HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week the following building permits were awarded in the office of the City Commissioner, Toronto :

P. Clark, two-storey roughcast dwelling, 449 Front street east, for $500 ; M. R. Wynn, two-storey and attic detached dwelling, brick and stone, Delaware ave., for $4,000 ; M. A. Armstrong, two-storey and attic detached dwelling, brick and stone, Maynard ave., for $4,000 ; J. A. Harvey, two pairs semi-detached two-storey and attic, stone and brick dwellings, Bathurst street, for $9,000 ; H. German, two-storey and attic, brick and stone detached dwelling, Lansdowne ave., for $2,000 ; The Acme Loan and Savings Company, for a pair semi-detached 2½-storey brick dwellings, Albany ave., for $7,000 ; A. Rowe, brick foundation, 683 Brock ave., for $500 ; Alexander Curran, two-storey roughcast dwelling, 95 Defoe street, for $1,200 ; C. Mey, for a building, Chestnut street, for $700 ; A. Bryce, pair semi-detached two-storey, stone and brick dwellings, 18 and 20 Isabella street, for $5,000 ; W. H. Wills, two-storey front addition to dwelling, 47 Garnett ave., for $300 ; B. Pierce, two-storey and attic detached brick residence, Walmer Road, for $4,000 ; Taylor, Scott & Co., two-storey brick factory, Pearl street, for $4,000 ; John Lee, stone foundation, 94 O'Hara ave., for $175 ; Mrs. Fussell, 1½-storey brick detached dwelling, 184 Howland ave., for $1,200 ; the trustees King street east Methodist Church and Toronto Social Union, for 2½-storey brick and stone church, corner of King street east and Bright street, for $15,000 ; Chas. Mould, 1½-storey three detached brick dwellings, stone foundations, near Wallace ave. on Campbell ave., for $3,300 ; Jos. Price, two-storey frame dwelling on Lee ave., for $1,500 ; Frederick Elliott, two-storey and attic brick and roughcast dwelling, Pendrith ave., for $1,100 ; A. Britnell, new store front, 241 Yonge street, for $700.

BOOKLET ON HEATING.

We have received from The Herendeen Manufacturing Company, of Geneva, New York, an advance copy of a little booklet of 24 pages, entitled "Warmth—In Ways Diverse." This is a handsome publication, dealing with the various methods of warming houses, from the open fire and stove to the modern steam and hot-water systems, profusely illustrated, and giving a large amount of useful information. The cover is handsomely illustrated in colors representing the spirit of warmth.

It is mailed free on application by The Herendeen Manufacturing Company, Geneva, N.Y., who also manufacture the celebrated Furman steam and hot-water boilers.

SIXTY PLUMBERS ON STRIKE.

About 60 plumbers and steamfitters went on strike at Ottawa on Monday, August 25, owing to the refusal of the master plumbers to agree to their demand for the regulation of shops and for a minimum wage of 25½c. an hour. The men are at present receiving 22½c., and several are receiving as high as 27c., but have not yet the regulation of shops.

The plumbers have been considering the question of a strike for some time, and apparently delayed making the move until the present, when the busy season has just opened. The apprentice question is not an issue this time. All the leading plumbing establishments of Ottawa are affected by the strike, which, however, does not affect the gasfitters.

BUILDING NOTES.

The town of Glace Bay is about to proceed with the construction of a town hall. It will be a three-storey structure, including a basement. The most modern systems of ventilation and heating will be used.

At a largely attended meeting of the Grain Exchange of Winnipeg, on August 20, the interesting question of erecting an exchange building was discussed at considerable length and it was decided by a good majority vote to purchase a site as a first step towards the project.

The Wolferstan Thomas estate, through Messrs. John James Browne & Son, has sold the property at the southwest corner of St. Catherine and University streets, Montreal. The lot measures 26 feet on St. Catherine street and 90½ feet on University street. The purchase price was $29,147, or $12.50 per foot. A seven-storey building is to be erected on the site, the ground floor being used for stores and the upper floors being let as bachelors' quarters.

Dorset, in the Muskoka district, is to have a new summer hotel to cost anywhere from $30,000 to $35,000. The active spirit in the new enterprise is W. Secker, of the Fairview Hotel, situated at the same place. The new building will be situated on a good location, consisting of 86 acres of land near the village. The hotel when completed will accommodate 100 people, will be lighted with electricity furnished by an independent plant on the premises, will have a complete waterworks system, and will be heated during the cool season with hot water.

PLUMBING AND HEATING CONTRACTS.

JAMES HURST, plumber, gas and steamfitter, 259 King street east, Toronto, has secured the following contracts : For overhauling Peacock's ; for putting in gas for White & Co., Front street east ; fitting up house, 8 Eastern ave.; alterations to plumbing at 190 Queen street east ; alterations at Nasmith's houses, 190 Front street and 396-398 Wellesley street ; putting in gas at house, 58 Isabella street ; water pipes and sinks at G. White's silk works, Sherbourne street.

Guest & Co., 86 Church street, Toronto, have secured the contract for the gasfitting of factory of E. & A. Gunther, 10 Wellington street east, Toronto.

Wray & Morgan, Bloor street west, Toronto, have secured the contract for plumbing and lighting the branch of the Bank of Toronto at the corner of Queen and Spadina, Toronto.

Fiddes & Hogarth, 122 King street east, Toronto, have secured the contract for heating the resideoce of Mr. Lee, of Rice Lewis & Son, Limited, on Madison ave., Toronto. Bark and Horwood were the architects.

Bennet & Wright, Queen street east, Toronto, have secured the contract for the heating and plumbing of the additions to the Toronto General Hospital ; for heating and plumbing at the residence of Robert Watson, St. George street ; for the plumbing of six houses in Rosedale for the Macpherson estate ; for the heating and plumbing of a large residence in Belleville, for George Wallbridge; for heating and plumbing for residence of T. F. Matthews, Peterboro' ; and for the plumbing of four houses on King street for Mrs. White.

THE HALIFAX RESOLUTIONS

At a meeting of the Toronto Association of the Master Plumbers' Association on Monday evening, the Halifax resolutions were referred to the Ways and Means Committee, with full power to act. This committee met on Thursday, August 28, at the office of the chairman, J. J. McKittrick, 16 Queen street east, Toronto.

PLUMBING NOTES.

J. Priestly, of Toronto, was elected vice-president at the meeting of the United Association of Plumbers and Gasfitters in Omaha last week.

The master plumbers will play the supply men a game of ball at Long Branch on Saturday afternoon, August 30. At present the master plumbers claim the championship, having been victorious last year with a score of 35 to 5. There will be a good time, whichever wins.

A BARN PAINT

Every farmer has a barn as well as other outhouses, fences, etc. All should be painted. Give your farmer customers a chance this Fall to paint their Barns at a low price. The Fall is a good time for it. Sell them a paint for $1.00 per gal. and make a good profit for yourself.

BUILDING OPERATIONS IN THE WEST.

THE Manitoba Morning Free Press has collected some valuable information of considerable interest to the building trade. Through its correspondents it has supplied the public with a reliable and approximate idea of the extent of the new buildings projected or in course of erection through a large section of the West. It says, in part:

The "shack" and other forms of makeshift shelter inseparably connected with precarious pioneer life are rapidly being supplanted by modern barns and dwellings, commodious and comfortable, and almost invariably of a substantial nature.

The amount of building it has entailed is simply enormous. It is not confined to any section of the country or community; it is general; and the volume of construction is limited only by the supply of building material and builders. It is also a matter of satisfaction to note that these extensive operations are largely being conducted on a cash basis.

The remarkable growth of Winnipeg, showing over $1,700,000 worth of new buildings already this season, is but a criterion of the growth of the country and other centres of population like Brandon, Calgary, Regina and Edmonton.

At Morden a large number of farmers are building stone structures, and all the buildings have at least good stone foundations. The stone used is the local article, which is obtained in almost any of the western townships, and as it is in the shape of boulders, but little expense is entailed in securing this material. A better building stone it would be hard to find. It gives the appearance of very great solidity and when painted it makes a very handsome building. Among some of the buildings erected here are Mr. Heckle's new block; addition to hospital, $2,000; J. H. Black, solid stone house, $7,000; A. Patterson, of Clegg, stone stable, $2,000; P. Zenbrick, house, with stone foundation and hot-air furnace, for $3,000; D. Allison, of Stronac stock farm, stone stable, for $2,000.

Between Morden and Manitou many new buildings are being erected, and all of them have as many modern conveniences as possible. In Morden 50 of the houses are heated with hat air or hot water, and many property owners have had water tanks placed in the attic to serve in place of a general water system.

At Carberry and immediate vicinity building operations to the value of $50,000 are being carried on. This does not include the new Union Bank building, worth $25,000. The principal structures are St. Agnes Church and rectory, at a cost of $10,000. Among the others are the Carberry gas plant, $2,000; B. A. Huckle's residence, $2,000; C. J. McClocklin, store improvements, $1,500; Joseph Har, large stable, $1,700; Jos. Renwick, stable, $1,500; Harry Boles, stable, for $1,500; James Thompson, residence, for $1,000; John Davidson, residence, $1,000; Peter Robertson, residence, $1,200 and stable, $1,200; Alex. Thompson, stable, $1,200; Oliver Bredin, residence, $1,000; Davis White, brick residence, furnace, $3,000; Grus. Turner, $1,000; Irwin School, $1,000; John Mattice, house, $1,000; D. Renwick, residence, $1,000 and 33 other buildings ranging in value from $300 to $900. Morden and Carberry may be taken as representative of the general activity in building throughout the West.

At Hartney a large number of costly new buildings that are now in course of erection are overtaxing the resources of contractors, and, in consequence, some who had intended to build have been obliged to postpone their improvements. Among some of the best buildings are two brick stores, one printing office, one machine shop, one power house, one business office, one roller mill, five residences, one depot, and barns, etc., nearly all of which are brick. Within about ten miles of Hartney 16 new residences and 30 barns, etc., are in the course of erection.

At Killarney $70,000 worth of buildings are already under construction. All of the residences and business blocks will be heated with furnaces. Among some of the buildings are two stores, two business blocks, 12 dwellings, one warehouse, one blacksmith shop and two stables, worth $7,000.

The value of the farm structures in the immediate neighborhood may safely be put at $22,000, and smaller buildings, such as granaries, etc., will easily bring the total up to $30,000.

In Gladstone building operations will easily amount to $63,550, or before the year is out to $70,000. Two stores alone cost $31,000 and one hotel, $8,000. About 13 residences, four stores, one hotel and one telephone system are under construction.

At Manitou one business block, six houses and ten barns are being built. Contractors and builders are hard to get, though nearly all cash is being paid for building material and labor.

At Elkhorn four new dwellings and six barns are under construction.

At Belmont 15 new dwellings and seven other buildings are being erected.

At Express River one store, five houses and a number of barns and stables constitute the sum of building operations.

At Crystal City lumber merchants say that the output of building material this season is more than 100 per cent. greater than last year. The number of buildings erected is less than it otherwise would be, owing to an unsupplied demand for carpenters and masons. There are being built seven dwellings, one business block and one $7,000 Methodist church. In the immediate country seven houses, nearly all brick, one Presbyterian church and four barns are under construction.

At Holland 11 houses, one school house, four stone foundations and seven barns are being built.

At Boissevain building material is hard to obtain. Six houses are being built and nine are being enlarged. In the surrounding country 13 houses are being built; also 14 barns, stables or smaller additions to houses are under construction.

At Forrest Station building is booming this year. Notwithstanding that lumber and other materials for building are from $5 to $15 higher per 1,000 this year than for the past few years, more building has been done than in the past three or four years together. Buildings erected cost $8,700. Five houses and five barns are being erected.

At Rosenfeld the amount of building going on there and in the vicinity so far this year is not so large as in former years. Many of them projected in the early spring were stopped owing to the terrible flood. Six houses or schools and six granaries have been built.

At Foxwarren four houses were constructed and eight minor buildings.

Building operations in Treherne have not been as extensive this season as last, neither in the town or adjacent country. Eight dwellings have been erected and two barns and one stable.

Lumber merchants at Alexander find it very difficult to get supplies of lumber fast enough for the demand, and report an immense improvement on last year's business. Two dwellings, three barns and one stable have been built.

Five houses, three barns and one stable are the total of building operations at Pilot Mound.

At Austin one church, two dwellings, one furniture store, one air-tight lime-house; in the country, three brick and three frame houses and two frame stables have been erected.

Four dwellings, 17 barns and one granary have been built in Thornhill.

In Sydney three houses and two stables have been erected.

In Selkirk one manse.

In Pipestone one dwelling and one elevator.

In Minto one Methodist church.

In Basswood two houses have been erected.

Regina (in the vicinity), two churches, 33 houses, 11 barns, two stables, one granary, one mill and one store. In the town itself, 44 residences, one hotel, one

"Just as Good"

The hope of competition is to make paint just as good as Lucas Paint. Lucas standard is the highest.

Fast Vermilions

Lucas Fast Vermilions are unequalled for durability of color and gloss, richness of color and covering capacity; toning or enriching Iron Oxides, Venetian, Indian and Tuscan Reds. Making permanent pink and red tints—when mixed with Lucas French Zinc. For lightness of gravity; they do not "liver" in the can, nor settle hard when thinned. They are the best-selling Vermilions on the market.

conservatory, one hospital, eight stores, three factories and two offices.

In Edmonton four churches, two hotels, one electric light plant, one school, 32 dwellings, three stables, three stores, one fur warehouse and two mills.

At Strathcona two churches, one costing $50,000; also, the number of barns and outbuildings will far outnumber previous years.

At Calgary, P. Burns' business block, $50,000; Calgary Milling Co., $5,000; Parslow's warehouse, $5,000; Ward school, $12,800; Hull's business block, $20,000.

At High River, one business block, $10,000; one Methodist church.

At Olds, one school, $4,000.

At Red River, one bank, $6,000; addition to school, $4,000; town hall, $12,000; also, 120 residences of all descriptions have been erected.

At Indian Head, one block, one exhibition building, five dwellings, one office, two warehouses, one store, and two additions to stores.

At Cardston, one sugar factory, $500,000; mill and elevators, $50,000; 24 residences, one brick block, 10 barns, one granary, two sheds, two offices, and one addition to store.

At Carnduff, one court house, two churches, four warehouses, one elevator, one office, six houses, one store, two school houses, three barns, one granary.

At Qu'Appelle, four warehouses, six houses, four elevators, four stables and one hotel.

At Grenfell, eight houses, one elevator, two stables, four barns and two blacksmith shops.

At North Portal, seven houses, two school houses, one hotel, one photograph gallery and one stable.

At Rostein, four business blocks, one church and one residence.

At Moosomin, one block and one church.

At Fort William, the C.P.R. has the following operations: Coal docks, $350,000; freight sheds, $12,000; elevator, $450,000; another, $100,000, and another, $18,000; machine shops, $22,000; storehouse and office, $3,500; also, hotel, $12,000; another, $12,155; another, $9,987. Seventeen residences, one block, one town hall, aggregating over $1,350,000 for Fort William, exclusive of repairs to a number of residences and business places of a minor character.

At Portage la Prairie, $100,000 for business blocks and $500,000 for new buildings is being spent.

Building operations include seven business blocks, 12 residences, additions to houses, hospital and school house; also a number of barns. In the immediate vicinity a partial list gives 16 houses, five barns, one drive shed, nine stables, 11 granaries, two warehouses, two stables and one church.

At Selkirk, one large block, one large store, asylum extension, $30,000, etc., making in all about $50,000.

At Miniota, two churches, 21 dwellings, four stores, one warehouse, one elevator, three barns, two stables and one granary.

At Minnedosa and vicinity, three elevators, 12 residences, 11 barns and two granaries.

At Carman, school, $26,000; hotel, $20,000; also seven residences, two stores, one church and one bank and many small buildings, making a total of at least $100,000.

In the vicinity of Carman, three residences, one barn, one granary and eight stables.

At Lariviere, one factory, 11 houses, five stables and five barns.

At Carlyle, one hotel, $7,000; one elevator, three stares and one bank.

A NEW MOLDING PROCESS.

FREDERICK BALDT, SR., general manager of The Penn Steel Casting Works, Chester, Pa., has discovered, according to The Metal Worker, many new and important processes that have raised the standard of steel casting to a high point, but that he has not been content to rest upon these laurels won in the past is demonstrated by recent achievements. For months he has been engaged in developing ideas that have resulted in the introduction of a system of steel molding that promises to revolutionize the process.

Patents were recently issued to him that will materially simplify the molding of steel. The method consists in first making a master mold from any pattern and then casting from this as many fusible patterns as may be required. This fusible pattern is then put into an iron box of suitable size, after which, by means of compressed air, the box is then run into the drying oven, where the fusible pattern is melted out. The casting is then made from the dried mold.

An important feature of this process is that it does away with skilled labor, the sand being conducted and driven by compressed air into all parts of the box and fusible pattern by either boys or laboring men. Since the castings are absolutely seamless and without fins, no chipping is required afterwards. The process is also particularly applicable to the casting of chains and similar interlocked articles. By this process it is also practicable to produce articles in exact duplicate and in any number.

CORROSION IN STRUCTURAL STEEL.

AN article of considerable interest appears in The Iron Trade Review under the caption of "Corrosion of Steel in Tall Buildings." The following is an extract from it :

"A radical change in the design of steel skeleton buildings in the thickly populated centres of the country is anticipated in the near future by architects and engineers who design and erect such structures. While tall buildings are a development of quite recent years some very grave defects have already been found in the steel work where columns and girders have been laid bare for inspection. Too little care has been taken to prevent oxidization and corrosion, and nearly all the steel work thus far examined has shown the action of destructive elements. Only recently an examination was made in an eastern city of the steel work of a large building erected about 10 years ago, and all the foundation columns were found to be in a dangerously bad state. One of the columns, more exposed to corroding influences than the rest, had to be replaced and the others were reinforced.

"Such revelations will certainly lead to new designs for such structures. The steel work will either have to be encased in cement to prevent the attack of destructive elements on the more exposed portions will have to be so built as to make frequent inspection easy, as well as the application of material to prevent corrosion. The system of plumbing will have to be changed so that none of the pipes carrying water or steam will come in contact with the steel work in any way, as leaks often greatly impair the steel work before being discovered.

"Many architects have been extremely careless in designing steel structures, and to-day the foundation columns of many large buildings are constantly exposed to the action of water and other corroding agents that will destroy the steel in a very short time."

NEW HARDWARE MANUFACTURING COMPANY.

In Stamford a company has been organized under the corporate name of The Mix & Riddell Hardware Manufacturing Co., with a capital stock of $500,000, for the manufacture of locks and hardware with the following men as directors : George H. Riddell, Frank W. Mix, Edward H. Mix, William F. Ellis, Kenneth K. McLaren, Walter U. Lawson and David F. Riddell.

At a meeting held August 14, the following officers were elected by the directors : Frank W. Mix, president ; Edward H. Mix, vice-president and general superintendent ; Geo. H. Riddell, secretary and treasurer.

A factory site has been purchased by the new company from the New York, New Haven and Hartford Railroad on the west side of South street, extending from South street to the river, bounded on the north by the N.Y.N.H. and H.R.R., and on the south by the Olmstead property. It is one of the finest sites for manufacturing on the line of the N.Y.N.H. and H.R.R. The main building will be 210 ft. long, 40 ft. wide and four storeys high with an additional building 40 x 70 ft. for power house and brass foundry. Provisions are being made for other buildings later on including an iron foundry. The originator of this company, Maj. F. W. Mix, is well known to the hardware trade in general.

NEW FOUNDRY PREMISES.

The Toronto Foundry Co., the well-known manufacturers of plumbing supplies, etc., Niagara street, Toronto, last week took possession of their new building at the corner of Jefferson ave. and Liberty street, which has been in course of construction for some time.

The new foundry and offices are commodious, well lighted and most modern in every particular. Besides the foundry proper, which is 180 x 70 ft., there is a cupola house, machine room, store rooms, fireproof pattern vault, and a handsome suite of offices. The comfort of the employes is also amply provided for, including a lunch room, bath room, with shower baths, lavatories etc., for their use. The buildings back on Pardee ave. and are connected with the G.T.R. and C.P.R. by a special siding.

UNITED STATES PIG IRON OUTPUT.

THE Iron Age in its current issue gives a summary of the capacity of pig iron furnaces in blast on August 1 in part as follows :

The blowing out of a limited number of large blast furnaces in the Central West during July has reduced the active capacity materially, so that August promises to become a rather slender month, comparatively speaking.

The weekly capacity of the furnaces in blast on August 1 compares as follows with that of the preceding periods :

	Total Capacity Per Week. Gross tons.	Coke Capacity Per Week.	Charcoal Capacity Per Week.
August 1, 1902.....	336,465	328,745	7,720
July 1.....	350,890	343,250	7,640
June 1.....	344,748	537,492	7,256
May 1.....	352,c64	345,627	6,437
April 1.....	337,424	331,.50	6,284
March 1.....	323 028	316,039	6,989
February 1.....	331,045	325,440	6,6,5
January 1.....	298,479	291,992	6,468
December 1, 1901	324,761	317,358	7,403

FURNACE STOCKS.

The position of furnace stocks, sold and unsold, as reported to us, was as below on August 1, as compared with three preceding months, the same furnaces being represented as in former months. This does not include the holdings of the steel works producing their own iron :

Stocks—	March 1.	June 1.	July 1.	Aug. 1.

APOLLO BEST BLOOM
GALVANIZED IRON

The metal-worker who uses common galvanized iron makes his business harder to do and harder to get ; and, of course, his profits less.

American Sheet Steel Company, New York

Representatives for Canada
B. & S. H. Thompson & Company
53 St. Sulpice Street
Montreal

YOU NATURALLY EXPECT THAT THE GOODS **YOU** BUY WILL GIVE ENTIRE SATISFACTION TO **THOSE** WHO BUY FROM YOU. WHEN YOU PURCHASE

2 AND 3 PLY READY ROOFING,
BUILDING PAPERS,
SHEATHING AND CARPET FELT,
COAL TAR PRODUCTS,
HANGING AND PRINT PAPER,
BROWN AND MANILLA WRAPPING

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS.

Aug. 29, 1902.

Thes prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Quality First Our Motto

Years ago, when Times were hard and Competition harder, we tried to meet the situation by reducing the quality of some of the goods we manufacture. Needless to say the experiment proved unsatisfactory, and we have since followed the policy of steadily improving the quality of our Building Papers and Roofing Felts. The increase in our business indicates that our customers are willing to pay reasonable prices for **FIRST-CLASS MATERIAL.**

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

No Bolts—— No Packing.

Our Hot Water Boiler has a heap of good points about it. No bolts or packing are used in its construction—just a simple screwed nipple connection. Then a very deep fire pot insuring a slow burning, steady fire.

It's easy to erect, and it means satisfaction every time as far as the householder is concerned.

We claim it's the best Boiler in the world, and every happy possessor of the

"ECONOMY"

Boiler claims the same thing—it's no experiment. **Write for booklet and information on water heating.**

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

CANADA AND SOUTH-AFRICAN TRADE.

THE conclusion of the South-African War has already been productive of great results. Greater still are the results that are bound to follow. The day has passed when nations beat their swords into ploughshares. Primitive implements could satisfy the demands of a primitive people. Up-to-date machinery now is essential.

The greatness of much of South Africa is not so much real as potential. Its possibilities are enormous. With the return of the Boers to their farms, the refugees to their business and the new farming population that is expected to pour in, vast tracts of fertile land will blossom with a wealth of crops. These must be harvested, and for Canadian producers now is the time to begin to build up a trade. A Canadian-South-African steamship service has now become a reality. The first ship that sails to that place with Canadian goods should not fail to carry a good supply of farm implements.

Canada assisted nobly in the war. It behooves her manufacturers to reap the rich harvest of peace by inaugurating a business with the agricultural element of South Africa. Prompt action in this matter will prove a valuable service to South Africa and quicken the pulses of Canadian industry.

UNITED STATES RAILWAY STATISTICS.

EXTRACTS from the Fourteenth Statistical Report of the Interstate Commerce Commission of the United States, covering the year 1901, have been made, which show beforehand some of the more important features that that report will disclose.

On the financial side of the question a great mass of figures are presented that reflect on the general financial condition of the country. First of all, it is a matter of general approval that the number of railways in the hands of receivers shows a decrease. Of the 45 railways in this condition on June 30, 1901, 33 were lines operating less than 100 miles, and consequently bearing no great influence on the money market. In the matter of capital stock concerned and funded debt a considerable decrease over 1900 is reported.

Mileage and equipment show decided increases. On June 30, 1901, the single-track mileage in the United States stood at 197,237.44 miles, an increase during the year of 3,891.66 miles. Locomotives numbered 39,584, an increase of nearly 2,000, and cars of all classes were 1,550,-833 in number, there having been an inerease of 99,995 in rolling stock.

The number of persons in the employ of the railways was 1,071,169. This is an increase of 53,516 or 19 men per 100 miles of track. The amount paid in salaries and wages was $610,713,701, which was $33,-448,860 in excess of what was paid in 1900. The compensation of the railway employes for 1901 is equivalent to 59.27 per cent. of the operating expenses and 38.44 per cent. of the gross earnings.

The gross earnings themselves stand at about $1,500,000,000 and the operating expenses at slightly over $1,000,000,000, giving $558,000,000 income. Dividends to the amount of $156,746,536 were declared, leaving a surplus on June 30, 1901, of $84 764,781, an amount slightly behind the surplus of the preceding year.

The rest of the report is taken up with statistics of accidents, the capitalization, valuation and taxation of railway property and figures dealing with the public service rendered by the roads.

OLD RAILS HIGHER THAN NEW.

A rather interesting and unique state of affairs exists in the United States in regard to steel rails ; and that is that many of the railroads are getting $3 a ton more for their old rails than they are paying for new rails. The explanation of this is the high price of steel billets, which are selling at $31 to $32 per ton.

Old rails are being used exclusively by a large Western agricultural implement manufacturer for making steel bars and other shapes employed in making machinery. The nailmakers are also using many thousand tons of the old rails.

A BUSINESS PROPOSITION.

NO public question in Canada to-day is receiving as much attention as that of the fast Atlantic service. It is not that it transcends all other questions. The fast Atlantic service is only a link in the chain of the transportation problem. And the part cannot, of course, be greater than its whole. But even as a part of the whole it is a question of great importance.

The idea of a fast Atlantic passenger service is born of the ambitious desire to possess a service at least equal in speed with that of the United States. It is, therefore, to no small extent influenced by sentiment.

But, while sentiment is all right in its place, there is a still more important point of view from which the question should be considered, and that is the business point of view. The fact that an annual expenditure of $1,500,000 will probably be entailed demands that, being a business question, it should be settled in a businesslike way.

While it would be neither wise nor proper to eliminate sentiment altogether as a factor in discussing the question, it would be neither wise nor proper to allow it to take precedence over practical business logic.

It must not be forgotten that an Atlantic freight service that would enable us to get our products to the British and European continental markets in as good condition and as cheaply and as rapidly as the United States can their products is the great desideratum. This we are not doing at present. In the matter of cold storage there has certainly been a great improvement in the Canadian service of late years, but in the matter of freight rates and insurance rates we are still seriously handicapped. The figures which have been from time to time published prove this beyond all peradventure. The questions of freight and insurance rates are to some extent wrapped up in each other. As the gateways to our ports, and particularly those on the St. Lawrence route, are placed in a more efficient condition the marine insurance rates must eventually become less excessive than they are at present. This will in turn tend to produce a proportionate reduction in rates.

It must not, however, be forgotten that there is another and still more potent factor in determining the rates of freight, and that is the quantity of freight which the Dominion can offer as an attraction to competing steamship lines.

The greater the quantity the smaller will be the carrying charges. Mergers and combinations may for a time prevent this desired consummation, but they cannot do so all the time. It is, therefore, obvious that as the country develops the transportation question will gradually, to some extent, solve itself.

Fortunately, the country is at present being developed at a rate which has hitherto been foreign to our experience. Our foreign trade is 44 per cent. greater that it was five years ago, and 72 per cent. greater than it was ten years ago. The bank clearing returns and the railway earnings, which reflect the internal trade of the country, also show a most gratifying increase. The same, in fact, may be said of every branch of our industrial activity ; but in no respect is it more clearly exhibited than in agriculture. The 80,000,000 or more bushels of wheat which Manitoba and the Territories have produced this year is the most striking example of this.

Would a fast passenger service, modern and equal to anything crossing the Atlantic, tend to aid in the development of the country ? And would it be a sufficiently strong factor to warrant the annual expenditure for a certain number of years of so large a sum of money as that proposed ? It certainly cannot obtain to the welfare of the country when the line of travel to Europe taken by Canadians themselves is chiefly by United States ports. Others will scarcely travel in our pathways if we ignore them ourselves.

But it is not only in the matter of passengers ; but our letters follow the same routes as the men and women take in crossing the Atlantic. And every envelope that bears across its face the words "via New York," as most of them do, is not only an advertisement in favor of a foreign port, but a reflection on our own ports.

When our routes are given the preference for passengers and mail matter they will ultimately be given the preference for merchandise. And in order to secure this, a bonus for a stated number of years would appear to be not unwise. The merchant invests his capital in order to develop his business. In investing some of the capital of the country in developing a fast steamship passenger service, we are therefore following a business-like course.

He who works against the grain gathers splinters of discontent.

SIR EDMUND BARTON.

NO popular demonstrations have greeted the visit to Canada of Australia's leading statesman, the Right Hon. Sir Edmund Barton, and yet his journey through the country possesses almost as deep a significance as that of the Duke and Duchess of York last fall. It is in reality but another manifestation of the growing unity of the Empire, when we find Australia's representative received as a brother and his plans for the advancement of the mercantile relations of the colonies applauded vigorously by the business men of the leading Canadian cities.

At the Board of Trade banquet in Toronto this week, Sir Edmund was not only an honored guest, who was being entertained because he held the dignified position of Premier of Australia, but he was a fellow-workman with the members of the Board of Trade in advancing the Empire's interest. This note of brotherhood and common interest could not have escaped the observation of any gentleman present at the gathering.

What visionary person could have dreamed even 50 years ago that the interests of a far-away island in the Pacific Ocean could have become so related to the interests of our own Dominion as to make every loyal Canadian feel a disinterested and brotherly interest in the welfare of that distant island ? And yet such is to-day the case, and in receiving Sir Edmund Barton the ties that bind Canada to Australia and the Empire are drawn a little tighter. By the time the Pacific cable is completed the union will be cemented together still more strongly.

HARDWARE WINDOW DISPLAYS.

Illustrations and descriptions of window displays will be at all times acceptable for this department.

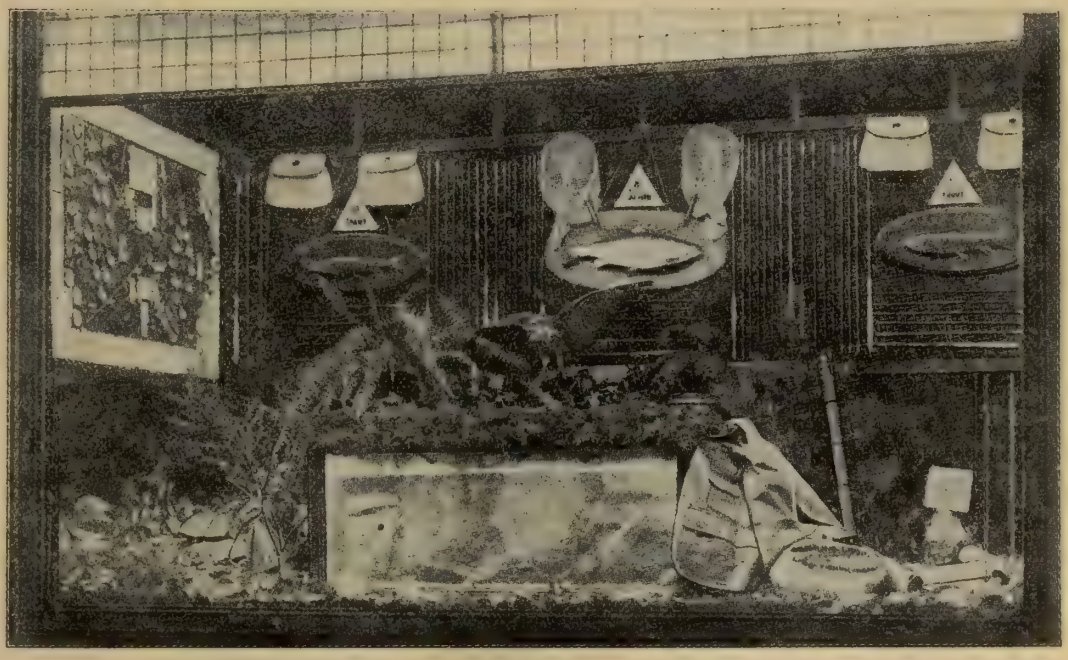
IN the hardware business, as in every other business, the most successful man is the man who advertises most extensively. An observer readily will note how attractive a successful hardware merchant, in common with those engaged in other lines of trade, endeavors to make his window displays. He recognizes this form of advertising as the handiest as well as the most effective way of reaching the general public and acts accordingly. He perceives that people who do not read the newspapers to any extent have to be got at by a different method than by advertisements in the local periodicals, and utilizes his windows as his right-hand advertising medium. He changes his windows often, for he knows people like to look at something new, and the oftener the window is dressed the more attractive it should be to the passers-by. He studies the wants of his customers, and is ready to present to their view the things they are most likely to require at the time the display is made.

At this time of the year a good hardware display is made by putting in a window of small articles, such as braces and bits, chisels, planes, knives, handsaws, etc. Arrange shelving neatly and cover it with dark cloth for a background. Dark green cloth is about as good as any. Then in the front row place in a neat manner knives, chisels, awls, covering up the steps well. In the second row display a number of whetstones of different sizes, rules, small planes, braces and bits, etc. A good many other smaller articles may be displayed with advantage, but it is wise not to put too great a variety of articles on the same shelf. The third shelf may hold similar small articles, and on the top shelf handsaws, etc., may be arranged. Glass-cutters and putty knives will now be in season for the fall trade, and form suitable objects for display.

A good display of pocketknives may be made by standing them on corks. Take four knives and so open their blades that they will stand at right angles to the handles. Stick these open blades in a large cork so that their handles rest on the floor of the window. The blade of a fifth knife, opened wide, may be stuck in the centre of the cork, so that it holds up the knife in the air.

For the fall trade stoves form the material for a window display. By reason of the adoption of modern and cheaper methods in its manufacture, the steel range will be coming much into use from now out, and one of these might be made the central figure in dressing the window. Place the range in the centre of the window some distance back from the glass. On either side, if there be sufficient room, place a small heater, one with a large amount of nickel work about it preferred, a little in front of the central stove. From the front of these heaters, place graniteware, pans and similar stove furniture in the form of a crescent reaching out as far as the glass in front of the central range. Inside the semi-circle may be placed some of the most modern oil heaters, gas stoves and such like articles which, as they are now made, are most attractive when shown in a window.

Sporting goods make an appropriate display in a window for the fall. Such articles as revolvers, loaded shells, powder flasks, shot pouches, hunting knives, guns and rifles are in general demand at that time of the year, and a window dressed nicely with them ought to be effective in increasing their sales. For this class of goods shelving should be put in the window, and the cartridges of different styles and calibres, knives, revolvers, etc., piled on them in an artistic way. Guns and rifles may be piled on the top shelf, and tickets bearing mottoes, such as, "Headquarters or Sporting Goods," "Call and Inspect Our Stock," may be hung up in the window with advantage.



An Attractive Fishing Tackle Display.

A FISHING TACKLE WINDOW.

The accompanying illustration shows a fishing tackle window display made by a Massachusets hardware firm. In the centre of the window, which is about 15 feet long and about 5 feet deep, with mirror back and

ends, is a tank 5 feet long, 2 feet high and 2 feet deep, with a glass front. The back of the tank is filled with granite, which makes a good background for the two dozen live trout in it, which weigh from ½ to ¾ lb each. The tank, of course, is provided with running water. On and around the tank are placed moss, ferns, etc., and the floor of the window is covered with pine needles and leaves from the woods. At the back of the window, above the mirrors, a mounted 8-lb. land-locked salmon was placed in the centre, with mounted square tailed trout on each side, around which rods and fish baskets were arranged in quite an effective way. On the wall at the end of the window is a display of fish lines, reels, flies, spoon hooks, Ingersoll watches, etc.

The aquarium is so placed that it is about even with the range of vision from the street. One can thus get a side view of the fish as they swim about in the tank. A fisherman, of course, would be attracted, and could not see such a display without feeling the longing to go fishing.

INTERESTING SUIT OVER NEEDLES.

An interesting case has recently been decided in the Chancery Division of the High Court at Redditch, England, which is of particular interest to merchants who handle needles. It appears, according to the evidence, that a man named J. Y. Morrall had sold a certain firm the right to manufacture needles under his name. It was claimed by Abel Morrall, Limited, Redditch, who is represented in Canada by C. H. Westwood & Co., Limited, Toronto, that the needles made by the defendant firm were an infringement of the needles they manufactured, and they applied for an injunction to prevent the continuance of this practice. The judgment, which has just been given, was in their favor, and the firm which was alleged to be infringing on the right of Abel Morrall, Limited, is therefore restrained from continuing the practice. The judges held that the defendants were simply trying to deceive the public by putting a cheaper and inferior needle on the market than that made by Abel Morrall, Limited, a firm which has been in business for nearly 100 years. The litigation has been pending for some time, and it is alleged that the costs are something in the neighborhood of $10,000.

A BAND OF THEIR OWN.

The Sylvester Manufacturing Co., of Lindsay, Ont., have assumed the management of the Lindsay Citizens' Band, and will make it one of the best musical organizations of the country. It will be called The Sylvester Company Band.

CATALOGUES, BOOKLETS, ETC.

A USEFUL BINDER.

THE Canadian General Electric Co., Limited, has just sent to its customers a binder as a handy means of keeping in easy reach the descriptive literature which they periodically issue. Pamphlets will be sent out at different times, referring to new devices and materials as well as improved and modified forms of standard devices manufactured and for sale by them. No. 314 is their catalogue and price list of sockets and receptacles.

THE MAKING OF A STOVE.

"The Making of a Stove," is a handsome and exceedingly interesting booklet issued by The Enterprise Foundry Co., of Sackville, N.B. The whole process of making a stove is carefully described and illustrated. The booklet will do much to interest the trade in the stoves, ranges and furnaces produced by The Enterprise Foundry Co.

JEWEL STOVES AND RANGES

"No. 58," the 1902 catalogue of "Jewel" stoves and ranges, made by The Burrow, Stewart & Milne Co., Limited, Hamilton, contains a full list of the many lines carried by this firm. In this catalogue the perfect working, the beauty of design and the durability of their well-known stoves and ranges are all duly emphasized.

BRASS AND COPPER GOODS.

Buyers of brass and copper goods will find the catalogue just issued by The Waterbury Brass Co., New York, a handy and valuable book. The company has spared no expense in making this catalogue as complete as possible in every particular, and in it is incorporated a full list of brass, bronze and copper in sheets, tubes, rods and wire, showing what they are carrying in stock in the New York warehouse. It also illustrates their treads, mouldings and ferrules. A large section of the booklet is devoted to weights and measures, which buyers will find of great service when ordering goods; and when used in connection with the complete stock list these tables will be found valuable aids in estimating on new work. The catalogue is clearly printed and nicely gotten up. Readers of HARDWARE AND METAL can obtain a copy for the asking.

GRAIN BY CANADIAN ROUTES.

The continued increase in the exports of grain via Canadian routes, as compared with New York, is the subject of a statement issued by the Canal Association of Greater New York. The statement is entitled, "Object Lesson No. 8," and shows that since the opening of navigation to August 1, over 6,000,000 bushels more wheat were shipped via the Canadian routes. The following figures give the total amount of wheat exported during May, June and July, this year, by the two routes :

	Bushels.
Via Canadian routes	11,613,896
Via New York	4,899,371
Canadian excess	6,714,525
Canadian inc. over 1901	3,034,289
New York dec. from 1901	4,394,187

The growth of the Canadian shipments is attributed to the Dominion's activity in increasing and developing water transportation facilites. Attention is also called in the statement to the fact that the movement of grain through the port of Buffalo for July showed a decrease of nearly 200,000 barrels of flour and over 6,000,000 bushels in wheat, as compared with the same month last year, showing that the lake grain traffic is being diverted from Buffalo.

AUSTRALIAN TRADE.

In a report to the Canadian Department of Trade and Commerce, dated July 15, J. S. Larke, commercial agent for Canada in Australia, gives the ststistics of Australian trade for the year 1901, the figures being as follows :

	Imports.	Exports.
New South Wales	$26,928,218	$27,351,124
Victoria	18,927,340	18,646,097
Queensland	6,386,208	9,249,366
South Australia	7,371,588	8,010,934
West Australia	6,454,171	8,515,623
Tasmania	1,969,577	2,916,656
Total Commonwealth	$63,438,520	$74,689,600
" New Zealand	8,739,633	12,881,424
Total Australia	$72,178,153	$87,571,224

Last Year Australia's crop was less than the previous year by 12,300,000 bushels, or 22.4 per cent.

Mr. Larke says : "The sale of Canadian hard wheat flours is making progress in New South Wales and Queensland, but there is a considerable trade in inferior grades in the South Sea Islands, which as yet Canada has not touched. The trade is unaffected by duties."

A STUDY OF BRITISH V. UNITED STATES METHODS.

INTERESTING conclusions reached by the commission appointed by the British Iron Trade Association to visit the United States and study industrial conditions there have been made public by the Treasury Bureau of Statistics at Washington. This commission consisted of J. S. Jeans, who is well known as an authority upon these subjects ; Axel Sahlin, an expert in blast furnace work ; Ebenezer Parkes, whose special duty was sheet and bar mill practice, and Enoch James, who gave special attention to the steel industry. Mr. Jeans' special work was to report upon the general economic and industrial conditions.

The report of the commission points out that in the United States the iron and steel industries are face to face with conditions that make both the dearest and cheapest labor at present found in the world—the dearest in point of nominal remuneration and the cheapest in industrial and economic results.

"Workmen at American mills," said Mr. James, in his share of the report, "are generally supposed to be working much harder than they do in this country (England), but this is not my own view. After much conversation with many men in various branches, who had been employed in similar works in England, and some of them subject to my own control, the conclusion I have arrived at is that the American workmen don't work so hard as the men in England. They have to be attentive in guiding operations and quick in manipulating levers and similarly easy work. They are also much more desirous of getting out large quantities than in England. They are better paid and more regular in their attendance at the works, loss of time through drinking habits or otherwise not being tolerated."

HIGHER GRADES FOR AMERICANS.

Mr. Sahlin says the American workman generally aspires to the higher grades of labor, leaving the purely manual labor to workmen from other countries. "Thus it is," he says, "that around American blast furnaces the American is found in a very decided minority. He may be a foreman, master mechanic, blast engineer, locomotive driver or stove tender, but he will not work 84 hours per week shovelling ore or wheeling scrap. For these duties are employed in the South the negroes, and at the northern furnaces immigrants, mostly Irish, Slavs or Italians."

On this question of higher-grade work and higher-grade wages of American workmen attention is called to the fact that in certain works Polish and Hungarian laborers were receiving $1 to $1.50 a day, while American rollers working alongside of them were receiving, on the average, $2 a day of 8 hours. The report quotes Mr. Carnegie as stating recently that the average wage of men in his employment at Homestead was $3 a day, or an average of £187 per annum against an average of £68 per annum as the earnings of iron and steel workers in Lacanshire and £79 received by the steel rollers in South Wales.

On the question of cost of living, Mr. Jeans declares that "the average American workman, in most of the essentials of life, can live, mutatis mutandis, as cheaply as he can in the Old Country."

"The importance of the human factor," says The London Statist in summarizing this report, "is fully realized by all the members of the commission. It is all very well to admire American plants, the ingenuity of machine tools, the devices for saving labor and so forth. But, as Mr. Sahlin remarks, 'it is not the guns which win the battles, but the men who stand behind them.'

SECRET OF AMERICAN SUPERIORITY.

"What the American admires and honors is the ability to do—that capacity in a man, through his own sagacity, nerve, enterprise and skill, to create and employ a fortune. Nobody is above his work. Everybody works, and for the sake of work, and thus has been produced in America within a generation an industrial potentiality more wonderful and more to be feared than all the factories and machinery and 'plants' that these workers have created.

"It comes to this, then, that American labor is not more efficient, though it is better paid than ours ; and that American manufacturing development is due to the persitent, unresting industry which once characterized the Briton, but for which trade unionism and athletics have given an apparently growing distaste.

"All the reporters, however, seem struck with the strenousness of American life. The comparative absence of a leisured class is noted as one of the prominent characteristics of the principal cities and industrial centres of the United States. In the avenues of industry a man without a regular business, or who is not concerned in the development of some industry, is as a fish out of water. Nowhere, we are assured, is the struggling youth more kindly encouraged, more generously aided and more readily trusted than in America; and it is pleasant to read of an esprit de corps among workers and managers which one would hardly expect to find in a land of such feverish competition."

"SUCCESS

don't konsist in never makin' blunders, but in never makin' the same one twict."

If you have blundered by putting "cheap" low-quality paint on your shelves, it's not too late to correct the error. Write to-day for our "B-13" booklet, which describes our goods and our methods, and you will have taken the first step toward success in the paint business.

THE SHERWIN-WILLIAMS PAINT

is a high quality article that gives satisfaction to dealer and consumer alike. It never fails to do what it's expected to do. It's a paint that makes money for the dealer.

RETAIL MERCHANTS' CONVENTION.

SECRETARY TROWERN, of the Retail Merchants' Association of Canada, is busy preparing for the convention of the Association to be held next week in the Temple Building, Toronto, on September 9 and 10. Arrangements have been made for the reception of a large number of delegates and a number of able speakers and business men will deliver addresses on the following subjects :

1. The best plan of organization as laid out by the Association so that direct communication can be obtained between all sections of the hardware trade throughout the Province.

2. The best plan to adopt to bring about better conditions for the retailing of hardware.

3. What proportion of expense should be added to hardware merchandise so as to ascertain the actual cost ?

4. What should the general profit be on goods sold in everyday business, such as nails and heavy hardware, granite and tin ware, paints, oils and glass, poultry netting, stoves, spades and shovels, harvest tools, etc.

5. The injurious effect department store methods have on the retail hardware trade, and the best way to remedy it.

6. The effect on the retail trade caused by wholesalers and manufacturers selling direct to consumers.

7. The advisability of holding joint conferences with wholesalers and manufacturers, so as to exchange suggestions for trade improvement.

8. The advisability of having a mark placed upon first and second quality granite ware, so that the public will be able to discriminate between them.

9. What steps should we take toward advocating the sale of Canadian-made goods ?

PROPOSED NEW NAIL FACTORY.

Geo. W. Angell, representing the Angell Wire Nail Machine Co., Cleveland, Ohio, was in Toronto for a few days this week. He is interested in a proposal to start a factory in Canada for the manufacture of wire and wire nails, and his visit was largely for the purpose of looking up a site for the same.

PERSONAL MENTION.

Mr. W. A. Burke, representing the American Metal Polish Co., Boston, is spending a few days in Toronto this week.

Mr. Charles Tucker, travelling representative of The Sherwin-Williams Paint Co., left Peterboro', August 26 for New York, from which place he will go to South America on a business tour in the interests of the company. Mr. Tucker's itinerary will include Brazil and the Argentine Republic.

Cyrille Wilbrod Parent has registered for A. D. M. Bertrand & Cie, St. Raymond, Que., traders and match makers.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

COMMERCIAL POSSIBILITIES OF THE ELECTRIC AUTOMOBILE.

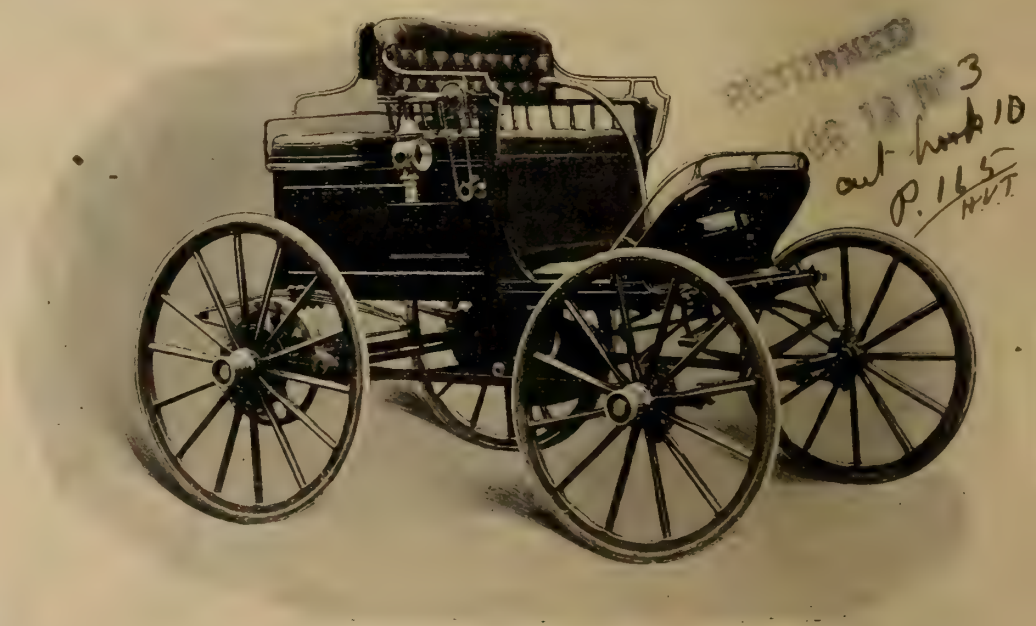
IF anyone should ask the layman wherein the great future for the automobiles lies he would undoubtedly receive the answer, in the majority of cases, in the line of industrial wagons, meaning trucks, delivery wagons, busses, cabs, and, in fact, all cases where motor vehicles are used for purposes other than pleasure. It would be well before entering into details in regard to apparatus to answer this question: Has the horse suddenly become objectionable? ceased to serve its usefulness, or have we progressed so far that as humanitariams we pity our old friend?

The fundamental value of any proposition is its commercial aspect, and in connection with the automobile it is the condition which the present state of the market presents for its manufacture. The passing of the horse has not been brought about suddenly with the introduction of the automobile; it began when mechanics were first introduced into commercial and industrial life. The steam locomotive serves its purpose, and the horse has passed for this sphere of service. The electric trolley serves its purpose, and the horse has been abandoned. Both of these have brought about such an immense improvement in their respective fields over former modes of transportation that we are looking for the automobile to bring about the same improvement in industrial vehicles during our lifetime. I say "industrial" because there are too many lovers of the horse to bring about a complete change in pleasure vehicles in this generation; and I say this in spite of the fact that most of my friends and myself find more pleasure in driving a motor than a horse.

With this in view and to no small extent as an advertisement, business houses have been induced to purchase delivery wagons, which, although in many cases they have been a failure, have amply demonstrated to automobile engineers that there is enough good in them to warrant a greater expenditure of time and money to bring about their perfection. In the majority of cases the vehicles first used for delivery, bus and cab service in America were electrics. The electric vehicle appeared ideal. The motors and transmission were efficient and flexible, the combination simple, and the vehicles easily controlled. There is less danger, no heat, odor nor vibration, and with all these possibilities and the apparent advantages over steam and gasoline, it is no wonder that we find that the majority of pioneers in this line were electrics.

In regard to their general equipment, they were modelled after street railway practice; the motors were hung on the axles and reaches with some springs suspended on one end, other rigid. The control was also modelled after this precedent, comprising series parallel connection of batteries of motors, or both. Storage batteries were heavy, and as soon as there was a large demand for a lighter battery, manufacturers began to make thinner electrodes in order to get more surface, and in that way more capacity for a given weight.

The problem to solve in regard to service conditions in an automobile, while similar to those of railway engineering, present traction in its worst phase. For railway cars have trucks to run on, thus reducing shocks and the consequent wear and tear to a minimum, while with motor vehicles, our best asphalt pavements brought about an enormous depreciation of the apparatus. Many have learned, as has the writer, by having experience bumped into them, that to hang motors on the axles, or any place below the vehicle springs, was a fatal mistake. Motors had a very large rate of depreciation, gears were thrown out of mesh very easily, and necessitated the introduction of a more expensive element—rubber tires—to absorb shocks. Of course, traction and slippage enter here, many will say, but this part of the problem could have been solved in a cheaper manner if motors were either hung on the body or mounted on springs supported by the frames, and if chain transmission had been used in place of gear, the wear and tear of motors could be reduced to a great extent. The arrangement of the controller is, in most cases, a matter of individual choice. Many vehicles are built which vary their speed by means of grouping of the batteries only, but where they must be occasionally and quickly handled, it seems best to group all the batteries in series and depend upon series-parellel connection.



In regard to batteries, much can be said. The battery, in spite of all its faults, has been the subject of much more abuse than it deserves, especially among those using them, and they help materially to injure the rapid introduction of the electric vehicle. When batteries were first used for traction purposes they

With a firm and ample base."
—Longfellow.

DO YOU?

WISH THUS TO BUILD an advertisement in the CONTRACT-RECORD, TORONTO will bring you tenders from the best contractors

weighed two or three times what they do to-day, for the same capacity and life.

The accompanying cut represents a carriage built by The Kay Electric Dynamo and Motor Co., of Toronto, and with the exception of a few trifling details, has proven very satisfactory. The batteries, in particular, have been put to the most severe tests and have proven beyond a doubt to be strictly first class in every respect. The above firm intend to manufacture automobiles extensively for all purposes.

I might say that the real mission of the motor vehicle is to lighten human labor by facilitating transportation in the field now occupied by the horse. Expensive, high-speed showy vehicles, which it has become the fashion to patronize, are of little aid towards the development of the industry along the lines that are to prove enduring and of benefit to the general public.

NIAGARA POWER FOR BERLIN.

The committee of Galt and Berlin men who have been handling the matter of the Niagara electric power project are now securing the names of manufacturers and other users of mechanical power who consider that it would be to their interest to instal electrical power provided it can be obtained for a cost of not more than $15 per horse power per annum. Nearly every manufacturer in Berlin has signed, and papers are now being circulated in Galt and Preston.

TENDERS FOR ELECTRIC LIGHTING.

At a committee meeting of the Newcastle town council the tenders for the installation of a complete electric lighting system and also for engine, were awarded as follows: Canadian General Electric Co., for electric light plant complete, $8,750; E. Leonard & Son, 125 H.-P. automatic cut-off engine and fixtures, $1,730.

ELECTRICAL NOTES.

The Gee Electrical Company, of Colborne street, Toronto, has sold a 50 light dynamo, to H. W. Petrie, of Toronto.

Parke, Davis & Co., Detroit, Mich., the well-known manufacturers of drugs and chemicals, are making extensive improvements and additions to their electrical, steam and power plant, the work being done under the direction of George W. Scott, consulting engineer, The Rookery, Chicago.

A. McKillop & Sons, lumber merchants, and The West Lorne Electric Light Co., Limited, West Lorne, Ont., have sustained loss by fire; both were partially insured.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

WILLIAM TAYLOR, cutler, etc., Brantford, Ont., has assigned to W. Watt, jr.

The estate of W. J. Bailey, builder, Toronto, is to be wound up.

Henry Plante, painter, Kincardine, Ont., has assigned to James M. Stewart.

Salvas & Lambert, general merchants, St. Francois du Lac, are offering 40c. on the dollar.

D. McLeod, general merchant, Blind River, Ont., is offering to compromise at 40c. on the dollar.

A statement of the affairs of Adolphe Lafontaine, general merchant, Drummondville, Que., is being prepared.

A statement of the affairs of J. Pineau & Co., general merchants, Bic, Que., is being prepared by V. E. Paradis.

P. Gagnon, general merchant, St. Flavie Station, Que., is offering to compromise at 70c. on the dollar cash.

F. Lablond, general merchant, St. Cecile de Whitton, Que., is offering to compromise at 40c. on the dollar cash.

John Milne & Co., dealers in stoves, awnings, etc., Toronto, have assigned to George Clay, Toronto, and their creditors held a meeting on September 5.

PARTNERSHIPS FORMED AND DISSOLVED.

Campbell & Co., tanners, Port Hope, Ont., have dissolved.

Lovell & McIntosh, dealers in agricultural implements, Saskatoon, N.W.T., have dissolved.

G. W. White & Son, general merchants, Centreville, N.B., have advertised a dissolution of partnership. G. L. White continues.

SALES MADE AND PENDING.

W. McCausland, hardware merchant, Regina, N.W.T., has sold out.

The assets of D. Mignac, hardware merchant, Montreal, have been sold.

John Veitch, harnessmaker, Clarksburg, Ont., is advertising his business for sale.

William Brown, blacksmith, Arnaud, Man., is advertising his business for sale.

James Cornett, harnessmaker, Wapella, N.W.T., is advertising his business for sale.

The business of A. McBean & Co., hardware merchants, Galt, Ont., is advertised for sale by tender.

CHANGES.

Frigon & Lavoie, contractors, Montreal, have registered.

Jean Naud, Fils & Co., hydrant couplings, Montreal, have registered.

Richey, Brown & Donald, ironworkers, Montreal, have registered.

W. Johnston, blacksmith, Morden, Man., is succeeded by Johnston & Moore.

Robert Campbell, hardware merchant, Mitchell, Ont., has sold out to Field Bros.

James Shaw, dealer in agricultural implements, Morden, Man., is out of business.

Burkell & Co., carriagemakers, of Neepawa, Man., are succeeded by Burkell & Betts.

FIRES.

The Mackey Stained Glass Co., Toronto, has sustained damage by fire.

D. Turner, blacksmith, West Lorne, Ont., was burned out; partially insured.

William Fitzpatrick, dealer in agricultural implements, Alvinston, Ont., has sustained loss by fire.

H. H. Coleman & Co., importers of hardware, London, Ont., have suffered loss by fire; insured.

DEATHS.

Thomas Heffernan, contractor, Montreal, is dead.

PLEASE WOMEN BUYERS.

RETAILERS, of course, realize the fact that the majority of their customers are women, remarks Trade. It is likely that due pains is generally taken to please these buyers. With many and no doubt most of the dealers in the small towns the farmers' wives are an important factor. Their trade once secured means more to the merchant than that of her city sister.

The farmer's wife is, as a rule, the purchasing agent for the entire family. She selects the goods for the sons and daughters of the household and for the husband, too, as well as for her own personal necessities. She should be the subject of much thought and attention in any plans devised for securing trade. Her tastes should be consulted and gratified and great respect extended to her in all possible ways.

When the merchant prepares his advertising matter for the local paper he should be particular to make his proclamation attractive to his best customers. A good many merchants make use of typewriting machines in their offices. It would be a good idea to employ them extensively in giving information to the housekeepers in the immediate vicinity, making special mention of the newest goods and all the many utilities the merchant has for sale.

City merchants do this among their many lines and classes of customers, making the newspaper advertisements the medium of inviting buyers and also circular letters are extensively used. This policy is found successful in the larger places and it can be made so in the smaller ones.

Every merchant desires to sell all the goods he can, and if he will adopt this policy and industriously pursue it he will find his trade growing under its inspiration.

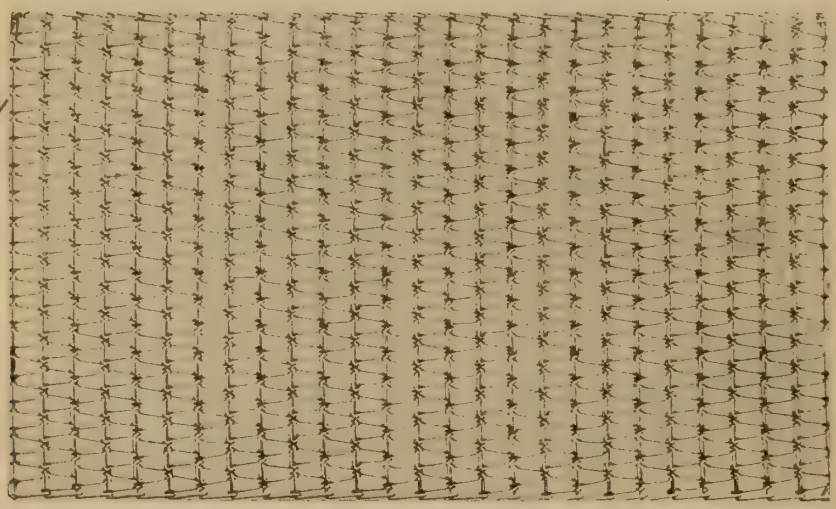
WIRE MATS.

THE United States Wire Mat Co., is situated at Decatur, Ill., U. S. A. The success attendant upon their efforts for the past 11 years, the constant and increasing demand for the U.S. wire mats and matting is evidence that quality counts and that the same is easily traced to the superiority of their product. Closest attention has been given to the requirements of the trade, and their line embodies a greater number of original ideas than heretofore have been incorporated in a product of a similar nature. They have gone into the hands of the dealers with most satisfactory results and unquestionably the most popular.



WIRE DOOR MAT.

There are three kinds of mats —fibre, rubber and wire.

The fibre mat makes, rather than does away with, dirt; it wears out quickly and becomes very dirty after short usage.

The rubber mat just half cleans the feet, continually fills up with dirt and you never get full value of one as it soon wears out and is very expensive. Large rubber mats are hard to handle and soon break when folded.

A wire mat—the right kind—does just what is desired. It cleans the feet as no other mat does, lasts longer than either fibre or rubber and feels better.

There are different kinds of wire mats. While all are better than either fibre or rubber, some wire mats are better than others.

With one exception, all wire mats are double sided. They are made so either side can be used, which seems a slight advantage, but it is not. The space between the two sides holds the dirt because the wires on the lower side prevent its falling through to the floor. The U.S. mat does not accumulate deposits, nor require to be shaken; every particle of dirt falls through to the floor and collects on the outside all dirt, snow, mud, etc., which would otherwise be carried in.

Some mats are constructed to roll either way; these kind are dangerous. A slight kick will cause them to curl up at the ends and not infrequently in the centre, inviting personal injury by tripping. The U. S. will roll but the one way, always lies flat and is as rigid as any flexible mat can be.

In presenting the U. S. mats and matting it is their sole aim to give the best value on the market. They are manufactured of the very best galvanized steel wire, especially tempered and galvanized for their use; are handsome, ornamental and neat in appearance, durable, weather proof, do not warp or curl at the sides or edges, adapts itself to uneven surfaces, convenient in handling (rolis up like carpet) and economical. The mats are made in any size and shape and the roll matting in any length and width, which is so woven that it can be cut any length desired, permitting of no waste. Every remnant is a ready-made mat. The meshes are small, permitting of the use of more springy wire, with much neater appearance, effective scraping qualities and greater elasticity, strength and durability. They remove all dirt from the shoes by scraping in any direction; the ridges run crosswise to the feet no matter which way you walk on it; it loosens the dirt as quickly as it gathers it, scrappings disappear and you have only to turn the mat over to cleanse it thoroughly.

CANADIAN CUTLERY.

An increased demand for good cutlery has been one of the direct results of the widespread prosperity of the country. The remarkable success of The Bailey Cutlery Co., of Brantford, well illustrates the fact that this Canadian-made article is gradually securing a larger share of the home market.

IS MOLTEN METAL PIG IRON?

THE suit of The Dominion Iron and Steel Co. vs. the Dominion Government, an action to recover the sum of $196,967, alleged to be due the company for bounties, was commenced in the Exchequer Court at Sydney on August 26 before Judge Burbidge. Mr. Chrysler, for the company, stated that the contention of the Government was that the material out of which the steel was manufactured consisted not of pig iron, but of hot metal in a liquid state, but he maintained that metal in a molten state is pig iron, and the product of blast furnaces is all known as pig iron, whether cast in pigs or not.

Mr. Aylesworth, who spoke for the Government, said that had there been a claim for bounty on steel ingots alone, the bounty might have been payable, even though the statute did not cover the case, but the suppliants were not content with a single bounty, but put in a double claim. By refraining from solidifying molten metal into pigs, the suppliants effected a considerable saving in the manufacture of steel, as compared with the manufacturer who bought pigs. The Government intended the applicants to receive the same bounty as manufacturers of pig iron or steel. The process of transforming the metal in a molten state was not in use or contemplated in Canada when the statute on the question passed. The whole question at issue was whether metal in a molten state was pig iron or not within the meaning of the statute. To prove this, the plaintiffs proposed to give expert testimony, and they called as their first witness Mr. Baker, general manager of the D. I. and S. Co.

Graham Fraser, of the N. S. S. and Coal Co., and C. A. Meissner, of the steel company, also gave evidence. The company will rest their case to-morrow with the evidence of Mr. Means, manager of the blast furnace, and the case will be continued at Ottawa.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, September 5, 1902.

HARDWARE.

ALTHOUGH the holiday on Monday seems to have disturbed business to some extent, yet the movement in hardware has been active, according to jobbers. Orders for fall goods have been arriving freely, and in shelf goods the demand has been very good. Quotable changes are few, indeed, this week. Among them are horseshoe nails, "M" brand, which have been advanced. Cutlery is reported as unusually active, and in guns and ammunition a good trade has been done.

BARB WIRE.—The demand for barb wire is very light at present, and no change in the price has been made, this article selling at $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—Only a small amount of business is reported in this wire. Quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Trade is fairly good this week. In hay-baling wire there is still a brisk movement. Prices have not been changed, and our quotations are as follows: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—This moves slowly and the market is without feature. The discount remains at 25 per cent. Net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c.; ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is no new feature to report. Trade is quiet and the discount is 62½ per cent. on both wires.

FENCE STAPLES.—There is but very little inquiry for staples at the present time, and the market is consequently dull. Galvanized staples are quoted at $3.25 per 100-lb. keg and bright at $2.90 per 100-lb. keg. For 25 and 50-lb. packages an extra of 25c. is charged.

WIRE NAILS.—The usual business in wire nails is doing, there being no feature worthy of special mention in the market. Prices are: In small lots, $2.55 and carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—A steady demand keeps up for cut nails. The price in carlots is $2.37½ and in small lots, $2.45 per keg.

HORSE NAILS.—"New Countersunk" nails have again been changed to 66 2-3 per cent. off. "New City" heads are now 57½ per cent. off. Trade is improving. Our quotations are now as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—As the fall season approaches the movement in horseshoes becomes more active. This week mills and jobbers report an improved demand and a good business at unchanged prices. We quote: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—A moderate inquiry is re-

ported for screws. Prices are steady, and we quote the discounts as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—The market for cordage is quiet and featureless. Our quotations are as follows: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—Some good lots are reported to have been sold this week at unchanged prices. The discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—There is still a brisk movement in bolts and nuts, but no new feature is reported. The discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3⅜c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is not much doing in this line. Prices are unchanged, and our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll

SCREEN WIRE CLOTH.—Trade continues quiet. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—This is moving slowly at present and there is nothing special to report. Discounts on Canadian or English netting are: 50 and 10 per cent off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used. For delivery in 1903 the discounts are 60 per cent. off for 19 wire and 55 per cent. off for heavier.

HARVEST TOOLS.—This market is dull and featureless. The discount is 60 per cent.

FIREBRICKS.—There is no change and trade is quiet. English firebricks are quoted at $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—The market is still quiet and no change in price is reported. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

"Ark Brand"

The experience of our customers is that "Ark Brand" is daily becoming more popu lar, and, consequently, more profitable.

If we are not represented in your town drop us a card and we will make arrangements with you. Don't delay. New agencies are being established everywhere, and your town may be the next.

THE FRANCIS-FROST Co. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

SPORTING GOODS.—The market is characterized by a brisk movement in all lines. There are no changes in the discounts, which are as follows: Empty, Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded, "Trap," 30 per cent.; American, 30 per cent. "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SNOW SHOVELS.—Jobbers report having received a good number of orders this week, and trade is improving. Quotations are as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—The demand for these is improving rapidly. The market was fairly active this week at steady prices. Our quotations are now as follows: No. 70, 38½ to 40c. per dozen; No. 55 55 to 60c.; No. 57, 82½ to 90c.; No. 60 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

METALS.

With the exception of one or two lines the metal market has been firm and steady during the week. One of the exceptions is tinplates, which have again weakened on the foreign market; and there is an easier feeling locally, though no reduction in price is reported. Sleighshoe steel has been reduced in price. No doubt there is still some shortage in one or two metals, but the situation is not such as to cause any uneasiness whatever.

PIG IRON.—The scarcity of this metal continues and the market is as firm as ever. No new feature has developed, except, possibly, a slight falling off in orders for future delivery. We quote as follows: Canadian, $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—In this there is a fairly good trade doing at unchanged prices. Merchants' bar is worth $1.95 to $2 and horseshoe iron, $2.20.

BLACK SHEETS.—There is nothing new to report in this line. The movement is fair. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is still a brisk movement in this iron, but the market is steady and prices are unchanged. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—The market has weakened considerably, but dealers are still quoting 14c.

INGOT TIN.—The price of Straits remains at 33½c. The market has not improved and only a fair trade is doing.

PIG LEAD.—Business in pig lead is not of an active nature at present. We quote $3.25.

LEAD PIPE.—Trade continues rather quiet and the market shows no new feature. Composition and waste are now quoted at 8c. and ordinary, 7c. The discount is 37½ per cent.

IRON PIPE.—Prices are unchanged and the demand keeps up very well. Our quotations are now as follows: Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—These have declined on the English market 1½d. Locally, no change in price is reported. We quote: Charcoal tinplates, $4.75 to $5.25 and cokes, $4.25.

CANADA PLATES.—We hear no more of a shortage in Canada plates, though in some cases supplies are not too plentiful. Our quotations are as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—The feature in this market is the reduction in price of sleighshoe steel by 5c. Other lines are unchanged in price and the market remains quiet, but with some improvement in the demand. We quote: Sleighshoe, $2.05; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—The inquiry for this metal has not improved and the market continues quiet. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—This moves along as usual and no change is reported in prices. Our quotations follow: Black

Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—A few orders have been received this week, but the demand, as a whole, is light. The price is $7.50.

COIL CHAIN.—Chain is not in very great demand at present and the market is rather uninteresting. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼ in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—This metal is moving about as usual. The volume of business is small. The price is $5.85 to $6.25.

ANTIMONY.—There is little doing. We quote 10c.

ZINC SPELTER.—No change has occurred. The price is 5c.

SOLDER.—Business in solder is fairly active, and the following prices are still maintained: Bar solder, 18c. and wire solder, 20c.

PAINTS AND OILS.

The only new feature that has developed in the paint and oil market has been the easier feeling in linseed oil. The market is weaker than at our last report, and under present circumstances we might reasonably look for lower prices before long; but it is impossible to foretell how long the present figures can be maintained in spite of the large crop of seed in the United States. In turpentine, the Southern market appears to maintain its strength. No quotable change is reported. Business in the general list of paints, oils, varnishes, etc., while it has fallen off considerably during the past month or so, is nevertheless of satisfactory proportions, considering the season of the year. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 77c.; boiled, 80c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 68c.; 2 to 4 barrels, 67c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Trade during the week has been of a more satisfactory nature than in the previous week. No quotable changes are reported, though there is a much easier feeling in copper, in sympathy with the prevailing weakness that exists in ingot copper. Some mills have lowered their prices on iron, but still seem to be importing. The market, in general, is in a healthy condition, and all lines are moving along nicely. We quote as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6 to 6¼c. per lb.

GLASS.

The market remains very quiet and entirely featureless. Orders have practically been all placed, business at present being confined to small orders for immediate sorting purposes. Our quotations are: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There have been no changes in prices during the week. Not much business has been effected, though tanners have shown greater willingness to buy. We quote: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c.; lambskins, 45 to 50c.

—

MARKET NOTES.

Sleighshoe steel is 5c. lower.

"M" brand horse nails "New Countersunk" heads are now discounted at 66 2-3 per cent. instead of 67½ per cent.

ONTARIO MARKETS.

Toronto, September 5, 1902.

HARDWARE.

THE condition of the hardware market is unchanged from last week. Trade is fairly well sustained in horse nails and horseshoes, and the demand for screws, nuts and bolts is still in excess of the supply, and the manufacturers of these seem to be greatly handicapped by the slow deliveries to them of raw material. The sporting goods season is opening up well and from all parts of the country, particularly the North and Northwest, the demand is becoming heavy for guns, rifles and loaded shells. The fall trade in stoves promises to be large, and manufacturers fear a shortage in supplies before the end of the season. Business in spades and shovels is recovering from its slackness and they are now quite active. Quite a few visitors are in on account of the Exhibition, but this has not done much to improve sales in general. No changes in prices have occurred. The prices of horseshoes are no longer being controlled by an association, but quotations are nominally unchanged.

BARB WIRE.—There is a fair demand for barb wire. We quote $2.65 in carlots and in less than carlots, $2.77½ f. o. b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—A little business continues doing in galvanized wire. We

Hope to see you at the Toronto Exhibition.

You will find us in the centre of the Main Building—where we will be happy to welcome you, and pleased to give all practical information that interests you about our

Unrivalled Sheet Metal Building Materials

Now don't miss our part of the show—it's well worth seeing and hearing about.

THE METALLIC ROOFING CO., Limited,
TORONTO, MONTREAL, WINNIPEG.

now quote the base price: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—There is still some call for stove pipe wire and hay-baling wire. The discount is 25 per cent.

SMOOTH STEEL WIRE.—The market for this line is lifeless, and we now quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—Jobbers and manufacturers are experiencing a good trade in these at unchanged prices. We quote as follows: Wire nails, in carlots, $2.50 and in less quantities, $2.55. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Trade in these is quiet The base price is quoted at $2.45 per keg and $2.50½ for carlots.

HORSE NAILS.—These are in active demand and the prices are firm. Our quotations are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—These are in good demand and stocks in the hands of retailers all over the country are light. The manufacturers are slow in their deliveries, and the market is in an unsettled condition owing to the disagreement among the manufacturers regarding the prices. Quotations are now open, but the heavy demand keeps prices up, and our quotations are now as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The volume of business in these continues to be limited to the ability of manufacturers to make deliveries. The inquiry is very active, but not many orders are being taken by jobbers. We now quote: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—The condition of the market for these is similar to that for screws. The inquiry is large and the supply is small, and the discounts are now as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The market for these continues bare of supplies, and we quote: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—These are in good demand. The stocks are becoming light owing to the fact that the manufacturers are unable to supply the demand. The manufacturers claim this is because they are unable to obtain raw material. The discount is 40 and 5 per cent.

ROPE.—A fair amount of business continues doing in all sizes of rope, and our quotations are as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

BINDER TWINE.—The situation is unchanged from last week. We now quote: "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

HARVEST TOOLS.—The demand for these continues to be of a sorting-up nature. The discount is 60 per cent.

EAVETROUGH, ETC.—A good business keeps up in eavetroughing and conductor pipe. The market is unchanged. We quote: Eavetrough, $3.10 per 100 square feet for 10-in., and conductor pipe, $4 for 3-in. and $5.25 for 4-in.

BUILDING PAPER.—A fair amount of orders keep coming forward for building paper, and our quotations are now as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

POULTRY NETTING.—Some business continues for delivery next year.

SPORTING GOODS.—The season for sporting goods is opening up well and many orders have come forward from all parts of the country, particularly from the North and Northwest, for guns, rifles and loaded shells.

CEMENT.—The manufacturers continue much behind in their deliveries of cement, and are unable to cope with the heavy inquiry from all over the country. The market is very firm. We quote: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 up per bbl.

METALS.

The situation in metals generally is about the same as last week. Trade in some lines is showing signs of improvement, and the import orders of Canada plates are now coming forward. The stocks of zinc sheets in the hands of jobbers are becoming small. No changes in prices have been made during the week. The outside tin market continues weak in tone and the copper market is in a somewhat similar condition. The outside iron market is quiet, but the lull is thought to be only temporary, as a number of heavy buyers, it is understood, have not bought beyond the current year and all consumers are short of current supplies through delayed deliveries.

PIG IRON.—The local market continues strong and active. The outside market is dull. We quote f.o.b. furnaces: No. 1 foundry, $20.50 to $21.

STEEL BOILER PLATES.—A moderate amount of business keeps up in this line. We quote $1.80 for carload lots on track, Toronto.

STEEL RAILS.—These are unchanged. Electric railway rails are quoted at $36

per ton and those for steam railways at $30 per ton.

TOOL STEEL.—The market for tool steel continues unchanged and the demand is fair. We quote as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—A fair demand is reported for mild steel.

SPRING STEEL.—The market is in an active condition.

BOILER TUBES.—The market is unchanged from last week.

BAR IRON.—This market continues active. No changes have occurred, and quotations are as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There has been a slight improvement in the demand for black sheets. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are in good demand and import orders are now arriving. Quotations are as follows: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—No change has occurred in these during the week and the market continues active. Prices are now as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge.

TIN.—There has been a small demand for tin in small lots during the week. We quote $32 to $33 per 100 lb.

TINPLATES.—The amount of business doing in these continues fair. We quote charcoal, $4.75 to $5 per box and cokes $4.25 per box.

COPPER.—Both ingot and sheet copper are in fair demand. We quote: Ingot copper, $13.50 per 100 lb and sheet copper, $22 to $23.

BRASS.—A fair trade is reported in brass. The discount is 15 per cent.

PIG LEAD.—Trade in this line is quiet. We quote: Pig lead, $3.50 and bar, $3.75.

IRON PIPE.—A fair demand for iron pipe continues. Quotations now are per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—Stocks of zinc spelter are very light. The article is in good demand. We quote 5 to 6c. per lb.

ZINC SHEETS.—The market for these is unchanged. We quote, zinc sheets: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—Business in solder remains steady.

ANTIMONY.—This article is meeting with a good demand. We quote $9.50 per 100 lb.

PAINTS AND OILS.

Business in paints and oils, generally, keeps fairly brisk. The principal feature of the week is a decline of 2c. per gallon in raw and boiled linseed oils. This reduction was made mostly by the jobbers who anticipate that the trade is looking for lower prices for September delivery in view of the fact that oil from the new crop of linseed will be on the market in a little over a month. A fair sorting-up business is reported in ready-mixed paints, and white leads by reason of the low prices at present prevalent are active at the prices quoted below, although a number of goods are offered at lower quotations. Advices from Calcutta do not hold out any hope that there will be a reduction in shellac this season, but it is difficult yet to estimate how large the new crop will be as the season is yet too early for the making of an accurate forecast. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb, $5.50: No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE AND GASOLINE.—Benzine, in barrel lots, 18¾c. per gal.; gasoline, ordinary, 21¼c., and engine, 22¼c. f.o.b. Toronto.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

DECATUR, BULL & CO., Sales Agents, MONTREAL

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities 10c. extra.

PUTTY.—Bladders, in bbls., $2.25; bladders, in 100-lb. kegs, $2.40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per bbl.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 77c.; boiled, 80c.; 3 to 5 barrels, raw, 76c.; boiled, 79c.; 6 to 9 barrels, raw, 74c.; ; boiled, 77c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 69c.; 2 to 4 bbls., 68c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

Trade in glass is fairly active and a heavy demand is anticipated during the fall. Quite a number of import orders have been received, but some jobbers report that all their orders have not yet arrived, and our quotations are now as follows : Under 26 inch, $4.45 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

Trade in all lines of old material is a little quiet owing to the Exhibition. No changes have been made in prices this week. Quotations are : Heavy copper and wire, 10 to 10¼c. per lb.; light copper, 8 to 8½c. per lb.; heavy red brass, 10c. ; heavy yellow brass, 8 to 8½c.; light brass, 5c to 5½c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2¾c.; iron, No. 1 wrought, $12 per net ton ; No. 2 wrought, $6 ; machinery cast scrap, $13 to $14 ; stove plate, $10 ; malleable and steel, $6 to $6.50 ; old rubbers, 5 to 5½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—The market for hides is steady and fairly active, and prices are unchanged. Our quotations are : No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, 8½ to 9c. per lb.

SKINS.—There is a fair amount of business doing in skins. We now quote : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; shearlings and lambskins, 45c.

WOOL.—The wool market continues weak and quotations are unchanged at 13½c. for fleece wool and 7½c. per lb. for unwashed.

TALLOW.—The market is weak and prices are likely to be lower. We quote 6¾ to 7c.

SEEDS.

Some alsike and timothy are offering at outside points. We quote $5 to $7 per bushel for alsike and $1.75 to $2 for timothy.

COAL.

Nothing new has come to light regarding the hard coal situation. The miners have not returned to work, and show as yet no inclinations to do so. The mine owners claim that they are mining some coal, but none has yet been delivered here. The prices in New York, Cleveland and other United States cities are being advanced by stages, until they now are very high. Soft coal at the international bridges is quoted at $3 to $4.50 per ton.

PETROLEUM.

Trade in this line is steadily improving, and the market is unchanged. We quote : Pratt's Astral, 17 to 17½c. in bulk (barrels extra) ; American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16 to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Raw and boiled linseed oils have declined 2c. per gal.

C. M. Irwin, hardware merchant, of Arthur, Ont., is in Toronto.

NOVA SCOTIA MARKETS.

Halifax, September 1, 1902.

BUSINESS in the hardware line has continued remarkably regular through the summer season, and neither wholesaler or retailer has anything to complain of, either as to the amount of business done or the general tone prevailing throughout the Province. Orders came in very freely during the opening months of spring, and continued so far into the summer. Within the last month or two orders have not been so large or so frequent, but a good business is being done. Payments have been met fairly well, and in this respect there is less to complain of than in former years. The prospects for a good fall trade are excellent.

* * *

In refined oil, the situation at present is very firm, and the prospect is that higher prices may shortly prevail and affect the fall trade. This is accounted for by reports of shortages in the various oil-producing districts, which have yielded much less quantities than was anticipated. The season is coming on when there is a greater demand, and the stocks in the hands of the dealers are only sufficient to meet current demands.

The price of linseed oil has fluctuated considerably of late and is still open to change. The present price is about the same as it was a month ago. The local demand is not so great as in the earlier part of the season and prices, locally, may be expected easier. Turpentine is firm and the local price has advanced two cents. The general tone of the market is not encouraging and dealers do not look for lower prices in the near future.

* * *

Naphthas, and gasoline and benzine have all advanced in the United States, where they are in heavy demand, but the local market has not been materially affected as yet. Seal and cod oil continue steady at the old quotations. Lubricating oils remain firm but unchanged.

* * *

The export business, which may be called the general trade barometer, has been slightly less for the last week than for the corresponding week last year, being $143,677 as against $151,241. The exports are apportioned as follows : Britain, $50,321 ; other European ports, $32,269 ; Newfoundland, $25,260 ; United States, $17,048 ; West Indies, $7,991 ; France, $7,538 ; Denmark, $3,250. The total exports of Halifax for the year ending June 30, amounted to $7,589,957 ; the imports were $6,956,983, an aggregate trade of $14,546,940.

R. C. H.

RENDEZVOUS FOR VISITORS.

Stewart & Wood, York street, Toronto, are busy welcoming their friends who are in town during the Exhibition.

Sanderson Pearcy & Co., Toronto, have fitted up a cosy corner in their headquarters on Adelaide street for the accommodation of their friends who call on them while the Fair is in progress.

The Canada Paint Co.'s sales office, 90 Bay street, Toronto, has been a busy place this week and is likely to be more so during the coming week, as Harry Clucas has an inspiring influence in imparting to western customers the benefits of using the company's standard brands of paints and varnishes which invariably speak for themselves.

HEATING AND PLUMBING

PLUMBERS' SHOPS AND WINDOWS.

"LUX" in The Australasian Hardware and Machinery proposes the following conundrum for plumbers: Why is it that so many plumbers' shops, the proprietors of which claim to be gasfitters, are so dismally dark and uninviting? A gasfitter is surely suggestive of someone who is able to make things bright and cheerful for other people—at any rate, till the bill comes in—and it would not be amiss for some of them to do for themselves as they would do unto others, especially in that part of the shop set apart for customers.

"Well done! Lux." Why it is so I can't tell, but it is a fact all the same. I guess it is because it is easier for the plumbers to show people how to do things than resort to the prosaic matter of fact doing them for themselves. It's the old case of "It's easier to preach than practice," don't you know.

But there are boys and boys, and I am sure there are plumbers and plumbers. Some might aspire to ideals sufficiently Imperalistic to fall under the same category as our Australian plumbers who have "shops so dismally dark and uninviting"; but, then, again, I know plumbers who deservedly pride themselves on the neatness of their "shops."

I saw a very neat, bright and clean display room the other day. A typical bathroom with all the bath accessories, of tub, shower, towels, basin. Everything shining and polished convinced me that the owner of the establishment was up-to-date. "My, isn't that nice," I overheard a lady say. "I notice that these people have everything so nice." Ten to one that that lady makes her husband buy there.

There doesn't seem to be a proper regard for window display. I know it's hard to make displays attractive and inviting, but occasionally I see it done, and an inquiry tells me that it pays. Some of the plumbers have no window displays at all; others have a window two feet deep. That is not what a really modern establishment should be like.

I saw a window with three posters in last week. Now, I don't mind when a plumber inserts posters for excursions for journeymen plumbers or patriotic or charitable purposes. These will promote good feeling with employes and show a proper appreciation of the interests of others. I think it would pay the plumber to decline theatre or circus posters. It gives your business a cheap appearance.

Plumbers seem to forget that the general public, who are the people upon whom they are dependent for business, are quite ignorant of things which are quite familar to the trade. I saw a lot of valves in a plumber's window. People, I suppose, would believe in a vague way that they were meant for plumbing; but why don't plumbers use a few display cards, or something to draw the attention of the people?

Plumbers won't, and often can't give prices off-hand, but a display card in a window would be productive of much good. Why not put in a neat card, thus "Quotations cheerfully furnished."

In that part of the "shop" set apart for customers, taste evidently is deemed superfluous or luxurious. Conglomeration reigns like that often-quoted "confusion worse confounded."

A few palms in your display room are very pretty, and I have seen them used with great effect.

PLUMBING NOTES

Harry Mahoney, master plumber, of Guelph, passed through Toronto on Wednesday, from the Halifax Convention.

At Brock street Methodist Church, Kingston, John O'Neil, a prosperous plumber of Picton, was married on August 25 to Miss Ida Larue, of Detroit.

BUILDING IN MONTREAL.

New buildings to the number of 54 were given permits. These included 45 dwellings, 3 stores, 3 factories, 1 warehouse and 2 sheds. The value of the new buildings amounts to $177,350.

According to the report of the building inspector of Montreal, during the month of August 29 permits were issued for alterations to buildings, of which 16 were for dwellings, 7 for stores, 1 for a factory and 5 for sheds, the total cost of alterations amounting to $22,817.

BUILDING NOTES

Sherbrooke, Que., is to have a city hall, costing $40,000, in Strathcona Square.

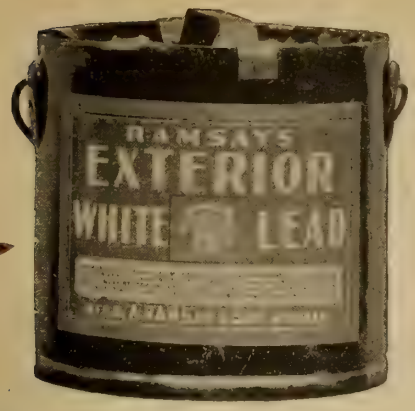
The new block of the McKeough estate, built for Northway & Co., of Chatham, Ont., was built by Robertson & McKie, Blight & Fielder doing the brick work, Westman Bros., the plumbing, Palmer the painting and inside furnishings, and John Piggott & Sons, the inside fixtures, all of which are of oak.

L. C. Wideman, architect, has let the contracts for the livery barn to be erected for E. Palmer, on Carden street, Guelph. The contractors are as follows: T. Mat thews, stone work; H. A. Clemens & Co., carpenter work; Builders' Supply Co., roofing; H. O'Connor, galvanized iron work; A. McKinnon, painting and glazing.

BUILDING PERMITS IN TORONTO.

DURING the week the following building permits were awarded in the office of Building Inspector Copping:

R. Anderson, frame and roughcast cottage, Pears ave., for $350; R. L. Orde, two-storey and attic detached brick and stone dwelling, South Drive, for $4,500; Miss E. Booth, three-storey brick training home, 135 Sherbourne street, for $19,000; B. E. Walker, two-storey and attic brick addition to dwelling, 99 St. George street, for $2,000; Bank of Nova Scotia, six-storey brick, cement and steel branch building, 39-41 King street west, for $70,000; A. V. De Laporte, two-storey brick and wood addition, 402 Church street, for $600; Robert Watson, two-storey and attic brick dwelling, St. George street, for $12,000; W. B. Raymond, two-storey brick dwelling, Empress Crescent, for $3,000; H. E. Sheppard, six pairs semi-detached two-storey and attic brick dwellings, corner of Bloor street and Preston ave., for $16,800; S. Mishaw, three-storey brick addition to store, 141 Simcoe street, for $900; J. J. Walsh, for pair 2½-storey semi-detached brick and stone dwellings, 1241-1243 King street west, for $8,000; Samuel Beeken, two-storey frame and roughcast dwelling, 39 Essex street, for $450; Erskine Smith, two-storey brick addition to 130 Bond street, for $800; S. R. Hughes, two-storey brick factory, Portland street, for $2,000; W. Murray, two detached brick and stone dwellings, Crescent Road, for $8,000; S. Young, two-storey alterations (brick) to Central Methodist Church, corner of Bloor and Park Road, for $500; Boeckh, alterations to building, 80 York street, for $200; J. Meyers, Son & Co., one-storey wood storage building, 80-82 Saulter street, for $300; W. Whalen, 2½-storey roughcast dwelling, Burnfield ave., for $500; John Wood, roughcast dwelling on Hogarth ave., for $500; Mrs. Margaret McDowell, two-storey frame and roughcast dwelling, North Crawford street, for $600; Nonsuch Manufacturing Co., third additional storey to factory, corner of Duncan and Adelaide streets, for $500; Thomas Dickens, two-storey and attic brick dwelling, Shaw street, for $1,500.



Many Men Make Money

They do it by watching the money-makers, and when they see one they buy it. Many men saw money in **RAMSAYS EXTERIOR WHITE LEAD** when it first appeared, and they have gone on making money out of it, because it is the greatest money-maker in the lead business. Architects, painters, householders, and users in general want it. It is ground finer, goes further, lasts longer, remains whiter than any pure lead made, and costs less, though it sells for more. We assist you with booklets proving its superiorty. Remember, **RAMSAYS EXTERIOR LEAD** is in a class by itself. It must not be confounded with any other make, whether sold under the name of exterior or some other imitation. Get **RAMSAYS.**

The Fairbanks Company

MONTREAL - VANCOUVER

BUILDING OPERATIONS IN VANCOUVER.

BUILDING operations in Vancouver, B.C., are steadily progressing. In all parts of the city, and particularly in the district lying west of Granville, many dwellings are being erected, and in the down-town portion a number of large buildings are in contemplation. Recently there have been blocks of large dimensions completed, and on Water street, the four-storey structure being constructed by J. McLuckie, contractor, is assuming shape. This adjoins the large block built last year for Kelly, Douglas & Co., and Greenshields & Co. It will cost about $20,000, and will be occupied by W. H. Malkin & Co., wholesale merchants.

Further down Water street will be the new warehouse of McLennan & McFeely, on the corner of Water and Abbott. This will be in course of erection shortly, and will be ready for next year's business. The two new hotels to be built will be commenced soon. A handsome three-storey brick and stone structure will be erected on the southwest corner of Pender and Howe streets by F. Foubert. This hotel will face on both streets, will be 52 by 120 feet, contain 52 rooms, and when in position will be readily seen from Granville. The new hotel and Turkish bath resort, to be erected on Hastings street, near the C.P.R. telegraph building, is being arranged for. This structure will probably be begun this fall, and at the latest next spring.

It is noticeable that the majority of permits taken out at the office of the building inspector at the city hall are for dwellings in the west end. During the past week or two a large number of permits have been issued, the value of the houses ranging from $1,000 to $3,000. Some of these are: C. R. Gilbert, Haro street, for $3,000; H. Cowan, $1,700, Haro; H. W. Vanderwater, $1,000, corner of Fifth avenue and Quebec street; Mrs. Willis, $1,400, Eighth avenue; Mrs. J. McQueen, two of $1,000 each, Cordova street east; Mrs. Dermid, $1,000, Victoria; Mr. Hinic, $3,000, Burnaby street; G. Caspell, $2,000, Nelson street; Lyon & Call, four of $1,000 each, corner of Davie and Thurlow; A. McIntyre, $1,000, Alberni; Mrs. Bayne, $1,000, Cordova east; Mr. Carlson, $1,000, Prior; G. H. Smith, $1,400, Keefer; John Clendenning, $2,000, Keeler. This list comprises only those to whom permits have been issued during the past three weeks.

It may be interesting to know that one of the permits was given to the agents of Lord Elphinstone, who owns a portion of the block of buildings on Hastings street, between Richards and Seymour streets. About $1,000 is to be expended in an improvement.

THE REVENGE OF THE SUPPLY MEN.

The ball game between the plumbers and the supply men of Toronto on Saturday last resulted disastrously to the plumbers. The plumbers, themselves, admit a score of 8—13, but the supply men claim a result far more uneven. Last year the plumbers won by a score of 35 to 5. The supply men now feel that they have obtained revenge.

ACETYLENE VS. COAL OIL.

Under the direction of Hon. James Sutherland, a test of acetylene gas has been made at Father Point on the Lower St. Lawrence, with apparently successful results. The tests will be continued at other lighthouses, and should equally good results be obtained acetylene gas may replace coal oil as an illuminant. The experiment will probably also be tried in the case of gas buoys on the St. Lawrence.

BUILDING OPERATIONS IN TORONTO.

The value of building operations in Toronto this year to date, as compared with that of the same period of last year, has advanced nearly a million dollars. For this year the total is $2,581,314 and for last year $1,595,300, an increase of $986,014. During August the permits issued aggregated in value $276,700 and in August, 1901, $175,635.

PLUMBING AND HEATING CONTRACTS.

Guest & Co., 86 Church street, Toronto, have sold a 2-in. water motor to James Morrison, Adelaide street west.

Brown & Semple, of Brockville, Ont., have secured a contract of plumbing and acetylene gas fixing from George Reid, a large general merchant of Portage du Fort, in the Province of Quebec, northeast of Ottawa.

BUILDING ACTIVITY IN THE STATES.

Building operations for the month of July in 23 of the leading cities of the United States, as compiled by The Construction News, of Chicago, show the greatest percentage of gain for any month this year, being an increase of 40 per cent, as compared with the corresponding month a year ago. During the month permits were taken out in 23 cities for 6,507 building improvements, involving a cost of $29,657,253, against 5,230 buildings, costing $1,879,185, for the same month a year ago, an increase of 1,277 in the number of buildings and $9,778,068 in cost.

"My Foot is on
"My Native Heath
"And My Name
"Is Macgregor!"

(*Macbeth.*)

If you place your foot upon some brands of so-called floor paints, your boot will probably stay there **forever.** Not so with the **CANADA PAINT COMPANY'S** hard-drying Floor Paints.

During the process of grinding and mixing, a hard, quick-drying varnish is incorporated with the color and a beautiful wear-resisting paint is the result; suitable for Floors, Verandahs, Steps and a variety of purposes where a first-class paint is required.

Our paints cannot be duplicated by any other firm as we make them from the first processes. It is conceded that they are the best, hence the feeble imitations which abound.

For Fall Trade avoid imitations and specify the Floor Paints of the

CANADA PAINT COMPANY

LIMITED.

Montreal and Toronto.

Shaking hands with Yourself

is one way of expressing satisfaction with something that pleases you. Our way when anything in our line pleases us is to tell dealers about it, so we want to say that the extraordinary increase in the sales of

Lucas Imperial French Green

more than pleases. It confirms our belief that it pays to make a green that is the painters' stand-by. Lucas Imperial French Green is durable and practically unfading, is positively non-poisonous, brilliant in color and has great covering qualities. It has been analyzed by almost all the painters' associations in the United States and Canada and has come out of the test always with great credit.

It can be used wherever a green is needed. **Dry and in Oil.**

Unsurpassed for Sidewalks, Floors, and all work requiring the Highest Grade of Portland Cement.

HEAD OFFICE: OWEN SOUND.

The Best Ready Roofing on Earth.

TRINIDAD ASPHALT MFG. CO.

Asphalt and Asbestine Gravelled

READY ROOFING

WITH INTERLOCKING LAP.

Fire, water, acid or gas proof.
Shipped with cement and nails for laying.

ASPHALT PAINT, CEMENT, COATING, ROOFING, DEADENING and SLATERS' FELT. BUILDING and INSULATING PAPER of all kinds. The trade supplied. Prices and samples from the

Canada Supply Co., Agents, Windsor, Ont.

The P. R. Cumming Manufacturing Co., Limited

CLARKSBURG and TORONTO.

Above we illustrate the manner in which the

"Cumming" Corkscrew Can Opener

(PATENTED)
is boxed for counter display.

No other Can Opener has a blade like this, and none other works so quickly, cleanly and safely. We also make the **"SPRAGUE"** style. Send for catalogue.

Address—
The P. R. Cumming Manufacturing Co., Limited, 90 Richmond St. East **TORONTO**

MANITOBA MARKETS.

Winnipeg, September 1, 1902.

IT would be a clever correspondent who could find anything new to say of the hardware market these days. It is good in all lines. Everyone is busy and happy, apparently. In paints, oils and glass, the anticipated drop in linseed oil has taken place and boiled is now 85c. and raw 82c. per gallon. The drop is, of course, due to the heavy crop now coming in.

The fuel question promises to be a burning one in more senses than one this winter. American anthracite (the coal principally burned on this market) has gone up to $13 per ton, and there are practically no stocks in the city, nor is the outlook for getting any encouraging. It has always been the practice of dealers here to get in their supplies early, before the fall freight and the wheat occupied all the time and attention of transportation companies. This has been an impossibility this year. Dealers are making inquiry as to Crow's Nest Pass coal. There will be a tremendously increased demand for Galt and Souris coal. The mines of the latter are now in good shape for economical working and large production. Should the supply of anthracite continue short there is no doubt many houses will adopt grates suitable to this lignite coal and burn it. It retails in Winnipeg at $4.50 per ton.

The following is a list of prices for the week :

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS

September 5, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

BOOKLET COMING— if you'll ask for a copy with trade discount.

453-461 Broadway, NEW YORK CITY.

The Rubber Belt is the Thresher Belt.

Other belts have had their waves of popularity, generally on account of price, but the threshers have invariably returned to Rubber.

WHY?

1. **BECAUSE** the rubber belt stands the weather.
2. **BECAUSE** the rubber belt adjusts itself best to the pulleys.
3. **BECAUSE** the rubber belt does not expand and contract with change of temperature, consequently the engine has not to be shut down and replaced.
4. **BECAUSE** the rubber belt is made for the thresher use and will best stand the work.
5. **BECAUSE** the rubber belt is honest in length. If you buy 100 ft. Endless, you do not get 97 ft.

Contracts are placed with us by all the large engine and seperator manufacturers.

WHY? WHY? WHY?

A COMMERCIAL EVOLUTION.

A MOVEMENT of an unique nature is at present on foot in Germany, the result of a conference of the leading citizens of Baden. It takes shape in the foundation of a national school to be opened during the coming fall, in which a practical type of German patriotism is to be taught.

If we are to believe the report of the United States consular agent, the promoters of this school have come to the conclusion that, if Germany is to take a place in the race for the world's commercial supremacy, she must make an effort to keep all expatriated natives in touch and in sympathy with the Motherland. Millions of Germans have crossed the seas, have settled in foreign countries and have eventually become citizens of those countries. As it is too late now for Germans to think of establishing a colonial empire of their own, they intend to do the next best thing and to establish relations with the people of German birth or German descent across the seas.

The promotion of this connection with the Old Country is to be made through the young Germans who are hereafter to pass through the national school. They are to go forth to all parts of the world, where Germans live or may yet live, and set to work to promote a German spirit and a German trade.

No one can deny but that this is a bold step. If, as it is predicted, the wars of the future are to be commercial wars, then mayhap this movement is one of the evolutions of the future method of warfare. But it is questionable if a foreign nation will submit to any such movement. Canada for the Canadians is a kind of motto which is not peculiar to this country alone, and other nations are just as jealous for their own national identity. So long, of course, as there is no interference with the industries of a country, any preference for German-made goods will not be objected to, but the minute rulers begin to find their German population favoring the goods of a foreign nation in preference to their own goods, then a sudden stop will be put to the matter.

The question of commercial supremacy is one of vital importance to an over-populated country like Germany, with but small hope now of securing colonies in which her surplus population can be provided for. The home population cannot live without a demand for their manufactured articles, and, if by reason of the successful countries this demand be diminished, the problem for statesmen to meet is next thing to insoluble.

THE BICYCLE INDUSTRY.

ANOTHER industrial combination has come to grief and will be subjected to a process of reorganization. According to the bill of complaint the American Bicycle Co. has obligations of more than $10,000,000, while its estimated marketable assets are placed at $7,751,523.

There has been a peculiarity about the bicycle industry which has not been known in other industries. While the usual trend of manufacturing has been slowly progressive, with the bicycle business there was a rapid development to most abnormal proportions. Those who were possessed of a keen insight into possibilities perceived that the demand was by no means likely to remain stable. There was too much of the popular fad behind it.

Others, however, seemed to take it for granted that the huge demand, which called for new wheels annually, would continue. That was why the amalgamation of the various companies making bicycles was brought about.

But bicycle-riding as a fad, or even for pleasure, has gone out and the wheel has assumed its proper place in the economic world. The demand has become stable and no longer does the rider ask for a new mount every year. These amalgamations with huge capitals have, with few exceptions, gone to the ground, and have been rebuilt on a proper business basis. That is what has been done in Canada and that is what is being done in this instance in the United States.

THE INTERESTS OF THE RETAIL MERCHANT.

WHILE the attendance at the convention of the Retail Merchants' Association of Canada in Toronto this week was not as large as it should be, it was sufficiently large to prove that the retail merchants of the country are becoming alive to the importance of the organization. But numbers at best are not always indicative of the utility of an organization of the kind. In commercial bodies as well as in all others it is usually upon the few workers that life and energy depend.

That the Retail Merchants' Association is developing strength and influence must be apparent to everyone who has perused the annual reports of the president and secretary.

This is an age of organization. And, while none need organization more than the retail merchants of the country, no class has been so slow to take advantage of it.

It is not in getting together and attempting to fix prices that lies the centre of usefulness in commercial organizations. That is the most difficult of all aims to accomplish; and is the rock upon which more than one organization has been wrecked.

The first aim when forming associations among business men, be they manufacturers, wholesalers or retailers, should be the dissipation of jealousies and prejudices, which can only be accomplished by those engaged in particular branches of trade being brought into contact with each other. It is only when these prejudices and jealousies have been dissipated that unity of purpose can be obtained.

It is in the wake of unity that follow the reform of all such abuses as price cutting, long credits, iniquitous devices to catch trade, trading stamps and unfair and unjust business methods generally. Victory is not possible where disruption is prevalent.

The members of the Retail Merchants' Association have contented themselves in getting together and concentrating their forces against evils which elicited their common co-operation. In other words, they have trained their guns upon common foes. Discriminating laws, trading stamps, departmental stores, have all been foes of this type. Had they undertaken to grapple with certain other questions which might appear to more directly concern them, there would possibly have been disruption and not unity and its accompanying strength.

There are many evils against which organizations of business men can turn their hands without trying to meddle in each others method of doing business. There are not enough business men in town and city councils and in Provincial and Dominion Parliaments. And when questions of commercial importance are being discussed by parliamentary or municipal bodies it seems to seldom occur to the mind of anyone that there is a great retail commercial class whose wide interests are entitled to consideration.

It is evident the Retail Merchants' Association of Canada is gradually bringing about a reform in this respect. Retail merchants are not being ignored as they once were by political or any other interests. And just as their organization becomes more perfected will their influence in matters relative to the commercial welfare of the country become more potent.

LINSEED OIL SITUATION.

LINSEED oil producers in Canada report that the percentage of oil obtained from the seed is smaller than usual. The cause of this is attributed to the wet season. The effect of this has been to impart a rather better tone to the home market, and it is now thought by the wholesale trade that the anticipated reduction will possibly be averted.

Meanwhile, the market in the United States continues weak and unsettled, and raw oil sold last week in Chicago all the way from 50 to 60c. a gal. Buyers there are taking small quantities only. They are reported to be waiting for new crop and settled markets, and are expecting to get their supply at 40c. or less.

After a temporary show of strength, the foreign seed market in the United States has become stagnant. One advice says that "as crushers are well supplied with domestic, and with the prospects of a very good crop in the Northwest, there is little chance of any radical change in the situation this season."

Recent advices from Kustendje, Roumania, say that the crop in that country promises to be a very fine one, being expected to yield 27,000 tons. Kustendje is a new factor in flaxseed, and the seed from there is shipped before American flax begins to move.

THE GENTLEMAN-MERCHANT.

MERCHANTS now-a-days are so liable to become engrossed in the mere mechanism of business that they become indifferent to the many smaller qualities besides business ability which go to make their business successful. Business ability is the main essential, but, if it is not supplemented by attention to the lesser details, it is not of much avail.

All the lesser attributes may be summed up in the word gentlemanliness. This word includes everything and excludes nothing. By a gentleman is not meant the individual who is dubbed a gentleman by society, and who in many cases is no more a gentleman than the seediest looking tramp on the road, but it is the man who sums up in his nature those qualities which make him respected and honored by all who meet him, that is the true gentleman.

With this basis of division, no retail merchant, however small his shop or however shabby his appearance, may be a gentleman-merchant. There are merchants who always show the utmost courtesy to customers but whose clerks lead dogs' lives. These cannot belong to the gentleman class, nor can their discourtesy to their employes remain long without its reward. Courtesy always pays well, and courtesy does good to good clerks and can do little harm to poor ones.

Then, many merchants have a way and a most discourteous way of receiving commercial travellers and other agents who are not customers. If it involves the payment of money or the spending of half a minute in conversation, they believe in making the unfortunate client feel as miserable as possible. They fail to realize that the agent's time is, mayhap, as valuable as their own, and they go on laughing and joking with cronies or working at their books till the unfortunate agent is so worked up that he swears to get even with the merchant some time.

Of course, many agents are undeserving of attention and the merchant may act thus in self-defence, but it is a pity that the worthy should suffer with the unworthy. Let the gentlemanly spirit predominate in every action and it will be found that undeserving agents can be turned down in a gentlemanly manner much more severely than in an ungentlemanly manner.

THE RETAIL MERCHANTS OF CANADA.

THIRD ANNUAL MEETING IN TORONTO.

THE Retail Merchants' Association of Canada held their third general convention in the fine Temple Building at Toronto, on Tuesday and Wednesday, September 9 and 10. The opening session took place on Tuesday afternoon. John Hargreaves, the president of the Association, was in the chair, and Secretary E. M. Trowern was on hand in charge of his department. The hall was tastefully decorated with flags and mottoes, such as "Organized to protect the commercial interests of all classes of the retail trade of Canada"; We want the golden rule on every counter."

President Hargreaves welcomed the visitors with a few words and introduced to the assemblage Mayor Howland, whom he said had always been a friend of the retail merchants.

The Mayor was pleased at having an opportunity of greeting those men who had come in from parts of the country far and near. He recognized that it was of great advantage to them to meet periodically in convention together, such as this, to discuss public affairs of importance to them. There was much to hope for from such meetings. One of the

DUTIES OF THE ASSOCIATION

was to prevent any tradesman from obtaining any advantage over the other. Their condition was subject to change, sometimes for the worse, often for the better. It would be much to the advantage of some corporations if the retailer were abolished. But the retail merchant was helpful to the general public in more ways than one. He was a constant source of credit to his friends, and while the credit system had its disadvantages it had also its advantages. In times of distress and trouble the retail merchant would supply all that was necessary for the sustenance of his friends. He was

A SMALL RESERVOIR

in his section of the country, supplying nourishment to its surrounding populace. The bank would not do as he did, neither would the departmental stores, for if they did they would have to change their system and this would place them on an equal footing with the retailer and they would not be to him such a serious competitor. The retail store was always a centre of enterprise and development, and so was entitled to a fair share of the public interest in struggling for its rights.

Alderman J. J. Ward, Chairman of the Reception Committee, was then introduced. Himself, a retail merchant, he was pleased to welcome the retailers of the Province of Ontario assembled in convention. They were the

MEN WHO HAD FOUGHT

and effected the abolition of trading stamps. They had done excellent work in combatting fake schemes and false business methods. Forty per cent. of the taxes in Toronto were paid by the retail merchants, and so they were entitled to some influence in its affairs. The same held true about the retail merchants all over the Province.

DISAPPOINTED WITH ATTENDANCE

Rev. A. L. Geen, president of the Belleville section, was disappointed in one way with the attendance, the smallness of which he attributed to the selfishness of those who stayed at home. They,

Mr. John Hargreaves, Toronto, Retired President.

down in Belleville, had been struggling along for some time when they were visited by Secretary Trowern, who came at an opportune moment. They found the merchants of Belleville had no faith in such an organization and were lukewarm. They successfully fought the trading-stamp people, who were very bitter opponents. In other respects they had not succeeded as well as he thought they should. They would have a good meeting and things would go along swimmingly for a time. Then the interest of the members of the Association would weaken. When he went back he hoped to be able to arouse their interest again during the fall. The merchants of Belleville paid a large proportion of the taxes there, he concluded.

Mr. Geen is a druggist as well as a clergyman.

APPRECIATION OF MAYOR HOWLAND.

J. G. St. Leger, in a few words, expressed his gratitude to the Mayor and Alderman Ward for their warm welcome to the delegates. The Mayor, he said, had shown himself to be a large man in every way. He had placed himself in the position of a country merchant and spoken from that standpoint. The city council, as the Mayor, was always willing to assist people who desired and needed assistance. He concluded by moving a vote of thanks, which was seconded by Samuel Corrigan, and carried with loud applause.

EXPERIENCES IN THE WEST.

B. G. Davis, president of the Windsor branch, took the floor and gave their experience in the west. They had formed a local association 12 years ago, which had lasted for a short time and then died a natural death. No attempts were made to revive the association till a short time ago, when they began organizing again. Secretary Trowern had then come along and rendered them valuable assistance, so that from then out things progressed satisfactorily and the membership had increased until it now embraced 45 merchants engaged in the retail trade. They were taking steps to bring into the organization merchants from the surrounding towns and villages and from now on looked for much prosperity to attend their labors. They had had a hard fight in getting The Trading Stamp Company put out of business. It had taken six months for them to effect this reform. At last they had gotten the members of the city council on their side and the anti-trading stamp measure was placed on the statute book of Windsor after they had aroused the interest of nearly all the merchants in their favor. They hoped to have successful meetings in the long evenings of the fall and were determined to keep up and expand the organization.

BELIEVED IN ORGANIZING.

Ex-Mayor Bond, of Toronto Junction, believed in organizing. He had found that it was co-operation which had made the British army so powerful and had seen that every other body were binding themselves together in corporations, keeping in mind this principle. The trade unions organized under a central executive, and he believed that it was advantageous for the retail merchants so to do. They thus could more effectively further their own projects. He had heard

that all the wise men came from the East. That is why there are so many in the west. They, in Toronto Junction, had found that some merchants had kept open nearly all night and were at business again sometimes at daybreak. He had tried this method of doing business and found that he became thinner and thinner until he had to quit it entirely. The Junction Association was now trying to have enacted a law enforcing early closing. There were about 40 merchants in the town. The rest tapered down until you could not tell what line of business they were in. He was a grocer, and the best he could say was "Grow, Sir."

LETTERS OF REGRET.

Letters of regret were read from a number of wholesale merchants, who, on account of the Exhibition rush, were unable to be present.

PRESIDENT HARGREAVE'S ADDRESS.

President John Hargreaves addressed the meeting as follows :

Fellow merchants and Members of the Retail Merchants' Association of Canada, allow me to draw your attention to the fact that the origin of our Association dates from 1897. Previous to that time the Retail Merchants' Association of Toronto had been energetically engaged in an endeavor to lay before the merchants of Toronto the advantages that can only result from a thorough combination of our scattered forces, and the necessity for an organized effort to protect the interests of honest and fair trading in the commercial community of Toronto.

We quickly decided that Toronto was not the commercial world, but that retail merchants outside of Toronto were similarly situated, and were just as influential and equally as needy, and that complete success must come only with the co-operation of merchants in all the towns and cities and villages in Canada. In 1899 canvassers started to work to establish the organization of an association of merchants for the Dominion, and, in November, 1899, the first convention of the Association assembled in this building. The work since then has progressed and improved, until to-day we have an Association that with wise and judicious control should wield greater influence than any other organization in Canada and secure a just and equitable recognition of the rights and interests of all those engaged in retail trading in the Dominion of Canada.

We admit that Toronto does not possess all the intelligence and power of retail merchants, but we also hold that for many reasons evident to you all Toronto is destined to be the core or centre from which must spring the channels or forces necessary to effectively and successfully secure a just recognition of our rights and objects.

This Association is largely indebted therefore for the success that has been achieved, to the Toronto branch, and the very efficient and energetic executive officials that have composed that branch. They have labored in season and out, have eschewed politics in any form from all meetings and discussions, and have piously refrained from any religious controversy ; but to my mind it occurs that the Association, if it has any orthodox religious creed, leans strongly to the Church of England, from the fact that in thinking on its past life we may truly say that we have left undone many things that we ought to have done, and because we have been very slow in passing the collection plate around.

The general working methods and plans by which we have endeavored to promote and advance the various interests of our members will be fully outlined in the report of our secretary, but I may be pardoned for stating this opinion, that our organization is unapproached by any similar commercial organization in America. We want a branch in every city, town and village in Canada. We wish every merchant to be a member of our Association, and to aid us in our efforts to elevate and educate higher commercial aims and objects. We require the brightest intellects, the most forceful energy, and the enormous influence, possessed only by the merchants of Canada, to unite in one solid body, to enable us to demonstrate our aims, and to enable us to demand from any power a just and fair recognition and our desire only for fair play and no favor. Fellow merchants, this means you must be ready and willing with your time and money. You must give freely of both. Can I convince you of this fact ? The time and money that you devote to this work is just that much capital in an investment that will surely realize you greater profits than you require on any merchandise you retail over your counters ; you therefore require to zealously watch and guard the investment ; it is thoroughly secure ; if you don't receive the returns this year, they must come, and the more loyal you are to the cause, the larger and quicker will be the returns that are required. Our duty should be for each to resolve to do all that we can and to leave as little as possible for the other fellow to do.

Our Association has done some vigorous work. We have had great expectations, and have put forth efforts in which we have not succeeded, but I may truly say that the results, when calmly considered, are very satisfactory, and should stimulate us to expend more energy and more influence at our work.

A very full outline of our plans and objects was laid down by the able chairman of our last convention. I may say that we have endeavored to assist in carrying out those plans, and to keep the same objects continually before us. We stated then that our plan was to unite all classes of merchants in our organization with one common object, the protection of the individual merchant against common enemies, such as capitalists, corporations, departmental stores, misrepresentation, adulteration, false weights, unfair taxation, false advertising, and any and all systems that are injurious to the retail merchant. Every one of such enemies can be reduced and placed upon their proper level only by a perfect organization, and by the same organization and co-operation only can we expect to accomplish reforms and improvements in fair and honest methods of retail trading.

We have petitioned the Legislature of Ontario on different occasions, and have requested amendments to the Assessment Act, an Act asking that corporations or incorporated companies be not allowed to perform acts and escape punishment for which an individual can be summarily punished under the Criminal Code.

To prohibit and make illegal the carrying on of departmental stores, to tax departmental stores on an increasing scale, to abolish trading stamps, coupons, and such. To place a law on the statutes making it a criminal offence to fraudulently advertise goods, to compel departmental stores to pay their fair share of the taxation.

We have not succeeded to the extent that we desire in all our attempts, but we have abolished the trading stamp iniquity, we have showed the Government that personal property of retail merchants is most unfairly taxed, we have had the Transient Trading Act and the Pedlars' License Act improved. I believe we have convinced the Government that departmental stores are a curse to the country.

Let me ask the hearty and energetic assistance of merchants outside the city where a departmental store is thriving, for "Canada has only one greatest store," let me request your assistance and co-operation in a struggle for self-preservation against these departmental stores for the following reasons :

Their methods have destroyed that confidence which should exist in a business community of the entire Province, and have educated the public to believe that all kinds of deception are necessary to successfully retail merchandise over a counter. They have reduced the value of labor, and have destroyed the purchasing powers of many classes, thereby affecting all other classes.

They have lowered the moral standard of commercial life ; they have concentrated the business into one small circle, and the power into the hands of very few. They are practically endeavoring to concentrate the business of the Province into one city or centre. Now, I ask the merchants of Toronto, Is it in the interests of the city of Toronto that there should be one huge prosperous financial concern in one small circle, and a large portion of the outside business surroundings at a standstill, or in almost a condition of decay ? I ask merchants from outside towns. Is it in the interests of the Province of Ontario that there should be one city in it in which there are a few huge prosperous corporations, thriving and fattening at the expense of all the out side towns and villages ?

Pardon me for devoting so much time and space to departmental stores, but they are the root and factor of the most of the injurious conditions that surround us to-day, and if they prosper in the city they will be imitated in the country. Then the disaster will spread like smallpox, and honest and fair trading merchants will be considerd unprogressive, behind the times, old fogy, etc. Our Association aims at building up, not destroying, at elevating, not degrading. We do not desire to have every business man considered a small retailer, nor do we wish to discourage manufacturers, but we do object to manufacturers and large corporations and companies receiving unfair advantage over other citizens, by their system of pulling down and killing out the small business so that they may grow larger and prosper. Our contention is that a thorough organization of prosperous retail merchants, doing business on fair legitimate methods, scattered throughout city, Province and Dominion, is a power that will tend to elevate the commercial and moral condition of the country, while, on the contrary, business methods as introduced and practised by

departmental stores are comparatively, in direct ratio, disastrous and degrading to the country from all stand points. We want a free and independent people, free and independent farmers, free and independent merchants, free and independent mechanics; not a few great landowners, a few merchant princes, etc. We object to a return of the old-time customs, where one man has the money, the power, the control, and the people are his tenants and hirelings.

Allow me to draw attention to one special feature of work done by our Toronto Association, and for which the drug section deserve a large measure of credit. I refer to what we call the Price Restrictive Plan, and as the plan is of vital importance to all branches of trade, I earnestly trust that every section here represented will consider the details of that plan. The plan has been tested, it is workable, and its legality is thoroughly established in Great Britain and the United States as well as Canada. Great credit is due The Ozone Company of Toronto, and The Shredded Wheat Company who have adopted the plan and are putting forth every possible effort to prove that the plan is all that we claimed for it. Let me urge every retailer to assist to his utmost any article honestly put on the market under this plan.

There is a necessity at this juncture for defining or classifying the different lines of business so that we can legally define what is a wholesaler, who is a grocer, etc. This is a question that interests merchants to-day, and the time may come when success to our hopes and plans will depend on a proper legal classification of retail and wholesale merchandising. Our Association has outspread our calculations, and is now at a stage in which it is important to revise the by-laws and constitution governing our work. I hope a competent committee will be appointed who will devote due consideration and endeavor to improve and perfect our organization.

A finance committee should be appointed, composed of members who can and will devise ways and means by which our Association may hereafter be in that happy financial condition that the question of money need never be a consideration that will deter us from undertaking any work deemed advisable and advantageous to our Association.

I would recommend that active committees be appointed on organization, its extension—legislative committee and committee on resolutions—and that the result of the deliberations of these various committees may so facilitate and perfect the carrying on of our good work that our successors may convene here next year with a record of greater achievements, greater and brighter prospects and a very large surplus, so that our most serious undertaking will be a consideration of properly and wisely investing the surplus funds of the Association.

I beg to thank the members of the Executive for the work done during the year, and in which they most faithfully and earnestly assisted. I must specially mention the consistent, persevering and energetic work done by our secretary, Mr. Trowern. We are largely indebted to him for the proud position we occupy to-day; indeed, were it not for him, I doubt if there would be a Retail Merchants' Association of Canada. I will not say that he is perfection, nor that our Association is perfection, but I believe that both he and the Association only require more encouragement and assistance to bring them to a state of perfection.

Gentlemen,—I thank you for the honor conferred on me nearly three years ago. If I have not been a very profitable officer, I trust I have always been faithful and earnest, and I hope my successor may be more worthy and competent, that he may be able to grace and honor the position as I have not been able to do, and if he is as sincere as I have endeavored to be our organization will prosper and the high position of excellency at which we aim will surely be attained.

SECRETARY TROWERN'S ADDRESS.

Secretary E. M. Trowern followed with his report. Mr. Trowern dealt chiefly with the doings of the Toronto branch of the Association. He was proud to say that they had at their back men who felt that the retail trade should be placed on a higher level. He traced the history of the Retail Merchants' Association of

Mr. W. B. Rogers, Toronto, Treasurer.

Canada from its commencement in 1897 until the present time. The first work to which the organization had set itself about to do was to see that the streets of Toronto were properly cleaned. Before that time these streets were in a filthy condition, but some of the merchants appeared before the city council and caused that body to take measures for the proper cleaning of the streets. They found that the departmental stores were not sufficiently taxed and that the smaller merchants bore an unequal and unfair share of the taxation of the city. They had set themselves about to remedy this state of affairs, and now the large corporations had to pay their share of the taxes as well. They had got the Provincial Government to appoint a Royal Commission to investigate into their charges as to the taxation of the same departmental stores. But the report of this commission had not been brought down yet. They had also caused to be passed the Exhibition by-law and had obtained representation on the Toronto Exhibition Board for two of their members. They had inspected the books of the Board and found that everything was conducted in a businesslike way. They had supported the appeals of the Yonge street merchants against their taxation and had opposed the election of the Board of Control from the whole city. Through their efforts, mainly, the present Mayor and several of the aldermen were elected. Ald. J. J. Ward had been by them placed on the Exhibition Board. They had appealed against the Merchants' Exchange, a campany which was working in Hamilton, and had the appeal carried to the courts. When the magistrate had decided adversely against them (in this matter), they had appealed against his judgment. They had considered the merits of the metric system and were urging its adoption. They had appealed against the Italians being allowed certain privileges around the Customs house, which other merchants were not accorded. They were at present making every effort to have the assessment commissioner's department thoroughly investigated. Instead of having "one commissioner, who did not understand his duties at all," they would try and get an assessment committee of their own that would be alive to the business of the city. They had formed the Retail Merchants' Association into 13 sections of the trade whereby they were enabled to better transact the particular business pertaining to each trade. During the summer they had had a number of excursions to points outside the city, picnics, and a moonlight excursion.

TOOK THEIR CUE FROM THE UNIONS.

W. B. Rogers, president of the Toronto branch, made a vigorous address. He was firmly convinced of the benefits of organization among the members of the trade. It was necessary to do this to protect their interests. For a long time the retail merchants had been separate units, with no cohesion amongst them. It was the retailers of Toronto who first formed the idea of forming the Association. They drew their model from the labor unions, who had quickly perceived the benefits of co-operation, under one central head, into a compact body. The cutting of prices by the merchants was one of the evils they had to contend against, and they were now feeling their way towards a condition of affairs that would better things in general. He praised the Price Restrictive Plan, which, he said, showed that something could be done to improve their positions as merchants. Their duty was to patronize Canadian manufacturers and build up the Dominion, making it a mighty nation.

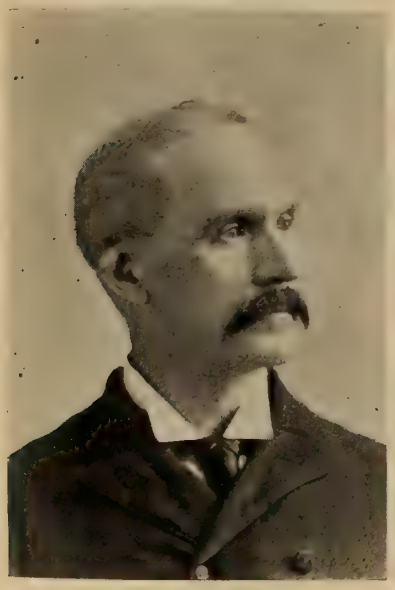
The evening and morning of the next day was taken up with the meetings of various committees and several sections

of the Association. The press was excluded from these gatherings.

The concluding session on Wednesday night of the retail merchants was held in the Temple Building, with President John Hargreaves in the chair.

DELEGATES' EXPENSES.

Mr. Hargreaves attached considerable importance to the fact that members were present from as far west as Fort William and Windsor. While the attendance was not large it was representative. The merchants should impress upon everyone with whom they come in contact that they form an Association. Provision should be made to provide the delegates with money to pay their expenses. A good many representatives were present from a distance at their own expense, which, in some cases, was considerable. He was of the opinion that some way might be thought out whereby the expenses could be supplied without



G. J. St. Leger, President.

much trouble. He was strongly in favor of the

PRICE-RESTRICTIVE PLAN.

The only man who could control the retail prices of the goods was the manufacturer. This had been demonstrated both in Great Britain and the United States, and after carefully consulting their solicitor, they found that it would be workable here and was legal in every way. Its conditions are that the manufacturers are to only sell to the retailer who agrees to dispose of his goods at a price to be fixed by the agreement. What they wanted was fair play and no favor. He was hot

AGAINST DEPARTMENTAL STORES

and was opposed to any system that was wrong. He advised outside merchants to keep their eyes on these stores, which through their mail-order system were reaching out everywhere in the country and taking away trade that rightfully belonged to the small retailer. One departmental store alone paid $17,000 duty on one order they had received through the Customs house.

THE NEW OFFICERS.

The following officers were elected :

Central President—G. J. St. Leger, Toronto.
Central Vice-President—Rev. A. L. Geen, Belleville, Ont.
Central 2nd Vice-President—B. G. Davis, Windsor, Ont.
Central Treasurer—W. B. Rogers, Toronto.
Central Secretary—E. M. Trowern, Toronto. (Accl.)

Mr. Hargreaves had declined to stand for re-election as president. Business matters and his health required that he should retire from the position that he held. So the election was proceeded with and resulted as above.

THE HAMILTON ASSOCIATION

A. M. Ballantine, Hamilton, said that the Hamilton branch of the Association was prospering well. Some merchants, it was true, were holding back, watching for results before they would join the new organization, but things looked bright for a prosperous future for the Association there. He was pleased at the election of Mr. St. Leger to the presidency. He would make a good business president, and would take much interest in the Association. Mr. Ballantine, himself, is a grocer, and he found that section prosperous at his home, and they, in Hamilton, were determined to succeed.

RESOLUTIONS RECOMMENDED.

The Committee on Resolutions recommended that resolutions be adopted as follows :

1. That the metric system be adopted and first taught in the public schools so that it should afterwards be brought into general use.
2. That the present fee system in the inspection of weights and measures be abolished.
3. That the railways should reduce their rates to the members of the Association when travelling
4. That the fees for the collection of debts in the Division Court be reduced.
5. That the Price Restrictive scheme elsewhere set forth be more widely adopted.
6. That the Government should initiate legislation to amend the Insolvency Act.
7. That the Association was in favor of a revision of the Toronto Peddling License By-Law.
8. That corporations should be made amenable to the law the same as individuals, and that all stamps and coupons should be redeemed at their face value.
9. That the false stamping of goods should be prevented.
10. That legislation should be brought about to bring the departmental stores to time.
11. That amendments should be made to the Assessment Act.
12. That Canadian merchants should be encouraged to buy and handle Canadian-made goods as far as possible.
13. That goods of Canadian manufacture should be prevented from being slaughtered on the bargain counter.
14. That the Transient Traders' Act be amended.

W. B. Rogers said that it was an act of patriotism, too, for Canadian merchants to handle only goods of Canadian make. It was in the interests of all the retail merchants to view this matter from a selfish standpoint as well, for it would greatly increase the home market if they should unite to handle only Canadian goods.

WISE WORDS FROM NEW PRESIDENT.

J. G. St. Leger, the new president, thanked the Association for his election and said that he would do his best to look after their interests. But there was a danger of their being too selfish. The interests of their customers should be the interests of the retailer. By giving a man honest measure and value for his money merchants could make their businesses prosperous. The Association need not be too selfish. They could debate on Imperial defence and other matters as well as the Board of Trade. We ought to use home-made goods, but in his opinion the proper way to do this was not to put a high tariff on things. "If we put high ideals before our workmen we can secure a proper share of trade for our home-made goods." He cited a case where he bought a consignment of shoes from the United States, which he was able to sell more rapidly and yet make a larger profit on than a consignment of the same value of shoes made in the Dominion. He believed that arbitration should be made compulsory. There were a number of other things that should be remedied. "Every man is our brother and God is our father." This, he said, should ever be borne in mind by the members of the Retail Merchants' Association of Canada.

LEGISLATION NECESSARY FOR DEFENCE

Rev. A. L. Geen believed that it was necessary to have legislation to defend their interests. The druggists, doctors of medicine, lawyers, all had legislation. "What would we have done without legislation, for, by it we secured the

E. M. Trowern, Secretary.

abolition of trading stamps ?" They had a good organizer in Mr. Trowern, and they would go home with a determination to improve their own association. They would better be able to help one another after this convention.

MISSIONARY WORK.

B. G. Davis said they would have to do some missionary work when they went home. From his short experience in Toronto, he thought there was lots of room for this same work there.

W. B. Rogers said they would be glad to receive as much help as would be forthcoming from outside.

APPRECIATION OF MR. TROWERN

E. M. Trowern, the central secretary, was thankful for their kindness in continuing him in the secretaryship. He would stay with then until he had accomplished what he started out to do. They had gained much from this convention by having many merchants present from outside the city, like Mr. Davis, from Windsor, and Mr. Geen, from Belleville, men from two points a long distance apart. He believed this was the beginning of the greatest mercantile organization in the Dominion. Their motto should be "This Association expects every man to do his duty."

The next convention of the Association will be held in Hamilton.

FOUR FIRMS AMALGAMATE.

FOUR of the leading firms of Kaslo, B.C., have consolidated. The new company is composed of H. Giegerich, Green Bros., H. Byers & Co., and A. B. Morris, and is incorporated under the name of The Byers-Giegerich-Green Co., Limited, with a capital of $100,000, making it one of the strongest corporations of its kind in the interior of British Columbia. It is understood that the business will be under the joint supervision of H. Giegerich and R. F. Green. A. B. Morris will be manager of the hardware department and Geo. Stott, of Green Bros., will be in charge of the other departments. The other branch stores of Messrs. Giegerich and Byers at Sandon, Ainsworth and Nelson are not included in the combine, but will be continued as heretofore. The idea is to make Kaslo more of a centre for wholesale business and the new firm will endeavor to supply the wants, and to create a strong commercial connection with retail stores in the surrounding neighborhood. With the capital at command, and with experienced men like the members of the new corporation, it is fully expected that not only will the firm themselves be financially benefited, but that Kaslo generally will find trade brisker.

PROMOTING TRADE WITH GREAT BRITAIN.

Mr. C. F. Strangewayes Barker, representing the Incorporated Chamber of Commerce, Liverpool, England, has been touring in Canada and calling on several manufacturers with a view to procuring agencies in England for any of the more important manufacturers who wish to extend their business with the Old Country. Those who are interested in this might find it to their advantage to communicate with Mr. Barker. His address is B10, Exchange Buildings, Liverpool, England.

A RUSH OF DEALERS.

The value of advertising has seldom been more clearly manifested than by the fact that, a few days ago, the United Factories, Limited, whose head office is located at 80 York street, Toronto, invited the dealers throughout the country who handle their splendid lines of brushes, brooms and woodenware to call on them while visiting the Industrial Exhibition. The result has been that the warerooms and offices of the company have been fairly deluged with visitors. Mr. Emil C. Boeck, the president, and his staff, are pleased to welcome Fair visitors and give them any possible information regarding their processes of manufacture, etc. The management of the United Factories more than ever see the advantage of supplying the trade with the highest class of goods. What is sacrificed in the small profits to the manufacturer is more than made up in the good-will and confidence of the trade.

GOOD VARNISH

The Sherwin-Williams Varnishes

are as good as it is possible to make.

They are manufactured with the greatest care from good materials only.

They are of uniformly good quality.

They are true to the label, work right and wear right.

They are prime favorites with the painter.

They are good sellers.

The quality of The Sherwin-Williams varnishes and the advertising back of them are the same as have made our house paint, S. W. P., so successful.

It has paid us to put such a line on the market, and it will pay any dealer anywhere to have them on his shelves.

They never go wrong where properly used and are the kind of varnishes that build up a satisfactory and ever-increasing varnish trade.

Write to-day for prices and further information.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

A STOVE FIRM'S FAILURE.

Scott & Jennings, who also traded under the style of John Milne & Co., dealers in stoves, awnings, etc., 4 Queen street east, Toronto, recently assigned to George Clay. A meeting of their creditors was held in the office of Mr. Clay on September 5, and a statement was submitted showing liabilities altogether approximating $8 200, and assets of stock amounting to between $2,000 and $3,000. The liabilities include a chattel mortgage of $3 500, but the mortgagees altogether have claims amounting to $6,590. The estate will be wound up, and Mr. Clay was appointed liquidator.

A CLOCK FOR MR. TAYLOR.

Mr. Frank J. Taylor, the senior member of The Western Foundry Co., the new stove manufacturing firm, of Wingham, Ont., left Toronto on Tuesday last to assume his new duties. A few days before his departure Mr. W. L. Helliwell, on behalf of the office and travelling staff of The Gurney Foundry Co., Limited, presented Mr. Taylor with a handsome marble clock. Mr. Taylor has entered upon his new venture with the best wishes of all his old confreres in The Gurney Foundry Co. He is succeeded as buying agent in that firm by Mr. E. Hogan, who has been with The Gurney Foundry Co. for four years, part of which he has been assistant buying agent.

AUTOMATIC SCREWDRIVER.

The angle slant of the spiral determines the relative power of the automatic screwdriver.

Goodell-Pratt Co.'s automatic screwdriver does not turn the screw around as many times for a given distance, but the process is much easier and screws of greater dimensions can be handled. Combination tools, as a rule, are neither practical nor popular, unless they embody separate and distinct mechanisms in such a way as to obviate any difficulty of interference on the part of different elements.

Decatur, Bull & Co., Montreal, are the sole agents for this automatic screwdriver.

Geo. Awde, formerly a clerk in Smith & Pethichis' hardware store, Wingham, was married at Uxbridge on Wednesday of last week to Miss Jennie R. Jones.

TRADE CHAT.

J. AND H. FIELD, of Teeswater, have purchased the hardware business of Robert Campbell, of Mitchell.

C. E. Morgan, travelling salesman of the Northey Manufacturing Co., Toronto, is dead.

J. P. Noonan, hardwareman, of Mount Forest, Ont., is making considerable addition to the rear of his hardware store on Main street.

Guelph is now after some tube works and will submit a bonus by-law. Tube or not tube, that is the question. — Brantford Courier.

Charles W. Short, with H. H. Dryden, hardware merchant, Sussex, N.B., was married recently to Miss Frances J. Smythe, of Sussex.

On September 3 Jas. P. Fennel, of J. Fennel & Son, hardware and coal merchants, Berlin, Ont., was married to Miss Grace Bowlby.

M. Henry Jones, a prominent hardware merchant of Dawson City, Y.T., was married at the Fort Range Methodist Church on September 3 to Miss J. H. Douglas.

The late Senator McMillan, of Detroit, left $250 each to all the employes of his hardware concern and $5,000 to each of his three managers. His estate was valued at $10,000,000.

Friends of H. Sapery, manager of the Syracuse Smelting Works, Montreal, will sympathize with him in the bereavement he has sustained in the death of his father, A. Sapery. Mr. Sapery, sr., went to England this summer on a pleasure trip, and whilst there he fell sick.

The Canadian Pacific Railway have awarded the contract for building four new car and locomotive shops at Hochelaga, to Lessard & Harris, of Montreal, the price being $235,000. The buildings will be of brick and will be started at once with a force of 200 men.

COULDN'T TAX OIL MERCHANTS.

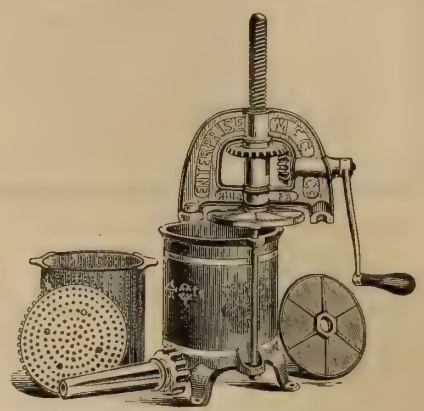
The town council of St. Henri, Que., a short time ago passed a by-law in regard to the sale and delivery of oil throughout that municipality, which has been objected to as illegal by the Recorder, Mr. La Rochelle. In the by-law it was provided that a yearly tax of $20 should be paid by every oil merchant who distributed his goods by means of a vehicle drawn by one horse. When the vehicle was drawn by two horses the fee should amount to $100, and when three horses were required $150 should be paid. The Recorder gave judgment in a case on Friday, September 5, in which he maintained that the by-law established an illegal and unjust discrimination between dealers as regards the manner in which they delivered their goods.

INCREASING IN SALES.

The rapid increase in the sales of the National Cutlery Co.'s shears with several of our wholesalers speaks well for their quality and finish. They are laid with special steel of superior quality, tempered by a patented method, which process gives uniform results. There are no soft spots, no feather edges. They are claimed to be the only shears made with a steel ride, and every shear is fully warranted. They are put up in separate pockets. The agents for Canada are Decatur, Bull & Co., Montreal.

SAUSAGE STUFFER AND LARD PRESS.

The Enterprise Manufacturing Co., of Philadelphia, Pa., having in mind at all times the improvement of the articles of their manufacture, assert that the "Enterprise" sausage stuffer and lard press as now furnished is undoubtedly the very best machine of the kind ever offered.



Each and every stuffer cylinder is bored true so that when stuffing, there being no space between the edge of the plunger plate and cylinder, the material must pass through the spout.

The lips on the tin cylinder make the handling and emptying of same very easy and prevents burning of the hands which is often the case with cylinders not so fitted.

The new patented spout furnished with each stuffer is vastly superior to the old style, in that the corrugations prevent air entering the casing while stuffing, thus obviating the necessity for puncturing the casing, which must be done when using the old style spout, and assuring the preservation of sausage. The "Enterprise" stuffer is the only one possessing these features.

A pretty wedding took place recently at Port Williams, N.S., at the home of John Masters, when Miss Hattie Masters was united in marriage to Mr. White, who is a traveller for The Sherwin-Williams Paint Co.

C.P.R. EXHIBIT.

It was an excellent idea of the Canadian Pacific Railway Co. to establish a building of their own at the Toronto Exhibition. Apart from the fact that the railway's exhibit is much more easily and comfortably inspected in a separate building than it would have been in the crowded main building, it obtains a certain distinction of its own by reason of its isolation.

This year the exhibit has been completely, or almost completely, devoted to illustrating the capabilities of the Canadian Northwest as a grain-producing country. The large, bright building of the company has been artistically decorated with the yellow grain. This has been arranged in a clever manner to cover the walls and to form arches across the ceiling, and it is done in such a way as not to appear the least monotonous. On the long western wall surrounding the C.P.R. coat of arms, grain from Sir William Van Horne's farm at Selkirk is disposed. This exhibit elicited much favorable comment. On tables along the western wing choice specimens of vegetables, pumpkins, beets, turnips and many other varieties were shown. There were also several of the company's handsomely-framed pictures on view, which added to the attractiveness of the interior. Altogether, the C.P.R. building was a decided relief from the confusion surging around other exhibits. The entire charge of the exhibit is in the hands of W. S. Dockrill, who has made an excellent disposal of the ample materials at hand.

ADVERTISING THE WEST.

The Winnipeg Free Press is evidently bound to make the wonders of the Western wheatfields known to the rest of the world. Its latest scheme has been to utilize the post office system to carry samples of Manitoba No. 1 hard wheat all over the country. The little bags containing the wheat are attached to large cards, on one side of which two pictures of the wheatfields are shown, giving a splendid idea, first of the vastness of the fields and secondly of the size of the growing grain. On the reverse side of the card, some facts about Winnipeg, the West and The Free Press itself are supplied.

MANAGING THE BUSINESS.

THE GOLDEN RULE IN BUSINESS.

PHILLIP PRESENT, Rochester, N.Y.

WE learn through history and experience that men through the instinct of self-preservation formed organizations. When two or more men found something in common, the same interests to protect, the same ideals to attain, they united, knowing well that in unity there is strength. We have also learned that through selfishness and the clashing of interests the strongest organization, whether civil, political, or religious, will be wrecked. So we have this lesson; if our organization is to be a power for good we must not base our existence entirely on selfishness, although the germ that produced it, like any other production of man, usually is selfishness. It must be built on the broad principle of a great moral and ethical platform, where all good men can support it. It is true that we are supposed to be watch-dogs of our household; we bark frightfully, snap or bite according to the nature of the beast if someone attempts to steal that which it is our duty to protect. We would not be worthy of our trust if we did not strive to do so. We want our customers to meet their obligations when due so that we can meet ours. We want to impress upon them, that it is neither honest nor honorable to order goods from us, and afterwards cancel the order or return the goods; that it is plain stealing to take a discount of 10 per cent. when 6 per cent. was specified; and that 60 days does not mean six months. Too long have we allowed the tail to wag the dog. We place too little value on our goods when we sell merchandise to parties in amounts equal to ten times as much as we would be willing to loan in cash, and allow trade abuses to continue through the fear of competition. We ourselves have two kinds of ethical rules, one for those who steal money, and another for those who steal merchandise. Public opinion, therefore, is not shocked or outraged by dishonest failures in mercantile life as it is by any other transgression of morals, and for that reason the law-making bodies of our States have statutes entirely in favor of the debtor class. It is a natural consequence that we usually get no more than we deserve, considering we are the first to suffer under the present state of affairs. It follows, that the duty devolves upon us to educate the public to a higher standard of ethics in business life. It is as rare now to see a smile on the face of a credit man as a 25 per cent. dividend in a bankruptcy case; and what can we expect? In every commercial death we occupy the mourner's bench on the first row; it is our funeral and no one else's. We used to have a laugh once in awhile when in a failure we would get ahead of the other fellow, but since the National Bankruptcy Law has come into existence we are deprived even of that. I have stated to you conditions which you all know by experience. You will ask, what is the remedy? First, let us eradicate selfishness and be what we wish the other fellow to be, honest and honorable. If the creditor class, manufacturers and jobbers, agree among themselves to abolish trade abuses and have an association for that purpose, they should live up to it, even at the cost of some sacrifice; the end will justify the means. Second, let us pledge ourselves to do all we can and drive the rascals out of business life by not supplying them with goods, even for cash; it will have a greater effect than a prosecution fund and be more justifiable. Third, having set a standard of integrity among ourselves we can have the courage of our convictions and educate others, as well as compel them, to be honest.

FAILURES AND THEIR CAUSES.

J. J. DOLPHIN, Buffalo, N.Y.

The subject is a very broad one, and in competent hands would afford a great fund of instruction for credit men. I confess inability to do the subject even moderate justice; however, I will present to you some statistics taken from Bradstreet's Record, which will give you a partial idea of the wide extent of the subject, and afford a beginning for further discussion.

Failures in the United States for the last four years are as follows, as to numbers in business and numbers failed:

	Number in Business.	Number Failed.
1898	1,093,373	11,615
1899	1,125,873	9,642
1900	1,161,639	9,912
1901	1,201,862	10,648
Totals	4,582,747	41,817
	Liabilities.	**Assets.**
1898	$141,611,413	$73,161,328
1899	119,775,255	60,140,250
1900	127,177,909	60,128,006
1901	130,109 678	61,098,831
Totals	$518,674,255	$254,528,415

Showing a net loss in the four years of $264,151,840.

There are eleven causes assigned for failures, and placed under the following headings:

Incompetence, inexperience, lack of capital, unwise credits, speculation outside of business, neglect of business, extravagance, fraudulent disposition, specific conditions, failure of others, undue competition.

Under these headings we have the following percentages, first, as to members, and second, as to liabilities:

	1900. Per cent.	1901. Per cent.
Incompetence	17 9/10, 16 6/10	19, 16 6/10
Inexperience	7 7/10, 3 2/10	7 8/10, 2 8/10
Lack of Capital	32, 23 8/10	30 3 10, 22 1 10
Unwise Credits	2 9 10, 2 2 10	3 6 10, 6 4/10
Speculation	2 2/10, 8 3/10	2 3/10, 6 4/10
Neglect of Business	3 4/10, 1 4/10	1, 1 6/10
Extravagance	9/10, 1	3, 1
Fraudulent Disposit'n	11 3/10, 8	4 4/10, 2 4/10
Specific Conditions	14 4/10, 31 2/10	16 4/10, 30 1/10
Failure of Others	2 3/10, 4 6/10	1 3/10, 3 4/10
Undue Competition	6, 2 3/10	10 2/10, 7 2/10

From these last figures it would appear that there are three conspicuous causes of failures, viz.: Incompetence, lack of capital, and specific conditions; the latter covering any happening out of the normal, such as strikes, great calamities, failure of crops, etc. Fraudulent disposition takes fourth place as to number and liabilities, and seventh place as to assets. There is a noticeable feature in this cause to which I would call your attention, viz., a marked decrease in the number and liabilities in 1901 as compared with former years. In 1898 the number per cent. was 10 2-10 per cent., the liabilities, 8 per cent.; in 1901 the number per cent. was 4 4-10, and liabilities, 2 4-10, while in 1899 and 1900, the number and per cent. of both liabilities and number was almost the same, 11 3-10 number, and 8 per cent. liabilities. There is opportunity for speculation in this as to what may have been the cause which produced the result. Specific conditions leads the list as to liabilities; lack of capital, second; incompetence, third; fraudulent disposition, fourth; failures of others, fifth; speculation outside, sixth; unwise credits, seventh; undue competition, eighth; inexperience, ninth; extravagance, tenth, and neglect, eleventh.

As to assets, the relative positions are changed, with the exception of specific conditions, lack of capital and incompetency, each of which holds relatively the same place with the liabilities. Failures of others comes fourth; unwise credits, fifth; speculation, sixth; fraudulent dispositions, seventh; undue competition, eighth; inexperience, ninth; neglect, tenth; extravagance, eleventh. Eight of the causes of failure are within the control of the trader, three are practically beyond his control, namely, specific con-

ditions, undue competition and failure of others.

To go into the analysis of each of the causes and their effects would require much time and labor, together with the ability to draw a correct conclusion. I will, therefore, not attempt this, but leave it for others. There are, however, four prominent causes which present themselves most forcibly to our attention; one of these, specific conditions, is a difficult problem for the credit man, and almost, if not quite, beyond his control as well as that of the trader. The three others are conditions more nearly within the vision of the credit man, though one is also a difficult problem, and usually almost out of the vision, namely, fraudulent disposition.

It would be a bright man who could foresee that disposition in the majority of cases. The other two causes are more nearly within the control of the credit man, and may be foreseen by careful study of the trader's condition.

THE WOES OF A RETAIL MERCHANT.

In order to show up the fallacy of the credit system and the unreasonableness of most debtors, the following tale of woe is related by a Canadian business man:

A man dealt with a merchant for several years and paid his bills promptly for some time, but he unfortunately conceived the idea of building a house. Now, because he did not have the necessary cash, he left the merchant after he had run up an account of some $40 and spent his spare cash on the construction of his house. This same plan was likewise followed with the other ten merchants in the town and the man gets ahead, say, $250. This pays for his lot and in addition allows him $150 to apply on his loan.

After awhile Merchat A. begins to want his money, and of course he very impertinently writes to the man, saying, as the latter is now buying his goods elsewhere, he would like to have his account settled. This makes the debtor very indignant, and he says to himself, "Here, I have been dealing with Mr. A. for a good many months and I always paid him promptly and now, even if I am dealing elsewhere, it is mean and contemptible of him to demand his money. I'll just go down and give him $10 and a piece of my mind "into the bargain."

This he proceeds to do, and the merchant, who has been used for years to hold himself in, takes it all in good part, and hands out a receipt for $10. The balance is to be settled next pay-day.

Pay-day comes and goes, and many another pay-day comes and goes, but the account is not paid. Naturally, creditors make demands on the merchant, and he is forced to ask for the settlement of the account with interest, adding the threat that, if not paid, it will be placed in court for collection. This is more than Mr. Debtor can stand. He gets very angry and goes to his employer and tells him what a mean man this merchant is to ask him to pay interest. However, he gets a sufficient advance of wages to pay the merchant off. He walks into the store with an air of injured innocence and explains that he wants to pay up his balance. The merchant is so pleased to get his money that he accepts payment without interest, notwithstanding that he has been paying the bank interest on this amount and others as well for the past two years.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINERY AT TORONTO INDUSTRIAL FAIR.

MACHINERY hath charms. Mechanical contrivances, skilful devices and labor-saving instruments awaken in even those unlearned in the ways of wheels, valves and powers admiration and wonder. The machinery hall of the Exhibition during the last two weeks has been humming and singing with the joy of busy industry.

"Hardware and Metal" has many friends among machinery men and to renew acquaintances its representative visited the hall this week and received a cordial welcome.

Entering the hall at the west door the first exhibit that confronts you is that of The A. R. Williams Machinery Company, Limited, 95-97 Front street west, Toronto. Wood-working machines at the Exhibition are scarce this year, but this company has an exhibit of the quick-return shaver, manufactured by The MacGregor-Gourlay Company, of Galt. Another noticeable feature of this well-assorted exhibit was the improved "Eclipse" planer, matcher and moulder, made by Major Harper & Son, manufacturers of woodworking machinery, in Whitby. Mr. Harper was in charge and operated the machine. A noteworthy factor in the makeup of the machine was the "Ross" device, which enables the machine, when the knives are kept in balance, to do perfectly smooth surfacing. The machine has four 3½-in. feed rolls, all power-driven. There is a pressure bar on the front side of the cylinder, which has both a lateral and vertical adjustment. The cylinder is rigid with the frame and always in line with the top rolls and pressure bar. The machine is meeting with a phenomenally large sale, owing to its serviceable character for a general jobbing wood-working shop.

On the north of this exhibit The Northey Company, Limited, Toronto, are exhibiting a full line of steam and power-pumping machinery, especially adapted to farm purposes. Their portable gasoline engine is particularly suited to the need of the farming community.

The Goold, Shapley & Muir Company, Limited, Brantford, have on exhibit a line of gas engines.

The Bradley, Levy & Weston Company, 102 Front street west, Toronto, are handling an exhibit of Goldie & McCulloch machinery.

The United Electric Company, Limited, of 134 King street west, Toronto, are showing some of their direct-current electric motors. These motors are made in sizes from 3 H.-P. to 50 H.-P., and their makers claim that they develop full rated power without drop in speed, overheating or sparking.

The Mica Boiler Covering Company, 9 Jordan street, Toronto, have an exhibit of mica coverings for boilers, steam and hot-water pipes, furnaces, flues and ovens. The manufacturers are showing it to interest people in what they claim to be the highest non-conductor of heat on the market.

A fireman, who, were he human, would seek to destroy the destructive flames constitutes one of the features of the exhibit of The Eureka Mineral Wool and Asbestos Company, 136 Bay street, Toronto.

The only oil exhibit on the grounds occupies a portion of the machinery hall. The Grant-Hamilton Oil Company, Limited, manufacturers of "Sterling" oil, are showing some of their lines of oil, grease, engine packing and general engineers' supplies. They are the sole Canadian agents for the varnishes of Murphy, Chicago.

Quite an extensive exhibit is made of Spooner's Copperine. Alonzo W. Spooner, of Port Hope, Ont., is the maker of these goods, which are specially put up for the hardware trade.

"Neverslip" is the name of a pulley covering which The Hamilton Manufacturing Company, of Toronto, are exhibiting at the eastern section of the hall.

Near neighbors to these with a well-assorted exhibit are The Crown Boiler Compound Company of 54 Bay street, Toronto.

The Toronto Liquid Carbonate Company are showing their Davies' patent Fire King. It is the claim of the company that the cost of maintenance is less than in the case of the ordinary chemical engines, because the charge of chemicals put into the engine is lost the moment it is brought into use, whereas the gas of Davies' "Fire King" is turned off and practically without loss.

The Electrograph, which can copy the picture of a politician at a distance of 800 miles, and supposedly, of ordinary individuals at a much greater distance, is shown by The Consolidated Electric Company, Limited, Toronto. They are making a specialty of their King Edward dynamo and motor.

The Queen City Cycle and Motor Works, 304 Queen street west, Toronto, are showing some of their Queen City wheels. The wheels have heavy laminated wood or steel rims and carbureters of the float-feed type. The front view shows an extreme width of six inches.

John J. Jessup is in charge of the gas and gasoline engines of The Fairbanks Co., 747-749 Craig street, Montreal. The Fairbanks engine is especially adapted for operating small machines in the shop or on the farm, or for electric light purposes. The Fairbanks Co. are agents for "Dodge" goods, and they claim, carry the largest stock of pipe in the Dominion. They have water-pipe tools especially adapted for cutting long threads.

The Toronto and Hamilton Electric Company, of Hamilton, manufacturers of diresct-current dynamos and motors, induction motors, exhibit an 18 K.W. direct-current generator, belled type.

Jones & Moore are exhibiting some of their machines which they manufacture at 22 Adelaide street west, Toronto.

One of the most interesting exhibits in the machinery hall is that of The Chapman Double Ball-Bearing Company. They exhibit some very interesting tests to demonstrate the worth and durability of their bearing. They have some wagon wheels from a vehicle which has carried eight tons of pulp; also a cylinder, weighing 6,728 lb. with an initial speed of 240 revolutions per minute, which spins 56 minutes after the removal of the belt.

Lead pipe, babbitt metals, block tin pipe, stereotype metals, etc., constituted the exhibit of The Canada Metal Company, William street, Toronto.

The Toronto Roller Bearing Company, Limited, have tests whereby to demonstrate the superiority of their bearings over others. This company has secured control of the Henderson roller bearing. Their head office is in the Temple Building, Toronto.

A. H. Tallman has charge of the exhibit of J. N. Tallman & Sons, of Ham

65 Shannon Street, MONTREAL.

ilton, Ont. Their special exhibit is their Arctic Anti-friction Metal; but they are showing machinery and ornamental brass, phosphor bronze, zinc, copper, etc.

Messrs. Arthur Betton, C. M. B. World, ——. McLaren and Fred Armstrong have in charge one of the best exhibits on the ground. It is that of The James Morrison Brass Manufacturing Co., Limited, 89-97 Adelaide street west, Toronto. They are showing a display of gas, electric and combination fixtures, marine twin safety valves, locomotive injectors and gauges. They are also showing a full line of J. M. T. brass and iron body valves, "Pop" safety valves, binnacle and compass for steamboats, steam whistles and Hancock inspirators, J. M. T. injectors. A noteworthy feature of their exhibit is the model bathroom with a patent folding shower for bath; also Quinn automatic flushing valve. This company are the sole agents for the Heintz steam traps.

The United Electric Co., Limited, of Toronto, have on exhibition electric generators, motors and arc lamps, with alternating or direct current.

The Goldie-McCulloch Co., of Galt, have their "Ideal" engine running the south line of shafting in the machinery hall. They have also on view one 12-in. moulding machine, sold to The Wiarton Beet Sugar Co.

The Dodge Manufacturing Company, of Toronto, are showing some of the Dodge standard wood-split pulleys, of which they are the sole manufacturers. They have as well an exhibition of their friction clutches or cut-off couplings.

S. Vessot & Co., Joliette, P.Q., have an exhibit of their "Champion" feed mill.

The Gee Electrical Co., 11 Colborne street, are showing their dynamos, motor and light generators.

The D. K. McLaren Co. are showing an exhibit of genuine oak-tanned leather belting.

An exceedingly extensive and excellent exhibit is given by The Canada Foundry Company and The Canadian General Electric Company. They show some of their fences, grilles, stair cases, office railings, set and cap screws. They have as well a good machine display.

In the implement building The Page Wire Fence Company, of Walkerville, occupies one of the most conspicuous portions of the space. Among the others exhibiting in this building are The Aylmer Iron Works Co., Limited; The Cyclone Woven Wire Fence Co., of Toronto; The Ideal Woven Wire Fencing of The MacGregor-Banwell Co., of Windsor; The Sylvester Gasoline Engine Company of Lindsay, Ont.; the ice harvesting tools of Robert Donaldson & Sons, Montreal; the marine gasolone engines, manufactured by The Hamilton Model Works of Hamilton; the gasoline engines of The Gasoline Engine Co., of Toronto Junction; the Dominion gasoline engine of The Dominion Motor and Machine Co., Limited, Toronto.

The general nature of the whole exhibit was very fair, equal to that of most years and in some respects better. It cannot be denied that considerable benefit accrues to the exhibitor, but manufacturers are manifesting a feeling that the cost of making the exhibit is often out of all proportion to the results.

Said one manufacturer: "We spent easily $500 last year in making an exhibit here, but to my knowledge no direct results ensued. It's very nice to shake hands with old acquaintances, and I suppose, indirectly, results come; but had I invested that $500 in newspaper space I could have traced results."

Said another: "We would not have had an exhibit this year, but they asked us to run a line of shafting and we've always done it since the hall was erected, and so we came."

Others believed that the Exhibition gave in a direct practical manner the kind of information that people wanted, but all were averse to breaking into the busiest portion of the year.

AUTOMOBILES HAVE COME TO STAY.

In a recent number of Outing William J. Lampton declares that at present automobiles are too complicated and prices are too high for general adoption. The ratio of machines to population in the United States, 12,000 to 78,000,000, say; that is, one to every 6,500 persons, does not at first appear promising, but when we consider that only three years ago the ratio was one to 1,500,000 persons a very different aspect is presented, and it may be safely concluded that with such possibilities of demand the automobile must of necessity grow to meet the measure of its greatness. American makers are quicker to see this opportunity than are their foreign rivals, as is proved by prices. Foreign machines are sold in this country at from $2,500 to $20,000, the record price paid by a wealthy New Yorker for a French machine, while the highest-priced American machine is $5,000, and hundreds are in use which cost their owners from $650 to $800. A good horse and wagon may be had for $200, and the automobile must approximate this figure to become popular. That this may be done and still be profitable to makers is shown in the history of bicycle prices, and in the further fact that one of the first American makers, with the popular ideal in view, made machines to sell at from $400 to $600, and advanced his prices later because he could get whatever he asked.

EMPLOYMENT OF ELECTRICITY.

Bradstreet's, New York, says: "Evidences of the immense extension of the employment of electricity in recent years lie about us on every side, but, perhaps, there is none more striking than the utilization of this force in transportation. Some statistics which serve to measure this growth have lately been given out by the Census Office. It is shown, for example, that in 1890 there were 2,895 electric cars in use on street railways out of 32,505 of all kinds, and 1,262 miles of track out of 8,123. By the year 1899 the number of electric cars had increased to 50,658, and the length of track to 17,969 miles. The importance of the field which has been so successfully invaded by electric traction and its extension under new conditions may be measured by the fact that whereas in 1890 the total capital and funded debt for all such railroads was $363,150,000, in 1900, the total for 871 street-railway systems, chiefly electric, was $1,023,819,987 capital stock and $777,862,571 funded debt, making a total of over $1,800,000,000, or about five times the aggregate for ten years before. The cost of operation by the electric motor seems to be below that entailed by the employment of the cable or of the horse. This is shown by figures furnished by The Metropolitan Street Railway Company of New York, which makes the cost of operating with the cable car 17.76 cents per mile and with the horse of 18.98 cents, as compared with 13.16 cents with the electric motor.

ELECTRICAL NOTES.

Jones & Moore have sold an 18 H.-P. 250-volt generator to Mr. Dobson, of Beaverton.

W. W. Carter, of Fesserton, has purchased a 30-light dynamo from Jones & Moore, Toronto.

J. Robinson & Son, of Oshawa, have purchased a 150-light dynamo and switchboard from Jones & Moore.

In a fire at West Lorne, Ont., on September 1, The Electric Light Company lost $2,000, with insurance of $1,800.

Jones & Moore, Adelaide street west, Toronto, have sold a 250-light generator to the Maple Leaf Woollen Mills, Markham.

The Kay Electrical Dynamo and Motor Co., Queen street east, Toronto, have sold a 20 H.-P. generator to The Smith's Falls Woollen Mills. The same company has also purchased from The Kay Company an 8 H.-P. motor.

Jones & Moore have sold a generator to A. F. Bowman, of Owen Sound; also one 40 H.-P. 250-volt generator, with switchboard and a 5 H.-P. 250-volt generator to The Ontario Malleable Iron Co., of Oshawa; also a 2 H.-P. 500-volt motor to W. C. Hunt.

U. S. LOCOMOTIVE INDUSTRY.

The United States census report on the manufacture of locomotives, just issued, says:

The reports show a capital of $40,813,793 invested in the manufacture of locomotives in the 28 locomotive works reporting for the United States. The sum represents the value of land, buildings, machinery, tools and implements, and the live capital utilized, but does not include the capital stock of any of the manufacturing corporations engaged in the industry. The value of the products is returned as $35,209,048, to produce which involved an outlay of $10,899,614 for wages; $1,369,341 for miscellaneous expenses, including rent, taxes, etc.; and $20,174,395 for materials used, mill supplies, freight and fuel. The census schedule takes no cognizance of the cost of selling manufactured articles, or of interest on capital invested, or the mercantile losses incurred in the business, or of depreciation in plant. The value of the product given is the value as obtained or fixed at the works.

During the census year 1900 there were 28 establishments, the sole or chief product of which was locomotives. At these works 2,774 locomotives of all classes were built, with an aggregate value of $27,121,063, compared with 2,409 locomotives, valued at $19,752,465, built in 19 establishments in 1890. In addition, 272 locomotives, valued at $3,276,393, were constructed at 26 railroad shops, making a total of 3,046 locomotives, valued at $30,397,456, built in 54 establishments during the census year 1900. The figures for 1890 do not include locomotives built in railroad shops.

Trade Standards

NOV - 1 1902
RETURNED

are Boeckh's Standard Brooms, Bryan's London Brushes and Boeckh's Standard Brushes, Cane's Newmarket Woodenware.

The high standard of excellence to which these goods have attained is not only a source of satisfaction to their manufacturers but a guarantee to the trade that in handling our goods dealers will always retain the good-will of their customers and at the same time have the largest possible margin of profit.

Boeckh's Bamboo-Handled Brooms—Labor-lighteners, none can equal them as trade-winners.

Brooms and Whisks—Buying direct from the growers enables us to quote lowest market prices.

Brushes—Artists' Brushes; Painters', Varnishers' and Kalsominers' Brushes; Toilet Brushes; Household, Machinery and Factory Brushes; Horse and Carriage Brushes, etc.

Stable Brooms—Bass, Rattan, Cane, Split Cane, etc. Special Broom made to order for Breweries, Street Sweepers, etc.

Feather Dusters—Turkey Feather Dusters, Peacock Feather Dusters, Hemp Dusters, Wool Dusters, Barbers' Dusters, Hearth Dusters, etc.

Cane's Newmarket Pails and Tubs—Noted for their wonderful durability—a triumph of worthy goods and ready sellers

Washboards—Latest improved styles—boards that will give perfect satisfaction.

Clothes Pins—Loose or in 4 or 6 dozen packages—all selected, perfect Pins.

Butterware—Barrel Churns, Ash-Dash Churns, Butter Dishes, Bowls, Paper, Spades, Ladles, Moulds, Prints, Stamps, etc —a wide range that keeps well to the front.

Kitchenware—Washers, Wringers, Self-Wringing Mops, Bake Boards, Rolling Pins, Pie Plates, Spoons, etc. Extra value in this line—a wide variety.

Cocoa Mats—Extra Brush Edge, Skeleton, Fancy, Wool Border, Rush and Corn Mats, etc.

Baskets—Butter Baskets, Market Baskets, Hampers, Grocers' Delivery, Waste Paper, etc.

Cordage and Twine—Clothes Lines, Halters, Plough Lines, Ropes, Twines, etc. Goods that pay the dealer to handle and the customer to ask for.

If one of our representatives has not yet called upon you and you are in a hurry for goods, write, 'phone, or telegraph to us direct at our expense.

CANADIAN WHOLESALE HARDWARE ASSOCIATION.

The Fourth Annual Convention in Montreal.

THE fourth annual convention of the Canadian Wholesale Hardware Association was held in Montreal on September 4 and 5. This is the first time the Association has held its meeting in that city since its formation four years ago. The president, W. Starke, of Howden, Starke & Co., Montreal, presided over the meeting.

The firms represented at the convention were: H. S. Howland, Sons & Co.; Rice Lewis & Son; Caverhill, Learmont & Co.; A. Macpherson & Son; Howden, Starke & Co.; Wood, Vallance & Co.; D. H. Howden & Co.; Canada Hardware Co.; L. H. Hebert; Seybold, Sons & Co.; Letang Hardware Co.; John Bowman Hardware and Coal Co.; Hobbs Hardware Co.; H. Lemieux & Fils; Lewis Bros. & Co.; D. H. Howden & Co.; Thos. Birkett & Son Co.

The report of the secretary-treasurer showed the affairs of the Association to be in the most satisfactory condition.

A number of manufacturers were unable to be present, and letters expressing their regret were read.

At the close of the sittings on Friday morning much regret was expressed at the accident to Robert Starke, and a vote of sympathy was passed for him. The information was given that Mr. Starke, although still in the hospital, was on a fair way to recovery. An operation had to be performed, two of his ribs having been broken, but he had come through it successfully and continued improvement in his condition was expected.

At the election of officers for the ensuing year the following were elected for the various positions:

President—Thomas B. Lee, of Rice Lewis & Son.
Vice-President—Fred. O. Lewis, of Lewis Bros. & Co.
Executive Committee—Thomas Birkett, M.P., of T. Birkett & Sons Co; John Bowman, of The John Bowman Hardware & Coal Co; A. Jeannotte, of L. H. Hebert; C. A. Whitman, of The Hobbs Hardware Co.; William Shaw, of The Chinic Hardware Co.
Secretary-Treasurer—Jenkins & Hardy.

On Thursday evening, September 4 a banquet was tendered to the members of the Association and a number of others connected with the hardware trade, by the retiring president, W. Starke, at the Windsor Hotel.

The guests, to the number of about 50, sat down to an excellent dinner, and nothing but praise could be heard for the arrangements of everything in connection with the occasion.

The toast list was not long, but was one well suited to the occasion, and elicited many clever and entertaining replies.

President Starke first proposed a toast to "The King," whose health was drunk to the tune of "The National Anthem," which was followed by that of "Our Country," the chairman calling upon Mr. Newman, of Caverhill, Learmont & Co., for a reply. That gentleman responded in his usual happy vein, and his remarks, though brief, were of a patriotic character which drew frequent applause from his hearers.

"Our Association" was fittingly replied to by Peleg Howland, a past president of the Association, who made the banqueters laugh heartily more than once, and also by Thomas B. Lee, the new president.

Mr. Lee, as the head of the Association for the ensuing year, was given a splendid reception on rising, referring, in the course of a happy reply, in terms of deep appreciation to the honor done him in his election, and to his determination to do all in his power to further the interests of the Association during his term of office.

"The Manufacturers" was the next toast, and, as there was not lacking a good number of that fraternity at the banquet, several short replies were heard.

Mr. Gould, of Hamilton, was called upon by the chairman to answer to the toast of "The Ladies," and Mr. Gould did so in a very pleasing manner.

The evening was not brought to an end until a toast was proposed in honor of the host, Mr. Starke. That gentleman replied briefly, expressing his satisfaction with the incoming president of the Association, and the pleasure it afforded him to give way to one so worthy.

Mr. Thomas B. Lee, President of the Canadian Wholesale Hardware Association.

IN BUSINESS 35 YEARS.

The Welford Bros., manufacturers of cotton, hemp and jute twine and cordage, Glebe street, London, have just completed their 35th year of business. They started the cordage and twine business in 1867; they added in 1887 brooms and whisks to their manufactures. Each year they have added to their broom plant the best machinery known to the trade.

Welford Bros. also make a specialty of halters, making the new cavalry halter, and as well all kinds of leather, web and rope halters. In these lines their trade extends all over the Dominion. They have an enormous trade in rope cattle ties, clothes lines and plow lines and commercial twines.

THE GOODELL

REVERSIBLE

Automatic Screw Driver.

EACH WITH THREE TOOL STEEL BLADES

for both driving and drawing screws automatically it is unquestionably the finest specimen of mechanical ingenuity ever produced.

Practical,
Strong,
Durable,
Of Moderate Cost.

It has two separate and distinct spirals, each working entirely independent of the other, thereby rendering it far superior to any having a cross spiral, such as has been the case with former Reversible Automatic Screw Drivers.

It has two brass nuts between the handle and the sleeve, and is operated as follows: For Right Hand Work, tighten the nut nearest the handle and loosen the one nearest the sleeve. For Left Hand Work, reverse this operation.

MADE ONLY BY

GOODELL-PRATT COMPANY,

Greenfield, Mass., U.S.A.

DECATUR, BULL & CO., Resident Agents, MONTREAL.

TAYLOR, SCOTT & CO.

THE firm of Taylor, Scott & Co., manufacturers of brooms, brushes and woodenware, etc., Bay street, Toronto, are about to make extensive alterations in their already large premises, and have bought the property immediately to the north and east of their present building, a large portion of which was formerly occupied by Grand's Repository. In an interview with Mr. Geo. C. Taylor, who is head of the firm (Mr. Scott having died some 10 years ago), he said :

"We found it necessary to make an extension owing to the increasing volume of business. The building just to the south of where the office and warehouse is now, and used as part of the factory, is to be created into a handsome office and warehouse, and the other building, with the extensions which will be added, will be exclusively used for the factory. It will be six flats high, and the whole establishment when completed will cover nearly one acre of ground. The factory will be fitted up with all the latest known improved machinery for the manufacture of brooms and brushes, etc., and when complete will be the largest and most up-to-date factory on the continent.

"I have recently returned," said Mr. Taylor, "from the large cities and centres of the United States, inquiring into and finding out all the latest improvements and ideas, all of which and many more will be included in the new factory. The alterations are expected to be finished this fall."

Mr. W. Starke, retired President of the Canadian Wholesale Hardware Association.

MAKING WASHING MACHINES FOR 25 YEARS.

Mr. J. H. Connor, of J. H. Connor & Son, Limited, Ottawa, claims to be the pioneer washing-machine manufacturer of Canada. Starting in this business 25 years ago, doing the work himself by hand, he has the pleasure of seeing the business grow till it is now one of the largest of its kind in Canada. Some of the first machines he made are in use to-day. Most people think he makes them too good. Last year the firm of J. H. Connor & Son was turned over to a joint stock company under the name of J. H. Connor & Son, Limited, with Mr. J. H. Connor as president. Extensive additions to their plant and buildings have been made within the last year, so that they are now able to turn out 10,000 washers and wringers a year. Besides making 8 different styles of washers and 12 different wringers, they make farm and garden wheelbarrows, tub stands, step ladders, etc. Their advertisement of a special rotary washer will be found on another page of this paper.

INCREASED WAREHOUSE SPACE.

The McClary Manufacturing Co.'s eastern and western business has so grown that they have found it necessary to nearly double the storage room in both their St. John, N.B., and Vancouver branches.

At present, two storeys are being added to their St. John, N B., buildings. Each storey will have a floor surface of 32x115 ft. and an eight-foot clearance. The St. John branch was established in April of last year, when a warehouse was purchased, which was then considered to be large enough for the next five years, but their eastern trade has increased so rapidly that this additional space was necessary for the coming fall business. The St. John branch is under the management of J. J. Foot, formerly of the head offices in London. The McClary Co. have also added two storeys to their Vancouver warehouse, which branch was established in 1894, and is managed by W. G. Drake, who has proven that he thoroughly understands the British Columbian and mining district needs by the large increase inbusiness which the company have enjoyed from year to year in this territory.

SHEFFIELD CUTLERY FOR AFRICA.

A few weeks ago King Lewanika paid a visit to the "Cutlery Capital," as Sheffield is called. He is now returning to his own country. On the eve of his departure he gave audience to some of those who entertained him on his visit to this country. Amongst them Ald. Senior, J.P., Lord Mayor of Sheffield, who took the opportunity of presenting him with a fine casket of cutlery, illustrative of the production of Sheffield. The casket is of rich Coromandel wood, with gold-plate mountings, lined with white satin and silk velvet. The contents were toilet requisites and a set of "Keen" razors, all the manufacture of George Butler & Co., Trinity Works, Sheffield, and at 62 Holborn Viaduct, London, E.C.

A shield in centre of lid bears the inscription :

Presented to
His Majesty
King Lewanika
by
Alderman George Senior, J.P.
Lord Mayor of Sheffield.
August 21st, 1902.

Col. Colin Hardinge, who has been in attendance on the King and came to Sheffield with him, was also presented with a full set of Butler's "Keen" razors, etc., suitably engraved.

THE METAL SHINGLE & SIDING CO., LIMITED
PRESTON, ONT.

IN THE ADIRONDACK MOUNTAINS.

The sweet green valleys ridged with heathery slopes
The streams whose soft blue arms encircle all,
And far away, the northern mountain tops,
Hued like the azure of the dewberry,
And mingling with the region of the rain.
—Buchanan.

TO a large number of Canadians the Adirondack region, or "Great North Woods," is a terra incognita, and this is not to be wondered at when we recall the multitude of beautiful mountain resorts which we have in our own country. However, the tourist in search of novelty and striking views knows no boundary line and enjoys revelling in the beauties of Nature whether it be in the Highlands of Muskoka, Banff Springs, in the Rockies, the Laurentides, at St. Agathe, or up the Saguenay, the beautiful St. John River in New Brunswick, the shimmering beauty of the Evangeline district, the Blue Mountains in Asheville, North Carolina, the entrancing Trossachs of Auld Scotia, the restful sweetness of the English Windermere lakes, Mount Snowdon, in Wales, Snaefell, in dear old Manxland, or the superb and majestic country of the Suisse.

To a Montrealer the Adirondacks have the great advantage of accessibility. Three hours from Montreal by the Canadian Pacific Railway and the New York Central Railway will place him within the portals of the northern gateway of the Adirondacks at the Mountain View Hotel, Mountain View Station, 1,600 feet above sea level. From the hotel balcony a grand view of the mountains may be obtained. No less than 14 forest-clad peaks being in sight with numerous lakes close at hand, one thinks of Byron :

There is a pleasure in the pathless woods,
There is a rapture in the lonely shore,
There is society, where none intrudes.

The massive pines which one delights to see in "the forest primeval" have nearly all been cut down by the remorseless lumberman except in extremely out-of-the-way places or where the United States Government has stepped in and reserved the section for the good of the people. The second and undergrowth, however, is marvelous, and the pure air is redolent with the rich sweetness of the cedars, balsam, spruce, hemlock, beech, birch, maple, elm and ash, while ferns, moss, golden rod and numerous wild flowers delight the eye and add to the delicious fragance.

The Mountain View Hotel is unique in its way. It is "run," as the Americans say, by the owner, Mr. Howard H. Lyman and his charming family. There is no "bar." Nor is there any in the village for the simple reason that no village exists. Only the hotel with the farm and boat-houses close by. Indian Lake, a fine sheet of water, is only a few yards from the verandah, which is ample and deep, with restful chairs for weary brains or aching limbs. The feeling of hotel life is absent, the place being home-like and invigorating.

You may take numerous day trips to places of interest. The village of Saranac, on Saranac Lake, is easily reached by rail in a couple of hours, and one can see lodging houses and village hotels to accommodate those with slender means in search of health or gaze upon the large caravansaries, such as the "Algonquin" Hotel or the "Ampersand," where the well-to-do New Yorker "puts up" and cools off after the excitement of coal strikes, beef trusts, watered stocks and Wall Street.

To Paul Smith's famous hotel is another day-trip or a drive from Mountain View to Schroeder's Glen (7 miles), probably one of the most bewitching spots on this broad earth. I must quote a Bostonian, who was one of the driving party. As the view burst forth, coming round a bend in the road, she exclaimed :

"This glorious vista lends a charm and produces an exuberant feeling which fills one with ecstasy, rapture and delight!"

"Amen," added a meek voice.

The extreme wildness of the surroundings is a great attraction. For instance, ask "Daisy," one of the young ladies of the house to show you High Falls. There is no beaten gravelled path here with a sign to "Keep off the grass," only a blazed trail through the woods — the haunt of deer — around stumps. Over fallen trees, "O'er moss and fell," bog and bramble our fair guide leads on until the falls are reached in a wild and sheltered glen, not marred by quack medicine advertisements, noisy mills or unsightly buildings. Here we had some more "tall" language in another vein. Several of the party were looking up at the lofty pines, and the following exclamations were indulged in :

"Ain't it sweet?"
"Oh, it's perfectly lovely!"
"It's real elegant!"
"Isn't it simply exquisite?"

Of course, my curiosity was aroused, and I looked up expecting to see a rara avis, a cockatoo, a bird of extraordinary plumage, or, perchance, a possum up a gum (spruce gum!) tree. No. Not even a squirrel in sight! At last, I inquired the cause of the excitement.

"Don't you see the big lump of fungus (toadstool) for painting upon. Isn't it delightful?"

"For the land's sake," some one exclaimed, "flap jacks and dough nuts and pumpkin pie, what a fuss over an unsightly product of dead wood!"

Returning to Mountain View we were quite ready for the tea mine host Lyman had ready for us and piles of smoking hot biscuits, ham and eggs with baked potatoes, etc., soon disappeared.

MARKETS AND MARKET NOTES

QUEBEC MARKETS

Montreal, September 12, 1902.

HARDWARE.

ALL seasonable lines of hardware have been moving satisfactorily, and trade is generally regarded as being more active than last week. The meeting of the wholesale trade in Montreal on September 4 and 5 aroused a good deal of interest in both jobbing and retail circles. The prices of heavy T strap hinges have been fixed as follows: 4-inch, 6¼c. per lb.; 5-inch, 6c.; 6-inch, 5¾c.; 8-inch, 5½c.; 10-inch, 5¼c. Food choppers are among the rapidly moving lines this week. They are quoted at from $1.10 up. Apple parers are also selling well.

BARB WIRE.—There is but a light movement in this article. The price is $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—The market is quiet and without any special feature to note. Prices are unchanged. We quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is a fair demand, and our quotations are now as follows: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is no change. The market remains very quiet. The discount is 25 per cent. with the following net extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c.; ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—The demand for this has slightly improved over last week, but trade is still quiet and the discount is unchanged from 62½ per cent.

FENCE STAPLES.—Business is of a very quiet nature and there is no change in price. We quote: Galvanized staples, $3.25 per 100-lb. keg and bright at $2.90 per 100-lb. keg. For 25 and 50-lb. packages an extra of 25c. is charged.

WIRE NAILS.—Jobbers report this week a fair trade in wire nails at the following prices: In small lots, $2.55 and in carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—These continue to move out fairly well. The market is steady and the price is $2.45 per keg in small lots and $2.37½ per keg in carlots.

HORSE NAILS.—No further changes in discounts are reported this week. The market is fairly active. Discounts are: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—Trade in horseshoes is now brisk. All jobbers are receiving many good orders. Prices are unchanged. We quote: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—There is a fair trade doing in screws. No material change has been reported during the week on the market,

and we quote the discounts as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—There is no change. Business is quiet. Our quotations are now as follows: Manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ½c. in carload lots.

RIVETS AND BURRS.—The market is steady and trade continues fair. We quote the discounts as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—A number of good orders have been received this week. The discounts, which are unchanged, are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—The market for building paper is now very quiet. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll

SCREEN WIRE CLOTH.—There is no change whatever to report. Trade is dull at $1.37½ per 100 square feet.

POULTRY NETTING.—In this article there is some movement, but the market rules quiet. Canadian or English netting is discounted at 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used.

HARVEST TOOLS.—There is nothing doing. The discount is 60 per cent.

FIREBRICKS.—These continue to move along as usual with no change to report in prices. English selling at $16 to $20 and Scotch at $17 to $22 per 1,000.

CEMENT.—Business in cement is not of a very lively nature at present. The prices have been maintained, however. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—All kinds of sporting goods continue to sell freely at unchanged prices. Discounts are: Empty Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded, "Trap,"

THE FRANCIS-FROST Co. Limited
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

30 per cent.; American, 30 per cent. "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SNOW SHOVELS.—The market is growing more active in this line. This week a good business has been done. Quotations are as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—There is a good demand for fire shovels, and we quote: No. 70, 38½ to 40c. per dozen; No. 55 55 to 60c.; No. 57, 82½ to 90c.; No. 60 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

METALS.

The metal market, in general, is still firm and active. There continues to be one or two exceptions to this, the most notable one being tinplates, which are again lower on the English market. The prices on other lines have been maintained.

PIG IRON.—There has been no change on this market. We quote: Canadian, $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—There is a fairly good demand for bar iron, and the market is active at $1.95 to $2 for merchants' and $2.20 for horseshoe.

BLACK SHEETS.—These continue to move our fairly satisfactorily, and no quotable change has occurred. Quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is active for galvanized iron. Our quotations now are: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—There has been no important change in this market. We quote 14c.

INGOT TIN.—This is weak and but a small trade is doing. Straits is quoted at 33½c.

PIG LEAD.—Nothing of importance has occurred on this market. The price remains at $3.25.

LEAD PIPE.—There is not much demand at present for lead pipe. Composition and waste are quoted at 8c. and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—There is no change to report. A fairly good trade is doing. Our quotations are now as follows: Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—Another decline of 1½d. is reported from the English market and the feeling is still weak. In spite of this, however, buyers state that they have difficulty in obtaining prompt delivery of goods. Local prices are: Charcoals, $4.75 to $5.25 and cokes, $4.25.

CANADA PLATES.—There is not a great demand for these at present. The prices are unchanged. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

STEEL.—No further reduction in price has occurred, and our quotations are as follows: Sleighshoe, $2.05; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

SHEET STEEL.—Trade is still quiet. Quotations are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There has been no change on this market, which is quiet. Our quotations are as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—The demand has not improved for terne plates, and only a small business is doing at $7.50.

COIL CHAIN.—This moves slowly and at unchanged prices. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.: ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The demand for sheet zinc is not heavy, but some good orders

have been received. The price is $5.85 to $6.25.

ANTIMONY.—There is no change. We quote 10c.

ZINC SPELTER.—The inquiry for this is light. The price remains at 5c.

SOLDER.—Bar solder sells at 18c. and wire solder at 20c. The market continues active.

PAINTS AND OILS.

The feature of the paint and oil market during the week has been an increase of 2c. in turpentine and a decline of 2 cents in linseed oil, raw being now 75c. and boiled, 78c. This followed upon the easy feeling which we indicated last week. There is still a good movement in both oils and turpentine, and in the early part of next month a good trade is looked for. Turpentine in the South continues strong. No new feature has developed in the market for paints. Business is not particularly active, but still manufacturers are satisfied with the volume of trade, considering the season of the year. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 1, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge; casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 75c.; boiled, 78c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17¼c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There has not been much change in the situation of scrap materials. Rubbers are quoted ¼c. higher. There is some firmness in iron. A considerable quantity is going from Europe into the United States, and when the trade is in that direction it is generally considered a forerunner of advancing prices. Quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10½c.; heavy yellow, 9c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6½c. per lb.

GLASS.

Some improvement is reported on the market this week, several orders of a sorting nature being received. Quotations are as follows: First break, 50 ft., $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There has been a somewhat better demand for hides during the week. Prices are unchanged, except in lambskins, which are 5c. higher. We quote as follows: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c.; lambskins, 50c.

MARKET NOTES.

Mr. Alexander Gibb, the Canadian agent for "Comet" brand, galvanized Canada plates, has been exceedingly fortunate with that agency. He reports making several large contracts during the past couple of weeks.

ONTARIO MARKETS.

Toronto, September 12, 1902.

HARDWARE.

THE wholesale hardware business has been better this week and the fall trade is opening up well. Trade is good in nearly all lines. Quite a number of good orders are coming forward and the unusually large number of visitors in town viewing the Exhibition have left a good number of orders with the hardware merchants. The demand from the Northwest is particularly good this fall and the prospects are that trade with that section of the country will be heavy. No changes in prices have occurred during the week, the market holding remarkably steady. In horse nails the manufacturers are hampered in making their deliveries by the scarcity of hard coal which they use in the making of this line of goods. The other lines are unchanged.

BARB WIRE.—Trade in this line has quieted down considerably. We quote as follows: $2.65 in carlots and $2.77½ for less than carlots f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—Business in this line is also light. We quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—A good quantity of stove-pipe wire continues to move out. The discount is 25 per cent.

THE BEAUTY OF BUILDING WITH OUR CELEBRATED

Sheet Metal Building Materials.

First and foremost—there's the sterling reliability of the goods. You're absolutely sure of qualities being exactly as represented. Our prestige in that respect has been fairly earned, and it counts for a great deal that your customers never find ground for complaint in the goods we deliver to you.

In addition, there's the ease of handling, the studied artistic effects, the fire and lightning proof qualities, and the many other details that have made sheet metal the popular building material for all progressive people.

—We honestly think you can do better business
—by handling our lines-try them. Send for our
—catalogue and read up. We make Shingles,
—Ceilings, Sidings, Cornices, and every other
—building requisite in highest-grade goods.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

SMOOTH STEEL WIRE.—Very little is being done in this line, and we now quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—Trade keeps up steadily in wire nails. The base price is as follows: Wire nails, in carlots, $2.50 and in less quantities, $2.55. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—The business doing in cut nails is mostly in small lots. We quote $2.45 per keg and $2.37½ for carlots.

HORSE NAILS.—The manufacturers of horse nails have a number of orders on hand, but cannot fill them, as they have no hard coal to make the nails. There threatens, if the present conditions continue, to be a scarcity of nails all over the country before long, and those jobbers and retailers who have already secured large stocks of these nails may consider themselves fortunate. We quote the discounts as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—There continues to be a good call for horseshoes and manufacturers have orders booked for all they can produce. The prices are steady and unchanged. Quotations are as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The inquiry still continues active, but stocks are still as light and hard to get as ever. Our quotations are as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—The situation in rivets and burrs is unchanged. Discounts are as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand for these is still greater than the supply. We quote: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—The demand for spades and shovels continues active. The manufacturers are still hampered by the lack of raw material. The discount is 40 and 5 per cent.

ROPE.—There still is a little business doing in rope, and we now quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—Quite a few sorting-up orders are still coming forward for harvest tools. The discount is 60 per cent.

EAVETROUGH, ETC.—A fair amount of eavetroughing is still being sold. We quote: Eavetrough, $3.10 per 100 square feet for 10-in., and conductor pipe, $4 for 3-in. and $5.25 for 4-in.

BUILDING PAPER.—A good deal of business continues in this line and the prices are unchanged. We quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—Business keeps up well in both tinware and graniteware, the prices of which are unchanged.

STOVES AND RANGES.—A good demand is reported for stoves and ranges, and quite a number are being forwarded to all parts of the country.

POULTRY NETTING.—Very little is doing in this line.

SPORTING GOODS.—The active condition of this market noted last week continues and prices are unchanged.

CEMENT.—The demand is still in excess of the supply and some manufacturers have withdrawn their quotations on cement for September and October deliveries. We quote as follows: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 up per bbl.

METALS.

The condition of the general metal market continues satisfactory. The prices, in most lines, are firm and the stocks, generally, well assorted, but there are shortages in some lines. The United States tin market is little improved from last week, but the prices in London, Eng., have gained strength. Copper has improved outside but the demand for iron and steel has not increased materially.

PIG IRON.—The demand for pig iron continues active and prices are firm. The Canadian furnaces have sold up to July 1 of next year and it is now nearly impossible to get orders filled at almost any price. Nominal quotations at the furnaces are $23 for No. 1 and $22.50 for No. 2. Summerlee iron is being quoted at $23 on track Toronto and there has been some English iron offered lately at $22 per ton on track Toronto.

STEEL BOILER PLATES.—The demand for these is moderate in nature. We quote: Steel boiler plates, $1.80 for carload lots on track, Toronto.

STEEL RAILS.—There has been no change in steel rails and those for steam railways are quoted at $30 per ton and for electric railways, $36.

TOOL STEEL.—A fair demand continues for tool steel. We quote as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—Trade in mild steel is keeping up well.

SPRING STEEL.—The tone of the market for spring steel remains active.

BOILER TUBES.—These are in fairly active demand.

BAR IRON.—There is a good deal of this metal going out and the prices are firm and unchanged. We quote: $1.95 to

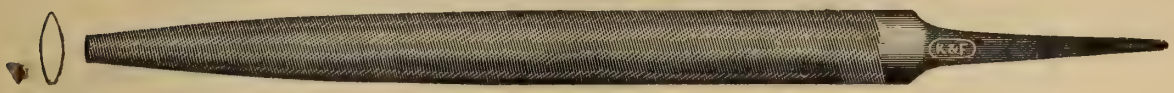
FILES and RASPS WARRANTED

KEARNEY & FOOT BRAND

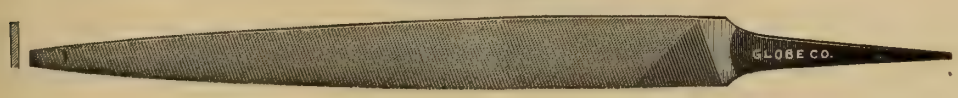


GREAT WESTERN BRAND

AMERICAN BRAND

ARCADE BRAND

GLOBE BRAND



The largest manufacturers in the world.

We manufacture the well-known brands of Cast-steel Files and Rasps shown herewith, all of which are warranted for high-class material and superior workmanship.

Our goods are now sold in the four quarters of the globe, command the highest prices, and have won for themselves an enviable reputation, acquired as the result of many years' experience.

Walter Grose, Montreal,

Selling Agent for the Dominion of Canada.

One or other of the above brands may be purchased from prominent Hardware Merchants throughout the Dominion who carry an assorted stock.

$2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—The demand for black sheets has been good. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are still active. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—The volume of business doing in galvanized sheets keeps up well. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge.

TIN.—The market for tin, locally, has been more active. The London, Eng., markets have gained strength, but the United States markets are inactive and weak. We quote $32 to $33 per 100 lb. for tin.

TINPLATES.—A fair demand continues for these. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25.

COPPER.—Ingot and sheet copper are in better demand this week. Quotations are: Ingot copper, $13.50 per 100 lb. and sheet copper, $22 to $23.

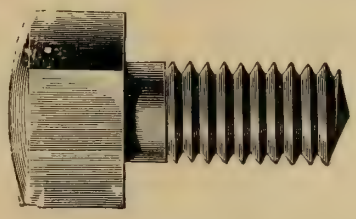
BRASS.—A fair demand for brass continues at unchanged prices. The discount is 15 per cent.

PIG LEAD.—There has been an improvement in pig lead during the week and prices are firm. We quote: Pig lead, $3.50 and bar, $3.75.

IRON PIPE.—A good business keeps up in iron pipe. Quotations are now per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—This metal is unchanged from last week. We quote 5 to 6c. per lb.

ZINC SHEETS.—A good, steady trade is doing in zinc sheets at unchanged prices. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.



THE JOHN MORROW MACHINE SCREW COMPANY, Limited

SOLDER.—Trade in solder is active.

ANTIMONY.—The improved demand for antimony noted last week continues. We quote $9.50 per 100 lb.

PAINTS AND OILS.

The local paint and oil market keeps in a healthy condition, and although trade has quieted down considerably, a fair amount of business in white leads ground in oil, zinc whites, and mixed paints is reported. No further reductions

have been made in the price of raw and boiled linseed oils, and turpentine is quiet and unchanged. Quite a number of visitors have been in town during the weeks of Exhibition, and the paint and oil merchants received a fair share of calls. Things look bright for a good fall trade. We quote :

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25 ; No. 1, $4.62½ to $4.87½ : No. 2, $4.25 to $4.50 ; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb , $5.50 ; No. 1, in casks of 560 lb., $4 ; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25 ; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE AND GASOLINE.—Benzine, in barrel lots, 18¾c. per gal.; gasoline, ordinary, 21¼c., and engine, 22¼c. f.o.b. Toronto.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities 10c. extra.

PUTTY.—Bladders, in bbls., $2.25; bladders, in 100-lb. kegs, $2.40 : bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 : bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per bbl.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 77c.; boiled, 80c.; 3 to 5 barrels, raw, 76c.; boiled, 79c.; 6 to 9 barrels, raw, 74c.: ; boiled, 77c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 69c.; 2 to 4 bbls., 68c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The fall trade in glass promises to open out well. Import orders are now arriving from Europe with more freedom and local importers are now in a better position to fill their orders. We now quote as follows : Under 26 inch, $4.45 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

Copper is weaker this week and all lines of old metals are quiet, the receipts being small. Quotations are : Heavy copper and wire, 10c. per lb.; light copper, 8c. to 8½c. per lb.; heavy red brass, 10c. ; heavy yellow brass, 8 to 8½c.; light brass, 5c to 5½c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2¾c.; iron, No. 1 wrought, $12 per net ton ; No. 2 wrought, $6 : machinery cast scrap, $13 to $14 ; stove plate, $10 ; malleable and steel, $6 to $6.50 ; old rubbers, 5 to 5½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—A steady business continues in hides. Quotations are as follows : No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, 8½ to 9c. per lb.

SKINS.—The volume of trade in skins keeps steady, and we quote as follows : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; shearlings, and lambskins, 45c.

WOOL.—The wool market is featureless. Fleece wool is quoted at 13½c. and unwashed at 7½c.

TALLOW.—The market is still weak. We quote 6¾ to 7c. per lb.

SEEDS.

A good deal of alsike is offering at outside points. There is also a little doing in timothy. For good samples of alsike, $5 to $7 per bushel will be paid and $1.75 to $2 for timothy.

COAL.

Latest advices from Shenandoah, Pa., state that miners, operators and everybody else interested in the coal strike are confident that the end is in sight, and the general belief is that by the middle of September the strike will break. Others, however, take a pessimistic view of the situation and think that the end will not be so soon. Stocks of hard coal in Toronto are light and should the strike continue the greatest difficulty will be experienced in getting a winter's supply of coal. Soft coal is quoted at the international bridges at $3 to $4.50 per ton.

PETROLEUM.

The demand for petroleum continues to improve, and our quotations are as follows : Pratt's Astral, 17 to 17½c. in bulk (barrels extra) ; American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16 to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

PERSONAL MENTION.

Mr. W. H. Evans, of the Canada Paint Co., with his wife, returned on Thursday, September 4, from a two weeks' vacation in the Adirondacks.

Mr. Charles D. Chown, of Edwin Chown & Son, wholesale dealers in stoves, etc., Kingston, was in Toronto for a few days this week. He reported business fairly good.

Mr. Hugh W. Aird, of the Canada Paint Co., accompanied by his wife and family, left on the first of the week for Old Orchard Beach, where he will spend a fortnight's holidays.

Mr. R. Seabury d'Espard, from Raimes & Co., New York, paid a flying visit to Toronto a few days ago. The attraction of the Fair brought him across from Buffalo where he was putting through some business.

NEW MANUFACTURERS' AGENT.

Mr. E. W. Hickson, who has for some years been connected with the hardware and allied trades in Toronto has begun business for himself as manufacturers' agent. His office is in the Carlaw building, 28 Wellington street west.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week the following permits were awarded in the office of the City Commissioner, Toronto: Mrs. Margaret McDowell, for a two-storey frame and roughcast dwelling, North Crawford street, for $600; Nonsuch Manufacturing Co., additional storey to factory, corner of Duncan and Adelaide streets, for $5,000; J. O. Patterson, for alterations and additions to dwellings, 121-125 Denison avenue, for $1,000; Robt. Jaffrey, two-storey brick dwelling, at 59 Grenville street, for $2,000; Wm. Booth, two-storey brick residence, 15 Chicora avenue, for C. E. Booth; King Bros., for three pairs two-storey semi-detached brick dwellings, 343-353 Brock avenue, for $9,000; Ambrose Kent, five two-storey detached brick and roughcast dwellings, North Lansdowne ave, for $8,500; Florence E. Goddard, two-storey roughcast dwelling, 161 Howland ave., for $500; Miss Hannah Thomas, two-storey brick dwelling, 20 Lindsay avenue, for $2,000; E. A. Drummer, pair of semi-detached, two-storey brick-veneered dwellings, 206-208 Campbell avenue, for $2,800; two pairs ½ detached brick dwellings, Perth ave. for $6,000; Wm. E. Weale, pair ½ detached two-storey and attic, brick and stone dwelling, 444-446 St. Clarens ave., for $4,000; W. Elliot, two-storey detached, brick and stone dwelling, at 38 Pendrith street, for $1,000; Jos E. Polkinghome, two-storey detached brick dwelling, Melville ave., for $800; Hiram Lehigh, two-storey and basement roughcast dwelling, Cobourg ave., for $350; W. Pinkerton, two-storey detached brick dwelling, Beatrice street, for $1,800; Alex. Johnston, two-storey, brick and stone alteration and addition, 71 Major street, for $600; Wm. Lightfoot, one-storey frame and roughcast potting house, 1048 Dundas street, for $400; P. J. Crathy, two-storey and attic, brick front, 33 D'Arcy street, for $1,000; S. J. Graydon, two-storey and attic, brick and stone dwelling, 131 Madison ave., for $6,000; C. R. Dinnick, 2½-storey brick and stone dwelling, 76 St. George street, for $5,500; Alexander Burgess, 2½-storey brick residence, 37 Maple ave., for $6,000; Susannah Watson, two-storey dwelling, brick cellar, roughcast, 31 Inglewood ave., for $500.

BUILDING OPERATIONS IN CAMPBELLFORD.

Some of the new buildings erected in Campbellford this year are: F. S. Titus, Water street, three storeys, double tenement, with two storeys besides offices; Max. M. Mowat, Prince William street, 2½-storey dwelling; Jas. Thompson, Ramsay street, 1½-storey dwelling; S. Laughlan, Prince William street, two-storey brick-faced dwelling; Dr. McNichol, Aberdeen street, two-storey double tenement; Methodist Parsonage, Prince William street, two storeys; E. LeGallais, Andrew street, two-storey dwelling; Jos. R. Sharpe, Water street, three-storey dwelling and store; W. J. Comeau, Water street, 2½ storey dwelling; Peter Gerrard, Minto street, two-storey dwelling; J. and D. A. Harquail, Queen street, two-storey dwelling; Angus McKenzie, Sugar Loaf street, two 1½-storey dwellings; Joseph Savoy, Sugar Loaf street, 1½-storey dwelling; Wm. Sproul, Water street, for a three-storey addition to hotel; Paul Roy, Union street, two-storey dwelling; Currie Bros., Ramsay street, wood-working factory; Waverly Hotel, Water street, new sample rooms.

Besides the above contracts have been about placed for the erection of the following: Wm. Currie, McMillan ave., two-storey dwelling; Dr. Lunam, Prince William street, office and dwelling; Wm. Brown, dwelling; Curling Club, new rink.

OTTAWA STRIKE OVER.

The plumbers' union strike at Ottawa, which lasted one week and three days, was settled by the men receiving 25c. per hour. The shop regulation demands were left to arbitration.

BUILDING OPERATIONS IN OTTAWA.

During the past week seven building permits were issued in Ottawa, the value represented being $12,000. Following is the list: Mrs. A. Blackburn, repairs to dwelling, Sussex street, $500; Separate School Board, repairing building, Anglesea Square, $1,600; H. N. Bate, two brick-veneered dwellings, Besserer street, $5,000; J. C. Edwards, solid brick dwelling, Theodore street, $1,200; Ottawa Milling Company, solid brick office, Duke street, $1,200; John A. Whillans, solid brick dwelling, Spruce street, $1,500; Albert Dunn, frame dwelling, Henderson avenue, $1,000.

PLUMBING CONTRACTS.

Hudon & Allard, machinists, St. Hyacinthe, Que., have dissolved.

Fiddes & Hogarth, King street east, Toronto, are doing the plumbing and heating in the house of Captain Trig, 30 Walker avenue.

Bennett & Wright Co., Limited, Queen street east, Toronto, have secured the contract for heating the new building for Gravenhurst sanitarium.

The heating and plumbing of the dwelling of Robert Watson, St. George street, Toronto, is being done by Bennett & Wright Co., Limited, Queen street east, Toronto.

Purdy, Mansell & Co., Adelaide street west, Toronto, are doing the plumbing and heating of the dwelling of A. McCurdy, Dovercourt Road, Toronto; also the plumbing of four houses for The St. Lawrence Starch Co., Port Credit.

BUILDING IN CHARLOTTETOWN.

In Charlottetown building operations this year has been carried on on much a smaller scale than for some years. Some of the buildings are: House for Benjamin Rogers, corner of Prince and Euston streets, erected by H. and S. Lowe; residence of Harry Houle, corner of Hillsboro' and Sydney streets; grey stone and brick residence of Richard Grant, built by Charles McGregor. Mr. McGregor has also a contract for a dwelling for Rufus Hogan, Prince street. W. W. Harper has just completed an addition to the Pasteurized Milk Factory. Schurman & Lefurgez are contractors for the residence of John C. McLeod. Brooklyn Vail is contractor for the residence of James Tait, jr., Brighton.

PLUMBING AND HEATING NOTES.

THE Hamilton Gas Light Company has discovered that electrolysis is doing serious damage to its pipes on Barton street. Some of the pipes have to be renewed.

Miss Sadie Borton, eldest daughter of John Borton, plumber, Moncton, N.B., late of Halifax, was united in marriage last week at St. Alban's Cathedral, Ottawa, to Harry Snelthorpe, of Ottawa.

The Algoma Pioneer says: "Forty cents per hour is the wage charged for tinsmithing and plumbing, and the day laborers will soon need to get $3 per day to keep up to the advanced cost of living at Sault Ste. Marie."

B. Ledoux, carriage manufacturer, Osborne street, Montreal, has given out a contract for an addition to his factory, which will face Osborne street, corner of Mountain. The addition will be 60 x 36 feet, seven storeys high, made of brick. The construction will be started at once. A. Venne is the architect.

The successful tenderers for the various works in connection with the construction of the new library building at Sarnia are as under: George Bruce, carpenter work, $3,347; Simpson & McDonald, mason work, $4,700; J. M. Jenkins, plastering, $509; Robt. Ross, plumbing, heating, sewer, electric wiring and fixtures, gas and fixtures, $2,009; J. B. Watson & Co., painting and glazing, $560; Mackenzie, Milne & Co., galvanized iron and tinning, $575.

The Dominion Oilcloth Company will immediately erect a new building on Parthenais street, Montreal, directly in the rear of their present premises. It will be built of pressed bricks, with iron and cement floors. The structure will be fireproof and very little wood, if any, will be used in its construction. It will be four storeys high. Building Inspector A. Chausse inspected the sites, approved the plans, and granted a permit for the erection of the new premises, which will cost $60,000. Plans are being drawn by T. Pringle, architect.

BUILDING OPERATIONS IN MONTREAL.

The month just passed was an exceptionally busy August in the building trade in Montreal, and the permits for new work taken out during the month were larger than any previous August, as usually most permits for summer work have been taken out before August sets in. No less than 27 permits for alterations were taken out during the month, the work affecting 16 dwellings, seven stores, one factory and five sheds, and representing an expenditure of $22,817.

For new buildings, 33 permits, representing 45 dwellings, three stores, one warehouse, three factories and two sheds, the whole to cost $177,350, were taken out.

MONTREAL - - - VANCOUVER

HOW TO OBTAIN RESULTS FROM ADVERTISING.

By Geo. B. Franck, Toronto.

THE great distributing machinery brought into existence by this era of combines demands ideas and methods of conducting business that were not thought of 20 years ago.

Manufacturers are not satisfied to remain at home, but it is their aim to have their business expand until goods produced by them are handled and sold in every portion of the civilized world.

Conditions are constantly changing. To-day men with ideas are exploiting them to the best of their ability; to-morrow the world looks for something better. The ever-present problem that confronts the manufacturer is how to cheapen the manufacture and lessen the cost of placing upon the market the articles he has manufactured. There is the jobber who must be reached, and generally through the medium of the commercial traveller. The dealer must also be interested, and last, but by no means least, is the great army of consumers. To reach the latter is the problem. This can be done and well done by good advertising, and the business man should make a judicious selection of mediums through which to advertise.

The primary object of advertising is to attract attention, to gain publicity for some particular commodity. The matter which goes to make up the advertisement must be attractive, unique, and presented in such a way as to catch the eye of the public, through the medium of the daily papers, circulars, magazines, and a hundred other ways.

Producers will manufacture and place upon the market more goods in the years to come than were ever placed upon the market before. Homes will be better and more liberally furnished, and these same manufacturers will be compelled to enlarge their plants and instal more machinery to meet the growing demand. The world judges effort largely by result. Above has been depicted the result; the means will be advertising.

This effort to gain publicity does not consist merely of contracting for a certain amount of space in certain papers or magazines, and crowding into it a lot of matter because there must be something said. Neither is it attractiveness alone that will count, but the genius of an advertiser will display itself in the way an "ad." is presented. There is not much trouble in telling the public what you have to sell; the secret lies in making them believe that they really need what you are advertising.

After advertising has begun to show results in the way of inquiries, it will not be sufficient to merely answer those inquiries, but they must be followed up. Following up a prospective purchaser is of as much importance as the advertising. A system must be established whereby the inquirer may be made aware of the fact that his business is valued. If you have several good reasons why a customer ought to purchase your goods, do not give him the whole lot in a lump, but spread them out in a series of three or four well-worded letters, and follow these up until he either purchases or it is plain that you cannot sell to him.

It has been demonstrated time and time again that good advertising more than pays for itself.

A LITTLE NONSENSE.

"I understand you said I wasn't worth powder enough to blow me up. I want you to take that back!"

"I will. You are worth just about enough powder to blow you up."

* * *

A little three-year-old miss, while her mother was trying to get her to sleep, became interested in a peculiar noise, and asked what it was.

"A cricket, dear," replied the mother.

"Well," replied the little lady, "he ought to get himself oiled."

INDUSTRIAL GOSSIP.

WHAT is said to be the largest contract for leather belting ever given in Canada has been awarded by The American Cereal Company, Peterboro', to Sadler & Haworth, leather-belting manufacturers, Montreal and Toronto.

This season The Winnipeg Elevator Company have built ten elevators at different points in the West, have six more under construction, and four ready to be built later on, making in all 24 new elevators this year. Their line of elevators with these will be composed of 74 buildings, all comparatively new, and all thoroughly modern. The company have spent over $50,000 this year alone improving their properties and making them in every way first class.

The Province, Vancouver, B.C., says: "There is lots of mineral paint, great red hillsides of it in this Province, but there is said to be a special line of it near Lytton.

"About three weeks ago 18 claims were staked off by a number of C.P.R. employes, who immediately grouped the properties and proceeded to handle them in common. The property is about six miles off the railway and nearly the same distance from that home of the winds, Lytton.

"From surface samples excellent results have been obtained, several local painters, including some of the artists at the shops, having thoroughly tested its coloring and covering qualities. These have been eminently satisfactory and the assays have likewise proved good."

LABOR UNIONS THAT WILL FAIL.

By Charles M. Schwab, President of The United States Steel Corporation.

LABOR unions will fail as trusts have failed, as long as they have for their fundamental principle restriction of the output. I may add that every labor union with which I have ever come in contact has been founded on this principle.

A trust will succeed where consolidation is made for economy's sake; otherwise no trust will succeed.

Labor organizations have had as their foundations the restriction of the output. Now, this will never do. They will never succeed.

I am opposed to labor organizations as organized to-day. I think manufacturers are not opposed to labor organizations per se, but upon the plan upon which they are organized. I think the organizations that want to restrict the output are all wrong. The fortunes and prosperity of the workingman are identical with those of the employer, and I think that the time may come when they will be together.

HIS REPORT A GOODLY ONE.

Mr. C. E. Marquis, of Killarney, Manitoba, was in Toronto recently. He was formerly a member of the firm of Marquis & McCullough, of Ripley. A few years ago he went to Manitoba as manager of the Killarney Trading Company, of which firm he a few months ago became the sole proprietor.

Mr. Marquis is a bright and enterprising man and is an interesting conversationalist. He informed Hardware and Metal that business in his part of the country is good, and that the outlook, on account of the enormous crop, is exceptionally good. He said that they all had suffered from the grain blockade last fall, and that at the time he left home grain of the crop of 1901 was still being shipped. He said that a number of people from the United States were taking up land in the vicinity of Killarney, which is in Southern Manitoba, but that it was principally improved land, and was being occupied by men with capital.

There was, he said, now practically no homestead land in his part of the country. "There is one thing about our part of the country," added Mr. Marquis, "and that is, the farmers are gradually going in more generally for mixed farming, and are raising quite a little stock."

An Ounce of Fact is Better

than a pound of assertion. One fact that we dwell upon at all times regarding Lucas Imperial French Green is that it is non-poisonous. A small but **important** fact.

A few other proven facts are that it is not surpassed for brilliancy of hue, body and color strength, fineness and staining qualities. When analyzed along with many others, at the request of the St. Louis Association of Painters, it was found to be strongest and best green of all that were examined. A very important fact. Send for sample card showing shades and let us quote prices. Dry and in Oil.

Beware of counterfeits. None genuine without the Lucas Brand stamped in head of every package.

Horse Nails

We make horse nails—that's all! Have been making nothing else for the last 37 years. Quite a long time! Very much longer than any other manufacturer of horse nails in Canada. You have the benefit of all our 37 years' experience embodied in every box of "C" brand nails you buy. Each nail is as perfect as long experience added to the best material known or used in the world for the manufacture of horse nails can make it. You are getting the best of everything, the best material, the best process, the old reliable hot forged one, which thoroughly hammers from the rod of Swedish charcoal steel while at a white heat into the desired shape, thoroughly consolidating and toughening the nail so that it will stand the hardest usage and greatest wear and tear. No nail made or sold in Canada has ever been sold for one farthing more than the "C" brand, which is a pretty solid argument that there were none better. On the other hand, we do ask and get a little more than any other maker for our "C" nails because we know they are worth more, and the buying public appreciate that fact and willingly pay us a little more. To get the best horse nails you have to pay the best price. Don't make any mistake in that point.

Your order solicited through the wholesale trade.

MANITOBA MARKETS.

Winnipeg, September 8, 1902.

NOTHING of importance is to be reported in the hardware line this week beyond the fact that local jobbing houses are receiving and placing fall stocks. All lines of hardware are in good demand as are also paints, oils and glass. The binder twine trade is over, and it now appears as though there is sufficient for all requirements, but dealers have no stocks to carry over. Prices remained firm, the last being sold at 13⅝c. for sisal or standard. The local factory at Brandon has found ready sale for all its make.

The cool weather of the last few days has turned the attention of Winnipeggers to stoves, and there is a good inquiry in retail circles. The question of fuel is an endless subject of discussion on every street corner.

As an indication of the hardware business in the country it might be noted that the following are opening stores: Sherry & Mitchell, Weyburn, on Soo Line; A. F. Grady, Cowley and Alberta; Robinson, Pentrold, Alberta; Arthur, Kenton, Man.

Prices for the week are as follows:

Barbed wire, 100 lb.	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire 10	3 75
" 11	3 80

NOTES.

J. & E. Brown, of Portage la Prairie, are establishing a foundry in connection with their implement business.

Apollo galvanized iron commands more money and shorter credit—at wholesale—than any other—but saves the worker money.

American Sheet Steel Company, New York

Representatives for Canada
B. & S. H. Thompson & Company

Montreal

YOU NATURALLY EXPECT THAT THE GOODS **YOU** BUY WILL GIVE ENTIRE SATISFACTION TO **THOSE** WHO BUY FROM YOU. WHEN YOU PURCHASE

2 AND 3 PLY READY ROOFING,
BUILDING PAPERS,
SHEATHING AND CARPET FELT,
COAL TAR PRODUCTS,
HANGING AND PRINT PAPER,
BROWN AND MANILLA WRAPPING

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS

September 12, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

The Rubber Belt is the Thresher Belt.

Other belts have had their waves of popularity, generally on account of price, but the threshers have invariably returned to Rubber.

WHY?

1. **BECAUSE** the rubber belt stands the weather.
2. **BECAUSE** the rubber belt adjusts itself best to the pulleys.
3. **BECAUSE** the rubber belt does not expand and contract with change of temperature, consequently the engine has not to be shut down and replaced.
4. **BECAUSE** the rubber belt is made for the thresher use and will best stand the work.
5. **BECAUSE** the rubber belt is honest in length. If you buy 100 ft. Endless, you do not get 97 ft.

Contracts are placed with us by all the large engine and seperator manufacturers.

WHY? **WHY?** **WHY?**

FENCES and GATES

IN WIRE AND IRON.

We can furnish anything required, from a plain wire fence for the farm to an ornate iron fence for residence or public building. Special prices to hardware trade. **Send for catalogues.**

The Dennis Wire and Iron Co.,

LONDON, ONT.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for extension to Point-aux-Pelee Island Wharf," will be received at this office until Friday, 26th September, inclusively, for the construction of an extension to the present wharf at Point-aux-Pelee Island, Essex County, Ontario, according to a plan and specification to be seen on application to the Postmaster of Point-aux-Pelee Island; at the office of Mr. H. A. Gray, Resident Engineer, Confederation Life Building, Toronto, and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the printed form supplied, and signed with the actual signatures of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for the sum of five hundred dollars ($500.00), must accompany each tender. The cheque will be forfeited if the party decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED GELINAS,
Secretary.

Department of Public Works,
Ottawa, 29th August, 1902.

UNFAIR TO SMALL TOWNS.

IT is a worthy ambition that merchants of certain towns and cities have to attract customers from other places. And they cannot be blamed when, having this end in view, they endeavor to secure special rates from the railway and steamboat companies to assist them. At the same time, however, it must be remembered that the merchants from the towns whose customers they try to attract are also entitled to some consideration.

At the meeting of the Union of Canadian Municipalities in Montreal this week this was one of the questions which came up for discussion, and was referred to a committee for consideration. It seems to us, however, that questions like this are outside the province of such an organization as that of the Union of Canadian Municipalities.

In championing such schemes they are only assisting the merchants in the large cities in their efforts to attract customers from the merchants in the smaller towns and villages throughout the country. If the merchants in such cities as Toronto, Montreal, Ottawa, and other places that might be mentioned, desire special rates, let them secure them on their own volition, and not call to their aid large organized bodies.

The more trade that is taken away from the smaller towns the less merchandise will the railways have to carry to the points thus affected, and it does not, therefore, seem to us in the interest of the railway companies that any such special rates should be accorded.

In the competition between the merchants of different cities and towns, it appears to us that they should be allowed to fight it out for themselves without any one of them being given the support of the railway companies, which they practicalty are when one is accorded special rates to the disadvantage of the other.

Let every town stand upon its own bottom on such matters. Discriminating passenger rates are no fairer than discriminating freight rates.

Merchants who do not believe in advertising may be said to be sceptical of the gospel of commercial salvation.

IMPROVEMENT WITH NEW REGIME.

IT is the general opinion that the recent Exhibition at Toronto, from an industrial point of view, was an improvement over its immediate predecessors. How much the credit of this is due to the new executive head we are not prepared to say. It is, however, significant that the improvement has come with the accession of Mr. McNaught, a successful business man, to the presidency.

HARDWARE AND METAL has had occasion during the last two or three years to take exception to the neglect of the industrial features of the Toronto Exhibition, and it is therefore with some degree of satisfaction it observes that the cause for adverse criticism in this respect is much less evident than it was. And this improvement has been accomplished without in any way impairing the entertainment features of the Exhibition. The trouble hitherto has been that more effort appeared to be concentrated on the entertainment than on the industrial features of the exhibit.

In the exhibit of machinery and electrical goods there has been a decided improvement. It has been a standing complaint with the manufacturers of machinery that the treatment accorded them by the management was simply cavalier. While all the irritation caused thereby may not have been removed, it is evident that a great deal of it has.

The main purpose of an exhibition is to hold forth to the gaze of the public the industrial life of the country as revealed in the products of the factory and field. President McNaught, with his business instinct, evidently recognizes this, and, as a result, his regime opened auspiciously.

COMBINATIONS IN THE IRON AND STEEL TRADE.

A CABLE from London announces that the negotiations for the formation of an association among the British steel rail manufacturers, which have been pending for some months, have at last been successful. The firms which are said to have formed the association are as follows: Barrow Hematite Steel Co., Limited; Bolckow, Vaughan & Co., Limited; Guest, Keen & Co., of Dowlais and Cardiff; Crawshay Bros., of Merthyr-Tydvil; The Moss Bay Hematite Iron and Steel Co., Limited; Charles Cammell & Co., Limited; The Northeastern Steel Co., Limited, and The Rhymney Iron Co. The capital stock of the corporation is $60,000,000.

As to whether the cable despatch is accurate remains to be seen. But one thing is certain—there is a growing sentiment among the iron and steel manufacturers of Great Britain in favor of combinations.

At present the iron and steel manufacturers in the United States are so busily employed in supplying the home market that they are able to give but little attention to the foreign trade. But everyone at all conversant with the situation knows perfectly well that it will be only a matter of time before the iron and steel producers in that country will be much keener competitors for foreign trade than they now are. The enormous productive capacity of the country in that particular branch of industry makes it obvious. And the necessity for the foreign market naturally increases with the expansion of the iron and steel industry. No one is more alive to this contingency than the British ironmaster. And as he is the one who will most keenly feel this competition it is only natural he should be casting about for ways and means of meeting it.

He is being told on all hands that he must modernize his plant and his methods. And it appears that while he is preparing to do this he is also preparing to imitate the combination-forming methods of his competing confreres in the United States.

But whatever may be the quality of the relative iron and steel-making methods of the iron and steel makers of Great Britain and the United States, the latter are far ahead of the former as far as the organization of combinations are concerned. The United States Steel corporation alone has a capitalization of over $1,000,000,000. According to statistics compiled by the Democratic Congressional Committee at Washington, there are to-day in the United States 287 combinations whose total capitalization is nearly $7,000,000,000. Of course, all this is not made up of iron and steel concerns, but they contribute to it more largely than any other branch of industry.

It will be interesting to watch during the next few years the development of the combination and anti-combination forces which are at work on both sides of the Atlantic. In the United States the Trust question promises to be the chief plank in the platform of the Democratic party at the ensuing elections, while President Roosevelt has pronounced himself strongly in favor of legislative control of the so-called Trusts. In Great Britain public opinion has not been aroused to the extent it has on this side of the Atlantic. But we may certainly look for it to develop as combinations expand in that country. And as unionism and socialism are more strongly organized there than in the United States we may ultimately look for strong opposition to combinations among the masses in Great Britain.

Organization and consolidation is the dominant spirit in every sphere of industrial activity. It cannot be smothered any more than could the advent of the machinery age which supplanted hand power. It can, however, and should be controlled by wise legislative enactments.

THE BONUSING EVIL.

During the convention in Montreal this week of the Union of Canadian Municipalities quite a little discussion ensued on the question of bonuses to manufacturers by municipalities, and a resolution was adopted by 24 to 1 condemning the principle.

This is a question which has occupied a great deal of attention in the Provincial Legislature of Ontario, and while laws have been placed on the statute books designed to minimize what is obviously an evil, the evil still exists in an unmodified form.

While very little may be done by such resolutions as that passed in Montreal a few days ago, it will have the effect of assisting to educate the public to put a stop to the bonusing system. It is a fact worthy of notice that some of the smaller municipalities in the country, which have been the most persistent in granting bonuses with a view to coaxing industries from other parts to their neighborhood, are to-day in a most unsatisfactory condition financially.

CANADA AND NEWFOUNDLAND.

SIR ROBERT BOND, the Newfoundland Premier, has returned from Washington, where he has been with a view to reopening reciprocity negotiations with the United States.

Canada can scarcely view with equanimity the reopening of these negotiations. A dozen years ago what is commonly known as the Bond-Blaine Treaty only needed the approval of the British Government to give it effect. This, it will be remembered, was withheld at the instigation of the Canadian Government.

If a commercial treaty between Newfoundland and the United States was distasteful to the Dominion 12 years ago, it can scarcely be less so now. Our trade with Newfoundland is larger than it was then. Our exports to that colony, for example, are over $1,000,000 larger. But should the present efforts to secure a treaty with the United States be successful, it is practically certain to receive the approval of the Imperial authorities, for we have it upon the word of Sir Robert Bond himself that he has the consent of the Home Government in his present negotiations with Washington.

Nothing as far as we are aware has been publicly said in regard to the attitude of the Dominion Government on the question. But it certainly cannot afford to be unconcerned.

At the same time, however, it is questionable whether it should take the same stand as it did in regard to the Bond-Blaine treaty. It is contrary to the spirit that rules within the British Empire to-day. What it should do, however, is to take time by the forelock and open negotiations with Newfoundland with a view to accomplishing what we failed to do when the Confederation of the Dominion was consummated.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

THERE has been a good demand during the week, and a very fair business all round has been done. Prices, however, are again a shade lower. Common, 14 by 20, Bessemer cokes, have been placed freely at 12s. 7½d. and 12s. 9d. per box f.o.b. Wales, and it is reported that even 12s. 6d. has been accepted. Manufacturers' quotations for fair specifications run 12s. 7½d. to 12s. 9d. per box, with Siemens' steel at 1½d. per box extra, lights and crosses at the usual differences, f.o.b. Welsh ports.—Iron and Coal Trades' Review, September 5.

ADVANCE IN SAD IRONS.

For some time past the sad iron market has been gradually stiffening, owing to the increasing cost of the raw material and the large demand made upon the manufacturers. A further slight advance has been made in this line, the tone of which continues steady and strong. The market is represented by the quotation of 2½ to 2¾c. for large lots of the common sad iron.—Iron Age.

LEAD AND SPELTER IN ST. LOUIS.

The Lead and Zinc News, St. Louis, in its issue of September 15 says: "The most noteworthy feature of the local lead and spelter market has been the exchange of heavy demand from the spelter to lead stocks. For three weeks past the demand has been in excess of the supply and the price of choice brands of soft Missouri and chemical hard has crept up from 3.97½ to 4.05 at which figure the market closed firmly to-day. This price, as has been noted, is the highest since the smelting combine cut the price of lead last December. Chemical hard has also been in demand, but, as with all other brands, the demand has been considerably in excess of the supply. A peculiar feature of this market is the apparent disparagement between the receipts and shipments of lead."

NEW YORK COPPER MARKET.

The market continues to exhibit the effects of the uncertainty produced by conflicting reports of stocks on hand and the position of those prominent as buyers preceding the recent advance. It is stated in certain well-informed quarters that the interest referred to have of late been free sellers in European markets at prices a fraction under the figures named by others. Be their position in Europe what it may, it is a noteworthy fact that buyers here are difficult to find either amongst consumers or elsewhere.

The large inquiry from consuming buyers noted in the early part of last week, has, so far as we are able to learn, resulted in but very small business from which we judge that it was to a considerable extent merely tentative.

The immediate future of the market must continue to be shrouded in darkness until a more pronounced attitude is taken by opposing interests. In the meanwhile consumers hold off and certain conditions, such as high money rates in New York, continued scarcity of coal and increasing production of the metal seem at least momentarily to dampen further prospects of an advance.—The American Metal Market.

ADVANCE IN STEAM GAUGES.

The manufacturers of steam and other gauges, who for some time past have been carrying on a ruinous competition, came to an understanding September 5 by which prices have been advanced so that a legitimate profit can be made by the manufacturers. Before the last era of low prices began the base discount was 60 per cent., which has now been placed at 65 per cent., the extras being determined by the class of buyer and the volume of his business. Prices previous to the change last week had gotten as low as 80 and 10 per cent. in extreme cases. While the present prices show advances in some instances of over 75 per cent., it is claimed by the manufacturers that prices in such cases had been cut to less than manufacturers' cost, especially on 5-inch gauges.—Iron Age.

PIG IRON IN GREAT BRITAIN.

There is more activity in pig iron than in finished materials. This is attributed largely to the American purchases over here, and is a state of affairs which, of course, could not last without some adventitious aid of that sort. The importance of the demand from the United States may be judged from the fact that from Teesside alone last month nearly 25,000 tons of Cleveland iron were exported to that country, or almost as much as all the other foreign shipments put together. In some quarters, however, it seems to be doubted whether these American purchases will continue much longer on the same large scale, and sellers who take this view are apparently prepared to quote forward iron considerably under current rates for prompt delivery. But although the requirements of the American purchasers may diminish in volume, there can be little doubt that production in the States will continue to fall short of the demand for the rest of the year at any rate, and that being the case, British makers may look forward to some trans-Atlantic support during that period at least. Meanwhile there can be no doubt that prices are hardening. Cleveland No. 3 foundry has been realizing 52s. 9d., while 53s. has been asked for prompt delivery. The same quality iron in Lancashire has been sold at 60s. 6d. less 2½ delivered Manchester, and in South Staffordshire on Thursday nearly all descriptions were put up 1s. Stocks in the public stores, taking the whole country, have decreased by about 2,000 tons during the week ended September 2. The following is our usual statement:

Public stores stocks in tons :—	Wednesday.
Connal's at Glasgow	42,000
Connal's at Middlesbrough	127,500
Connal's at Middlesbrough, hematite	300
West Coast hematite	27,300
N.E.R. Stores, Middlesbrough	———

—Iron and Coal Trades' Review, September 5.

MANUFACTURED IRON AND STEEL IN GREAT BRITAIN.

The business passing in finished material, taking iron and steel together, cannot be described as entirely satisfactory, although there is a moderate weight of orders coming forward. There appears to be less demand for iron than for steel at the moment; but the trade doing in South Staffordshire bars is a steady one, and prices are maintained. In Lancashire, however, while the list basis remains at £6 15s. for local and North Staffordshire qualities delivered in Manchester, this price is not generally obtained, and 2s. 6d. less is accepted. Iron sheets are in fair request, but quotations are somewhat irregular, which fact is held to indicate a weakness in the position of makers. In the steel trade a fairly active business is passing in most branches, and there is a good demand for structural material. Prices, however, remain rather low and in many districts continental competition is keenly felt now. The shipbuilding branches are at present an unsatisfactory feature of the situation, the demand for new tonnage being rather quiet generally. Clyde builders seem to be somewhat better off than the English yards, and Scotch makers have recently been able to put up their quotations for steel plates and angles 2s. 6d., making ship plates £5 15s. to £5 17s. 6d., and boiler qualities, £6, both f.a.s. Glasgow. There have been considerable shipments of common plates from Manchester to the United States recently, with the result that prices have stiffened, few makers in that centre being now prepared to accept less than £6 5s. In South Wales there have been fresh importations of German steel bars during the past week, and as a result the market for the article manufactured locally is weaker.—Iron and Coal Trades' Review, September 5.

MOST IMPORTANT THINGS IN CONDUCTING A HARDWARE BUSINESS.

By Hamp Williams.

ALL things pertaining to the hardware business are to be taken collectively in order to make it a success. Location, capital and ability are the essential points and are the foundation of all mercantile pursuits. More especially is this the case with the hardware business.

Location is the first, for without a good location it is impossible to have a demand. Capital is to be considered, and, of course, is important, but is not so important as the first or last mentioned. A good location and ability taken collectively will induce capital to assist you.

CREATING DEMAND AND PUSHING GOODS.

Ability is the most essential of all, as there can be no hope of success without it. So upon it I mean to dwell, as I regard it paramount to all other points in conducting a hardware business. To know when to buy and how much to buy is a hard problem, but my experience has taught me that the most successful way is to buy according to the demand. But many times you can increase the demand by an earnest push. Increase your demand by increasing your variety. That is more necessary than to increase your stock of goods already introduced. And as you increase in capital so should you increase in knowledge. Staples will sell themselves, but it takes a good merchant to introduce new goods successfully. If a man can take sewing machines alone and make money out of them, I certainly can make money on them as a side line. If there is not a pump in my town I will undertake to make a demand by getting a few and pushing them vigorously.

Three years ago there was not a self-binder machine in my county, very few mowers and but few reapers. I accepted an agency (my competitor already had one) and we began to push them. Everybody said that we couldn't run harvesting machines in this country—too rough and too rocky. But we kept pushing, and now there are four machines sold in our town, and altogether we will sell 200 machines this year. We have done the same thing in cultivators. We made a demand. We helped ourselves and we have benefited our people and our country. We have made it possible for our customers to make more, and they are therefore able to spend more. We have better farms and better farmers, and we are better merchants.

Three years ago there was not a buggy in our town for sale. Now there are four firms handling buggies and doing a nice business. We made a demand by keeping them in stock, and secured a trade that otherwise would have gone to distant cities. And this same will apply to many other lines of business. By creating the demand and pushing the goods we have benefited ourselves as merchants and helped our city and country.

HANDLING CUSTOMERS.

Add to your location capital, and to your capital ability, and success is assuredly yours. It takes ability to know how to sell goods, partly cultivated, and partly inherited, but mostly it is done by cultivation. You must meet people well or you can't win them. Never meet them with a deceitful air, but always with a glad hand and an open heart. Be frank and courteous always and under all circumstances. If you want to be successful see your customer first. Receive him kindly, place him in good hands and assure him that he will be treated right. See him last and get an expression from him as to how he has been treated. Invite him back again and be particularly careful that he goes away satisfied. And be careful again that you hold all your old customers, for there is the foundation of your business and upon it you can build. If you can't hold your old customers how can you expect to hold your new ones? You must remember, also, that your old customers will get "weak in the faith." If you never give them anything except the glad hand and the open heart they will consider it hardly enough. They sometimes expect a little something more, and a small gift occasionally is money well spent and usually appreciated. But don't stop at that.

GOOD GOODS.

Educate your trade to buy good goods. Do not handle goods to compete in price with catalogue houses. It is well enough to have a small assortment of cheap goods on hand, to show your trade the difference between a first-class article and a cheap one. Push good goods and stand by them. Educate your trade to know that when you recommend an article it means something. It is not necessary to guarantee your goods, but handle a line you know will give satisfaction. Four years ago I was selling a great quantity of cheap tinware. A salesman induced me to put in a small stock of good-quality enamelled ware. I protested at first, telling him there was too much difference in price. For instance, a tin wash basin that I sold for 5 cents, and made 1 cent profit, the same size in enameled ware sold for 25 cents, a profit of 9 cents. I ordered a very small assortment. Thirty days later the salesman returned. While he was in my store I had a call for a wash basin and I showed my customer the enameled ware, at the same time apologizing to him for showing it, and told him that it was high. Of course, he agreed with me and took the tin basin. When he went away the salesman said: "Do you expect your trade to buy an article from you when you condemn it yourself? Why didn't you tell him the truth—it was not high. The enamelled pan was better worth 25 cents than the tin one 5, and a difference of not less than 8 cents to you." That opened my eyes and from that day I began to sell the best grade of granite, since which time I have sold quantities of the ware, and to-day I can hardly sell cheap tin at any price.

On a number of other lines I have had the same experience, increased my sales, benefited my customers, and have made a better percentage of profit. I am a strong believer in special brands. And it matters not whether your own or your jobber's, if you control the brand it is your own, and a comparison in quality is impossible, which enables you to get a fair profit.

CREDIT AND CASH SYSTEMS.

It requires ability to sell goods on credit successfully. To say, "yes" when you should say "no," or vice versa, is the secret to success in the credit system, as a very little experience will soon teach you. If you find that you have not the ability to sell on credit, then try the cash system, which, in my opinion, requires more ability than the credit system. It is easier to sell goods on credit, and if you will exercise the proper precaution you can make a success. But locality and custom have a great deal to do with it, and in that you must be the judge. If you sell goods on credit always have a set time for collections, and give your trade to understand that you will expect payment to be made when due. I sell builders' hardware, shelf goods, etc.,

Limited
HAMILTON, ONT.

on 30 days in the city, but I do not sell any class of goods on 6 or 12 months' time, except wagons, buggies, sewing machines, cultivators and such other items as I can hold a lien upon to secure me for purchase price. For instance: If you sell 30 or 60-day goods on open account to a farmer on such terms you must have a large surplus of money, or you cannot discount your bills. And if the party proves to be "no good," you have but little show to collect. But if he is owing for a wagon, machine or cultivator, you can take that from him, and that exposes him in the neighborhood in which he lives, which thing he will not allow if he can possibly prevent it. But if it is an open account and he does not pay it, very few, if any, will know about it.

CLERKS.

It requires ability to select good, honest clerks, and it requires more judgment to keep them good and honest after you employ them. No doubt, in my mind, but that many merchants are the cause of their men being dishonest and trifling—some by teaching them that they have no confidence in them. And it is certainly very discouraging to a clerk to know that his employer has no confidence in him. If you have no confidence in your clerks, how can you expect others to have; and unless your trade has confidence in you and in your clerks, which means the same thing, how do you expect to build up your business? Your clerks are a part of your business, and your success is largely dependent upon them. As you increase your stock of knowledge you must help to increase theirs, and as you increase your stock of merchandise you should help increase their finances. If you take no interest in your business, how can you expect your clerk to do so?

There are a great many other things that are necessary in successfully conducting a hardware business. For instance, a well-kept stock, clean and complete. And last, but not least, you must treat the people you buy from right; pay your bills promptly and never make a claim for shortage or hold goods subject to order unless you know positively that you are right. One claim of a shortage, when proven that you are wrong, will injure you more with your jobber than the worth of the article.

TRAVELLING SALESMEN.

The drummers are the representatives of their houses, and unless the jobber or the factory had confidence in their honesty and ability they would not send them out. Therefore it is very necessary that you treat the drummer right, for upon him your success largely depends. He and his co-workers encircle the globe and they are on the "go" continually. They are writing and talking, and it is their business and right to be heard. They are your mouthpiece, and when they hear you they communicate it to their employers. If you are not courteous to them their houses hear of it. If you hold them unnecessarily waiting for your order, that is an injury to the house that is represented, and the blame will come back to you. I owe a great deal of my success to the travelling salesmen. They come into my store, they talk with my clerks, they enthuse them and put new life in them. It is just as necessary to have friends to buy of as it is to have friends to sell to.

A CHEERFUL DISPOSITION.

has a great deal to do with your business, both in buying and in selling. On one occasion I had a customer to call. I met him at the door, shook hands with him, called him by name, invited him in, and asked about his home and the country in general. I could see that he was blue. He asked me how my business was. I said, very good; that everything looked bright to me—one more rain now and another in two weeks and still another three weeks later and our crops would be a certainty, and then what a great harvest we would have. He began to brighten up a little. I told a joke and he laughed. Then I asked him if I could sell him a wagon. He said: "No, but I thought when I left home that I would buy my wife a new stove. She certainly does need one, but I was just about out of the notion when I came in here. I had been in another store and they were talking about times being so hard, and that they did not see what was to become of the people if it did not rain right away, and if it did rain there would not be much made, as the crops were half cut already, and they looked for a war anyhow. And they told me about the big strike in Chicago, about Armour cornering the meat market, and several other things; and so I just about made up my mind to keep the money and not buy the stove." I said: "Yes, that fellow over there is soured and soured on the world. He is not doing much business any way, and he thinks that everybody is going wrong." I told him that "Uncle Sam" had seen Mr. Armour, that the strike would amount to nothing and that everything was O. K. He bought the stove from me, went away happy, made his wife happy and she told her neighbors about her fine new stove. It rained as predicted, and I sold ten or more stoves in that neighborhood. That one sale was the cause of all the sales

"No patience, no self-denial, no character and no brain is required to set up in the grumbling business, but those who are moved by a genuine desire to do good have little time for murmuring or complaint."

"Hope unlocks the temple door,
Oh, heart, arise and see.
Weak fear an added bolt supplies
And doubting rusts the key."

The Sherwin-Williams

Crack and Seam Filler

A tough, elastic composition for filling unsightly cracks and seams in floors and in decks of vessels.

A splendid selling preparation. Very satisfactory. Makes a fine foundation for finishing on. Should be on every dealer's shelves.

For use on old floors where the grain of the wood has cracked or the boards have shrunk apart.

It is also used on new flooring that does not come together completely, and on decks of vessels.

It seals up the cracks thoroughly and prevents them from clogging with dust and dirt.

It is elastic and will not dry up and shrink as putty does.

It is uninjured by water and will withstand any usage that a good floor finish is subjected to.

Write to-day for prices and further information.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

AUTOMATIC SCREWDRIVER.

IT should be stated at the outset that it is the angle slant of the spiral and that only which determines the relative power of the automatic screwdriver; the size has virtually nothing to do with it. The more gradual the slant, or, in other words, the less the slant of the spiral the greater the power. And it does its work easier and larger screws can be handled than it is practical or even possible to handle with a differently-constructed tool. To go further, it is simplicity which counts in tools of this character. Their construction must be simple if they are to win a lasting favor.

Many customers insist upon having a Goodell-Pratt Co's automatic screwdriver. Its reversible mechanism, however, is worth more than a passing notice; two separate and distinct spirals, each working entirely independent of the other, is a feature which the consumer will more and more appre ciate as the years go by. The driving mechanism is used 10 times as much as the drawing mechanism, and, consequently, subjected to 10 times the chance for wear. Where tools of this character are constructed with a single spiral the grooves must be narrower and the bearing narrower in order to overcome the breaks occasioned by having both right and left-hand nuts travelling over the same shafts. These little points will wear, and unless the right-hand mechanism is used evenly with the left the value of one or the other is materially detracted from. Combination tools are, as a rule, neither practical nor popular unless it is possible to embody entirely separate and distinct mechanisms in such a way that neither shall interfere with the working of the other. Any jobber will supply a customer with a Goodell-Pratt Co.'s catalogue, where a complete line of high-class tools is shown. The Canadian agents are Decatur, Bull & Company, Montreal.

PERSONAL MENTION.

On September 9, Mr. Harvey Wilson, of E. M. Marshall's hardware store, Sarnia, was united in marriage to Miss Maggie Jennings.

Mr. Chas. Shaw, of Shaw & Co., Quebec, was one of the visitors to Montreal a few days ago. He reports trade in Quebec exceedingly healthy.

Mr. Dunn, of Coy Bros. & Southcott, St. Catharines, Ont, accompanied by Mrs. Dunn, was a guest at the Windsor Hotel, Montreal, for a few days this week, and visited a number of old friends in the city.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

MACHINERY FOR AUSTRALIA.

THE PROVINCE, Vancouver, of September 3, has the following :—

"One of the most interesting shipments to be made to-morrow by the steamer Foreric, for Australia, is a large consignment of machinery from Vancouver, and manufactured in this city. The shipment is being sent by Letson & Burpee, of this city, from their machine works on Alexander street, and is the second consignment to be shipped by that firm to the Antipodes.

"Last year the Vancouver firm sent a representative, in the person of Mr. H. Peck, to look up possible business in the island continent and adjacent manufacturing centres. It was the newest kind of a business venture, and from results already attained was eminently successful. Before returning here last month Mr. Peck visited Japan and other countries in the Far East and there secured further business for the Vancouver house. The trip was an enterprising one and is of special interest to Vancouver.

"The first shipment was sent several months ago, for a large fruit-canning concern, which has branches in different cities. The shipment, which consisted of only one line, has proved so satisfactory that orders have since been placed for four more lines by the same company. The machinery shipped to-day consists of can-wipers, toppers and soldering machines, together with the crimpers, shafting, bearings, pulleys, etc., which go to make up complete equipment for cannery plants. The machines have all been patented by Letson & Burpee in Australia, as well as in Canada and the United States. In order to accommodate the special needs of the fruit-canning business carried on by the Australian people, an improvement has been made in the wiper which provides a separate jet of steam to each can, and tests of this already made have proved very satisfactory.

"The Foreric to-morrow will take out part of this new shipment, and the remainder will go by the next regular liner—part consigned to Hobart (Tasmania), Sydney and Melbourne."

ELECTRIC LIGHT AND THE EYES.

According to the researches of a Russian specialist electric light is less injurious to the eyes than other forms of artificial light. This conclusion is reached on the basis that damage to the eye is proportioned to the frequency of the closure of the lids. He found that the lids close in a minute 6.8 times for candle light, 2.8 times with gas light, 2.2 times with sun light and 1.8 times with electric light.

NEW POWER COMPANY.

Letters patent have been issued incorporating Benjamin F. Pearson, R. E. Harris, Chas. H. Cahan, H. A. Lovett, G. H. Pearson, to carry on the business of light, heat and power company in all its branches, with all those privileges incidental to the establishment of such a company.

ELECTRICAL AND MACHINERY NOTES.

H. W. PETRIE, 141-145 Front street west, Toronto, has supplied The Tate Optical Co., Peterboro', with a three H.-P. 500-volt motor.

Jones & Moore have sold a 20 H.-P. motor to Robert Watson & Co., Toronto; also a 10 H.-P. motor to The W. English Canoe Co., Peterboro', and an 8 H.-P. motor to The Queen City Vinegar Works.

The Canadian Heine Safety Boiler Co. are shipping this week to The Jacques Cartier Electric Light and Power Company, Quebec, two 500 H.-P. Heine safety water-tube boilers to be used for the reserve station.

Owing to the increased demand for gasoline engines, the manufacturers at Uxbridge, Jos. Haggas & Son, have been compelled to increase their plant by installing a 16-inch iron shaper and a 100-inch radiator drill. The machinery was supplied by H. W. Petrie, Toronto.

The Gee Electrical Company have sold a 100-light dynamo to Mr. Miller, of Sudbury; also a two H.-P. and a one H.-P. motor to The Strathroy Gas and Water Co. The same company has also closed a $1,000 contract for house lighting, including the new Victoria Ladies' College, Toronto.

Some time ago a small "Jewel" engine was shipped to C. L. Vickery, Port Perry, Ont. Owing to the unbounded satisfaction given by this engine, and an increase of power being necessary, Mr. Vickery has purchased a No. 8 "Jewel" engine which will give him 60 horsepower. This speaks well for a well-known engine. The sale was made by H. W. Petrie, Toronto, who is the Canadian agent for this engine.

ALCOHOL AS A MOTIVE POWER.

Prof. Behrend, of the Technical Institute of Rohenheim, who has been experimenting on the motive power of alcohol as applied in a Koerting engine of six H.-P., nominally obtained the following results with three mixtures of alcohol :

(1) Alcohol denaturalized for commercial purposes ; (2) Alcohol with benzine added to the extent of half the volume of the ordinary denaturalizing agent ; (3) The same mixture as No. 2 with 18 per cent. benzine added. The results were as follows :

Mixture.	Quantity consumed per B.H.P.-hour, kilogram.	Cost of spirit per B.H.P.-hour, franc.
1	0.595	0.149
2	0.585	0.146
3	0 519	0.130

The alcohol cost 25 francs per hectolitre ; and by adding benzine this is reduced 0.837 franc per hectolitre. The cost of running with petroleum is about 0.125 franc per B. H.-P. hour.

SILVER LEAD MINING IN B.C.

The silver-lead mining operations in the Slocan and Boundary districts, Vancouver, are reported to be in the most flourishing and prosperous condition. Within the neighborhood of Sandon alone 50 mines have been opened up, and the general activity and prosperity have communicated themselves to every branch of industry, particularly to the merchants supplying the mines. Almost the only feature causing dissatisfaction to the mine owners is the price received for raw lead, for which they receive but $1.30 per ton, while it is quoted at $4.70 in Montreal. There are excellent prospects, however, for a new market, owing to the rivalry between The American Smelting Company and the lead producers of the Coeur D'Alene.

As the best feeling exists between the mine owners and the railroad company, the two important problems of bringing in coke for fuel and the carrying of ores are much facilitated. As the Great Northern will probably succeed in extending its line to the mining district, rates of transportation are apt to decrease.

The proposed import duty on lead is much opposed by the mine owners. The $5 bounty given by the Dominion Government for every ton of lead refined in Canada has so far benefited them but little as the Trail smelters swallow up most of this money.

CATALOGUES, BOOKLETS, ETC.

NEW FURMAN BOILER CATALOGUE.

WE have just received from The Herendeen Manufacturing Co., of Geneva, New York, makers of the Furman steam and hot-water boilers, a copy of their new catalogue. This is a book of 34 pages, handsomely printed on enamel paper, with cover in three colors, and describing and illustrating in the most profuse manner, with very high-class cuts, the various boilers manufactured by The Herendeen Manufacturing Co.

The first 15 pages are devoted to a description and illustrations of the Furman new sectional boiler. This boiler is made in a great variety of styles, so that one may select a boiler especially adapted for burning soft coal, or hard coal, or coke, or natural gas or wood, as the case may be. It is made in four widths of grates, namely, 12 in., 20 in., 30 in. and 40 in., and over 50 sizes, with capacities ranging from 175 sq. ft. of steam to 5,700 sq. ft. of steam, and 275 sq. ft. of water to 9,400 sq. ft. of water radiation.

One of the most interesting features of the Furman new sectional boiler is the fact that it is also manufactured as a central feed magazine burner. The various sections are put together with taper slip nipples, which are manufactured on a special automatic nipple machine designed and patented by The Herendeen Manufacturing Co. The tapered holes in the sections are bored on a special massive six-spindle boring machine designed expressly for this purpose, so that absolute accuracy is guaranteed in the assembling of the sections and the making of positively tight slip-nipple joints.

The next part of the catalogue treats of the Furman water tube portable boilers, which have been manufactured by this company nearly a quarter of a century. These are made both as surface burners and magazine burners and for hard coal and soft coal, and are triple jacketed. These boilers are made in sizes ranging from 175 sq. ft. of steam to 975 sq. ft. of steam when used as magazine burners, and from 275 sq. ft. of water radiation to 1,500 sq. ft. of water radiation. As surface burners they range in size from 200 sq. ft. of steam to 1,050 sq. ft., and from 325 sq. ft. of water radiation to 1,725 sq. ft. of water radiation.

The next section of the catalogue treats of the Furman brickset boilers, which are made in sizes ranging from 325 sq. ft. of steam to 5,000 sq. ft. of steam, and in water from 525 sq. ft. to 7,600 sq. ft. An illustration of a battery of three of the largest size No. 12 Furman brickset boilers is shown on the back page of the catalogue, having a capacity of 15,000 sq. ft. of radiation.

The last part of the catalogue describes and illustrates the Furman junior boilers, which are made for both steam and water, in sizes ranging from 135 sq. ft. to 275 sq. ft. of steam radiation and from 175 sq. ft. to 450 sq. ft. of water radiation. It will be noted that the larger sizes formerly made in the Furman junior style have been abandoned, as the Furman new sectional boiler in the 12 in. series, which ranges in capacity from 175 sq. ft. to 400 sq. ft. of steam radiation, and from 275 sq. ft. to 650 sq. ft. of water radiation, is designed to take the place of the larger sizes of the Furman junior boilers.

Finally, the catalogue contains telegraph and cable codes, tables of dimensions and price lists, etc.

This catalogue should be in the hands of every progressive steamfitter, and is mailed free on application.

SOCKETS AND RECEPTACLES.

The Canadian General Electric Co. have issued a neat, concise and serviceable illustrated catalogue and price list entitled "Sockets and Receptacles."

ART IN ADVERTISING.

The Canada Paint Co., of Montreal and Toronto, have issued a handsome hanger advertising the "Elephant" brand of white lead. It is lithographed in 10 colors, done by The Canada Engraving Co., Montreal, and is considered a work of art. For a number of years "Elephant" brand has gone along well without any advertisement, but a number of the customers of the company asked for something tasty to help show off the goods in the stores. Any hardware merchant who makes a specialty of the "Elephant" brand white lead can get a copy of this hanger by writing The Canada Paint Co., Montreal.

MR. TARTE AND THE IRON INDUSTRY

Hon. J. I. Tarte, Minister of Public Works, during his investigation into the condition of Canadian industries and the need of a higher tariff, on Monday, September 15, visited the Montreal Rolling Mills, Caledonian Iron Works Co., and Pillow-Hersey Manufacturing Co. The Minister was shown all over the plants and given all desired information. From what he learned he believes the iron industry to be in the best of condition, with a probable continuance of that state of affairs if the tariff is not altered. He believed that it would develop very greatly if all the raw material could be produced in Canada, and protection against United States competition afforded on some lines.

A LARGE ANCHOR.

What is perhaps the largest and heaviest anchor ever made was forged recently at the Charlestown, Mass., navy yard. Its weight is over 8 tons and it cost nearly $2,000. It is 15 ft. long over all and 9 ft. 6 in. wide over the points. The cable for this anchor is 360 fathoms (2,160 ft.) long, each link weighing 60 lb.

AN OTTAWA WEDDING.

A pretty home wedding took place recently at the home of the bride's brother, Mr. J. Thorp Blyth, Maclaren Street, Ottawa, when Mr. Chas. Watt, of the firm of Blyth & Watt, was united in marriage with Miss Robena Blyth. Among the guests present were: Mr. D. H. Geggie, managing-director of the Quebec Gas Works, and Mrs. Geggie and Mr. J. T. Maclaren, of Maclaren & Co., Strathcona, Alberta, and Mrs. Maclaren.

Mr. and Mrs. Watt left on a short trip to New York and Boston.

Mr. Watt will be remembered by many friends among the eastern hardwaremen as a former representative of the Thos. Davidson Manufacturing Co. of Montreal.

HARDWARE AND METAL joins with a host of friends in wishing Mr. and Mrs. Watt every future happiness.

A LARGE STEEL DOME.

The largest steel dome in the world, according to Engineering News, will be that which will surmount a large new hotel now in course of construction at West Baden, Ind. The dome, which is 200 ft. in outside diameter, rises about 50 ft. above its bed-plates and is supported by 26 steel ribs. All is connected at the crown to a circular plate drum, and tied together at the bottom by a circular plate-grinder tie.

Successive pairs of ribs are braced by bays in both upper and lower chords. The bracing consists of crossed adjustable rods. At the centre these rods are carried over to an attachment to the central drum so as to give more rigidity against twisting of the centre. The entire weight of the dome, including framework and covering was 475,000 lb. The dead load is, hence, about 15 lb. per square foot.

In course of erection, the large central dome was first raised to its proper position by means of a falsework tower, and a boom derrick was then securely fastened on the top for hoisting the ribs.

Oliver J. Westcott, in charge of the estimating department of The Illinois Steel Co., originated and worked out the design. The general contractors of the building are Caldwell & Drake, of Columbus, Ind.

WE LEAD — OTHERS FOLLOW.

THE INTERCOLONIAL EXHIBIT.

A WALL space of some 140 feet was devoted to the exhibit of the Intercolonial Railway at the Toronto Exhibition this year. This was used to display 35 large and handsome reproductions of scenes, illustrating the country through which the Maritime Express passes. They included views in the Provinces of Quebec, New Brunswick, Nova Scotia and Prince Edward Island. There were summer resorts, fishing and hunting regions and sea bathing spots depicted, all calculated to entrance the minds of would-be tourists. A handsome centre to the exhibit was a large moose head, the trade crest of the railway company, which stood out from the wall in all its natural might. Among the pictures, one of the most striking was the photograph of the Miramichi moose, shot this year by Robert H. Armstrong.

The exhibit was prepared by Mr. W. L. Creighton, the advertising agent of the railway company, and during the two weeks of the Exposition it was in charge of Mr. N. Weatherston, the travelling freight and passenger agent. Mr. Weatherston was able, from his 15 years' service on the railway, to give excellent information to the many inquirers who passed by and admired the pictures. Indeed, the exhibit attracted much attention, and there was great eagerness evinced to secure the literature that had been prepared for distribution. Many people were surprised to learn of the facilities afforded by the railway company to summer tourists. From June 1 to September 30, greatly reduced rates are in force, with a good return up to November 1, and with very liberal stop-over privileges at all the principal points of interest.

Anyone who was unable to see the pictures shown by the Intercolonial is reminded that descriptive literature will always be readily supplied at the company's offices, which will explain everything about travel on that railway.

WHY?

Editor HARDWARE AND METAL, — Can you tell me through the columns of your valuable paper whether it is the fault of the paper manufacturers, or the people whom they pay to keep them honest, that there is a discrimination in favor of Ottawa as regards freights, which virtually shuts the Montreal men out of the tarred and grey paper market around and north of Ottawa? Again, I wonder why? WANDERER.

[Remarks: Perhaps some of our readers can enlighten "Wanderer."—Editor.]

INQUIRIES ABOUT CANADIAN TRADE.

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London:

1. A London firm of buyers for South-African business houses desires to get into communication with Canadian shippers of hams, bacon, cheese, fruits, canned goods and produce generally.

2. A North of England firm using quantities of spade and shovel handles wishes to be placed in touch with Canadian exporters of these goods.

3. A London firm interested in a new process for treating iron sand desires to get into communication with owners of iron sand deposits in Ontario and Quebec.

4. A firm at Boulogne (France) wishes to correspond with one or two reliable Canadian shippers of apples of good quality.

5. A Middlesbrough firm asks to be placed in communication with Canadian exporters of peas, beans, cheese and other produce from whom they could obtain quotations.

6. A Johannesburg (S. Africa) firm desires to secure agencies for Canadian natural and manufactured products, and will be glad to hear from houses in the Dominion requiring such services.

[The names of the firms making the above inquiries can be obtained upon application to the Editor of HARDWARE AND METAL.]

A. Lafontaine, general merchant, Drummondville, Que., has assigned, and his creditors held a meeting on September 15.

QUEBEC MARKETS.

Montreal, September, 19, 1902.

HARDWARE.

AMONG the active lines this week are household hardware articles of all sorts. Kitchen utensils are also in good demand, and business in weather strips, coal hods, fire shovels, stoves and stove boards, etc., has considerably improved. Prices on most lines have remained unchanged. Some change will be found in cordage, lathyarn being higher. In scythe snaths for 1903. delivery, the discount is now 40 per cent. instead of 45 per cent. Lamp and lantern burners are now selling well. Carpet sweepers and cutlery have commenced to move for the Christmas trade.

BARB WIRE.—Very few orders have been received for this wire during the week and the market is dull. The price is still $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—No improvement is reported and trade continues quiet and without special feature. Quotations are: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—The market is rather quiet this week. Quotations are as follows: Bright and annealed, $2.60 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—Trade has not improved. The discount is 25 per cent. Net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c.; ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—A few orders have been received this week at current prices, but the market is somewhat quiet. The discount is 62½ per cent.

FENCE STAPLES.—There is little or nothing doing in this article. Galvanized fence staples sell for $3.25 per 100-lb. keg; bright, $2.90 per 100-lb. keg; 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—Business in wire nails, while not especially active, has been fairly satisfactory for the season, and trade has been done on a basis of $2.5 in small lots and $2.50 in carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—In these a fairly good trade is doing at unchanged prices. We quote: $2.45 per keg in small lots and $2.37½ per keg in carlots.

HORSE NAILS.—There is a good demand for horse nails. No change in the discounts has been made, and we quote: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—In this line the market is active, though steady. No quotable change is reported. Quotations are as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—Business is only fair. The market is without any striking feature. The discounts are quoted as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—Lathyarn is ½c. higher this

NOV .7 1902
RETURNED

Yukon Triple Heater

Practically a Small Furnace.

Burns rough wood thirty inches long.

Cold air can be drawn from adjoining rooms, or outside if desired, by connecting pipe to collar at back of stove.

Heat travels three times the length of stove before entering stove pipe.

Is especially adapted for country schools.

Will heat a moderate-sized house as well as a furnace and at less cost.

Write for advertising matter.

All orders filled promptly.

MIDLAND, ONT. Limited

week, single being now quoted at 11½c. and double at 12c. Jute sells at 9c. We quote as follows: Manila, 15c.; British, manila, 13c.; sisal, 12½c. lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound. 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—The discounts on rivets and burrs have not been changed. A fair demand is experienced, and our quotations are as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—These move out fairly well at unchanged prices. The discounts are: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is but little doing in this line, though a few sales are effected at the following prices: Tarred felt, $1.70 per 100 lb.; 2-ply ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll

SCREEN WIRE CLOTH.—Nothing is doing. We quote $1.37½ per 100 square feet.

POULTRY NETTING.—Trade continues very quiet. The discount on Canadian or English poultry netting is 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used.

HARVEST TOOLS.—Dull. Discount, 60 per cent.

FIREBRICKS.—A fair trade is reported this week, but there is still much room for improvement in the demand. English firebricks are quoted at $16 to $22 and Scotch at $17 to $22 per 1,000.

CEMENT.—Trade continues rather quiet and the market is featureless. We now quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—These are in active demand. Prices are firm, and we quote the discounts as follows: Empty, Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded, "Trap," 30 per cent.; American, 30 per cent. "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per

cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SNOW SHOVELS.—Jobbers report a very good demand for snow shovels, and we quote as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—These are in active movement at unchanged prices. We quote: No. 70, 38½ to 40c. per dozen; No. 55 55 to 60c.; No. 57, 82½ to 90c.; No. 60 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

METALS.

Prices in the general list of metals have been steady during the week, advanced figures being no doubt prevented to some extent by the importations, which have been fairly heavy. Orders for structural and railroad steel continued brisk. Pipe is in fair demand and the market is improving. Bar iron is also active, but sheets are reported quiet. Ingot tin is quoted lower this week, in sympathy with the English market, which still shows some weakness.

PIG IRON.—The exceptionally heavy movement in pig iron keeps up. We quote as follows: Canadian, $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—This continues in brisk demand at $1.95 to $2 for merchants' bar and $2.20 for horseshoe iron.

BLACK SHEETS.—These are fairly active, but nothing of importance has occurred on the market. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is a good demand and the market is active. We quote: No 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell", brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—The copper market is somewhat steadier this week. The price is 14c.

INGOT TIN.—In sympathy with the foreign markets ingot tin is quoted lower this week. Straits is now quoted at 30 to 31c.

PIG LEAD.—There is no change and a fairly good demand prevails at $3.25.

LEAD PIPE.—There is some improvement in the demand this week. Composition and waste sell for 8c. and ordinary, 7c. The discount remains at 37½ per cent.

IRON PIPE.—This is in fair demand at unchanged prices. We quote: Standard pipe per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—The English market is still easy, but no further declines are reported. Locally, there is no change. We quote: Charcoals, $4.75 to $5.25; cokes, $4.25.

STEEL.—This is fairly active, and we quote: Sleighshoe, $2.05; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

CANADA PLATES.—These are moving out fairly well. We quote as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

SHEET STEEL.—There has been no improvement in the demand for this metal. We quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—This is moving slowly. Our quotations are as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 30 to 50c.

TERNE PLATES.—There is no change. Trade is quiet and the price stays at $7.50.

COIL CHAIN.—Very little doing. Prices are unchanged, and we quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Trade has not improved and the market is quiet at $5.85 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—There is not much doing. We quote 5c.

SOLDER.—Trade keeps up well, good sales being effected on a basis of 18c. for bar solder and 20c. for wire solder.

PAINTS AND OILS.

Linseed oil and turpentine are steady at the quotations here given, no change having been made since our last report. A feature of the market is the extraordinary demand for white lead. The trade is evidently of the opinion that now is a good time to buy. Some grinders have difficulty in keeping up with the orders which are pouring in. After about two weeks of quietness, owing to the large fairs being held, and several travellers off the road, the trade started in with a strong, healthy movement, and the whole list of paints and oils is exhibiting a buoyant tendency. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, \$5.15 to \$5.25; No. 1, \$4.77½ to \$4.87½; No. 2, \$4.40 to \$4.50; No. 3, \$4.02½ to \$4.12½; No. 4, \$3.65 to \$3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—\$5.25 in casks; kegs, \$5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., \$1.90 per 100 lb.; bulk, in less quantity, \$2.05; bladders, in bbls., \$2.25; bladders, in 100 or 200-lb. kegs or boxes, \$2.40; in tins, \$2.55 to \$2.65; in less than 100-lb. lots, \$3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, \$4.50; in 100-lb. kegs, \$4.75; in less quantities, \$5.75 per 100 lb. No. 1 red lead, casks, \$4.25; kegs, \$4.50, and smaller quantities, \$5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, \$5.25; smalls, \$5.75 per 100 lb.

LINSEED OIL.—Raw, 75c.; boiled, 78c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, \$2.35 to \$2.45; orange, \$2.25 to \$2.35.

MIXED PAINTS.—\$1.20 to \$1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Heavy red brass is quoted ½c. lower this week and heavy yellow, ¼c. lower. Copper and brass are still dull. The movement in iron, however, is active, and prices are firm. We quote as follows: Heavy copper and wire, 10½c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, \$15; No. 2, \$7 per ton; machinery scrap, \$16; stove plate, \$12; malleable and steel, \$5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6½c. per lb.

GLASS.

A better movement is reported this week for glass, several orders having been received for immediate delivery. Prices are as follows: First break, 50 feet, \$2.10; second, \$2.20 for 50 feet; first break, 100 feet, \$4; second break, \$4.20; third break, \$4.70; fourth break, \$4.95.

HIDES.

There has been no change in this market. Trade is fair, but offerings have fallen off considerably. We now quote: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c.; lambskins, 50c.

MARKET NOTES.

Lathyarn has advanced ½c.

Scythe snaths are 5 per cent. higher for 1903 delivery.

ONTARIO MARKETS.

Toronto, September 19, 1902.

HARDWARE.

IN wholesale hardware the fall rush is commencing and everything is moving with increased activity. The orders taken during Exhibition have kept the jobbers busy, and now that the travellers have returned to their routes business keeps up well. A good many orders have also come in from the Northwest since the harvest has turned out so well, and this, combined with their usual trade, is making business in all lines very active. Stoves and ranges are selling well and there are indications of a shortage in them before the end of the season, as the demand for them this fall will be heavy. No changes have been made in prices, and the market in all lines is steady.

BARB WIRE.—Very little business is doing in barb wire. We quote: \$2.65 in carlots and \$2.77½ for less than carlots f.o.b. Cleveland. From stock, Toronto, \$3.00.

GALVANIZED WIRE.—Trade in this line is light and the prices are unchanged. Quotations are as follows: Nos. 6, 7 and 8, \$3.50 to \$3.85 per 100 lb., according to quantity; No. 9, \$2.85 to \$3.15; No. 10, \$3.60 to \$3.95; No. 11, \$3.70 to \$4.10; No. 12, \$3 to \$3.30; No. 13, \$3.10 to \$3.40; No. 14, \$4.10 to \$4.50; No. 15, \$4.60 to \$5.50; No. 16, \$4.85 to \$5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at \$2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—Business in this line is mostly confined to stove-pipe wire. The discount is 25 per cent.

SMOOTH STEEL WIRE.—The demand for this wire is small, and we now quote the base price: \$2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, \$2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—The volume of business in wire nails has increased a little during the week. Our quotations are as follows: Wire nails, in carlots, \$2.50 and in less quantities, \$2.55. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—These are quiet. Prices are unchanged. We quote: \$2.45 per keg and \$2.37½ in carlots.

HORSE NAILS.—There is a greater demand for these than the manufacturers can supply. Some sizes are hard to get, especially "C" brands, and we quote the discounts as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—There is an improvement in the demand for horseshoes this week. Our quotations are as follows: Iron shoes, No. 2 and larger, light, medium and heavy, \$3.45; snow shoes,

EASTLAKE SHINGLES

ARE SO EASY TO HANDLE.

They fit together perfectly by means of their patent side lock—can be quickly laid by any handy man—and last so long, being absolutely Fire, Rust, Leak, and Lightning Proof. These are the points that commend them to your customers.

You're not doing all the business you might do, unless you keep Eastlakes in stock.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

$3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The inquiry for these is even better than it was, but the difficulty in obtaining supplies is as great as ever, and we quote the discounts as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—The condition of this market is similar to the situation in screws, and the discounts are quoted as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—These are also in heavy demand and the supplies are very small, and our quotations are as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—Jobbers are experiencing a good sorting-up demand for spades and shovels. The discount is 40 and 5 per cent.

ROPE.—Trade in rope is of a light sorting-up nature. We quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11c., double, 11½c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—Trade in this line is keeping up well. The discount is 60 per cent.

EAVETROUGH, ETC.—Quite a number of orders for eavetroughing and conductor pipe are now coming forward with the approach of fall. Our quotations are as follows: Eavetrough, $3.10 per 100 square feet for 10-in., and conductor pipe, $4 for 3-in. and $5.25 for 4-in.

BUILDING PAPER.—A good demand continues for building paper. Quotations follow: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—Some lines of tinware, such as stove furniture, are moving out briskly, but enamelled ware is quiet.

STOVES AND RANGES.—These are very much in demand and the prospects are that before the fall is over there will be a shortage of stoves. Stovepipes, elbows, etc., are also active.

SPORTING GOODS.—There is still a good demand for guns and rifles, principally from the North and Northwest, and ammunition is also going out freely.

CEMENT.—The market for cement is firm and unchanged. The manufacturers have taken enough orders to keep them busy for months ahead, and very few new contracts are being closed. Quotations are as follows: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 up per barrel.

METALS.

The situation in metals is little changed from last week. Trade in all lines is good and there have been no changes in prices. The tin market abroad shows dullness and lack of speculative interest, and the New York and London copper markets are weak and dull. Owing to a slight improvement in the shipments of coke this week the outlook in pig iron in the United States is better than it has been for a couple of weeks back. Only a few of the Valley furnaces at Pittsburg have been banked at any time during the last few days, but production is not up to the normal.

PIG IRON.—There is a strong demand for pig iron and the market is firm. The situation at the Canadian furnaces is unchanged. Quotations at the furnaces are nominal at $23 for No. 1 and $22 for No. 2. Summerlee iron is quoted at $23 on track, Toronto, and English iron, $22 on track, Toronto.

STEEL BOILER PLATES.—A very fair amount of business continues in these at unchanged prices. We quote $1.80 for carload lots on track, Toronto.

STEEL RAILS.—Rails for steam railways are quoted at $30 per ton and those for electric railways at $36.

TOOL STEEL.—A fair amount of orders keep coming forward for tool steel and the market is unchanged. We quote: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—No change is reported in this steel.

SPRING STEEL.—A good demand is experienced for spring steel.

BOILER TUBES.—A good business continues in these.

BAR IRON.—The demand is active and the supply is limited. We quote: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—The demand for these continues good. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are moving freely and the prices are unchanged. We quote as follows: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—These are still in active demand, and our quotations are as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 gauge.

TIN.—This is quiet on the local market. The London, Eng., tin market is easy and the United States market shows lack of speculative interest. A good demand is reported from consumers for spot tin, but competition for the business is keen, and it is being supplied at below cost of import. We quote $32 to $33 per 100 lb.

TINPLATES.—An improvement is noted in the demand for tinplates on the local market. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25.

COPPER.—A good demand for copper is reported. We quote: Ingot copper, $13.50 per 100 lb. and sheet copper, $22 to $23.

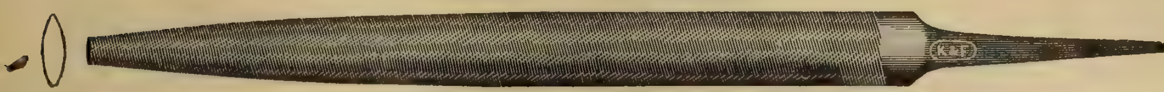
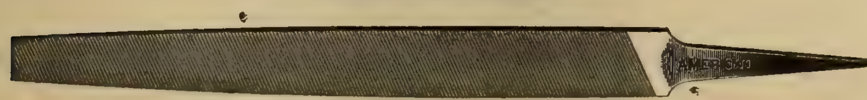
FILES and RASPS WARRANTED

KEARNEY & FOOT BRAND

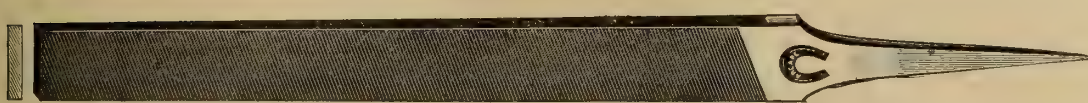


GREAT WESTERN BRAND

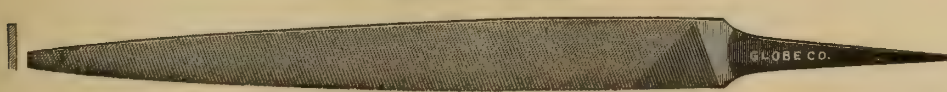
AMERICAN BRAND



ARCADE BRAND



GLOBE BRAND



The largest manufacturers in the world.

We manufacture the well-known brands of Cast-steel Files and Rasps shown herewith, all of which are warranted for high-class material and superior workmanship.

Our goods are now so'd in the four quarters of the globe, command the highest prices, and have won for themselves an enviable reputation, acquired as the result of many years' experience.

Walter Grose, Montreal,

Selling Agent for the Dominion of Canada.

One or other of the above brands may be purchased from prominent Hardware Merchants throughout the Dominion who carry an assorted sto k.

BRASS.—The market is unchanged in this line from last week. The discount is 15 per cent.

PIG LEAD.—This is moving fairly well in small lots. We quote: Pig lead, $3.50 and bar, $3.75.

IRON PIPE.—An active trade keeps up in iron pipe at unchanged prices, and our quotations are as follows per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—The market for zinc spelter is quiet. We quote 5 to 6c. per lb.

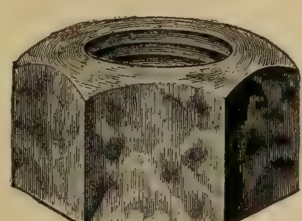
ZINC SHEETS.—These are unchanged. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—Trade in this line is still active.

ANTIMONY.—A fair demand for antimony continues. We quote $9.50 per 100 lb.

PAINTS AND OILS.

The feature of the paint and oil market this week is the advance of 2c. per gallon in spitits of turpentine, due to the upward movement of the Southern market for the spirits, which have been advancing there steadily during the week. The spot stocks of the spirits here are small and the buying is moderate in nature. Raw and boiled linseed oils are unchanged, but show some activity. White leads in oil of standard brands are active at the prices quoted below, but some manufacturers are even offering the pigment at lower prices than these. Mixed paints are fairly active. The other lines are unchanged. We quote:



THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

DECATUR, BULL & CO., Sales Agents, MONTREAL

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb, $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE AND GASOLINE.—Benzine, in barrel lots, 18¾c. per gal.; gasoline, ordinary, 21¼c., and engine, 22¼c. f.o.b. Toronto.

PARIS WHITE.—90c. to $1 per 100 lb.
WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities 10c. extra.

PUTTY.—Bladders, in bbls., $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per bbl.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 77c.; boiled, 80c.; 3 to 5 barrels, raw, 76c.; boiled, 79c.; 6 to 9 barrels, raw, 74c.; ; boiled, 77c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 71c.; 2 to 4 bbls., 70c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

This market continues steadily to improve and increased sales are reported this week, and our quotations are now as follows: Under 26 inch, $4.45; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

Trade in old material continues about the same as last week. New copper is weak and this is having its effect on the old metal, but no quotable changes have been made. Zinc is strong, and if the present indications prove true, there will be an advance next week. Our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c. to 8½c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c to 5½c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2⅜c.; iron, No. 1 wrought, $12 per net ton; No. 2 wrought, $6; machinery cast scrap, $13 to $14; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 5 to 5½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—Buying in hides is fair and the prices are steady at the following quotations: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, 8½ to 9c. per lb.

SKINS.—A fair demand is reported for skins, and quotations are as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings, and lambskins, 50c.

WOOL.—This product is quiet and the quotations are unchanged at 13½c. for fleece wool and 7½c. for unwashed.

TALLOW.—No change is reported in the tallow situation. Prices are weak at 6¾ to 7c. per lb.

SEEDS.

The movement in seeds is confined to offerings of alsike at outside points. A little timothy is also being brought forward. We quote ' Alsike, $5 to $7 per bushel and timothy, $1.75 to $3.

COAL.

The situation at the mines is unchanged. Some people hold that there will be shortly a termination of the strike, but others do not expect any settlement for some time. The available supplies on the local market are small and prices are advancing sharply. We quote at international bridges: Soft coal, $3 to $4.50 per ton.

PETROLEUM.

The demand keeps improving, and we quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16 to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Turpentine has advanced 2c. per gal.

BE COURTEOUS TO THE DRUMMER.

"IT is a curious thing," said a leading jobber, "that there are so many retailers and retail buyers who, while painfully careful of the feelings and interests of their customers, are utterly oblivious to the feelings and interests of the commercial travellers with whom they come in contact. Let a man approach them as a purchaser and the are all smiles and suavity. Let him approach them as a seller, and they do not even treat him with common decency. They seem to feel a pleasure in visiting upon the head of wholesalers' agents all the snubs they suffer from their customers. As a consequence there is many a merchant doing business with travelling men who, while booking his order, curse them in their hearts, not because he is a close or shrewd buyer that they cannot over-reach, but because to get his order it is necessary to put up with an amount of indignity and humiliation that stirs their deep resentment."

Business is business and a commercial traveller or any other solicitor for patronage expects to put up with discomfort and annoyance, but no one has the right to ask him to patiently endure unnecessary humiliation. He who does shows an amount of conceit, an ignorance of the world and a capacity for making enemies that sufficiently prove his own insignificance as a man and a merchant. There are men on the road as elsewhere who cannot be too severely treated, but they are exceptions. The average travelling man has an exceptional knowledge of the world, exceptional powers of observation and insight into character and conditions, and an inside knowledge of goods and men that makes him a mine of information, a travelling storehouse, for the people with whom he comes in contact. With his access to the credit men of great wholesale houses, his acquaintance with other travelling men, and his many relations in the great markets of the country, he is a commercial factor whose influence it is hard to overvalue. What folly it is to excite without provocation the ill-will of such a man!

If a merchant cannot see the advantage of having the good-will of the travelling fraternity let him remember that credit and the amount of consideration shown the retailer by the wholesale house are often materially affected by the travelling man's favorable or unfavorable attitude toward him. It's a hard thing to be hard on a man whom you like, and the reputation of being a nice man to do business with is a valuable moral asset. Again, it is a good thing to have the good-will of the men from whom you never have bought and never expect to buy goods. The time may come when they can speak a word for or against you. The prestige for good or evil built up about us by the involuntary estimates or action of other people has its fruit as much as our direct efforts.—From The Keystone.

BUSINESS CHANCES.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the past week the following building permits were granted in Toronto : S. Kellow, a pair of semi-detached 2½-storey brick and stone dwellings, Albany ave., for $4,000 ; St. Stephen's Church, a one-storey addition to church, corner of College street and Bellevue ave, for $1,500 ; C. W. Thompson, for alterations to dwelling, brick and wood, Avenue Road, for $2,000 · Thos. Corbett, a two-storey and attic brick and stone dwelling, St. Clarens ave., for $1,900 ; Reliance Loan Company, a fourth additional storey to office building, brick, King street, for $4,000 ; Thos. McIlwain, pair semi-detached two-storey and attic, brick and stone dwellings, Clow ave., for $6,000 ; R. Anderson, two-storey dwelling, brick front, roughcast sides and back, 19 Carlaw ave. for $750 ; R. F. Scott, two-storey and attic brick dwelling, No 5 Rosedale Road, for $4,500 ; Lieut.-Col. W. C. Macdonald, alterations to dwelling, brick, No. 485 Huron street, for $2,000 : Orr Brothers, alterations and one-storey brick addition, Nos. 43-45 Queen street east, for $1,000 ; Robt. Dale, pair semi-detached, two-storey brick dwellings, on Euclid ave., for $3,000 ; R. Smith, two-storey brick dwelling, Albany ave., for $2,500 ; The Bell Telephone Co., three-storey brick addition to telephone offices, Nos. 31 and 33 Temperance street, for $35,000 ; Peter Macdonald, two-storey brick store on Sherbourne street, for $4,000 ; A. F. Langoes, two-storey and attic brick and stone dwelling, No. 700 Dundas street, for $1,800; pair two-storey brick and stone dwellings, detached, on Campbell ave., for $2,000 ; trustees Baptist Church, three-storey brick and stone Sunday school, Argyle street, for $9,000 : W. H. Brouse, two-storey and attic brick dwelling, No. 63 St. George street, for $3,300 ; A. Norman, two-storey stone foundation, brick front, roughcast sides and back, to cost $2,800 ; G. A. Walker, pair semi-detached, two-storey and attic brick and stone dwellings, Sorauren ave.; J. J. Fraser, pair semi-detached, two-storey brick dwellings, Nos. 16 and 18 Pendrith street, for $2,000.

BUILDING OPERATIONS IN SYDNEY.

According to The Sydney Record, the building boom at that place has been no means abated. The advance in the price of lumber and the increased cost of wages have been no barrier to the building industry. The contractors, notwithstanding the great number of men employed, are scarcely able to keep up with the orders they receive. During the past year The Rhodes, Curry & Co. have completed a contract of 600 houses for The Dominion Coal Co., at Glace Bay, and are beginning a new contract of 56 houses for The Dominion Steel Co., at Ashby, and 50 houses for The Nova Scotia Steel Co., at Sydney Mines. Other contractors have also large contracts.

NEW SOIL PIPE FACTORY.

Plans for the establishment of the new foundry for the manufacture of soil pipe, valves and all the smaller castings used in the plumbing business are being rapidly pushed forward by The A. C. Thompson Co., of Sydney. A. C. Thompson has just returned from a two weeks' visit to the United States, where he has been selecting the machinery necessary for the foundry. The foundry will give employment to a large number of men, and will be the largest industry of the kind in the Province of Nova Scotia.

PLUMBING AND HEATING CONTRACTS.

Mashinter & Co., Toronto, are furnishing a couple of houses on Euclid avenue with plumbing and gas lights.

Fiddes & Hogarth, Toronto, have secured the contract of plumbing for the Methodist Church on King street east, that city.

The heating and plumbing of the residence of Jas. Smith, Montague Place, Toronto, is being done by Mashinter & Company.

C. R. Bowers & Co., Chatham, report the following contracts : Plumbing of two houses for James Taff, Queen street ; also heating for dwelling of James Waugh, William street ; plumbing of dwelling of Thos Brown, Adelaide street.

PLUMBING AND BUILDING NOTES.

Burkholder & Green, plumbers, Vancouver, have dissolved.

A. S. Hunter, plumber, Rossland, B.C., has sustained loss by fire.

Tenders are now asked for the new $15,000 Roman Catholic Church at McGregor, Essex county, the plans for which were prepared by Moore & Henry, of London. The building is to be of stone and will have a seating capacity of 600.

INDUSTRIAL GOSSIP.

IN a few days A. J. Hughes and A. S. White, two English capitalists, who are inspecting the steel plants of Canada, will arrive in Toronto. These gentlemen, who are connected with an iron and steel business in Russia which employs from 9,000 to 12,000 men, and have a plant with a capacity of 300,000 tons of pig iron, hope, by a study of the steel works of the Dominion, to improve their methods of manufacture.

The new factory to be erected by The McClary Manufacturing Co., of London, will be somewhat of an innovation, as the walls and floor will be entirely of concrete and Portland cement. This new building, consisting of two storeys, will be 300 x 80 feet in dimension and will be used exclusively for stove mounting and nickleplating.

F. W. Wheeler, the retired shipbuilder of Bay City, was in Sault Ste. Marie, Ont., on Saturday, in conference with F. H. Clergue regarding the matter of a shipyard to be located at the Soo. Mr. Clergue has for a long time past desired to start a yard there, and it is said that he has at different times negotiated with various parties regarding the matter. Three years ago, Mr. Wheeler, who was one of the largest shipbuilders on the great lakes, sold his Bay City yards to the Trust, and has since been retired from business. Although very reticient as to the conversation which occurred at the meeting, Mr. Wheeler admitted that this subject was the chief topic of conversation.

J. S. BENNETT'S DISPLAY.

One of the attractive displays at the Toronto Industrial Exhibition was the shelf boxes for groceries, drugs, hardware and other lines of trade, and kitchen cabinets manufactured by J. S Bennett, No. 15 Marion street, Toronto. The kitchen cabinet is among the latest of Mr. Bennett's inventions. It is fitted with a bread board and drawers for spices, etc. This cabinet has many ingenious features about it, and Mr. Bennett secured quite a number of orders for it.

Mike : "How much further does the soign say it is to Noo Yor-rk, Patsey ?"

Pat : "Twinty moiles."

Mike : "Well, thot's only tin moiles apiece."

IMMIGRATION OF AMERICANS TO CANADA.

ACCORDING to a Winnipeg, special to The Evening Post, the extent of immigration into Manitoba and the Northwest Territories from the United States is little understood in the east. Sir Charles Dilke's prophecy of 12 years ago that these fertile lands would become the wealth centre of the Dominion is already being fulfilled. For the year ending June 30, 1902, 19 570 persons from the United States took up homesteads in Manitoba and the Northwest Territories, against 5,197 in the preceding year. Actual settlers number five times as many, as only heads of families can take up homesteads. In 1900 land along the C.P.R. was worth $3 an acre; now there are few obtainable lots close to the line, while the price of the nearest is $7 to $8 an acre. An examination of Winnipeg hotel registers shows that 40 per cent. of the visitors are from the United States. It is said that the cheapness of land makes it possible to produce wheat and flour at less cost than in Minnesota or the Dakotas. Millers of Minneapolis and St. Paul are anxious to get Canadian wheat, and are advocating reciprocity with Canada with the idea of having the grain duty removed. This influx of Americans is proving of great benefit to Canadian development, especially in the line of capital, as the American settlers are bringing millions with them into the country.

BACK FROM AUSTRALIA.

Mr. L. Rosenthal, representing the firm of A. L. Silberstein, New York, has returned to Montreal from his Australian trip, greatly pleased with his success there. The "Griffon" cutlery, made by this firm, have taken a firm hold on the trade in Australia. In the Carbo-Magnetic razor, especially, Mr. Rosenthal did an excellent business.

WHO IS RESPONSIBLE?

Editor HARDWARE AND METAL,—Would some of your readers kindly enlighten us on the following: We purchased a quantity of hardware from an English firm. The traveller who sold us the goods gave written prices c.i.f. Montreal, and we signed a contract on those terms. When the goods arrived they were in a rusty and unsalable condition. We protested in good form and endeavored to have the goods replaced as they had already been paid for, the arrangement being that they were to have been paid for on delivery to the steamship company on the other side.

The firm from whom we bought the goods ignore our protest, and claim that even though they were sold c.i.f. Montreal, they are not responsible for the entire insurance, and that they are not liable in any way.

We claim that having bought the goods, c.i.f., Montreal, we were bound to receive them only in good condition.

We would be glad to have the opinions of some of the readers of HARDWARE AND METAL on this subject.

IMPORTER.

[This is an important question and HARDWARE AND METAL willingly places its columns at the disposal of the trade for its discussion.—Editor.]

SUING FOR DAMAGES.

The Canada Hardware Co., Montreal, took action, through their legal representative, J. L. Chalifoux, against Suren, Hartmann & Co., hardware exporters, London, England. The Canada Hardware Co. claim that the English firm shipped out a quantity of hardware which reached this port in a damaged and partly unsalable condition. The difference between the price paid and the value at which the plaintiffs appraised the goods amounts in all to somewhat over $1,000, for which the action is brought.

MADE IN CANADA.

Editor HARDWARE AND METAL,—In passing among the exhibits at the Industrial Fair, Toronto, this year were to be seen displayed on most of the exhibits neatly printed cards "Made in Canada." Canadians had no reason to be ashamed of the goods so set out for special notice, and these cards added another link in the chain of education to that started by the Canadian Manufacturers' Association and endorsed by the Retailers' Association. The next link is the perfecting of lines made and reducing the cost of manufacture so they can meet foreign competition, and, at the same time, increase the return to labor.

The producer is also a consumer, and, in order to utilize the product of the country, he must have means to buy with. This our American neighbors do. How they do it will be my next article in next issue.

CANADIAN TRADE.

[These series of articles are contributed by a gentleman who has had experience in manufacturing, wholesale and retail business.—Editor.]

A BOOKLET ON VANCOUVER.

We are in receipt of a booklet issued by the Vancouver Tourist Association containing an excellent view of Vancouver harbor together with such scenes as render Vancouver of much interest to the touring world. The attractions and advantages offered by this city to tourists are admirably set forth and portrayed.

NECESSARY TO ADVERTISE.

Nearly everyone who aims to do business on a large scale, or for that matter on anything like a remunerative scale, recognizes the necessity of advertising, but how and where and when to do it are the important questions to be determined, says The National Advertiser. Random advertising will not accomplish much. It is the well-considered, carefully planned and determined effort that produces results. A product that is likely to strike the fancy of the public, if properly placed before the people, is certain to prove a winner, if it is put before them in the proper light. An article, however meritorious it may be, cannot succeed on its merits alone. It may be appreciated in the locality in which it is known, or among the friends who have tested its virtues and who know them from practical experience; but there it rests. With the aid of advertising, intelligently planned and energetically carried into execution, the merit of the article is known to hundreds and thousands instead of to the few who knew about it when it was depending upon the publicity its few friends were giving it in its early days. One newspaper—even one of moderate circulation—is of value to the advertiser, and repays many fold the investment in the advertising columns, provided the advertisement is prepared and given to the public properly. It is the manner of relating that does the trick. So, too, in the way of advertising—the way of writing and arranging it in print tells every time. The advertisement need not be a large one, but it must be well written and equally well displayed.

FIRE AT SPANISH RIVER.

The village of Spanish Station is about wiped out by fire. F. E. Lang's store and dwelling and about all his stock were burned; no insurance.

W. H. Graham's store and part of his stock were burned; partly insured.

DEATHS.

James Thomas, contractor, Montreal, is dead.

J. E. Laboeuf, saddler, St. Casimir, Que., is dead.

W. L. Shields, general merchant and sawmill owner, Coboconk, Ont., is dead.

PAINTERS PERFECT WHITE LEAD

Manufactured by the Latest and most Approved Method, Securing Whiteness, Permanence, and the Greatest Covering Power.

This Lead is a new and scientific combination of materials which are in themselves perfect pigments, ground in pure refined Linseed Oil. It will be found on trial to be the whitest lead ever introduced, besides which it has great covering power, works well under the brush, and shows up tints sharp and clear. In thinning, it takes more Oil than any other Lead, and will, therefore, cover more surface. It will also wear better either on inside or outside work than any paint ever offered before.

MANITOBA MARKETS.

Winnipeg, September 15, 1902.

THE activity of the market continues without abatement, more particularly in the line of building hardware, as even at this late date a large number of new buildings are being started. The demand of houses is so far in excess of the supply that houses will be built as long as there is the remotest possibility of getting them closed in before the snow flies.

The question of stoves is naturally well to the front in this month and the trade is large in all lines of stoves and stove fixtures. The only articles in the hardware list that show change this week are horseshoe nails, on which there has been an advance, the discount being now 40 instead of 45 per cent.

Scrap iron shows an advance of $1 per ton. In paints and oils dealers are talking of an advance in linseed oil, although it is lower in the east. The demand here is exceptionally heavy at the present time.

Prices for the week are as follows :

Barbed wire, 100 lb	$3 30

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

The Rubber Belt is the Thresher Belt.

Other belts have had their waves of popularity, generally on account of price, but the threshers have invariably returned to Rubber.

WHY?

1. **BECAUSE** the rubber belt stands the weather.
2. **BECAUSE** the rubber belt adjusts itself best to the pulleys.
3. **BECAUSE** the rubber belt does not expand and contract with change of temperature, consequently the engine has not to be shut down and re-set.
4. **BECAUSE** the rubber belt is made for the thresher use and will best stand the work.
5. **BECAUSE** the rubber belt is honest in length. If you buy 100 ft. Endless, you do not get 97 ft.

Contracts are placed with us by all the large engine and seperator manufacturers.

WHY? WHY? WHY?

MOLTEN IRON CASE TO GO TO THE COURTS.

A DESPATCH from Ottawa says that permission has been granted The Dominion Iron and Steel Co. to bring action against the King on a claim for bounty on liquid iron manufactured into steel by the company. This means, in other words, permission to sue the Dominion Government. King Edward, of course, knows nothing about it and probably never will, unless he should read in the newspapers the fact that he is defendant in a suit which is attracting a great deal of interest.

This suit is the one which it was some weeks ago announced that The Dominion Iron and Steel Co. proposed to take against the Government.

The case is a most unusual one. There was probably never one like it before, and it is possible there will not be in the future.

As our readers are aware, the Dominion Government pays a bounty of $3 per ton on pig iron made from domestic ore and $2 per ton on the production made from foreign ore.

Now The Dominion Iron and Steel Co., instead of making into pig the iron which is to be utilized for steel-making purposes, transfers it in its molten state direct to its steel-making plant. On this molten metal the company claims it is entitled to the bounty which it would receive were the iron first made into pigs.

From what HARDWARE AND METAL can gather from an inside source, the Auditor-General, when the certificate of claim was presented to him for payment, refused to endorse it until he had obtained legal advice. This advice he obtained from a Toronto lawyer, and this being of a negative character, he accordingly acted upon it.

To many people at the first blush it no doubt seems as if the company is asking for something to which it has no legal right. But one thing, however, must not be overlooked, and that is the purpose of the bounty. Undoubtedly, that is to encourage the manufacture of iron in the country. It should not, therefore, it seems to us, concern the Government as to what methods are employed in making the iron as long as it is made. The method employed by The Dominion Iron and Steel Co. in making the iron is the modern one. It should therefore be encouraged rather than discouraged. To stipulate that the iron must first be made into pigs before it can be turned into steel would certainly be tantamount to saying: "If you want the bounty you must stick to antiquated methods."

There may be a difference of opinion in regard to the principle of giving bounties at all, but we do not see how there can well be any difference of opinion as to what methods are employed in producing the iron as long as it is produced, and that in a way that will permit of its being utilized for further and higher stages of manufacture.

REDUCTION IN HARVEST TOOLS.

HARVEST tools generally in Canada have been reduced in price, an extra 10 per cent. discount off the old list being now given, and a new list is reported to be in course of preparation, which may be issued in a few days. The cause of this change is that one United States firm has been lately exporting large quantities of harvest tools of their own manufacture to Canada, and offering them here at lower prices than are prevalent in the United States. This is in spite of the fact that the demand for harvest tools at present on the other side is heavy.

To meet this competition the Canadian manufacturers have been forced to cut their prices, and as they have a tariff of 35 per cent. in their favor they hope to ultimately gain control of the home market.

As soon as the foreign goods are driven off the home market prices may be expected to regain their former basis and probably go higher.

HOW TO USE SOFT COAL.

THE question which at present transcends all others in Canada and the United States is the fuel question. Everyone is turning over ways and means in his mind whereby the difficulty which has arisen because of the famine in hard coal may be overcome. Hard coal sufficient for even a fractional part of the requirements is now out of the question. One large user in Toronto this week offered $20 a ton for 100 tons and could not get even one ton.

All are now agreed that the best substitute is bituminous or soft coal. Another difficulty, however, here arises on account of the fact that the use of soft coal demands not only different attention than the hard coal which we have been in the custom of using in our furnaces and stoves, but closer attention. And a good deal of consideration is being given to this particular point.

Among those who have investigated the matter is the editor of Scientific American, and the result is given in part as follows :

"After careful inquiry among the coal dealers and general coal interests, we are satisfied that when the public begins to buy soft coal, as it will have to do before very long, the dealers will be able to supply all that is needed at a cost not to exceed, even in the suburbs, $5 or $6 a ton. We are assured by one of the largest dealers that there is no doubt that, even if the strike should continue for several months longer, it would be possible for householders to obtain an abundance of bituminous coal at the price named and probably for something less. Nor is there any quality in soft coal which renders it unfit for domestic use. Indeed, as a matter of fact, practically no other fuel is used, or has been used, for domestic purposes in Great Britain, and, while the cooking ranges differ somewhat in design from those used in this country for anthracite coal, it will be quite possible for the householder, by using a little judgment, to burn soft coal to advantage in the ordinary American cooking stove. The most important fact to remember is that the great quantities of gas thrown off when soft coal is first ignited render it necessary to supply considerably more air above the bed of fuel than in the case of anthracite coal. Thus, in replenishing the kitchen stove, it will not do to fill the grate entirely full of fresh fuel, since this would result in the rapid lowering of the oven temperature, which would not be restored until the mass had become ignited and the gases had been somewhat burned off. It will be found that the best method is to feed small quantities of fuel to the fire at frequent intervals, keeping the lower drafts closed more than would be in burning anthracite coal, and keeping the upper draft constantly open. For use in the heating furnace, soft coal will be found to give good results when once the proper manipulation of the furnace has been learned. It should be understood at the outset that more constant attention will be necessary, for the reason that soft coal burns more quickly and will not remain incandescent for so long a time as anthracite coal. During the daytime the attendant will have no difficulty in keeping a steady fire if he is careful to feed the furnace frequently ; to keep the bottom drafts but slightly open ; and to give a liberal feed of air through the air inlet in the furnace door. Owing to the rapidity of combustion of bituminous coal it will not be possible to bank up the furnace for the night and leave it with a certainty that there will be a live fire remaining in the morning ; but this difficulty can be overcome if a ton of anthracite is laid in with the winter's supply of soft coal, and the anthracite used only for banking up the fire over night. A ton of anthracite used for this purpose should suffice to tide the household over a period of high prices.

"There is one feature connected with the use of soft coal, however, which, unless it be carefully safeguarded, may introduce an element of danger. We refer to the heavy deposit of soot in the flues which will occur when soft coal is used. This soot, unless it is swept out at stated intervals, will accumulate, and being inflammable would be liable to ignite and produce a fierce fire in the chimney, with a consequent risk to the dwelling. It sometimes happens that the ends of rafters or beams are, by careless or ignorant construction, allowed to project into the chimney flues. These might become ignited and carry fire to the interior of the house. There is further danger that the shower of sparks from a burning chimney would ignite the shingle roof of the suburban cottage. These risks may be obviated by sweeping the chimney, say once in two months. The "chimney sweep" is an important personage in the old countries, and it would be a curious incidental development of the strike if he should make his appearance, even temporarily, in this country."

We would suggest that our readers place the above article up in their stores in a conspicuous place in order that their customers may read it.

RUMORED TURPENTINE COMBINE.

RUMORS are again rife in the South regarding a proposed combination of the naval store interests. Very little information, however, appears to have so far leaked out, there evidently being a desire to keep the public in ignorance as long as possible. It is said, however, according so latest despatches, that a general meeting of the turpentine factors will be held on October 1, when, it is alleged, steps will be taken towards organizing the combine.

Prices are ruling firm, but how far this may be due to the rumored movement for combination cannot be determined. "This temper of the market," remarks The Paint, Oil and Drug Review, "is encouraging, since September is a month of large receipts, which are expected to depress prices." The Naval Stores Review says that talk of 50c. winter spirits is heard, and there is no doubt that many look for some such price before the close of the season. In 1899-1900, the last year of small receipts, when the receipts of Savannah fell off 20,000 casks in comparison with the previous year, the market ranged above 50c. during the last three months of the season, and was never below 47c. from the middle of September.

Advices from New York say that stocks there on September 24, were only 1,541 barrels, and largely centralized in the control of one dealer. The market there, however, is light, as the large consumers are disposed to resist the higher values.

In Canada the market has also appreciated in sympathy with the outside conditions, quotations being 2c. per gal. higher than a week ago.

A LINK IN THE TRADE.

Notwithstanding the prophesies of some wise ones, wholesale houses in all lines of trade will be stronger than they have been in the past.

They form a natural link between the manufacturer and retailer, and are a part of the economic machinery whereby manufactured goods are concentrated for the convenience of all concerned.

SPECIALIZING IN MANUFACTURING.

By "Canadian Trade."

ANOTHER link in the chain to make "Made in Canada" on goods more general is to improve the quality and to produce at lower cost.

There is a tendency in Canada for manufacturers to try to make a large variety of different classes of goods in the one factory. By this method a greater variety of machinery is necessary. Employes from constant changing do not become as expert. The little details cannot be as well looked after, such, for example, as improvements in methods and designs. Consequently the cost of production is higher, and lines not so attractive in either finish or price as can be obtained from other countries.

Manufacturing in this country is, comparatively speaking, in its youth, and the market has been limited. With experience and larger markets, however, will come better methods.

We are more conversant with American methods on account of their being on the order of our own country. From the class of goods, and the prices they are sold at, it can be gathered that similar methods are employed in other countries. The cause is summed up in concentration of energy and resources. They largely confine their lines to as small a variety as possible, and adapt their machinery and methods to turning out lines attractive in finish at low cost. Special machinery is largely employed, and, to look after this machinery, competent help is employed and well paid. Being well paid, the employes exert themselves, and are expected to do so in order to turn out large quantities. Having money to spend, they utilize more of the goods produced, and obtain greater comforts for their homes, and as the homes are the strength of the nation, there is greater happiness and contentment.

This specializing has got some headway in this country, and is proving successful where tried. The mention of three concerns in different lines will emphasize this, namely, The Dominion Cotton Company, who make different lines of goods at each of their mills, one mill after another having been overhauled and adapted to the work it was to do with the best machinery that could be obtained to turn out better goods and larger quantities. The Toronto Radiator Co., whose goods have gone across the "great pond" to be installed in heating some of the largest buildings in England, and The Slater Shoe Co., who have developed a large business in men's boots. There are others. At a factory visited recently, I was shown a machine design by one of the proprietors that is to take the place and do the work of six different machines, and another designed by the same man that does work in 20 minutes, that formerly, under an old system, took over three weeks.

I will close by saying to manufacturers, concentrate ; make and push the sale of as few lines as possible. In other words individulize. Only increase lines as capital will warrant, obtaining the best machinery and the best results.

The next article will be "The Manufacturer, the Wholesaler, the Retailer."

AN IMPORTANT QUESTION OF TERMS.

Editor Hardware and Metal,—Referring to the article in your issue of September 20, headed, "Who is responsible?" "Importer" states : "We claim that having bought the goods c.i.f. Montreal, we were bound to receive them only in good condition."

He does not state regarding the terms or his insurance policy which he paid for with the cost and freight, neither does he state what the goods are, and what is the usual practice of insuring the same.

If the insurance policy (which is the common custom) specifies F.P.A. (free from particular average) no claim for damage can be made according to the terms of the same, "unless the ship is sunk, stranded, on fire or in collision."

It depends, therefore, what the goods were, and what were the terms of his insurance policy, and, therefore, a discussion by the trade, which you ask for, would be of a more satisfactory character if "Importer" would state the terms of the insurance policy on which the payment was made on the other side, as he states "they had already been paid for."

"Another Importer."

Montreal, September 22.

Editor Hardware and Metal,—With reference to the article in your last issue, "Who is Responsible?" and the succeeding article, "Suing for Damages" which evidently refers to the same matter, I beg to state that the queries and assertions are not stated correctly, and, as a matter of fairness, I beg to submit the following :

Amongst a number of contracts which I closed wirh The Canada Hardware Co. was one in which the goods arrived seadamaged by rust. In all cases my contracts stated "c.i.f. Montreal" and in all cases I had supplied policies "F.P.A." (Free of particular average unless caused by stranding, sinking or collision). All the previous shipments arrived without seadamage and nothing was said by The Canada Hardware Co. objecting to the form of policy. This question was only raised when the rusty shipment arrived. My contention is—which I think will be backed up by every importer in the trade, also in any court—that the term "c.i.f. Montreal" means "including ordinary insurance," and it is a matter of easy proof that the goods in question called for such F.P.A. policy. Further, it happened that in this special case I had notified The Canada Hardware Co. some time before shipment that these goods would be covered as usual, and that if they wished special insurance (with particular average) they would have to cover this themselves or pay us extra premium for same.

The Canada Hardware Co. are stating in the newspapers that they are going to sue my principals for the matter. So far we have received no direct notice from them, but have informed them that we are prepared at any time to meet the issue, and only regret that they should be willing to waste money on foregone conclusions.

I have taken the liberty to explain the matter in full as above, as the articles which appeared in your last issue are naturally worded so as to rather prejudice our standing.

Gerald Lomer,
Agent for
Suren, Hartmann & Co., of London.

Montreal, September 23, 1902.

OTTAWA AND TARRED PAPER.

Editor Hardware and Metal, — In reply to "Wanderer's" letter in your issue of September 20, would beg to say that gentleman must have been asleep for the past several months, as Ottawa has not been a point of delivery for dry and tarred sheathing, roofing felts, or, in fact, any goods controlled by the Tarred Paper Manufacturers' Association, since June 2 last. Under the circumstances, if "Wanderer" is unable to sell the above goods in Ottawa and the territory surrounding that city it must be from lack of enterprise and not because he is discriminated against in any way in the matter of freights.

I judge "Wanderer" is one of those gentlemen who thinks he should supply pretty nearly all the trade of the Dominion and who quite overlooks the fact that prices and terms being equal orders will naturally go to dealers at the nearest point of delivery. If it were otherwise the jobbing houses in the smaller cities could not possibly succeed, as the bulk of their trade is of a local character.

A Member of Tarred Paper Manufacturers' Association.

INDUSTRIAL GOSSIP.

TENDERS are being asked for the erection of the new varnish factory at Brantford. The location will be in the east ward at the foot of Drummond street.

J. & E. Brown, general merchants, of Portage la Prairie, are now asking for tenders for the erection of a new brick foundry, to consist of one storey, 40 by 120 feet in dimensions. By erecting this foundry the Brown firm are introducing a new industry into Portage la Prairie.

The great demand for cement, which is now utilized in such a variety of ways, is keeping the Canadian cement works very busy. The Canadian cement, besides finding a good market at home, is now being shipped in considerable quantities across the line. As in the other industrial establishments, there is a complaint among the cement manufacturers of difficulty in securing sufficient workmen to carry on all the operations which their business demand.

P. W. Richardson, of the big shipbuilding firm of Wigham & Co., of Newcastle, England, is in Sydney for the purpose of investigating the suitability of that city as the site of a steel shipbuilding plant. Mr. Richardson has arrived at no definite conclusion as yet, since he has not had time to discover whether Sydney would be a convenient locality for the collection of all those materials necessary in the construction of a ship.

Every effort is being made by L. C. Barnett, of the firm of Barnett & Record, elevator contractors, to complete the Port Arthur elevator in time to have it ready for the storage of grain this season. Mr. Barnett is seriously handicapped by lack of men, and fears that he will not be able to complete the building before the setting in of cold weather, which would hamper the work considerably. Mr. Barnett has endeavored to make some arrangement whereby the work might be carried on on Sundays, but so far witnout result.

Chief Engineer Kerr, of Ottawa, in an interview with a representative of The Ottawa Citizen, declared that so much water had been diverted from the civic supply that there would soon have to be a new pumping auxiliary operated by steam in addition to the two plants at work at present. The construction of a canal on Middle street by The Ottawa Power Company to distribute and develop available power on the Chaudiere, while it may be favorable to industrial development, will cause a heavy drain upon the water of the city. The diversion of the water to the Consumers' Electric plant and to suburban municipalities will also impoverish the water supply. According to Mr. Kerr, the cost of the new auxiliary would at least be $15,000, which, added to the price of coal and the wages of those necessary to operate the plant, would be a heavy burden on the already overtaxed ratepayers of Ottawa.

DOES NOT AFFECT TRAVELLERS.

The secretary of the Commercial Travellers' Association has received the following letter from directors of the Association in Winnipeg :

"The report that you have received in respect to the city of Winnipeg imposing a tax on commercial travellers is incorrect. These reports take their origin from the recent by-law put through by the city of Winnipeg covering transient traders. In the past very great complaints have been made to the city council in connection with peddlers. Under these circumstances a by-law was introduced covering this class only. The idea of imposing a tax on commercial travellers was never even suggested or discussed in connection with the recent by-law that has been placed in force."

WEST INDIES AND CANADA.

The following from The Antigua Observer indicates how commercial, if not political federation with Canada is being regarded and discussed in the West Indies :

"There is no doubt that Canada can supply us with 60 per cent.; Europe with 30 per cent. and the United States 10 per cent. of our whole imports.

"Freight from Canada is low—half of what it is from Europe—as low as from America, with this advantage also over European imports that you can order goods and receive same within a month, whereas from Europe months elapse before your goods come to hand. With exports of a perishable description the voyage to Europe occupies 14 days—to Canada seven days. In fact, even European manufactures may be imported from Europe via Canada at a slightly cheaper rate of freight than direct from Europe. Continental manufacturers are brought to this island with lighter shipping charges than from London or other cities in England. Goods from Glasgow come cheaper in the matter of freight via New York than direct from England.

"With closer commercial relations with the Dominion of Canada it would possibly lead to a branch of some Canadian bank being opened here and conducted on different principles to those that are at present in existence and which are not quite suited to the time."

TRADE CHAT.

J. P. LUCKHARDT, hardware merchant, of Elmira, Ont., is now on a prospecting tour in the Northwest, where it is his intention to secure a tract of land and start ranching on a large scale.

Moore Bros., Bradford, Ont., have succeeded to the hardware and stationery business of Paul Chapelle.

John S. Durand, of The James Walker Hardware Co., was married last week to Miss Henrietta Morrison, of Napierville.

Wm. S. Gurison, a well known commercial traveller, of Charlottetown, who represents The Logan Hardware Co., New Glasgow, N.S., has taken up his abode in Lunenburg, N.S.

By a decision of the council of Hull last week the grounds of the new Durham cement works about to be established in that city will be exempted from taxes for a period of 15 years.

A branch hardware store has been opened by A. C. Thompson & Co. at Sydney Mines. A. W. Smith, formerly in the hardware business in North Sydney, has assumed the management of the branch.

THE LATE FRED UNITT.

Mr. F. W. Unitt, of Toronto, who died the other day, for some years conducted a hardware business at the corner of Spadina avenue and Queen street in that city. Mr. Unitt was at one time an alderman in the "Queen City," and, besides, held prominent positions in the A.O.U.W. and the Masonic Order. Recently he devoted much of his time to the Industrial Exposition as manager of the main building.

Mr. C. A. Godson, of The Robertson, Godson Co., Vancouver, B.C., is in Toronto this week.

ANSWER TO THE COAL QUESTION.

THE fuel question in Canada is becoming more and more serious. Coal is getting dearer and wood is getting scarcer, but we have the good fortune of expecting in the near future large productions of fuel from peat, both as a domestic commodity and coke for factory and smelting purposes. The Dominion Peat Products, Limited, of Brantford, Ont., are erecting a plant at Newington, near Ottawa, which will demonstrate the "Economic Process" owned by them, and will produce 50 tons per day. This "Economic Process" is a very different one to the ordinary compressing process which has been in vogue in Canada for several years, but has been unable to compete commercially with other fuels. Dr. Spencer claims that the "Economic Process" will produce large units cheaply and supply the market with a domestic fuel in the shape and size of an ordinary building brick, obtained from first driving the peat through a German machine, thence placing it in a hot air chamber for 24 hours and drying by superheating. The coke is made by the same process by extra superheating, the by-products being driven off into condensors for distillation, leaving us first-class coke, the best fuel in the world for smelting steel and iron. After this process has been demonstrated at Newington, factories will be erected all over Canada. Subscribers to the parent company's stock, which is selling at $10 per share, are getting 20 per cent. bonus, but only until a sufficient sum has been raised to work the first plant. Thus the company expects to place upon the market a clean, low-ash, non-odorous fuel at a figure that will compete with any other fuel in the market to the advantage of the consumer.

A REMARKABLE TEST.

A surprising test has recently been made of "Novo" steel on a cast iron power transmitter for rope instead of belt, the casing was 22 ft. 6 in. in diameter by 6 ft. high. It roughed off at a speed of 23 ft. to the minute, and five tools of "Novo" steel, 1 x 2 in., were engaged in the operation of roughing at one and the same time. The five tools removed in the roughing out chips at the rate of 500 lb. per hour, and the tools ran for 36 hours without grinding.

At the recent meeting of the Master Mechanics' Association, Chicago, the merits of the above steel were discussed by several of the members, and it was pronounced to be the best steel for rapid work that they had ever used, the results obtained from it being astonishing. This opinion has been fully borne out by the series of trials made in the principal railway and other shops in Canada, a number of whom have adopted it as a standard.

Many a Paint Dealer

has said, "I can't make any money handling paint," when, if he had carried the right sort of paint, he would have made good money out of it.

There's neither profit nor satisfaction in selling "cheap," low-quality paint or lead and oil. Neither one of them can give satisfaction.

There are profit, big sales, and the best sort of satisfaction in selling

THE SHERWIN-WILLIAMS PAINT

It's a paint made to sell. It has every quality that a good paint ought to have. It looks well, spreads easily, covers most surface to the gallon, saves the painter's time, wears long, is economical, and every package always is full measure.

It's well advertised, too. We do not sit back and expect our dealers to sell the paint. We help them push it. We help them make money out of it.

If you want to know more about our proposition; if you want a paint that will make money for you, write to-day for a copy of our "B-13" booklet.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

A NARROW ESCAPE.

The works of The Canada Horse Nail Co. had on Wednesday noon, September 24, a very narrow escape from fire. The adjoining building to their works, owned and used by the Department of Canals, took fire and in a very short time was entirely gutted. Fortunately no damage was sustained by The Canada Horse Nail Co. beyond the stoppage of their works for the remainder of the day.

A GOOD WINDOW.

C. Roussin, hardware dealer, of 1719 St. Catherine street, Montreal, recently had a clever window display of Sherwin-Williams paints. The centre of the display was formed by a large clock, with the motto beneath, "It's time to paint." Above the clock stood a large frame of colors and picture of a house painted with these paints. A frame was made around the whole window by cuts of the S.-W. paint cans, the corners of the windows being decorated with larger cuts. Below, above and at the sides of the central part were placed cans of all sizes of this paint, including the many kinds of enamel paint, floor finishes, buggy paint, etc. To show off the aluminum and stovepipe enamel, a piece of stovepipe was placed close to the window glass at the foot of the display. One end of the pipe was painted with aluminum, another with the black enamel, the centre being left in its natural state.

AN ASSIGNMENT.

The wholesale and retail hardware firm of Desforges, Desforges & Cie, 123 St. Paul street, Montreal, of which Joseph Desforges is the sole partner, has assigned on demand of J. A. Champigny, commercial traveller.

The liabilities amount to $23,744.12, the assets being the stock in trade, and a lot on Labelle street, Montreal. The chief creditors are: Dame Alexina Drolet, $10,600; L. H. Hebert, $1,033.35; Canada Hardware Co., $888; Letang Hardware Co., $930. There are reported to be over 200 creditors, mostly for small amounts.

PERSONAL MENTION.

Mr. Geo. Boomer, of Galt, has accepted a position with The Sherwin-Williams Paint Co. He will travel in the Eastern Provinces.

Mr. W. H. Evans, of The Canada Paint Co., we regret to hear, has been prevented from attending to business this week through illness, having taken a severe cold.

NOVA SCOTIA MARKETS.

Halifax, September 22, 1902.

THE hardware business has hardly recovered from the usual midsummer dull season, and for the last few weeks only a fair business was done. However, the business has been up to the average of former years and the dealers have little to complain of in this respect, except that they would prefer a regular, even volume of business all through the year. The prospects are looking well for a good autumn trade.

* * *

Very great difficulty is still experienced in having orders filled promptly by the manufacturers of iron and steel goods, but the opinion prevails that this state of affairs, which has lasted now for over a year, will be alleviated within a year. New iron and steel plants are getting into operation, and every month will see the supply getting on more even terms with the demand.

* * *

During Exhibition week the merchants had plenty of time to meet out-of-town customers, and to meet prospective customers—thus the dull season has been an advantage.

* * *

Payments from all quarters are well attended to and the travellers coming in off the road bring excellent reports of business activity all over the Province, which denote, besides a good autumn business, a good trade for next summer. Crops are good; business generally has thus been materially affected, and already a large amount of building operations are being planned for next year.

* * *

There is still a general demand for builders' hardware, but orders are small. Wire fencing, which earlier in the season was in great demand, is now dull and very little is moving. Prices remain unchanged at $3 base, and 3½ to 4c. for staples.

* * *

The advance in horse nails manufactured by The Canada Horse Nail Co. is still maintained, on account of the shortage in anthracite coal, a fact previously noted. Wire nails are easier in the United States market, and prices may be slightly cut at any time. So many new factories are being established that the production is even now far beyond the demand. The price of special wire nails and tacks has advanced in the primary market by ten per cent., but local prices are not affected as yet.

* * *

The trade barometer for this port—the exports—for the last week is away up, almost double the amount for the corresponding week last year, being $168,526 against $85,565. The goods exported are apportioned as follows: West Indies, $77,209; Great Britain, $50,403; St. Pierre and Newfoundland, $10,005; United States, $21,518; various ports, $5,718; Russia, $3,000; France, $689. The total exports from July 1, 1902 to date exceed those of the same period of 1901 by $240,432.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

HEATING IN RED-HOT LEAD FOR HARDENING.

I HAVE seen from time to time in various mechanical papers articles on heating steel in the lead crucible. As some of these have been beneficial to me, says E. R. Markham, in The American Machinist. I have thought that a few points may be useful to some who possibly are having troubles that I have encountered in an experience that now covers several years.

For certain classes of work I consider the lead pot a very satisfactory method of heating. Take, for instance, such bicycle parts as cones, ball cups, etc., and such tools as small mills, shank mills, reamers, counterbores, and similar articles. For these it is a speedy and very reliable means to use, as the heat is so uniform and can be applied so safely. With it there is no danger of burning the outside of the article before the centre is heated. Large and small parts are heated alike, and quite a number of pieces can be heated at the same time, thus making it quite a cheap, speedy, yet reliable way of heating.

It is necessary to have a good, uniform heat under and around the pot, that can be maintained for quite a length of time. I prefer an oil or gas fire, but good results can be obtained when using coal or charcoal.

The most satisfactory crucible is one made of graphite especially for this purpose. A cast-iron one can be used, but as a rule it is not as satisfactory and is more costly, as it burns out very quickly. The graphite crucible should be annealed before using, as this toughens it, reduces the liability to cracking, and makes it longer lived. To anneal the crucible, place it in an oven or furnace, heat it to a red, take it out, and allow it to cool off slowly.

TONS OF SOOT.

A perpetual cloud of soot, gradually settling down, is known to overhang every large manufacturing city. To determine the amount of this wasteful dirt deposit in Manchester, England, Mr. W. Irwin weighed the solid matter obtained from a sample of snow that had been lying on the ground ten days, and has found an equivalent of 107 pounds per acre, or three tons per square mile. As the sample represented the condition over at least 100 square miles, the chimneys of Manchester are convicted of throwing out not less than 300 tons of soot in ten days. Analysis showed 48.6 per cent. of carbon, 6.9 of heavy oil and grease and 45.5 of ash, from which it appears that each day 30 tons of soot is given adhesiveness by about two tons of oily matter.

LIQUID FUEL IN ENGLAND.

A cable despatch from London says that the increasing use of liquid fuel is absorbing the attention of the British railroads and of the British Admiralty. Two of the former are now increasing their equipment of oil-fired locomotives, while the Admiralty is carrying on extensive experiments with liquid fuel at Keyham. The results are generally understood to be very satisfactory, though the details are jealously guarded by the Government experts.

MORE PUMPING PLANTS.

The engineers of the Brooklyn Water Department are preparing plans for three new pumping stations, which, when completed, will increase the water supply of Brooklyn from 10,000,000 to 12,000,000 gallons a day. The construction of the pumping stations was recently authorized by the Board of Aldermen. Deputy Commissioner Van Iderstine recently said that all three will probably be located in Nassau county. They are to cost in the neighborhood of $154,000.

The officials of the Water Department say there is great need for the proposed new pumping stations.

SUIT OVER A BICYCLE BRAKE.

The Canada Cycle and Motor Co. requested Mr. Justice Street, at the Non-Jury Assizes, Monday, to issue a mandatory order on William S. Wilson, of Brantford, to put the company in possession of letters patent of a certain bicycle brake, which they paid Wilson to perfect. Wilson, who is an expert machinist and draughtsman, had perfected this brake, and before quitting the employ of the firm, early in the spring, had promised to sign all papers requisite to give the company full control of its manufacture. This was not done, hence the company are presenting their petition. His Lordship issued an injunction prohibiting Wilson from handling the device, but reserved judgment on the order.

NEW TYPE OF ENGINE.

THE question as to what motive power is the most suitable and economical for engines is one which is now receiving much attention. It has been conceded that the oil engine of the present day is, for general purposes and moderate powers, the most convenient motor known, when its portability, small size and weight are taken into consideration. Hitherto, however, much difficulty has been experienced in operating these engines, owing to the comparative easiness with which they are thrown out of order. According to a British journal, Ropey & Co., Limited, Lincoln, Neb., have commenced the manufacture of a new type of oil engine which will remedy most of the defects common to oil engines. One of the improvements is that the jacket space for water around the cylinder is provided with a large cover readily removable in case of interference caused by impure water. In like manner access can be readily obtained to the piston and interior of the cylinder. What appears somewhat unusual is that the valves are mechanically instead of automatically controlled, which feature, however, renders the control more certain. The oil-feed of this new engine is controlled by a small force pump instead of being supplied by suction or gravity. The governing of this engine is almost perfect and the makers strongly recommend it for direct coupling to lighting dynamos.

ELECTRICAL AND MACHINERY NOTES.

The Toronto Electric Co. will occupy their new offices on Adelaide street east on October 1.

The blower furnished by The Dominion Motor and Machine Co. to The Alexander Brown Milling Co. is now in operation.

The extensive buildings erected in Toronto Junction by The Canadian General Electric Co. are nearing completion. The blacksmith department will be put into operation next week.

The Dominion Motor and Machine Co. have shipped this week to G. R. Pruneau, Amhertsburg, a six H.-P. coal oil motor; also a four H.-P. motor to N. Hoove, Woodbridge.

PORTABLE ELECTRIC GENERATOR.

THE Societe Nouvelle des Etablissements Decauville has devised a handy portable electric generator applicable for domestic purposes. It is convenient for lighting premises which cannot obtain the necessary current from central stations. The dynamo is driven by an oil or gas engine. The pipes delivering the liquid fuel, and those for the inlet and outlet of the cooling-down water, run under the flooring, at the foot of the engine. Adequately effective means are provided for the escape of the gases of combustion. The baseplate is cast in one piece, and is fitted with a two-cylinder engine, all the motive parts of which are cased in. Automatic lubrication is provided. The dynamo is mounted beside the engine, on the same base-plate. A compensating flywheel is placed between the engine and dynamo, forming an elastic coupling, which insures the independence of both the engine and dynamo shafts, and also regularity in the working.

A noticeable feature of the apparatus is a contrivance for insuring fixity in the degree of light, whatever may be the number of lamps in service. The engine can be easily and quickly dismantled and transported, while it does not require much attention while running—two essential features of the invention. The cylinders are 3½-inches diameter. The oil to lubricate the mechanical parts is supplied from a hand pump, and the cooling water is delivered under pressure, a suitable tank fed by a pump forming part of the installation, to insure a regular supply. The generating capacity of these engines is sufficient to supply current for 40 16 candle-power lamps. The switchboard contains an exciting rheostat, and is made for direct lighting.

Machines of similar design are also manufactured for the lighting of building yards. For this purpose the engine is mounted on a four-wheel trolley to facilitate transportation from one point to another. The installation in this instance comprises engine, dynamo, water-tank, pump and gearing, ribbed tubes forming a radiator for cooling, a tank for liquid fuel, another for the lubricating oil, a switchboard and a roll of cable for connecting the dynamo with the lamps.

A NEW MOTOR VEHICLE.

A new steam-wagon, constructed for transport purposes in West Africa, in the works of Simpson & Bibby, of Cornbrook, Manchester, receives a notice in a recent issue of The British Trade Journal. One of the most interesting features in connection with this wagon, calculated as it is to traverse virgin and frequently marshy country, is its enormous proportions. The load to be carried is no less than 18 tons, while the tare of the wagon itself is 11 tons. The driving wheels are five feet in diameter, and the engine, which can be also brought into use for practically any stationary service, has a normal power of 50 horse. One of the most practical features of this engine is that if it sticks fast in marshy ground it is fitted with self-contained haulage gear which would enable it to lift its own weight vertically. Contrary to the usual practice, the power-generating plant, engine and boiler is not mounted in front, but at the rear of the platform and the steering or front wheels are mounted upon the central pivot and are governed ingenuiously by hydraulic steering gear connected with the boiler. The furnace is exceptionally large so as to consume brushwood or any such rough fuel as is available. The engine is fitted with both steam and exhaust pipes. The wagon has already been subjected to trial trips over all kinds of country in Derbyshire, and so far has complied fully to all the demands required.

COMPRESSED AIR MOTORS FOR MINES.

During the last ten years a great many mines have, according to Cassier's Magazine, replaced animal haulage with compressed air motors, which lend themselves splendidly to the work desired. There are, in general, two systems—the low-pressure system, in which air is compressed to 500 or 600 lb.; and the high-pressure system, with air pressure of 2,000 lb. and over. The former system can be used in large galleries or tunnels or drifts where the width is ample and the track is reasonably straight. This permits a large receiver on the motor, 30 to 40 inches in diameter and from 8 to 16 feet long, to be handled with ease. The high-pressure system is used where the drifts are narrow or the curves on a small radius, permitting only a small wheel-base on the motor. Large receivers are, therefore, impractical, and steel tubes must be used and charged with high-pressure air to get sufficient volume. Compressed air may be used cold on either of these motors, or the air may be passed to small tanks of hot water supplied to the motor at the charging stations. The air and hot-water combination does almost double the work that cold air will do. These motors can carry sufficient air for any ordinary run desired and haul tremendous loads. Two miles and return, with 15 or 20 loaded cars, is not an extraordinary effort, and from the general results obtained, the cost of haulage is from one-half to one-third of the cost of the animal power. The air escaping from the exhaust of the motor engines adds to the ventilating effect in the mine and the whole system harmonizes thoroughly with the power outfit in the average mine.

THE FIRST IRON BRIDGE.

AFTER standing securely for upwards of 120 years the cast-iron bridge which The Coalbrookdale Company erected over the Severn in the years 1777-1779 has failed by the sudden breaking of the girders. The structure is believed to be the first metallic bridge ever erected, and it possesses the further distinction of having given its name to the picturesquely-situated riparian township of Ironbridge in Shropshire. The span of the arch is 100 feet, the width, exclusive of parapets, 26 feet, and the height from base-line to centre, 40 feet, while the weight of iron in the bridge is about 380 tons. No details are at present available as to the cause of fracture, but it is surmised that "fatigue," due to long-continued vibration, may have some connection with the collapse. Among other powers conferred on the trustees by the Act authorizing the construction of the bridge is included the right to levy toll on all vehicles, including mail-coaches, and on all persons, including His Majesty's forces and all members of the Royal Family.

Cast iron for bridge-building is no longer in favor, rolled iron or steel being the material generally used, but for all that, there are few wrought-iron or steel structures now being erected that are likely to remain intact for such a prolonged period as has the famous cast-iron bridge over the Severn. The huge Brooklyn Bridge is already showing ominous signs of decadence, and a certain railway bridge over which I pass daily has constantly to be tinkered at to maintain it in safe condition. On the other hand, cast iron is quite unsuitable for the heavy loads and fast speeds of modern railway trains, and so impressed with this fact were the directors of the Brighton Railway, after the Norwood Junction failure some years ago, that they at once decided to rebuild all the cast-iron bridges on their suburban system, substituting wrought-iron or steel structures.—"Vulcan" in Ironmonger.

ADHESIVE LIQUID FAT FOR DRIVING BELTS.

A patent has been granted in Germany to W. Hofschulte, of Freren (Hanover), for the following method of preparing a liquid fat for application to driving belts in order to increase their adhesion to the pulleys. The materials consist of: Saponified olein, 60 per cent.; vaseline oil, being 15 per cent.; castor oil, about 5 per cent.; resin oil, about 20 per cent.; the whole being mixed together in an iron pan and then heated, with continued stirring, until the resin has melted and intimate incorporation ensues. Finally, the mass is boiled for seven to eight minutes, without interrupting the stirring. The olein causes the boiled product to be perfectly clear and free from all suspended impurities, whereas tallow olein would furnish a thick product. An increase in the proportion of the vaseline oil at the expense of the olein causes precipitation of the other constituents, leaving the oleic acid floating on the surface. The fat described above, when applied to driving belts, permeates the leather, without drying or becoming viscid and leaving incrustations on the surface; consequently the leather remains supple and clean.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

HARDWARE.

Montreal, September 26, 1902.

DURING the week, the market in general hardware has been marked by a continued activity, and both manufacturers and jobbers report a brisk demand. There continues to be an active inquiry for such seasonable articles as cow ties, lanterns, cant hooks, weather strips, axes, etc. Skates, hockey sticks, and cutlery, as well as all fancy lines, are moving very well in anticipation of the Christmas season. Harvest tools for delivery in 1903 have been reduced. The discount on scythe snaths has been changed to 40 per cent. off for 1903 delivery.

BARB WIRE.—This moves slowly, as is usual at this time of the year. There has been no change in the price, which is now $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—In this article, but few orders are being received and the market is quiet under steady and unchanged prices, and quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Most lines are in poor demand. A fair amount of business, however, has been transacted in annealed hay wire. Our quotations now are as follows: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb., are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is no change to report in this market whatever. Trade continues quiet with the discount at 25 per cent. Net extras are: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c.; ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is little doing. Both wires are discounted at 62½ per cent.

FENCE STAPLES.—Very little demand is experienced for these and the market is quiet. Galvanized sell at $3.25 per 100-lb. keg and bright at $2.90 per 100-lb. keg. For packages of 25 and 50 lb. an extra of 25c. is charged.

WIRE NAILS.—A fair volume of business has been done during the week and the market is in a healthy condition. No price changes are reported. In small lots wire nails sell at $2.55 and in carlots, $2.50 f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—Trade in this line is still satisfactory and the market is steady at the following prices: In small lots, $2.45 and in carlots, $2.37½ per keg.

HORSE NAILS.—The market is active this week and a good fall and winter trade is looked for. The discounts are unchanged, and we quote as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch" horse nails are discounted at 70 per cent.

HORSESHOES.—A good demand continues and a brisk trade is doing at the prices here quoted. No changes have been made, and our quotations are as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—The demand is no more than moderate and nothing of importance has transpired on the market. The discounts are quoted as follows:

"Famous" Oil Heater vs. High-Priced Coal.

No person wants to start a fire in furnace or base-burner before cold weather gets fairly settled, and it is not necessary if a "Famous" Oil Heater is provided.

The high and almost prohibitive price of coal has paved the way for the sale of a large number of Oil Heaters in every district.

The "Famous" sells easily, and the first sale leads to many more.

Is easily carried from room to room, and so simple that a child can operate it.

Makes no odor whatever and throws out an intense heat at a cost of about one cent per hour.

Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—No further change in price has occurred this week. The market is not active, the heavy demand being over for the season. Our quotations are now as follows: Manila, 15c.; British manila, 13c.; sisal, 12½c. lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is not much doing. The market has developed no new phase, The discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

BOLTS.—In this line the movement continues only fair. The discounts are: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Orders for building paper have been on the increase during the past week, many merchants buying for fall and winter interior work and business is reported fair. There are no quotable changes, and we quote: Tarred felt, $1.70 per 100 lb.; 2-ply ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll

SCREEN WIRE CLOTH.—This is dull and is quoted at $1.37½ per 100 square feet.

POULTRY NETTING.—There is but a very light demand for this article. The discounts on Canadian and English netting are as follows: 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used.

HARVEST TOOLS.—Some improvement is noted in this market, a number of orders having been received for future delivery. The discount for 1903 delivery is 60 and 10 per cent., instead of 60 per cent., as at present.

FIREBRICKS.—These move along fairly well, the market showing a gradual improvement. There have been no changes in the prices. We quote: $16 to $22 for English and $17 to $22 for Scotch per 1,000.

CEMENT.—This is quiet and no material change is reported on the market. We quote: Canadian cement, $1.90 to

Manufactured by

THE FRANCIS-FROST Co. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

$2.25 ; German, $2.20 to $2.30 ; English, $2.15 to $2.25 ; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—The market is very active, all jobbers reporting an excellent business. Prices are unchanged. Our quotations are as follows : Empty : Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded: "Trap," 30 per cent.; American, 30 per cent. "Leader" and "Ideal," smokeless brands, $37\frac{1}{2}$ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent. ; American, $1.60 per 1,000.

SNOW SHOVELS.—These are moving out rapidly. No special feature characterizes the market, and our quotations are as follows : "Habitant," $2.25 to $2.40 ; "Victor," 30 per cent. off ; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—A good trade continues in this line. We quote as follows : No. 70, $38\frac{1}{2}$ to 40c. per dozen ; No. 55, 55 to 60c.; No. 57, $82\frac{1}{2}$ to 90c.; No. 60 $82\frac{1}{2}$ to 90c.; No. 65, $1.37½ to $1.45 ; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21 ; No. 9, $1.52 ; No. 11, $1.82.

METALS.

The only quotable change this week is in ingot copper, which is lower. In other metals prices have been steady, though tinplates continue somewhat weak. Heavy arrivals of Canada plate and sheet iron have placed jobbers in a better condition as regards these lines.

PIG IRON.—The market continues very firm with a heavy movement and an unabated demand. We quote : Canadian, $18.50 to $19 and Summerlee, $21.50 to $22.

BAR IRON.—There is a good trade doing at unchanged prices. We quote $1.95 to $2 for merchants' bar and $2.20 for horseshoe iron.

BLACK SHEETS.—Trade continues fair. Supplies have increased considerably on the local market. Quotations follow: 28 gauge, $2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This is moving out fairly well at unchanged prices. We quote : No 28, Queen's Head, $4.40 ; Apollo, $10\frac{3}{4}$-oz., $4.40 ; Fleur de Lis, $4.15 ; Comet, $4.25 ; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—This is quoted $\frac{1}{2}$c. lower this week, the price now being $13\frac{1}{2}$c. The market is not active.

INGOT TIN.—There has been no further change in price. Straits is quoted at 30 to 31c., with a fair trade doing.

PIG LEAD.—A number of orders have been placed this week. The price is $3.25.

LEAD PIPE.—A moderate inquiry prevails. Composition and waste sell at 8c. and ordinary at 7c. The discount is $37\frac{1}{2}$ per cent.

IRON PIPE.—The demand is no more than fair and nothing of importance has transpired on the market, which is steady. Our quotations are as follows : Standard pipe per 100 feet, in lengths under 19 feet : Black, $\frac{1}{4}$, $2.40 ; $\frac{3}{8}$, $2.65 ; $\frac{1}{2}$, $2.85 ; $\frac{3}{4}$, $3.65 ; 1-in., $5.20 ; $1\frac{1}{4}$, $7.35 ; $1\frac{1}{2}$, $8.95 ; 2-in., $12.55. Galvanized, $\frac{1}{4}$, $3.20 ; $\frac{3}{8}$, $3.45 ; $\frac{1}{2}$, $3.85 ; $\frac{3}{4}$, $5 ; 1-in., $7.20 ; $1\frac{1}{4}$, $10.05 ; $1\frac{1}{2}$, $12.20 ; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, $\frac{1}{2}$, $4.20 ; $\frac{3}{4}$, $5.25 ; 1-in., $7.55 ; $1\frac{1}{4}$, $10.55 ; $1\frac{1}{2}$, $12.75 ; 2-in., $17.60. Galvanized, $\frac{1}{2}$. $5.20 ; $\frac{3}{4}$, $6.65 ; 1-in., $9.55 ; $1\frac{1}{4}$, $13.25 ; $1\frac{1}{2}$, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—These are still easy on the English market, though no quotable change is reported. Locally, there is a fairly good demand, and business is done on a basis of $4.75 to $5.25 for charcoals and $4.25 for cokes.

STEEL.—Business is fairly brisk at the prices here quoted : Sleighshoe, $2.05 ; tire, $2.20 ; bar, $2.05 ; spring, $2.85 ; reeled machinery, $2.75 ; toecalk, $2.70.

CANADA PLATES.—Heavy arrivals are reported this week and whatever scarcity existed in some lines has been entirely relieved. Quotations are as follows : 52's, $2.70 to $2.80 ; 60's, $2.85 to $2.90 ; 75's, $2.80 to $2.85 ; full polished, $3.75, and galvanized, $4.25 to $4.35 ; galvanized, 60's, $4.45 to $4.55.

SHEET STEEL.—This moves along as usual with no new feature to note. Our quotations are as follows : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; $\frac{1}{4}$, 5-16 and $\frac{3}{8}$, $2.40.

TOOL STEEL.—Jonas & Colver's "Air Hardening" steel has been advanced by 10 to 15c. Other brands are unchanged. Our quotations are as follows : Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade ; Jessop's, 13c.; Leonard's, $7\frac{1}{2}$c.; Jonas & Colver's, 8 to 15c. ; "Air Hardening," 45 to 60c.

TERNE PLATES.—The market is quiet. We quote $7.50.

COIL CHAIN.—There is no improvement as yet and trade is quiet and fea-

tureless. Quotations are as follows : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.95 ; 9-16, $3.85 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—We quote $5.85.

ANTIMONY.—This is unchanged at 10c.

ZINC SPELTER.—The market is quiet The price is 5c.

SOLDER.—The market is steady and unchanged under a good demand. We quote bar solder, 20c. and wire, 18c.

PAINTS AND OILS.

During the past week business in all seasonable lines has been good and manufacturers are well employed. The demand for white lead has been very brisk, and prices are well maintained. Turpentine is strong both on the Southern market and locally at present figures ; if no reaction sets in at the South, local dealers may have to advance prices. Linseed oil is quiet but irregular. The usual fall activity has commenced in putty, and a good demand is expected from now until the close of navigation. We quote :

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25 ; No. 1, $4.77½ to $4.87½ ; No. 2, $4.40 to $4.50 ; No. 3, $4.02½ to $4.12½ ; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 75c.; boiled, 78c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

For Yourself

you choose reliability and endurance when it comes to building.

Choose the same for your Customers.

Then you are certain of harmonious conditions and ever-increasing sales and prestige.

We make every conceivable need in Sheet Metal Building Materials—honest, capable goods give the acme of artistic effect, as well as enduring reliability.

With our lines in stock, you'll never have an apology to make to your patrons.

Consider—these things count for much.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

SCRAP METALS.

The market shows no material change, except in heavy copper and wire, which is quoted ½c. lower. The demand for copper or brass is very small, although higher prices are obtained in the United States markets. We quote as follows : Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6¼ to 6½c. per lb.

GLASS.

The market is quiet, business being confined to small orders for immediate requirements. Our quotations are as follows : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

Deliveries of hides have been arriving more freely during the past week and the market is in a good condition. Trade is fairly good. We quote as follows : No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c. ; lambskins, 50c.

MARKET NOTES.

The discount on scythe snaths is 40 per cent. for 1903 delivery.

Jonas & Colver's "Air Hardening," tool steel is 10 to 15c. higher.

Harvest tools, delivered in 1903, are discounted at 60 and 10 per cent.

ONTARIO MARKETS.

Toronto, September 26, 1902.

HARDWARE.

ALL fall lines of hardware are in active demand and the market is in a good, healthy condition. Large orders keep coming forward for stove pipes, stove boards, and similar articles. Stoves, ranges and furnaces are moving out freely. Sporting goods, such as guns, rifles and loaded shells are very much in demand this fall, and building paper is moving out in large quantities to various parts of the country. The approach of the cold weather is causing builders to hurriedly complete their work, and this is causing a big business in builders' hardware. Harvest tools are active on future account, and to meet the prices quoted by a United States importer, prices here have been reduced an extra 10 per cent. Some jobbers were cutting the prices of poultry netting, and so a general change has been made in the prices of 2-inch mesh, 19 w.g., which are now quoted at 60 to 60, 10 and 5 per cent. discount. The old discount was 50 and 5 to 50 and 10 per cent.

BARB WIRE.—No business of any account has been done in this line, and we quote : $2.65 in carlots and $2.77½ for less than carlots f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—The demand for this wire is quiet. We quote : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—Trade in fine steel wire is principally confined to stovepipe wire, which is fairly active. The discount is 25 per cent.

SMOOTH STEEL WIRE.—The volume of trade in this line is small and the prices are unchanged. The base price is quoted as follows : $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—A fairly good trade is reported in this line. Quotations are as follows : Wire nails, in carlots, $2.50 and in less quantities, $2.55. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Trade in these is of a light nature. We quote $2.45 per keg and $2.37½ in carlots.

HORSE NAILS.—The demand for horse nails keeps up well and the manufacturers are rushed to fill orders. We quote the discounts as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—The volume of business continues heavy and the market is strong and unchanged. We now quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—There is still a surplus of orders for screws on the local market, which the manufacturers are unable to fill, as they still are hampered by a scarcity of raw material. The discounts are as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze, 70 per cent.

RIVETS AND BURRS.—No change is reported in the situation in these and the prices are unchanged. The discounts are as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—There is a strong and active market for these, with a scarcity of supplies. Quotations are as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—Activity is the feature of the spade and shovel market. The discount is 40 and 5 per cent.

ROPE.—A small business is doing in rope. Quotations are as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11½c.; double, 12c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—A good many orders have been taken during the last week for harvest tools on future account. A United States manufacturer has been shipping quantities of these goods into Canada and offering them at prices below the basis quoted last week, so there has been a reduction all round. The discount now is 60 to 60, 10 and 5 per cent.

EAVETROUGH, ETC.—A good business continues in this article, and we quote as follows: Eavetrough, $3.10 per 100 square feet for 10-in., and conductor pipe, $4 for 3-in. and $5.25 for 4-in.

BUILDING PAPER.—A good many orders are coming forward for building paper. Some lines, especially tarred sheathing, are a little scarce this week, owing to the fact that some manufacturers are out of tar. Our quotations are as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—Enamelled ware is experiencing a fair sorting-up demand, and, in tinware, a good many stovepipes, elbows, stoveboards, etc., are being sent forward to various parts of the country.

STOVES AND RANGES.—These are very active and the demand is greater than the supply. A number of furnaces are being sold also.

SPORTING GOODS.—Trade in sporting goods is heavy at present. There is a big call from the North and Northwest for guns, rifles, loaded shells, powder, shot, etc.

CEMENT.—The market for cement continues strong and unchanged, with a heavy inquiry. The manufacturers are still away behind with their orders and are taking scarcely any new ones. We quote: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 up per barrel.

METALS.

The metal business in general is good and there is a strong tone to the market. Manufacturers, both in Europe and America, are nearly all sold out of supplies. On the local market there has been acutely felt a scarcity of bar iron, and it has been almost impossible to get some sizes. The outside spot tin market is weak, the demand is light and prices are still easing off. Futures are firm. Copper in New York is dull and unchanged, but is firmer in London, Eng. The iron market abroad is strong and there is no prospect of relief in the shortage of pig iron in the United States, as the fuel question there is still unsolved.

PIG IRON.—The demand for pig iron keeps up well and the market is strong and unchanged. In the United States there is no prospect of relief in the shortage of pig iron, the coal strike being yet unsettled. Prices at the furnaces are nominal at $23 for No. 1 and $22.50 for No. 2. Summerlee iron is quoted at $23 on track, Toronto, and English iron, $22 on track, Toronto.

STEEL BOILER PLATES.—The demand for these is fair and the prices are firm. We quote $1.80 for carload lots on track, Toronto.

STEEL RAILS.—Steam railway rails are quoted at $30 per ton and those for electric railways at $36.

TOOL STEEL.—An active market continues for tool steel and the prices are firm and unchanged. We quote as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—The market is unchanged from last week.

SPRING STEEL.—This metal continues in active demand.

BOILER TUBES.—A fair demand keeps up for these.

BAR IRON.—The local market is strong and unchanged. There has been a scarcity in some sizes during the week. Our quotations are as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—These are in active demand and prices are firm. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—A good business is being done in this line and prices are un-

One or other of the above brands may be purchased from prominent Hardware Merchants throughout the Dominion who carry an assorted stock.

changed. There are shortages in some sizes. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—A good business continues doing in galvanized sheets. Quotations are as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 guage; Gordon Crown, $4.50 for 28 gauge.

TIN.—Some business is doing in tin in small lots. The weakness on the outside markets has been marked. We quote $32 to $33 per 100 lb.

TINPLATES.—These are in better demand this week. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25.

COPPER.—This metal is in fair demand. We quote: Ingot copper, $13.50 per 100 lb and sheet copper, $22 to $23.

BRASS.—No change is reported in this market. The discount is 15 per cent.

PIG LEAD.—There has been an improvement in the demand for pig lead. We quote: Pig lead, $3.50 and bar, $3.75.

IRON PIPE.—The local market for iron pipe continues strong and active, and our quotations are as follows per 100 ft.: ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—A small business has been done in this article during the week. We quote 5 to 6c. per lb.

ZINC SHEETS.—These have been fairly active. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—A good business keeps up in solder.

ANTIMONY.—This metal is in moderate demand. We quote $9.50 per 100 lb.

PAINTS AND OILS.

The continued stiffening of turpentine is still the main feature of the paint and oil market. During the past week three successive rises have taken place in the primary markets of the South, and an advance of 2c. on last week's market has occurred here, with still a higher advance probable. The market, otherwise, is steady, and shows more firmness than a couple of weeks ago. The general demand keeps up and is likely to be maintained all through the fall. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE.—In barrel lots, 18¾c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities 10c. extra.

PUTTY.—Bladders, in bbls., $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per bbl.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 77c.; boiled, 80c.; 3 to 5 barrels, raw, 76c.; boiled, 79c.; 6 to 9 barrels, raw, 74c.; ; boiled, 77c., delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 73c.; 2 to 4 bbls., 72c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The demand for window glass, as is usual at this season of the year, has increased considerably. The demand in other kinds is also good. Quotations are as follows: Under 26 inch, $4.45; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

The demand for old material continues good. New copper is still weak. As yet, zinc has not altered. Brass, owing to the weakness of the copper market, has dropped a little. We quote: Heavy copper and wire, 10c. per lb.; light copper, 8c. to 8½c. per lb.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5c to 5½c.; lead, 2¼ to 2½c.; scrap zinc, 2½ to 2¾c.; iron, No. 1 wrought, $12 per net ton; No. 2 wrought, $6; machinery cast scrap, $13 to $14; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 5 to 5½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—Buying in hides continues fair. In green hides there is an advance of ½c. With this exception quotations are the same as last week. We quote: No. 1 green, 8½c. No. 2 green, 7½c. No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, 8½ to 9c. per lb.

SKINS.—Prices are steady and the demand is fair. We quote as follows: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings, and lambskins, 50c.

WOOL.—Wool continues quiet at the same quotations. We quote: Fleece wool, 13½c. and unwashed, 7½c.

TALLOW.—Prices are still weak at 6¾c. to 7c. per lb.

SEEDS.

There is still little moving in the seed market save alsike, and this, owing to the bad weather during the alsike harvest, is frequently inferior in quality. The movement is chiefly confined to outside points. Timothy is also on the market in small quantities. We quote as follows: Alsike, $6 to $6.25 per bushel; timothy, $1.50 to $1.75 per bushel. The prices are higher for extra fine grade seed.

COAL.

As anthracite coal is just now out of the question, the dealers are obtaining large shipments of bituminous coal. The washed nut coal, which is now largely replacing the anthracite, is quoted at $5.30, while the Ohio lump coal, for furnace use, is selling at $5.50.

PETROLEUM.

The demand for petroleum continues good. Our quotations are now as follows: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16 to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

GASOLINE.

We quote: Gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

MARKET NOTES.

Turpentine has been advanced 2c. per gallon.

The discount on harvest tools has been changed from 60 per cent. off to 60 to 60, 10 and 5 per cent. off the list.

The discount on poultry netting, 2-inch mesh, 19 w.g., has been changed from 50 and 5 to 50 and 10 to 60 and 60 and 10 per cent. off the list.

HELP your customers

to save fuel by supplying

The "PRESTON" RADIATOR

In this Radiator we have combined Artistic Appearance, Great Heating Surface, Simplicity and Low Cost.

It is a heater which at once appeals to the good judgment of a purchaser, as there are no complicated parts, it is easily cleaned, has no parts to get out of repair, and its vast heating surface is plainly visible.

A customer can estimate just what he is getting when he buys a "Preston" Radiator. It is not necessary to sell them on approval.

The damper, when set horizontal, fills the space between the tubes and compels all the products of combustion to pass out between tubes and circle about the outer shell.

The cold air enters tubes at bottom of radiator and escapes at top, creating a good circulation of air in any room where it is located.

It can be used on smoke pipe above stove or at floor in an upper room.

BUILDING PERMITS ISSUED.

TORONTO.

THE following permits have been issued in Toronto since last Wednesday: J. D. Kent, two-storey and attic brick and stone dwelling, No. 119 Macdonell ave., for $2,500; William Pudifin, pair semi-detached two-storey and attic brick and stone dwellings, on Dufferin street, for $3,200; also two-storey and attic detached brick dwelling, Dufferin street, for $2,000; A. Chisholm, pair semi-detached two-storey and attic brick dwellings, Delaware ave., $3,500; A. Nonnan, pair semi-detached two-storey and attic brick, stone and roughcast dwellings, Nos. 199-201 Albany ave., for $2,800; The Toronto Hardware Manufacturing Co., one-storey foundry and factory, brick and steel, Dufferin street, for $20,000; Jas. Burford, two-storey and attic brick dwelling, 1021 Bathurst street, for $2,700; H. H. Snyden, two-storey and attic brick residence, No. 25 Chicora ave., for $3,800; R. Peterkin, two-storey and attic brick dwelling, No. 472 Church street, for $3,000; J. S. Montgomery, for two pairs semi-detached, two-storey and attic brick dwellings, Nos. 549-555 Euclid ave., for $1,200; Toronto General Hospital, additional storey, brick, to women's pavilion, Gerrard street east, for $3,000; W. H. Knowlton, for four attached two-storey and attic brick and stone dwellings, Duchess street, $4,500; Jas. Green, pair semi-detached two-storey and attic, brick and stone dwellings, Daymar ave., for $3,000; All Saints' Church, one-storey, brick club building, corner of Wilton avenue and Sherbourne street, for $3,300; the Macpherson estate, two-storey brick dwelling, Macpherson ave., for $2,000; Walter Randall, two-storey and attic brick dwelling, Shaw street, for $1,600.

HAMILTON.

Permits have been issued to The International Harvester Company, Hamilton, Deering division, for the erection of the additional brick buildings for which contracts were awarded last week, to cost $80,000; to Rastrick & Sons, for a brick cottage on Arkledun ave., for G. Cook, to cost $800; and to R. Tope, for a brick dwelling on Bold street, between Pearl and Ray streets, for H. E. Elmer, to cost $1,700.

OTTAWA.

During the past week the following permits have been issued in Ottawa: Geo. Tomlinson, brick shop and dwelling, on Gladstone ave., $2,600; W. J. O'Connor, alteration to dwelling, Albert street, to cost $300; H. McKenney, brick-veneered dwelling, Maclaren street, $1,500; Lawrence Brennan, brick and ironclad dwelling, Redpath street, $650; W. E. Harris, frame dwelling, McKay street, $600; Thomas Dean, frame dwelling, Cambridge street, $800; Dey Bros., skating rink, on Gladstone ave., $3,500.

THE COST OF LABOR.

The following table, compiled by The New York Tribune, shows the increase in wages in New York for labor per hour, from 1869 to 1902:

	1869.	1879.	1902.
Bricklayers	34	30	60
Carpenters	34	20	56
Gasfitters	25	30	50
Hod carrier and other laborers	21	17	37½
Marblecutters	32	25	55
Marble polishers	20	17	44
Masons	34	30	65
Painters	27	25	44
Plasterers	39	30	62
Plumbers	27	30	50
Roofers	32	25	50
Stonecutters	34	30	55

EMPLOYES PRESENT WEDDING GIFT

AN evidence of the pleasant relations existing between master and man was given at the establishment of Blyth & Watt, plumbers and hardware merchants, corner of Bank and Somerset streets, Ottawa, the other evening. Mr. Watt, who was recently married and had just returned with his bride from a trip to New York, was made the recipient of a present, artistic in its appearance and valuable for its utility. It was a secretary, one of the most complete obtainable.

The presentation was made on behalf of the office staff and employes of the other departments by the foreman, E. C. Holloway. In a congratulatory address, reference was made to the pleasant relationship existing between employers and employes in the establishment. The kindly interest always shown by Mr. Watt was dealt with in appreciative terms. Assurance was given of the sincere wishes of the subscribers to the present for the future happiness of Mr. and Mrs. Watt. Warm applause marked the acceptance of the present by the former. In replying, he thanked his employes for their evidences of good-will and wishes. Dealing in turn with the happy relationship existing in the establishment, Mr. Watt abscribed to it much of the success of the business. He remarked that he always held his employes' interests in mind, and he was glad to know that they appreciated the fact. Mr. Watt afterwards received the individual congratulations of those present.

NEW COMPANY INCORPORATED.

Incorporation has been granted to Chas. Henry Worsnop, Halifax, England; Jas. W. Pike, Montreal; H. E. Hodgson, Cleckeaton, England; T. P. Howard, Montreal, and C. D. Gaudet, Montreal, as The Eclipse Lighting and Heating Company. The company has a capital of $200,000, and will carry on the business of general founders, metal turners, etc., besides going into the acetyloid and acetylene gas business.

PLUMBING AND HEATING CONTRACTS.

The Bennett & Wright Co., Limited, are furnishing the plumbing, heating and lighting for the new Salvation Army Training Home on Sherbourne street, Toronto.

Guest & Co., Toronto, will move on October 1 to larger and better lighted premises at 102 Church street, where they will still make the manufacture of water motors their specialty.

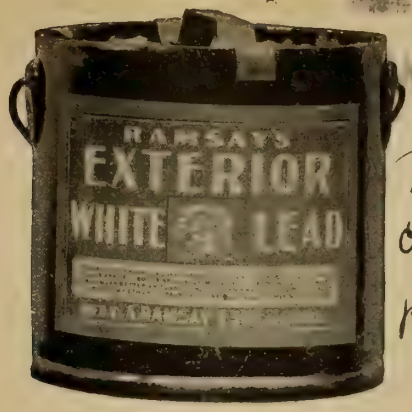
While few contracts are being closed in the plumbing line, the demand for job work is enormous, and plumbers, like other industrial employers, are complaining of difficulty in obtaining efficient workmen.

This week water motors are being shipped by Guest & Co. to Niagara, Hamilton and Brantford. Two are also being furnished for Toronto church organs. The same company have supplied a water motor for Wellesley Methodist Church, a boiler for Dr. Aikens residence, Queen street, and gas fitting for the dwelling of R. L. Johnson, Earl street.

PLUMBING AND HEATING NOTES.

The T. A. McLean Manufacturing Company, of Charlottetown, P.E.I., have secured the contracts for heating and plumbing Richard Grant's new residence, and for heating the house of Edward Kelly, Southport.

A. G. C. Simpson, grocer, boot, shoe and crockery dealer, Teeswater, Ont., has sold his grocery stock to J. G. McBeath.



IT STANDS ALONE.

THE CANADA FOUNDRY CO.

THE most conspicuous exhibit, perhaps, in machinery hall at the recent Industrial Exhibition at Toronto, was that of The Canada Foundry Co., which occupied a space extending along the entire side of the west end of the building.

Behind snow-white columns was an elaborate display of the products of the company, containing an exhibit of water and gas, cast-iron pipe, elbows, T's, and special castings, hydrants, valves, valve-boxes, stop-cock boxes, combination and single-drinking fountains, and many other special manufactures of this company.

An interesting feature was a freight-car truck, one of an order of 100, for the Canada Northern Railway; and another object of interest was a sample of the great forges, part of the equipment of the new forge shop at Toronto Junction. There were also samples of structural steel, and an automatic cold-pressed nut machine in operation, this machine being the only one of its kind in Canada. An automatic screw machine, making three by one-half (3 x ½) cap screws also attracted much attention.

The company had also an extensive display of ornamental iron work, including a large bronze tablet for the Canadian Bank of Commerce, and a section of iron dado work for the Montreal office of The London, Liverpool and Globe Insurance Company, this being part of a contract amounting to $50,000, recently obtained by the company.

There were also shown several samples of their well-known wrought iron fences, and the entire exhibit was enclosed with the popular design No. 110.

A prominent feature of this portion of the exhibit was a heavy wrought-iron gate made for John Penman, of Paris, Ont. The entire corner section of the exhibit was devoted to the display of wrought-iron fire dogs, fenders and screens, which were all of modern design and remarkably strong and well made.

Upon an easel in the corner was displayed a sample board of hammered leaf work made by the artistic blacksmiths of the ornamental iron department. This class of work is being used to a very large extent by all the prominent architects for interior decoration, being seen in the recent designs for grills, railings, staircases, etc.

At night the exhibit was brilliantly illuminated by the latest type of enclosed arc lamps, manufactured by The Canadian General Electric Company.

Exhibit of The Canada Foundry Co., Limited, at the Toronto Industrial Exhibition.

HO FOR CHRISTMAS.

Among up-to-date merchants there is always a great effort to make a good display for the holiday trade. A great deal of attractiveness can be obtained in this line at a small outlay to the merchant by using the adjustable stand or table. It can be used as a table, or in five different positions as shelves, and is really indispensable to the progressive storekeeper. United Factories, Limited, Toronto, highly recommend these goods and cheerfully furnish any information regarding this splendid substitute for the old-fashioned counter.

THE POWER OF ADVERTISING.

In the hardware store of the well-known firm of Kerr & Robertson, wholesale and retail hardware jobbers, of St. John, N.B., may be seen a framed cut of two elephants telling a funny story. This was extracted several years ago from "Hardware and Metal" in connection with the advertising for liquid paints. The picture, which tells its own tale in a quiet but graphic way, is a silent but strong advertisement and is highly prized by the firm mentioned above. Only yesterday The Canada Paint Company had a request from a large hardware firm, which reads as follows:

Gentlemen,—We noticed in HARDWARE AND METAL a picture of a man with a very long arm. Could we have the use of this electro-plate for advertising?

It will be remembered that this was also an advertisement of The Canada Paint Company's which aupeared in this journal. It depicts a young man standing on his toes reaching out for trade. A good advertisement is well thought of and creates more than a passing interest.

B. Lequime & Co., sawmill owners, of Grand Forks, B.C., have sustained loss by fire.

A. B. Greer, manufacturer of carriages, London, Ont., has sustained a small loss by fire; fully insured.

E. P. Charton & Co., departmental store, Montreal, had the stock in the St. Lawrence street store damaged by water; insured.

DEATHS.

Robert McLeod, lumber merchant, of Black River, N.B., is dead.

AMMUNITION CONTRACT.

The Colonial Ammunition Company of Melbourne, Australia, have received an order from the Commonwealth Defence Department for the supply of 10,000,000 rounds of .303 rifle ammunition, of which 9,500,000 rounds will be ball cartridge and 500,000 blank, to be delivered half the quantity by the end of the present year and the balance by June 30, 1903. The Federal Commonwealth states that the annual supply will shortly have to be increased to 17,000,000 rounds. The above is, of course, a purely Government contract, but, apropos "Shooting Irons" of all sorts, it may be as well to mention that shooting is one of our great national sports and the field for sporting rifles in Australia is a good one. Good English makes sell well, but are high-priced as a rule. American makes are not nearly so well represented as they might be and there is ample room for a good medium class of trade if the article was well advertised, worthy of merit, and would retail at 7 or 8 guineas.—Iron Age.

PAINTERS PERFECT WHITE LEAD

Manufactured by the Latest and most Approved Method, Securing Whiteness, Permanence, and the Greatest Covering Power.

This Lead is a new and scientific combination of materials which are in themselves perfect pigments, ground in pure refined Linseed Oil. It will be found on trial to be the whitest lead ever introduced, besides which it has great covering power, works well under the brush, and shows up tints sharp and clear. In thinning, it takes more Oil than any other Lead, and will, therefore, cover more surface. It will also wear better either on inside or outside work than any paint ever offered before.

MANITOBA MARKETS.

Winnipeg, September 22, 1902.

THERE are no changes in prices to report, but there is some complaint of cutting among dealers which is reducing profits to an unreasonable extent. In paints, oils and glass, trade is good and the only new feature is the advance of 2c. on linseed oil, making the present price 84c. for raw and 87c. for boiled. The demand in the glass market is very heavy

NOTES.

Minnedosa has a new hardware store under the management of Gunn & Baker.

J H. Walker, Olds, Alta., has sold out his hardware business to Code & Hayes.

Mr. Learmont, of Caverhill, Learmont & Co., Montreal, is making his first visit to the West, and in common with others is surprised at the development of Winnipeg. He states the company is entirely satisfied with its venture here and may extend operations in the near future.

APOLLO BEST BLOOM
GALVANIZED IRON

Whatever advantage belongs to galvanized iron and liberal dealing goes with Apollo.

Costs not a cent, and relieves you of much anxiety.

American Sheet Steel Company, New York

Representatives for Canada
B. & S. H. Thompson & Company
53 St. Sulpice Street
Montreal

YOU NATURALLY EXPECT THAT THE GOODS **YOU** BUY WILL GIVE ENTIRE SATISFACTION TO **THOSE** WHO BUY FROM YOU. WHEN YOU PURCHASE

2 AND 3 PLY READY ROOFING,
BUILDING PAPERS,
SHEATHING AND CARPET FELT,
COAL TAR PRODUCTS,
HANGING AND PRINT PAPER,
BROWN AND MANILLA WRAPPING

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS.

September 26, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

The Rubber Belt is the Thresher Belt.

Other belts have had their waves of popularity, generally on account of price, but the threshers have invariably returned to Rubber.

WHY?

1. **BECAUSE** the rubber belt stands the weather.
2. **BECAUSE** the rubber belt adjusts itself best to the pulleys.
3. **BECAUSE** the rubber belt does not expand and contract with change of temperature, consequently the engine has not to be re-set when once properly placed.
4. **BECAUSE** the rubber belt is made for the thresher use and will best stand the work.
5. **BECAUSE** the rubber belt is honest in length. If you buy 100 ft. Endless, you do not get 97 ft.

Contracts are placed with us by all the large engine and seperator manufacturers.

WHY? **WHY?** **WHY?**

L. H. Packard & Co., Montreal.

You take no chances

in buying all you use of Brass and Copper Sheets, Tubes, Rod and Wire from us. Everything is in your favor. Complete stock carried at our New York warehouse—our Mill at Waterbury for special gauges, sizes, etc. Connected with a private wire. Prompt delivery is a potent factor in any business, but in the hardware business it becomes an absolute necessity to the success of the enterprise. The dealer who is content to wait a week for his supply when it can be shipped the same day order is received is the same fellow who is always wondering how in time the other fellows make a living. Procrastination, pessimism, egotism, dry rot, creditors and sheriff—that's the rotation, but not if you get the "Waterbury habit."

The UNITED STATES represents the best and most up-to-date development of modern mats and matting. Investigation will reveal the fact that they embody a greater number of original and distinctive merits than have heretofore been incorporated in a product of a similar nature. Special attention has been bestowed upon construction and material used in order to secure the highest satisfaction. They have gone into the hands of the dealers with most satisfactory results, and our line, we believe, range sufficiently to meet the wants of any intending purchasers of wire mats and matting.

RETURNED Nov. 6/02.

3 Warm Air Collars—ample capacity for all.
Fire Travels 7 ft. 6 inches.
Weight, 510 lbs.
Burns wood 36 inches long.
Size of Feed Door, 14 x 12 inches.

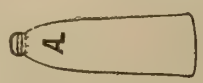
For further particulars ask the makers.

OUR TRADE A MARK
AUER LIGHT MANTLES
LONGEST LIFE & BRIGHTEST
OUR TRADE A MARK

The Value of Annealing.

Annealing is the most costly step of mantle making—consequently a cheap mantle cannot be properly annealed—That is the reason a cheap mantle caves in like this if you lay it on its side, after burning off the coating—Try one—They injure your trade.

Mantles branded A are thoroughly annealed over pressure gas—They fit the burner—They don't shrink—They stand up this way—They are reliable—They help your trade.



—We are the sole manufacturers of A mantles.
—Write us if you are interested.

Lowest prices on Mantles, Shades, Chimneys, Globes and Sundries.

A DULL TINPLATE TRADE.

IN spite of the general healthy condition of the iron and steel trade in the United States, the tinplate industry over there is at present in a most unsatisfactory condition. It is estimated that fully 80 per cent. of the capacity of The American Tinplate Co., in other words, the Trust, is idle.

It will be remembered that the tinplate industry of the United States is practically only about 10 years old, having been been brought into existence by the McKinley tariff, but in that time the development of the industry has been enormous.

When the McKinley tariff went into [illegible] rts of tinplates into the United State were 328,000 tons, the production less than 1,000 tons, while the consumption was about 329,000 tons. In 1901, the last year for which we have any statistics, the imports were only a little over 77,000 tons, while the production was close upon 400,000 tons. The consumption in the latter year was 477,686 tons.

It is claimed, however, that the cause of the present dullness is not as much overproduction as the fact that the short pack of canned vegetables and fish in the United States has greatly curtailed the usual consumption of tinplates. Where the pack of canned goods is so enormous, the fact of the partial failure of the output naturally must greatly affect the consumption of tinplate. The tinplate industry, it will be remembered, is largely controlled by The American Tinplate Co., which is in turn a part of the Steel Trust. In spite of the falling off in the demand for tinplate, the Trust, however, has not made any change in its prices, still quoting $4 per box for ordinary quality sheets, 14 x 16 in size. Some of the independent mills, however, have been cutting prices, in some cases from 20 to 25c. per box.

CUT IN SHEET STEEL.

A heavy cut in sheet steel is reported from Pittsburg. The American Sheet Steel Co. has announced that it will take orders until further notice at 2.75c. for No. 28 gauge sheets, box annealed one-pass cold-rolled, in 500-bundle lots, and for galvanized at about 75 and 7½ per cent. off. This means that a cut of $5 a ton has been made without the least inkling of the action being given to the trade.

Its motive would seem to be a desire on the part of the Steel Company to prevent independent mills from loading up at higher figures before the actual cut came.

THE STOVE SITUATION.

AT a meeting of the stove manufacturers in New York a few days ago prices were advanced 5 per cent. The last advance that was made in prices of stoves in Canada was in April of the present year, when figures were put up 5 per cent. From what HARDWARE AND METAL can gather the advance in the United States is not likely to influence the market in Canada, either at present or in the near future.

The condition of the stove and furnace trade in Canada is still phenomenally brisk; in fact, never in the history of the trade have the manufacturers experienced the same activity. They are all away behind with their orders, and the largest of them do not expect to be able to catch up with their orders this season. One of the largest manufacturers in Canada told HARDWARE AND METAL a few days ago that his firm expected to be fully 1,000 stoves short.

As a rule, at this time of the year manufacturers have a fairly good supply of stoves in stock, but now most of the houses are even without proper assortments in their sample-rooms.

It is possible that should the coal strike continue that it may affect the demand for base burners. At present, however, there is no indication of this. In the meantime, there is a particularly good demand for wood stoves for shipment to the northern part of the country where wood is still the principal fuel.

PROBLEM OF MOVING THE NORTHWEST CROPS.

THE enormous cereal crop in Manitoba and the Territories has naturally again brought to the front the question of getting it to the seaboard. A statement made in Montreal places the number of Canadian vessels available for the service at 18, while a Fort William authority estimates that we have 30 grain-carrying vessels, taking into account passenger steamers as well. Vesselmen themselves have recently declared that they can handle about 2,500,000 bush. weekly.

Although there are really no more railway lines in operation in the West than there was a year ago, the facilities for carrying the grain are better than they were a year ago. The C.P.R. has lengthened all its sidings between Fort William and Winnipeg, so that each siding is now able to accommodate two trains of 90 cars each. Besides this, large additions have been made to the rolling stock. General-Superintendent Leonard only a few days ago said that the C.P.R. had 10,000 cars west of Fort William for the wheat service alone. Estimating 800 bushels to the car, this would mean a carrying capacity of 8,000,000 bushels.

Now, with regard to the wheat crop. Exactly what it is cannot be said. At a moderate estimate it can scarcely be less than 75,000,000 bushels, allowing 60,000,000 for Manitoba and 15,000,000 for the Territories. Last year Manitoba gave 50,502,000 bushels and the Territories 12,676,000, a total of 63,000,000, while there were inspected at Winnipeg over 46,000,000 of the crop of 1901. We all remember the difficulty that was experienced to move this crop and that millions of bushels had to be carried over to 1902, simply because of the insufficient transportation facilities.

As we have shown, the transportation facilities are better than they were in 1901. But the question is, have they sufficiently improved to warrant one in concluding that they are equal to the demand that will be made upon them? Candidly, we do not believe they are. The fact of the matter is, that even with the addition of the Canadian Northern, the grain-producing capacity of the West is far in excess of the transportation facilities of the country. And the weakest link in the chain is the steamship service.

The steamers we have are few and the carrying capacity of the most of them is anything but modern. And even were their general carrying capacity more modern, they would have to lighten at Port Colborne of anything in excess of 75,000 bushels if they were bound for the lower lakes. As much as 250,000 bushels of wheat have been carried through the American Soo Canal by one steamer, and the average cargo is 175,000 bushels. It is evident, therefore, that Canada is handicapped in more ways than one in regard to the transportation of grain from the Northwest.

During the calendar year 1901 there were shipped from Fort William and Port Arthur 15,374,000 bushels of wheat. Of this 3,225,000 bushels went through the Welland Canal, 5 000,000 bushels to New York, via Buffalo; 1,500,000 bushels to Owen Sound, 2,160,000 bushels to Midland, 600,000 bushels to Depot Harbor, 700,000 bushels to Point Edward, 1,500,000 bushels to Goderich and Meaford. The remainder went to Port Huron and Detroit.

It has been claimed that it will not be a great while before 100,000,000 bushels of wheat will be shipped annually from Fort William. And the way the Northwest is developing such a thing is probable, but the question that concerns us most is how we are going to properly handle the quantity that is now produced by the West.

Two or three years ago the Dominion Government essayed to relieve the situation by suspending the navigation laws, but it created such a storm that it promised never to do it again. It is just a question, however, whether it would not be justified in doing it again.

The United States has certainly no right to consideration from us as far as shipping laws are concerned. There is not and never has been any intention on the part of the United States to give a moderate interpretation of their shipping laws as far as Canada is concerned. On the contrary, their interpretation has always been of the strictest and most arbitrary character. The refusal to permit Canadian vessels to participate in the carrying trade from Porto Rico and Hawaii to the United States is a proof of this. But the question is, would we, by a temporary suspension of the navigation laws, and thereby allowing United States vessels to participate in our carrying trade, facilitate the marketing of the enormous grain crop of the Northwest? It seems to us there is but one answer to the question.

On the United States side of the upper lakes last year 77,000,000 bushels of grain and 8,000,000 barrels of flour were carried. If, therefore, the vessels which engaged in carrying that quantity could for the short time now remaining before the close of navigation be permitted to engage in the the Canadian carrying trade the result would obviously be to the advantage of the commercial interests of Canada, for the more grain that can be shipped the more money will there be to circulate in the country.

A "KICK."

THE following letter was sent to a Montreal newspaper on September 27, the writer signing himself "British Merchant":

The writer noticed an article in a well-known English paper referring to the trade of Canada with Great Britain in comparison with the trade the States have with Britain.

The writer of the article was evidently a Canadian, as, after detailing some of Canada's energetic efforts to promote trade with the Old Country, he blames the British merchant for lack of enterprise.

As a merchant, I may be permitted to reply that the fault may rest with the Canadian merchant or manufacturer.

My firm have made several efforts to introduce Canadian goods into this country, and two or three agencies have been given us, but the same agencies have also been given to other firms, as our representatives have discovered when offering the goods; with the result that we at once drop them.

No self-respecting firm is going to offer goods for which they are supposed to be the agents, to find that other firms are offering the same; also posing as agents for the same concern.

We are agents for several American houses, and have the entire handling of their goods, and we have had every possible support in our efforts, and never had any similar experience with them.

It is a common practice for British merchants or manufacturers to appoint more than one agent for their goods in Canada; and why such should be objected to in Great Britain, where with so much greater population a larger field is provided, is not quite clear. In some cases firms as near to each other as Montreal and Toronto are agents for the same British goods. Each manages to do a good trade in his respective locality and throughout the country surrounding, and neither considers it any loss of self-respect that another firm is handling the same goods.

AN IMPORTANT INSURANCE QUESTION.

Editor HARDWARE AND METAL,—In answer to "Another Importer" and Mr. Gerald Lomer's letters in your last issue, we beg to say that we would have much preferred having the general opinion of the trade on this important question of terms before Mr. Lomer entered the field or before bringing our names into the question, as we knew in advance the opinion of Mr. Lomer and "Suren, Hartman & Co."

But, as Mr. Lomer has given out the names of the interested parties, we shall try and state the facts again, clearly and with fairness, to back up our first statement, which we claim is absolutely correct.

Unfortunately, we could not forsee that our friend, HARDWARE AND METAL, would place "Suing for Damages" and "Who is Responsible?" on the same page in its valuable paper, as it proved that the two articles were practically one. However, we would ask Mr. Lomer to write to his principals and see if our action is serious or not, as it has been sent direct to them, and we shall see later who will pay damages, etc.

We claim that when we purchase goods c.i.f Montreal that we have nothing whatever to do with freight or insurance, as it does not matter by what line the goods are shipped, how insured or how manufactured, as the sellers undertake to pay all charges until goods are landed here, as we accept delivery in Montreal only, goods being sold in our office by the agent of the company.

We believe it is clear the shippers are responsible for all risk until the goods arrive in Montreal, and if they neglect to ship by the cheapest way or do not insure properly, it must be their fault and not the buyer's.

Mr. Lomer has stated in his letter that in this special case it happened that he notified us before shipment that these goods would be covered as usual. This we would like Mr. Lomer to prove, as such a notification was only given us on a new contract made later, but which was accepted c. and f. only, and not c.i.f., as before; we insured it ourselves to our entire satisfaction.

We having a balance of the old contract still unfilled after the rusty shipment arrived, they (the sellers) proposed that we should make out our own insurance, so as to avoid further trouble, which proposition was accepted by us at a reduction to about cover our insurance.

Mr. Lomer also stated in his letter that we said nothing about insurance before the rusty shipment arrived. We would say in reply, that we had nothing to complain of about insurance before this, as the goods delivered then could not easily be damaged by sea water, as they were not the same goods, being galvanized or japanned. But these rusty shipments were perishable goods, and shippers should have insured them accordingly.

They should have known this, and we believe must be liable for damages when it was not properly done by them. We trust that the wording of this reply will not in any way prejudice Suren, Hartman & Co., or Mr. Lomer, and would quote what an English firm has already acknowledged when in a similar position as Suren, Hartman & Co. to-day, to one of our large Canadian importers: "They did not know what they were doing all these years selling goods c.i.f., and not to insure against all risk when making such sales, and we sincerely wish that in future they will have no more trouble like this."

Hoping that this letter will make the matter clear and that it will be discussed by the trade in general, as we believe it is an important question to the trade.

The Canada Hardware Co., Limited,
A. M. ST. ARNAUD, Manager.

Editor HARDWARE AND METAL,—Thinking over the important question of insurance brought up in your last few copies, I fail to understand why there should be so much doubt in the matter, as to my mind c.i.f. must mean full cost, including full freight and full insurance.

"Importer" states that he bought his goods c.i.f. If he did (and if his contract is written c.i.f.) it would certainly mean that the seller is responsible for insurance and freight until goods are landed safely.

The "i" in c.i.f. is not half an I, and cannot mean half or part insurance unless so stated in contract.

If I were buying sheet metal or chain or whatever the goods might be, and a traveller quoted me "c.i.f." prices, I should expect his firm to abide by them.

"Importer" did not state whether the insurance policy was given to him before shipment was made or not, and if it was his usual custom to insure against all risk or not in his other dealings. But these facts need not alter the case. The matter being brought up through your valuable paper has opened the importers' eyes and I think will certainly do good.

"STILL ANOTHER."
Montreal, September 30.

STILL, WHY?

Editor HARDWARE AND METAL, — In answer to the letter of "Member of Tarred Paper Association," I would say that I am willing to admit being sleepy, but at the same time cannot yet understand why Ottawa was cancelled as a delivery point for paper. It would seem to me the freights are not as high as to Quebec, or is it a case of "You've got to buy our stuff and we don't care what kind of usage you get?" Manufacturers in other lines send baskets of peaches to their customers and then make Ottawa an f.o.b. point. As for wanting to supply the whole Dominion, I acknowledge the soft impeachment, and say yes; but I must contradict the statement that, "Prices and terms being equal the orders go to dealers at nearest points of delivery," as I know for a fact that prices being equal the orders often go to the most popular house, and, pardon my modesty, to the most popular salesman.

Trusting the Roofing Paper Manufacturers will soon see their way clear to give the consumer north of Ottawa fair play and make Ottawa a delivery point.

"WANDERER."
Montreal, September 27.

HE GOT THE INFORMATION.

A man who does not take his home paper, but occasionally answers advertisements in "story papers," has had some interesting experience, says an exchange. He learned that by sending $1 to a Yankee he could get a cure for drunkenness. Sure enough he did. It was to "Take the pledge and keep it." Later on he sent 50 2c. stamps to find out how to raise turnips successfully. He found out—"Just take hold of the tops and pull." Being young he wished to marry, and sent 34 1c. stamps to a Chicago firm for information as to how to make an impression. When the answer came it read, "Sit down on a pan of dough." It was a little rough, but he was a patient man, and thought he would yet succeed. Next advertisement he answered read, "How to double your money in six months." He was told to convert his money into bills, fold them and he would see his money doubled. Next he sent for 12 useful household articles, and got a package of needles. He was slow to learn, so sent $1 to find out "How to get rich" "Work like the devil, and never spend a cent." And that stopped him, but his brother wrote to find out how to write a letter without pen or ink. He was told to use a lead pencil. He paid $5 to learn how to live without work, and was told on a post card, to "Fish for suckers as we do."

A new hardware store is to be opened to-day, October 3, in Sarnia, by H. A. Couse & Co.

INDUSTRIAL GOSSIP.

IT is now stated as a positive fact that the Gurney Company will locate works at Toronto Junction. Operations will be commenced this fall on a building to be 700 ft. in length.

Tenders are now being asked for the construction of the new factory for the Cockshutt Plough Co. to be erected in Brantford.

According to reports from Winnipeg, work on the big Ogilvie Mills' oat elevator, on the bank of the Red River on the company's property in Point Douglas, is making splendid progress.

The International Cement Works of Durham have, in addition to exemption from taxes, secured the privilege of passing wires for the transmission of electrical power to the new works, of inducing the Hull Electric Co. to extend its tracks to the new manufactory, and of encouraging the people of Hull to subscribe for the stock of the company. For these concessions the company has promised to employ 100 men, residents of Hull, to be paid not less than $60,000 per year in wages.

Referring to the progress being made on the Quebec bridge, The Quebec Telegraph says: "The work on the construction of the caisson is being pushed forward with commendable rapidity and to the entire satisfaction of the contractor and engineers in charge. Despite some difficulty with the sinking of the south shore caisson the temporary delay is nearing an end, and the work in question, having reached a depth of nearly 50 feet below the bed of the river, is expected to be completed by the middle of next month. The unlooked for obstruction, which occasioned the short delay, was due to the west end of the caisson coming into contact with a pocket of sand, while the balance rested on a foundation of solid rock. This necessitated a deeper penetration into the river than was at first estimated. Of course, in a work of such magnitude some unforeseen obstacles may at intervals be expected, but on the whole the great undertaking is progressing favorably."

A NEW OVEN THERMOMETER.

D. G. Cooper, Pequabuck, Conn., has manufactured an oven thermometer which is of the greatest utility for all cooking and baking purposes. This invention of Mr. Cooper's meets the requirements which every experienced and competent cook has felt of indicating the exact temperature of the oven at any moment during the process of cooking. Every precaution is taken that the hand on the dial of this thermometer shall indicate the exact temperature of the air of the oven. The thermometer is fastened on the inside of the lining of the oven door toward the oven, and asbestos resting on this lining keeps the thermometer away from the door. The hand is susceptible to the least change of temperature in the oven. This thermometer is easily adjusted to both a drop and swing door.

WILL SEND A PERMANENT REPRESENTATIVE.

E. C. ATKINS & CO., Indianapolis, Ind., one of the largest saw manufacturing firms in the United States, have decided to push their business in Canada most vigorously. The business they have hitherto done in Canada has been chiefly through the mails. They will now supplement it through a resident representative with headquarters in Toronto. The gentleman selected for the duty is Mr. Harlan P. Hubbard, who has been connected with the saw trade all his life, and has gone through every branch of the business. Mr. Hubbard, whose portrait is herewith reproduced, is in Toronto this week for the purpose of opening up an office and paying a preliminary visit to the trade. The the three A's is the trade mark of the firm he represents.

Harlan P. Hubbard, resident representative in Canada of E. C. Atkins & Co., Indianapolis.

The "North Star" refrigerator, manufactured by the North Star Refrigerator Co., is giving good satisfaction. This refrigerator was awarded a diploma at the late Exposition in Ottawa by the Central Canada Exhibition Association.

TRADE CHAT.

MR. A. S. SMITH has put up a windmill on his hardware store by which to keep his store cellar dry. The pump keeps working just as the wind blows and the water in the cellar is being brought to the outside in free supply.—Moosomin, Assa., Spectator.

Beaupre & Son's iron foundry at 54 St. Henry street, Montreal, were badly damaged last Friday by fire.

Last week P. J. Crowley, bookkeeper of M. E. Agar, hardware merchant, St. Johns, was married to Miss Margaret A. Lawlor.

Pike Bros. store, Stanstead, Que., was recently badly damaged by fire. The fire originated in the cellar where the paints and oils were kept.

Notice has been given of the dissolution of partnership of John L. Fawcett and J. T. Allan Diblee, hardware and grocery merchants, Hartford.

The first of the three baseball games for the championship of London, between the Londons and McClary's, champions, respectively, of the city and wholesale leagues, resulted in a win for the McClary team—by a score of 3 to 0.

A combination of the wire nail manufacturers is expected in Vienna. At a meeting held about the middle of September, 80 per cent. of the members favored the formation of a combine, and it is anticipated that it will be formed notwithstanding the opposition of the minority.

PERSONAL MENTION.

Mr. Wm. Currie, hardware merchant, Omemee, Ont., was in Toronto this week.

Mr. Ralph Smailes, of Rendell & Co., general merchants, Greenwood, B.C., was in Toronto this week.

Mr. W. R. Tait, of Lewis Bros., after being in Toronto for a few days, is starting on his trip to New Ontario again.

Mr. Max Morell, manager of Lewis Bros. & Co.'s Toronto branch, has just got back to Toronto from a business trip to Montreal.

PRODUCTION OF COPPER.

THE production of copper in 1901 is reported by Charles Kirchhoff in "Mineral Resources of the United States, 1901," now in press, United States Geological Survey.

The conditions surrounding the copper-mining industry during the year 1901 were in many respects extraordinary. Production was only slightly less than it had been in 1899 and in 1900, and consumption in this country was undoubtedly considerably greater. But a determined effort was made during the greater part of the year to maintain values in the face of adverse conditions in the countries which are the principal customers for our large surplus. Prices were kept above the parity of Europe, so that large importations were added to the supply. The result was an extraordinary accumulation of the red metal in the hands of leading interests. For a while co-operation between the principal producers was tried, and when this failed coercion was attempted by the breaking of the market toward the close of the year. This was preceded by a very serious decline in the shares of copper companies on both sides of the Atlantic.

The total production of domestic copper in the United States in 1901 was 268,782 long tons, as against 270,588 long tons in 1900. The amounts produced and the relative percentages of the total production of Lake Superior, Montana and Arizona were as follows:

Lake Superior, 69,772 long tons, percentage of total production, 25.9; Montana, 102,621 long tons, percentage, 38.2; Arizona, 58,383 long tons, percentage, 21.7. Mr. Kirchhoff discusses at some length the conditions and production of the mines in the Lake Superior district, in Montana, in Arizona, in Utah and in Tennessee.

The total imports of copper into the United States in 1901 from all sources and in all forms amounted to 124,938,323 pounds, as compared with 103,895,026 pounds in 1900, with 93,172,191 pounds in 1899 and with 50,268,499 pounds in 1898.

The total value of the exports of copper from the United States in 1901 was $36,071,448, as compared with $58,875,439 in 1900, with $43,485,654 in 1899 and with $35,545,251 in 1898. Germany is by far our largest customer for copper, since the greater part of the metal shipped to the Netherlands is in transit to that country; on the other hand, some of the copper which goes to the United Kingdom is shipped from there to other countries. The details of these movements cannot well be followed.

The estimated consumption of copper in the United States in 1901 was 382,761,014 pounds, as against 356,891,121 pounds in 1900.

Good Returns.

After all what you want the goods you sell to do is to bring you good returns—good profit to yourself and satisfaction to your customers.

Every way you take them

THE SHERWIN-WILLIAMS PAINTS AND VARNISHES

bring good returns. They are the most profitable paints and varnishes any dealer can sell. They afford a splendid margin of profit and help to build up a steadily-increasing trade through their selling qualities.

They never go wrong if properly used, and they bring the consumer back again and again.

They are the best advertised paints and varnishes sold. They are known and have a good reputation all over Canada. They are the paints and varnishes you ought to sell.

Our "B-13" booklet describes our entire line of products and tells what we do for paint dealers selling our goods. Write for copy to-day.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

The stock of copper on hand in the United States on January 1, 1902, is estimated as being at least 300,000,000 pounds, equivalent to six months' production. In the absence of figures which might be said to represent normal years, it is impossible to do more than make a guess at what might be considered the excess over a reasonable stock. It is probably fair to assume that, even at the beginning of the year 1901, the stocks of copper in this country were beyond the working limit.

The copper market opened in 1901 rather dull at the official prices of 17c. for Lake and 16½c. for electrolytic, but actual sales were made at 16⅞c. for Lake and at 16¼c. for electrolytic. By January 13, 1902, the official prices had fallen to 10⅛c. for Lake copper.

The world's production of copper in 1901 was 511,803 long tons, as against 487,206 tons in 1900, 463,693 tons in 1899 and 429,379 tons in 1898.

AN ANCIENT INDUSTRY.

ONE of the most ancient industries in existence at the present time in Europe, according to Scientific American, is the production of zinc in Silesia. From the 16th century calamine was obtained in the manors of Beuthen and Jagerndorf; it was used in the local manufacture of brass, and it was exported to the countries adjoining the Oder and Vistula. During the 30 years' war, when the workmen, mostly Huguenots, had abandoned the mines, this industry disappeared, and its exploitation did not recommence until the 18th century, when George de Giesche, a Breslau merchant, obtained in the year 1704 from his Sovereign Leopold the privilege, for 20 years, to extract calamine in Silesia. The first zinc foundry established in Silesia was that of Lydagnia, which existed from 1809 to 1900. At first prices were very high, $21.75 per quintal. As the production increased, which in 1816 reached 20,000 quintals, prices dropped to $3.75 and in 1820 to $2.35. This year proved fatal to the high furnaces, some of which were obliged to shut up. At that time the article was exported to Asia via Brody and Russia. In 1820 the English route was employed for shipment to India, where it proved a powerful competitor to the Chinese zinc. This exportation gave fresh prosperity to the Silesian mines. Since 1830 the production has continued to increase. In 1837 there were 32 works, employing 1,091 workmen, in activity, and the production reached 207,707 quintals. At present it exceeds 2,000,000 quintals, and requires nearly 8,000 workmen. The exportation in 1897 amounted to 496,004 double quintals, and in 1901 to 533,129 double quintals. The nominal price at Breslau is now from $3.25.

THE "SOO" POWER CANAL.

THE great water-power canal of the "Soo," which has just been finished after four years of construction and an expenditure of $5,000,000, is regarded by engineers as the most magnificent work of its kind in the world.

The canal is two and a third miles long, from the mouth of the intake above the rapids to the overflow far below the entrance to the ship canals. The average width is 224 feet, and the depth is 22 feet. The intake has an area of more than 15,000 square feet, through which will flow a volume which is estimated to be 30,000 cubic feet per second, with a velocity of about two feet per second, or about one and a half miles per hour. The entrance is 891 feet wide and 18 feet deep. In its excavation some 300,000 cubic yards of material were removed.

The river front of the forebay is closed by the power house, the duplicate of which cannot be found in the United States. It is constructed of red sandstone, is 48 feet over a quarter of a mile in length, is 100 feet wide and 125 feet high. The massive building sits upon a foundation of piles covered by log sills and caps, and covered with Portland cement concrete to a depth of three feet. The cost of building this foundation alone represents a snug little fortune. The substructure consists of 81 masonry walls 100 feet long, 20 feet high and three feet thick. The stalls or pits thus formed, aside from supporting the building, serve to deliver the water from the turbines into the river.

The penstocks are all of uniform dimensions, 40 feet long, 15 feet wide and 20 feet high. The dynamo floor occupies space on the same floor on the river side of the power house. The floor above is used for the machinery, which converts the energy of the water into electrical power.

The energy to be developed by this immense engineering achievement is estimated at 40,000 horse-power, developed by 320 turbines of the McCormick type. Four of these turbines in pairs are placed in each penstock. All of the turbines are joined to one high shaft of pressed steel, and are housed in iron cases, leaving no openings save for the passage of water. The water enters the penstocks at a depth of 13 feet, and passes through the buckets of the turbines, through the draft tubes below each turbine, thence into the pits and from there into the river. As the rush of water passes through the turbines, the wheels revolve, that in turn revolves the big shaft, and thus the power is produced to turn the dynamos awaiting on the floor above.

The electrical equipment of the power house consists of 80 dynamos constructed by The Westinghouse Company. After converting the water power into electrical power, the latter will be transmitted by feed wires to the doors of the various plants, which are either in course of construction or projected, and which are expected to use the power produced. Among other things, the power will be used to propel the street cars.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

PETROLEUM AS A FUEL.

THE utilization of petroleum for fuel and other commercial purposes is being more widely adopted, comparatively speaking, in the little European State of Roumania than in many other larger and more important countries, according to an exchange. Nearly all the sugar mills, distilleries, gas works, hospitals and manufactories in Roumania now use petroleum refuse as fuel, as well as the State railways, upon which it is employed largely for the locomotives. During the last two years the price of British coal, which was formerly almost exclusively used in the manufactories, has mounted to about $10 per ton. Considering that the heating effect of petroleum residue is about one and a half times that of coal, and taking the price of coal at $10 per ton, the comparative value of petroleum residue is equivalent to $15 per ton. The average price of residum, however, is about $8, and crude petroleum, $7 per ton. It is proposed to hold a Petroleum Congress at Bucharest in 1903. Before the congress will be laid geological maps of Roumania, showing the petroliferous zones, worked and unworked; maps showing the salt, lignite, coal and quarries existing in the country; tables explaining the growth and development of the petroleum industry, a series of geological sections of the most important works and soundings, analyses of the chemical and industrial properties of the petroleum, photographs of the chief refineries and workshops, a series of geological sections of the valleys, plans of injectors in service for the use of petroleum as a combustible as employed by the Roumanian State railways and navigation societies, and a map showing the geographical position of Roumania in regard to other countries, buyers of petroleum, the means and cost of transport, besides other matters of importance bearing on the subject of petroleum.

A HANDY BINDER.

Bulletin 825, issued with a magnificent binder, by The Canadian General Electric Company, Toronto, illustrates the various generators which this company handles. This catalogue, like others of this company, contains splendid cuts of the machinery described and much useful information regarding their construction and operation is concisely given. A booklet entitled "Suggestions for Rail Bonding" is also issued by the same company. The binder is a particularly good piece of work, and by a simple device can be made to contain much of the literature which the company sends out to the trade.

NEW ELECTRICAL COMPANY IN QUEBEC.

The demand for electric and steam cars in Quebec city and its vicinity has attained such increased proportions that some decided steps are now being made by several Quebec and Levis capitalists towards the forming of a company for the purpose of erecting a large factory wherein cars and other like equipment for railways will be built. Mr. Dodge, the superintendent of the Levis Electric Railway, is one of the promoters, and it is said that the company will have a capital of over $50,000.

A STEAM AUTOMOBILE'S RECORD.

On September 24, G. C. Cannon, New York, with a machine of his own design and make, beat all previous records for steam automobiles, from one to five miles. G. C. Cannon is a young Harvard student, and for several years past he has been experimenting with steam automobiles. Last summer he succeeded in making a new record for the distance of one mile, which he covered in 1.07 2-5 minutes. This year he constructed his "Freak Steam Auto" with which, on Narragansett Park last week, he reduced the mile record to 1.05¼, and the five-mile record from 6.43 1-5 to 6.05. Two men are required to handle this new machine.

A 30-TON CASTING.

The Laurie Engine Company, St. Catherine street, Montreal, made a 30-ton casting last week, the largest ever attempted by this company.

The casting was for the bed-plate of a blowing engine and all preliminaries, save the drawing of the plugs, had been prepared beforehand. The greatest task was the moving of the derricks containing the molten metal. One of these contained 15 tons of molten metal, while two smaller receptacles held the remainder. The casting was left undisturbed for 60 minutes to cool.

THE LATE MR. JOHN DOTY.

Mr. John Doty, who died at his residence, 97 Ossington avenue, Toronto, last Monday, was a prominent figure for many years in Canadian manufacturing circles. In 1871, when he left his native State of Vermont, he established an engine works in Oakville, which business he conducted till 1875, when he moved to Toronto and established the firm of John Doty & Co. After his retirement in 1890 this business was carried on by The Bertram Works. The deceased was the founder of the modern island ferry system.

ELECTRICAL AND MACHINERY NOTES.

DURING the past week The Gee Electrical Company have furnished with electric wiring the residence of T. B. Lee, Madison avenue; two dwellings belonging to L. R. Orde, in Rosedale; also the Baptist Mission on Follis avenue, and the Sunlight Soap building on Eastern avenue, all in Toronto.

The Dominion Motor and Machine Co. shipped, on Thursday, an 8 H.-P. portable gasoline motor to F. S. Fillmore, Westmorland Point, N.B.

The Ontario Dynamo and Electric Company, who have secured the contract for lighting the town of Tottenham, have bought the necessary generating apparatus from The Kay Electrical Co.

H. J. Hass, former superintendent at The Canada Motor and Cycle Works, Toronto Junction, left on Monday for Buffalo, where he has secured a position of a similar character with The E. R. Thomas Motor Company.

The board of The Canada Foundry Co., at a meeting last week, resolved to make many alterations to their original plans in completing their new plant at Toronto Junction. A storeroom is to be built almost in the centre of the plant, while the storage building, originally intended to be 80 feet wide, will be extended to a width of 180 feet.

The Kay Electrical Company have supplied two motors to The A. R. Williams Machine Company, of Front street, Toronto; also two motors to The King Furnishing Company, of Chesley. This company have also supplied dynamos to Young Bros., Almonte; and to The R. L. Laidlaw Company, lumber merchants, Toronto. To The Smith Woollen Company they have sold a dynamo and motor.

AVOIDING EMERGENCIES.

By W. H. WAKEMAN.

MACHINES of all kinds show signs of wear after they have been in service for longer or shorter periods according to conditions, but some of these are more difficult to discern than others.

When I was a boy, driving a pair of large bay horses was my occupation, and while doing this work I noticed that some of the chains we used would wear down quite thin in places and then break off if not strengthened, while other parts would break while yet undiminished in size, without sustaining a very heavy load, and when the broken ends were examined they appeared like a collection of shining pebbles, showing that the iron was brittle. The former defect was easily discovered, but the latter was concealed until failure of the part called attention to it.

The former is like the part of an engine that wears until its weakened condition shows plainly to even the most casual observer that it must soon fail, while the latter resembles a boiler plate that is so brittle that it will not safely carry one-half of its former pressure, yet looks as strong as ever, to the casual observer, because it retains its full size.

This brings us to the main subject of this article, which refers to worn out steam boilers. I do not intend to show the awful wrecks, resulting in loss of life and property, which are caused by attempting to use boilers that are unsafe, as that is unnecessary, but shall call attention to the unwise plan adopted by some steam users who fail to heed repeated warnings concerning boilers that are rapidly failing until they are finally condemned in the midst of a busy season, causing loss, annoyance, and dissatisfaction.

The following incident is not a fancy sketch, but is only one of many that might be presented:

The boiler in a certain mill had been in use for many years until some of its parts showed signs of wear, as the plates were not as thick in all places as when new, and the experienced inspector knew that the sheets were crystalized, hence brittle and unsafe. The pressure was reduced until there was barely enough available to run the engine, which, of course, means that the steam was not used to good advantage.

Repeated warnings of the condition of affairs were not heeded, until one day the boiler was found to be utterly unfit for further use and the escape from failure under pressure seemed miraculous. Business was so prosperous that the firm could scarcely allow a day for boiler cleaning and inspection, and here they were found without a boiler to use, and no arrangements made for another. Here I wish to note the strangest and most unreasonable part of the whole affair, for the manager blamed the inspector in unmeasured terms for condemning the boiler so that if its condition had been due to carelessness and inefficiency on his part, his condemnation would have been no greater. Perhaps some reader can explain the philosphy of this action, but the writer cannot. It would naturally seem as if the vigilant and faithful inspector ought to have been complimented.

Another boiler was secured and set as soon as possible. The change proved to be a great improvement, so far as operating expenses were concerned, for calling coal worth $4 per ton, it saved $600 per year, which would not only pay a high rate of interest on the investment, but soon dispose of the principal also. This was so satisfactory that an apology was tendered the inspector for the mistake made in abusing him.

If no further explanation is made along this line, it will probably appear all right to some, therefore I shall proceed to show the disadvantage of the plan adopted in this case, hoping that it will prove beneficial to others in similar circumstances.

No plans had been made for a new boiler, and it became necessary to get one at the earliest possible hour, therefore, no opportunity was affered to select the most suitable kind for the conditions under which it must be used in that place. Where such a mistake is made it usually results in the purchase of a boiler that possesses at least one good quality, for it is ready for service without delay. It may be so designed that scale may rapidly collect in some of the parts which are not easily accessible for cleaning, and perhaps only well water, or some other kind that contains much impurity is available.

An acceptable boiler may not be at hand, so that the next best move is to have one built in the shortest time possible. This means that pressure is brought to bear to hurry every operation, and while I do not dispute the fact that a boiler can be well made under such conditions, yet it is only reasonable to expect that it will not be so well constructed as if it was known that no special haste was called for.

It is poor policy to drive too sharp a bargain when buying a boiler that is not yet made, because some boilermakers will build according to the price paid, which action will be condemned by almost everybody, yet, said condemnation will not make a good boiler out of a poor one, nor recall men to life and health who are in its path when it fails under steam pressure. It becomes necessary, however, to consider the financial part of such a transaction, and as some steam users are too short-sighted to see that there is such a thing as being too sharp, it is possible to put a safeguard around them, by pointing out the fact that if a boiler is well made, of good material, at a time when there is not much to do in the shop it is probably a good boiler, and its quality will remain the same if its owner is obliged to sell it at a low price, therefore, in view of all these facts it is quite possible that it will pay to buy such a boiler at a low price, even if it is not wanted for several months.

An inspector condemned the boiler used to generate steam for a certain plant, but allowed it to be run until a new one could be procured. The engineer in charge was told to select a suitable boiler from the stock of a designated dealer, but found them all fitted with hand holes in the front heads, underneath the tubes. As he wanted a man hole in his boiler so that he could go into it under the tubes, he objected to this form of construction. He was promptly informed that the heads would be taken out of the boiler he wanted and new ones put into it, made as he desired. With this understanding, he accepted, but took the precaution to put a private mark on the shell. The boiler arrived in a few days and appeared to be satisfactory. The private mark could not be found, however, which aroused suspicion, and subsequent cross-examination of one of the workmen brought out the fact that a new boiler had been built in the shortest time possible, or in other words, under the most undesirable conditions.

It was then too late to reject the boiler, so that it was put into service. Of course, it is unwise to claim that anybody is dishonest, unless abundant proof is available, but this transaction certainly does not come under the head of the golden rule.

It is the custom of some boilermakers to furnish their foremen with the main parts of the specifications, giving the principal dimensions, but not supplying all of the details, as the latter are followed out in accordance with the ordinary custom prevailing in that shop. This may be all right, but it shows that if any improvement, or change is to be introduced, the engineer should be on hand occasionally while the boiler is in process of construction, to make sure that his ideas are properly carried out.—Age of Steel.

Bates & Macdonald, of the Round House at Depot Harbor, have this week bought the machine shop in Parry Sound belonging to Weir & Tizzard.

CATALOGUES, BOOKLETS, ETC.

A HANDSOME PRODUCTION.

A CATALOGUE and price list of all the articles of their manufacture has recently been issued by The Pillow & Hersey Manufacturing Co., Limited, Montreal. Like the other productions of this firm, the catalogue is complete in every respect, and bound and printed in a style that not all catalogues receive. In addition to the regular lists of the products of the tack factory, wire nail factory, cut nail factory, horseshoe factory, bolt and nut factory, rolling mill department, etc., there is also included in the book a complete telegraph code, which customers at a distance will find of great convenience when ordering goods by wire. A good deal of useful information will also be found regarding the weights, counts, contents of cases, etc., which the trade will find of profitable interest. An index at the front of the book makes it easy to obtain quick reference to any section. Altogether this catalogue is a really fine one, and in keeping with the contents of the well-known "Blue Hoop Kegs." Everyone in the trade should have a copy of it.

A CENTURY IN THE CUTLERY TRADE.

The firm of Thos. Turner & Co., of the Suffolk Cutlery Works, Sheffield, Eng., have issued a handsome "Centenary Souvenir" commemorative of the fact that the cutlery manufacture as carried on by successive firms in these works is now a century old. The main purpose of this souvenir is not to advertise the grade of cutlery produced from the Suffolk Works, but to explain and illustrate the various stages by which an article is brought to its perfected state. The processes of forging steel, making and grinding are all lucidly explained, and the splendid cuts which accompany these explanations assist greatly to the understanding of these operations. Many facts connected with the manufacture of scissors, razors, and penknives, etc., are disclosed to those not proficient in the cutlery trade. In the preface a retrospective review is given of the history of the firm, while the frontispiece is a magnificent view of the Suffolk Cutlery Works, of Sheffield.

TO MAKE HEATING STOVES.

Isaac R. Williams, of Savannah, Ga., who, with his wife and daughter, visited Toronto recently, tells The Savannah Democrat that Toronto is the cleanest city he has ever seen in all his travels. There is more regard for law, order and morality than he has seen elsewhere.

Mr. Williams came to Toronto in the interests of the Howard air-tight heating stoves, and says a company will be organized and a factory built in Toronto or some other Canadian city in a few months. A. W. Dingman, of Toronto, will take hold of the enterprise.

A FAVORITE BRAND.

The demand for guns and ammunition this fall has been exceptionally good. The Canada Hardware Co., who are agents for the "Peters" cartridges and loaded shells, report that these are selling rapidly.

HELP your customers

to save fuel by supplying

The "PRESTON" RADIATOR

In this Radiator we have combined Artistic Appearance, Great Heating Surface, Simplicity and Low Cost.

It is a heater which at once appeals to the good judgment of a purchaser, as there are no complicated parts, it is easily cleaned, has no parts to get out of repair, and its vast heating surface is plainly visible.

A customer can estimate just what he is getting when he buys a "Preston" Radiator. It is not necessary to sell them on approval.

The damper, when set horizontal, fills the space between the tubes and compels all the products of combustion to pass out between tubes and circle about the outer shell.

The cold air enters tubes at bottom of radiator and escapes at top, creating a good circulation of air in any room where it is located.

It can be used on smoke pipe above stove or at floor in an upper room.

THE SHERWIN-WILLIAMS CO.

From a Cleveland, Ohio, paper.

CLEVELAND has long been the centre of the paint industry in the United States, and it is only natural that here should be located the headquarters and main plant of The Sherwin-Williams Company, the largest paint and varnish makers in the world. To illustrate the extent of the business of the company, it may be stated that in the last year the railroad customers on its books represented a rolling equipment of over 1,300,000 cars, while the entire equipment of all the railroads in the United States, Canada and Mexico is around 1,670,000 cars. In prepared paints for buildings and household use the capacity of the Cleveland plant alone is probably larger than the output of any other concern. In quick-drying coach colors, their yearly capacity is sufficient to paint 1,000,000 buggies. In the item of freight-car paint alone, the company's annual output would cover 350,000 cars, each one averaging about 35 feet long.

The Sherwin-Williams Company make, treat and refine all their linseed oil, having just erected a finely-equipped linseed oil mill for the purpose. They manufacture all their dry colors; make all their driers, varnishes, and japans; operate their own tin-can factory, box factory and cooper shop; do all their own printing, make their own machinery and own a screw steamer for hauling their lumber and flaxseed down the great lakes. The tin can factory of the company has a capacity of 5,000,000 cans a year. In the box and cooperage departments, the mills have an annual capacity of 15,000,000 feet of lumber and a dockage front along the river of 500 feet. The sample department where all the sample folders are finished turns out annually 40,000,000 samples. The capacity of this department permits the pasting of 126,000 samples a day, while the paint that is spread on the color cards would paint all the houses in a good sized town.

The history of The Sherwin-Williams Company is one of wonderful progress since its establishment in 1869. From the small beginning of a store building the company now operates the largest system of paint factories and warehouses in the world. The main offices and factories of the company are at No. 100 Canal street. The plant at this point consists of 17 buildings, ranging from two storeys in height to seven storeys. In the general offices here are also located the headquarters of the central division of the company's organization, which handles the business of the northern central portion of the United States. The remainder of the continent is divided into six divisions—the eastern division, with offices and warehouses at New York City and factory at Newark, N.J.; the western division, with offices and factory at Chicago, and a depot at Minneapolis; the Canadian division, with offices and factory at Montreal and a depot at Toronto; the New England division, with offices and warehouse at Boston; the Pacific division, with offices and warehouse at San Francisco, and a depot at Los Angeles; and the Southwestern division, with offices and warehouse at Kansas City, and a depot in Texas soon to be established.

The growth of the company, while it has been remarkable in many respects, is yet most reasonable when it is considered that the foundation principles of the company are such as could insure only success. This foundation is quality, and on it the structure, as it now stands, has been built. Based upon the principle of "good quality" in its finished product, it is most natural that every step in the manufacture of the goods should embrace the same idea. The most striking of this evidence to the visitor at any of the company's plants is the most scrupulous cleanliness that would be noticeable in a bakery. This applies not only to the machinery and floors, but also to the employes. Every facility is given to encourage cleanliness. There are a number of toilet rooms, including shower baths, large and excellently appointed, and at the large Cleveland plant towels are supplied in liberal quantities from the company's own steam laundry.

The work of insuring good quality in the goods begins in the company's chemical laboratories, where all the raw materials are analyzed to insure their purity. The standards of the company are very high in this respect, as, of course, they must needs be when good paint only is desired. From this point through to the time that the cans are packed for shipment every step is watched by experts. Every precaution is taken to insure that the work is done well, and when a can of paint leaves the factory there is an absolute certainty of its being strictly up to the highest standard. In the process of manufacture there are many interesting points that always arrest the attention of the visitor. Among these are the following: A very exact measurement to insure accuracy in following the formulae; a skillful and unfailing method of watching the colors; the exceptional fineness of grinding, and a check on the consistency of the paint at the time of filling, which makes it impossible for any of the goods to leave the factory either too thick or too thin.

One of the very striking details in the work of The Sherwin-Williams Company is their great belief in the power of intelligent advertising. In one of its buildings the company operates its own printing house and bindery. In this department all the advertising of the company is designed, printed, and finished, and sent out to the customers. The features include everything from the sample folders to 24-sheet posters. It is a distinguishing mark of The Sherwin-Williams Company's advertising that it is all invariably in good taste, a point that gives effectiveness, but is often overlooked by advertisers.

There are over 95 men constantly on the road from one end of the year to the other, and the growth of the company is such that this staff is being increased at the rate of about 15 men a year.

Another feature that impresses the visitor at the Cleveland plant is the splendid system of organization which makes work possible with the least friction and gives great orderliness to the entire factory. There is, besides, a surprising attention to detail, which is, of course, made necessary from the fact that quality prevails, and that in paint, upon the perfection of every detail depends the perfection of the finished product. The most evident esprit de corps is another very distinguishing point. The relation of employe to employer is exceptionally close and friendly. There is a genial fellowship pervading the entire establishment which reaches from the top to the bottom of the scale.

There are many other interesting features of The Sherwin-Williams Company's methods, including some very interesting work for the industrial betterment of their employes. Clevelanders are undoubtedly familiar with the company's work along these lines, as their methods have often been written up in the various newspapers and magazines. In every point the company maintains a standard of business decorum that gives to its wonderful success in the past 30 years a permanence of which nothing can rob it. The policy of the company is a broad one. It includes the very widest expansion. Within the last year a great many additions and improvements have been made at all the plants. At present plans are under way which will almost double the capacity of the Newark plant; the plant at Chicago is being remodelled and rebuilt on a very large scale; the Montreal plant is to be vastly improved, and altogether the company is preparing to forge ahead with its usual aggressiveness.

The company has also a finely equipped export department, with a staff of foreign representatives in the field, and the same progressive methods that have won them success in America are bringing them large business abroad. They are making big headway in England, Ireland, Australia, South Africa, and in every foreign country where paint can be used to advantage. The products of the company include everything good in paints and varnishes, except artists' colors.

The Cooper Oven Thermometer

The First, Best and only thermometer ever used on stove oven doors which is of any real value to those who do baking. This is no loose advertising talk, but statements easily verified by facts.

FULL-SIZED CUT OF DIAL.

Many of them have been in constant use thirteen years, and many thousands of them from eight to ten years. Used by over forty manufacturers of the highest-grade ranges in the U.S. and Canada.

Since the use of the Cooper Thermometer has shown the necessity for such an instrument on oven doors, within the past five or six years there have been some half dozen devices put on the market called oven thermometers.

They do not deserve to be so-called.

Their bad working is depopularizing the NAME of oven thermometer with the public, who do not understand the difference between them and a good one.

Fortunately, unlike a watch, their value can easily be known by their faces.

Twenty degrees difference in the temperature of an oven is sufficient to make "good luck" or "bad luck" in baking many kinds of food.

Unless an oven thermometer will plainly indicate such change, by a movement of the hand SUFFICIENT to be EASILY SEEN, such thermometer is positively worthless, by which to regulate the fire and heat of an oven. An attempt to use them for that purpose only produces disappointment and disgust, more or less of which attaches to the stove on which they are used. Between normal temperature, and extreme baking heat, there is a difference of 325 to 400 degrees. If for such a change of temperature, the whole movement of the hand of an oven thermometer is only two or three inches, it is plain that with a change of 20, 30 or even 40 degrees the movement of the hand would be too slight to be noticed by those who usually do baking, at least without a magnifying glass, which is not commonly used in a kitchen. The hand on the Cooper thermometer moves over six inches with such change of temperature, PLAINLY shows a difference of 8 or 10 degrees in the heat of the oven, and even 2 degrees can easily be seen, by a slight knock on the oven door.

Next to good working, DURABILITY is the most valuable quality in an oven thermometer. Thirteen years of satisfactory working is a very good record for the Cooper thermometer. Not being obliged to increase the radius of the hand in order to give it sufficient movement to be noticed, the dial on the Cooper thermometer is only as large as is necessary to be plainly seen by those using it, thereby making the danger of breaking much less than if it had a larger diameter. Those who use them do not say they "Do not think an oven thermometer amounts to much, anyway." The most common expressions of those who use the Cooper thermometer is, "I would not TRY to keep house without my oven thermometer," or "I don't know how I ever got along without it."

It is easily adjusted to either a swing or drop door, and is the best selling point ever put on a stove or range. However highly it is praised by the seller, it is more than verified when used. Do not buy a worthless article because it can be bought for a few cents less. It is sure to be far more costly in the end. An honest TILE is preferable to a "make-believe" oven thermometer.

The price of the Cooper thermometer is very low indeed, when cost and VALUE are considered.

Every thermometer carefully adjusted, and tested by heat, before sending out.

MANUFACTURED AND SOLD BY THE INVENTOR,

D. G. COOPER, - PEQUABUCK, CONN.

MANITOBA MARKETS.

Winnipeg, Man., September 29, 1902.

TRADE is still active and jobbers complain that in many lines, more particularly heavy hardware, deliveries are slow and factories do not seem to be able to keep up to the requirements of the trade.

Winnipeg has pretty well made up its mind that it will have to do without anthracite coal this winter, and people with grates only suitable to hard coal are beginning to arrange for grates that will burn bituminous coal. The wood supply is short at present, but there is plenty of wood cut in the woods, and within a week after the first sleighing comes there will be an abundance. There is a good supply of American soft coal and plenty of Galt coal, so that there is no doubt Winnipeg will keep warm this winter in spite of strikes.

Sportsmen's goods are still in active demand. All classes of building hardware are being called for steadily.

Machinery men are just about winding up sales for the season, and with the beginning of October they will settle down to the business of getting in collections. There has been a very fair fall trade in both plows and wagons. There would, no doubt, have been more demand for plows if farm help had been more plentiful; as it is all hands have been concentrated on threshing and stacking, so that to a considerable extent fall plowing has been neglected.

ADVICE TO EMPLOYERS.

NEARLY all of the retail merchants began their business careers as clerks, and for this reason they should better appreciate how to assimilate the services of those employed by them in the business of selling goods, says Trade.

Occasionally a man who has risen from the position of clerk to proprietor is inclined to undervalue the usefulness of his employes, forgetting that to depend upon himself alone to do all the thinking is as great a mistake as if he were to undertake to perform all the details of the store.

With reasonable encouragement the clerks will supply the employer with many bright ideas that will give value to the business. It can readily be supposed that the clerks, if they may be made to understand that their suggestions are appreciated, will take more interest than if held off at arm's length.

The proprietor cannot see everything As a rule he cannot do more than exercise a general supervision, but among his assistants will be found material for the originating of winning business schemes and he will be an unwise man who does not invite and welcome the co-operation of his assistants. Give the clerks a chance and their interest will be made apparent.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, October 3, 1902.

HARDWARE.

THE demand for hardware during the past week has kept up very well, and all fall lines are in active movement. Some cutting is reported in one or two metals, but it is confined to very narrow limits. The effect of the lack of coal is not yet visible as regards the business doing in hardware; but some jobbers are anticipating higher prices should coal rise higher in price and thus increase the cost of production. On the other hand, most of the mills have contracted for their supply and feel no anxiety. One mill, which uses hard coal, has been unable to fill some orders.

BARB WIRE.—Trade is dull. We quote $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—There is not much doing this week and quotations are unchanged. We now quote as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—In annealed hay wire there are still some orders being received. Otherwise the market is not active, and our quotations now are as follows: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb., are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FENCE WIRE.—There is but a small amount of business doing in this line. The discount is 25 per cent., with net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c.; ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—Trade has not improved. The discount on both wires is 62½ per cent.

FENCE STAPLES.—Business in fence staples is of small proportions at present, and no changes in prices is reported. We quote: Galvanized, $3.25 per 100-lb. keg; bright, $2.90 per 100-lb. keg; 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—Considering the season a fair trade is doing. The price of wire nails is $2.55 in small lots and $2.50 in carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a fairly good demand for cut nails still and sales are made on the basis of $2.45 for small lots and $2.37½ for carlots.

HORSE NAILS.—There is no change. A brisk trade is doing. Discounts are: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch," horse nails are discounted at 70 per cent.

HORSESHOES.—The market is still active and prices are unchanged. We quote as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

SCREWS.—The market for screws has not improved, and during the past week business has been somewhat quiet. The discounts are now quoted as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—Trade continues quiet at unchanged prices. Our quotations are as follows: Manila, 15c.; British

"Famous" Oil Heaters

throw out an intense heat from very little fuel and give perfect satisfaction in every way.

Take advantage of the high price of coal to sell these heaters—they are selling like the proverbial "hot-cakes," and every town should have its list of buyers.

Can be easily carried from room to room, and so simple that a child can operate it.

Burns with a clear white flame, makes no odor and throws out an intense heat at a cost of about one cent per hour.

Body is made of Russia iron. Legs, rims and top are heavily nickel-plated.

manila, 13c.; sisal, 12½c. lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ½c. in carload lots.

RIVETS AND BURRS.—These are moving out rather slowly at present and the market is without any special feature. We quote the discounts as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—A few orders are being received, but nothing special is doing. The discounts are quoted as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—In this line there is some business of a jobbing nature doing. Prices are steady and unchanged. Our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—There is nothing doing. The price remains at $1.37½ per 100 square feet.

POULTRY NETTING.—Business in this article is slow and the discounts are unchanged, Canadian or English netting being discounted at 50 and 10 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used.

HARVEST TOOLS.—The discount for future delivery is 60 and 10 per cent. Freight will be equalized for 1903 to London, Hamilton, Toronto, Ottawa, Montreal, Sherbrooke and Quebec.

FIREBRICKS.—These are going as usual with no quotable change to report. We quote: English, $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—There is no change to report. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—These continue in brisk movement at unchanged prices, and shells are quoted as follows: Empty: Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded "Trap," 30 per cent.; American, 30 per cent.; "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per

Canadian Distributing Agents for Grippin's Crack Filler.

cent. Primers, Dominion, 30 per cent. ; American, $1.60 per 1,000.

SNOW SHOVELS.—The demand continues heavy and no quotable change has been made. We quote: "Habitant," $2.25 to $2.40 ; "Victor," 30 per cent. off ; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—The market is quite active, though the volume of business is not up to that of last year at this time. The discounts are quoted as follows : No. 70, 38½ to 40c. per dozen ; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60 82½ to 90c.; No. 65, $1.37½ to $1.45 ; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21 ; No. 9, $1.52 ; No. 11, $1.82.

METALS.

Lower prices are quoted by some dealers on the local market for Canada plates, 52 and 60-sheets. The general list of metals are firm in price and a good movement is reported in most lines. The English market for tinplates has been steadier during the past week and no further declines are reported. Former discounts on soil pipe and fittings were cancelled on September 30, and new discounts made. The local market has been lacking in quotable changes during the week, prices in almost all lines being steady and unchanged.

SOIL PIPE AND FITTINGS.—The new discounts on these are as follows : Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Nothing new is reported on this market, which is still very firm under a heavy movement. We quote : $18.50 to $19 for Canadian and $21.50 to $22 for Summerlee.

BAR IRON.—The demand keeps up and prices are well maintained. We quote : Merchants' bar, $1.95 to $2 and horseshoe, $2.20.

BLACK SHEETS.—There is a fair demand for these at unchanged prices. We quote as follows : 28 gauge, $2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is fairly active, but without any new feature. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15 ; Comet, $4.25 ; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

INGOT COPPER.—There is not much doing. The price is 13½c.

INGOT TIN.—Straits tin is still quoted on this market at 30 to 31c. A moderate amount of business is doing.

PIG LEAD.—There is no change, and we still quote $3.25.

LEAD PIPE.—This is in fair demand. The price of composition and waste is 8c. and ordinary, 7c. Discount, 37½ per cent.

IRON PIPE.—Business in this line is fair. No quotable change is reported. Our quotations are as follows : Standard pipe per 100 feet, in lengths under 19 feet : Black, ¼, $2.40 ; ⅜, $2.65 ; ½, $2.85 ; ¾, $3.65 ; 1-in., $5.20 ; 1¼, $7.35 ; 1½, $8.95 ; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45 ; ½, $3.85 ; ¾, $5 ; 1-in., $7.20 ; 1¼, $10.05 ; 1½, $12.20 ; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, ½, $4.20 ; ¾, $5.25 ; 1-in., $7.55 ; 1¼, $10.55 ; 1½, $12.75 ; 2-in., $17.60. Galvanized, ½. $5.20 ; ¾, $6.65 ; 1-in., $9.55 ; 1¼, $13.25 ; 1½, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—The price of tinplates remains at $4.75 to $5.25 for charcoals and $4.25 for cokes. The demand is moderate, and no particular feature characterizes this market.

STEEL.—This moves along fairly well at unchanged prices : Sleighshoe, $2.05 : tire, $2.20 ; bar, $2.05 ; spring, $2.85 ; reeled machinery, $2.75 ; toecalk, $2.70.

CANADA PLATES.—Owing to the large arrivals one or two houses are offering special prices on these, namely : $2.50 for 52's and $2.60 for 60's. Other houses have not changed prices and are quoting as follows : 52's, $2.70 to $2.80 ; 60's, $2.85 to $2.90 ; 75's, $2.80 to $2.85 ; full polished, $3.75 and galvanized, $4.25 to $4.35 ; galvanized, 60's, $4.45 to $4.55.

SHEET STEEL.—No change has been made in the price of sheet steel. We quote as follows : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—No further changes in prices are reported this week. The market is still rather quiet. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade ; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c. ; "Air Hardening," 45 to 60c.

TERNE PLATES.—The demand for this metal is light and the price is still $7.50.

COIL CHAIN.—There is not much doing in this line. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.: ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—This is moving slowly and the market has developed no new phase. The price is $5.85.

ANTIMONY.—The demand has not improved. We quote 10c.

ZINC SPELTER.—In this a slightly better movement is reported. The price is 5c.

SOLDER.—Both bar and wire solder are in good demand, the former selling at 20c. and the latter at 18c.

PAINTS AND OILS.

The feature of the week's paint and oil market is the advance of 2c. in turpentine, and decline of 3c. in linseed oil, making the former now 72c. for single barrels and the latter 75c. for boiled. At the advanced prices turpentine is still strong and it is expected that the present figures will be well maintained. Linseed oil is easy. Supplies are comparatively abundant, and the new crop of seed has, no doubt, affected the market. Some cutting is reported in putty, 5 per cent being allowed off for small lots. In the general list of paints and oils there is a fairly good movement. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 72c.; boiled, 75c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 72c.; 2 to 4 barrels, 71c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

THE POPULAR CEILINGS

FOR PRACTICAL PEOPLE

We claim that our Metallic Ceilings and Walls are the very best style interior finish made.

Sanitary—artistic—fireproof—exceedingly durable and capable of an immense amount of variety in coloring and effect.

These are goods that satisfy all buyers. No imperfections—no stinting of quality—highest grade materials and workmanship throughout.

Do you think you're wise if you don't carry them in stock?

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

No quotable change has occurred this week. The market continues somewhat quiet, copper and brass being dull. We quote: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6½c. per lb.

GLASS.

There is no change. Trade is very quiet, except for a few small orders for immediate delivery. Quotations are as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There is a fair demand for hides and a moderate amount of business is doing. We quote: No. 1 hides, 10c.; No. 2, 9c.; No. 3, 8c. Calfskins, 10 to 12c.; lambskins, 50c.

MARKET NOTES.

Linseed oil is 3c. lower.

Turpentine has advanced 2c.

Light soil pipe has been advanced.

ONTARIO MARKETS.

Toronto, October 3, 1902.

HARDWARE.

THERE has been a general improvement in the demand for all lines of hardware for the fall trade this week. Though not large, the orders that are coming forward are well assorted and are particularly numerous for guns and ammunition, stoves and ranges, and the fall lines of tinware. Builders' hardware also continues active, and a great many harvest tools are going out, the activity in these being due to the fact that the impression has gained ground amongst the trade that the reduction noted last week will be only temporary and that the articles in a short time will go back to their former prices, if not higher. Saddlery hardware has been active this week, and dealers have now nearly all been supplied with their sleigh bells and horse blankets for the season's business. No changes have occurred in prices during the week.

BARB WIRE.—A little business has been doing in this wire this week, principally in small lots. We quote $2.65 in carlots and $2.77½ in less quantities f.o.b. Cleveland. From stock, Toronto, the price is $3.

GALVANIZED WIRE.—There is nothing doing in this line. We quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—Quite a demand keeps up for this article and the prices are unchanged. The discount is 25 per cent.

SMOOTH STEEL WIRE.—No business of any account is being done in this line. We quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c. and tin-

ning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—There is a considerable quantity of these going out in small lots. We now quote $2.50 in carlots and in less quantities, $2.55. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—A fair number of orders keep coming forward for cut nails. The prices are unchanged at $2.45 per keg and $2.37½ in carlots.

HORSE NAILS.—This market continues active, but the manufacturers are still able to keep up with their orders. Discounts are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—These are still in good demand and the prices are firm and unchanged. The manufacturers are still abreast of their orders. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—An active market is still reported in this line and jobbers are in about the same situation in regard to stocks as they were last week. Discounts are now: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—Trade in these is limited to the capacity of the manufacturers to fill their orders, and prices are firmly maintained. Discounts are as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The manufacturers of bolts and nuts have been a little freer in their deliveries and consequently a little more of these has gone out during the week. Quotations are now as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—These are still in good demand at unchanged prices. The discount is 40 and 5 per cent.

ROPE.—Business is of a light nature, and prices are unchanged. We quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11½c.; double, 12c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—The market is active this week. A large number of retailers are taking advantage of the decline in price noted last week to lay in supplies of harvest tools before the expected advance takes place. The discount is 60 to 60 and 10 per cent.

EAVETROUGHING, ETC.—Trade in eavetroughing still keeps up well, though it has not been as active this week as the week before.

BUILDING PAPER.—Quite a few orders keep coming in for building paper. We quote: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—The fall lines of tinware are much in demand. Enamelled ware is moderately active.

STOVES, RANGES, ETC.—A good business is reported in these and prices are firmly maintained.

SPORTING GOODS.—There is still a good call this week for sporting goods and numbers of orders are being forwarded all over the Dominion, from the Atlantic to the Pacific.

CEMENT.—The situation is unchanged from last week. The inquiry continues active and the factories are filled with orders, but are behind in their deliveries. We quote: Canadian Portland, $2.40 to $3 and Canadian hydraulic, $1.35 up per barrel.

METALS.

A good demand has kept up for metals, generally, during the week and quite a quantity of galvanized iron and Canada plates have been moving out. There is still a scarcity in bar iron, some sizes being very hard to obtain. The tin and copper markets abroad are dull and the prices are weak. Iron and steel in the United States are moderately active under light buying. The American Sheet Steel Company has reduced the price of 28 gauge sheets, box annealed one pass cold rolled, in 500-bundle lots, to $2.75 f.o.b. Pittsburg, and for galvanized at 75 and 7½ per cent. off. This is a cut of $5 per ton and has astonished the trade, being entirely unlooked for.

PIG IRON.—The local market is active, the demand being heavy and prices firm. Prices at the furnaces are nominal at $23 for No. 1 and $22.50 for No. 2. Scotch iron is quoted at $22 on track, Toronto.

STEEL BOILER PLATES.—There is a good call for these this week at unchanged prices. We quote $1.80 in carlots on track, Toronto.

STEEL RAILS.—These are still quoted at $30 per ton for steam railways and $36 for electric railways.

TOOL STEEL.—Business keeps up well. Our quotations are now as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—Trade in this line continues steady.

SPRING STEEL.—A good market is reported.

BOILER TUBES.—The volume of business is fair and the prices are unchanged.

BAR IRON.—Jobbers and handlers of bar iron generally, here, have been experiencing a scarcity of the article for some time past, particularly in some sizes which have been practically impossible to obtain. We quote: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—Business is still active at unchanged prices. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are active and the prices are firm. Some sizes are scarce. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10, and all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—Trade is good and prices are steady and unchanged. We quote as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 guage; Gordon Crown, $4.50 for 28 gauge.

TIN.—This metal is not very active. The outside markets are still weak. We quote $32 to $33 per 100 lb.

TINPLATES.—A fair trade is reported doing. We quote: Charcoal, $4.75 to $5 per box and cokes, $4.25.

COPPER.—A moderate demand continues for copper. We quote: Ingot copper, $13.50 per 100 lb and sheet copper, $22 to $23.

BRASS.—Trade is quiet. The discount is 15 per cent.

PIG LEAD.—A good inquiry continues for this metal. We quote: Pig lead, $3.50 and bar, $3.75.

IRON PIPE.—A good business is doing at unchanged prices. We quote per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—A moderate demand keeps up for this metal at unchanged prices. We quote 5 to 6c. per lb.

ZINC SHEETS.—A fairly active market is reported. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—Trade is solder is moderate in volume.

ANTIMONY.—A fair amount of business is doing. The price is $9.50 per 100 pounds.

PAINTS AND OILS.

The market has been brisk this week. Turpentine has advanced in the Southern market. Locally no change has been made since last week. In linseed oil there has been a decline of several cents. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genui.e, 7½ to 8c.

WHITE ZINC.—Gen.iine, French V.M., in casks, $6 to $6.25; Lehigh, in cgsks, $6.00.

SHINGLE STAIN.—In 5-gallon lots, 60c. to $1 per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY.—Bladders, in barrels, $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1 10 per gallon.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 74c.; boiled, 75c.; 3 to 5 barrels, raw, 71c.; boiled, 74c.; 6 to 9 barrels, raw, 69c.; boiled, 72c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 73c.; 2 to 4 bbls., 72c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 18¾c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

GLASS.

Business shows a decided improvement. Prices are steady and unchanged. We quote: Under 26 inch, $4.45; 26 to 40 in., $4.75; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71

to 80 in., $6.25; 81 to 85 in., 87; 86 to 90 in., 87.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 40 per cent.

OLD MATERIAL.

The market is brisk. Copper continues weak. Zinc has advanced to 3c. Wrought iron, owing to a slightly congested market, has dropped 50c. Our quotations are now as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c. to 8½c. per lb.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5c to 5½c.; lead, 2¼ to 2½c.; scrap zinc, 3c.; iron, No. 1 wrought, $11.50 per net ton; No. 2 wrought, $5.50; machinery cast scrap, $13 to $14; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 5 to 5½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—These, so far, remain unchanged, but owing to the great decline which took place in Chicago and the United States markets last week, a corresponding change is expected here. We quote: No. 1 green, 8½c.; No. 2 green, 7½c.; No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, 8½ to 9c. per lb.

SKINS.—Prices are practically the same though business is weak. We quote: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings, and lambskins, 50 to 55c.

WOOL.—This is very quiet and the quotations are unchanged. We quote as follows: Fleece wool, 13½c. and unwashed, 7½c. per lb.

TALLOW.—Prices are low. We quote 6¾ to 7c. per lb.

SEEDS.

The movement in alsike is still very moderate, while no red clover is offered. We quote: Alsike, $6 to $7 and timothy, $1.50 to $1.75.

COAL.

During eleven days soft coal has more than doubled in price, and it is almost impossible to obtain at $12. During the past week bituminous coal has advanced $2.50. We quote: Unwashed nut coal, $7 and Onio lump coal, $8.

PETROLEUM.

The demand continues good. The prices are slightly lower than last week. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); Americam water white, 17 to 17½c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16c. to 16½c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

A LITTLE NONSENSE.

A young merchant has a charming wife. The wife's mother fell sick, and the doctor was sent for, and he said to her husband, "Your mother-in law is in a very serious condition, she must go to a warmer climate!" The son in law made a rush downstairs and brought up the axe, and gave it to the doctor, and said in a trembling voice that shook with emotion, "Doctor, here, you do it—I have not got the heart to do it myself."

AN IRON TRADE ROMANCE.

ABOUT the middle of the 18th century a strolling minstrel, who had his domicile midway between Dudley and Stourbridge, was familiarly known as "Foley the Fiddler." He was looked upon as rather a "daft" youth, but he was clever with his fiddle, and amused the workers in the iron forges of the district by playing for them during their meal times, thus relieving the monotony of labor's weary round.

He would appear to have been fairly observant, and among other matters which attracted his attention was the immense labor and loss of time caused by the primitive method of dividing the bars of iron into rods so as to adapt them for the use of the nailmakers.

A great sensation was caused about the year 1780 by the announcement that bars ready split into rods by some cheap mechanical process were being made in Sweden, and were being brought into the Black Country at a price which even local producers could not even "look at." The new iron from Sweden began to arrive in large quantities, and the local trade began proportionately to decline. The ironworkers were put to short time, and there were dismal forebodings among them as they loitered at the street corners of Dudley and Stourbridge.

Foley the Fiddler was a keen though silent listener to all these words of despondency and despair. He gathered that in the far-away land of Sweden there was what seemed to him a magical method of spliting bar iron into rods, which was kept a profound secret. No stranger or foreigner was allowed to enter the Swedish iron works, and so the secret was well preserved.

"But," said Foley to himself, "the secret must be found out or the Staffordshire rod trade will be ruined." The fiddler was suddenly missed from his accustomed haunts, and had gone no one knew whither. He fiddled his way to Hull, got employment on a vessel sailing for Sweden, and presented himself as a wandering minstrel at one of the slitting mills. The workmen liked his music, and he was admitted to the works with a hearty welcome.

But while Foley was fiddling as for dear life he kept a sharp eye on the slitting machines and their method of work. He was allowed at night to repose in a warm corner of the forge, and while the ironworkers were laboring on, he, unobserved, made rude drawings of the machines on odd bits of paper. He was not a gifted mechanic, but a sense of the vast importance of the work he had undertaken inspired him to such a degree that in a few weeks he had some notion of the methods of the slitting machines, and, bidding his new-made friends adieu, he fiddled his way back to port, worked his passage to Hull, and fiddled his way to Stourbtidge, where he found the state of affairs in the iron trade more desperate than ever. Foley's return, as mysterious as his going, was the theme of gossip in Dudley and Stourbridge for the proverbial nine days, but when it became rumored that he had been to Sweden and had found out the secret of the slitting mills, there were shrieks of incredulous merriment at the expense of the "daft" fiddler.

One local ironmaster, whose trade had well nigh left him, and who, like a drowning swimmer, was ready to "catch at straws," took Foley the Fiddler into his confidence, and heard all the story of his strange adventures. He examined the rude drawings of the slitting machine, and boldly resolved to have one made as an experiment. It was a slow and costly undertaking, and Foley watched its development day by day with anxious care. At length it was finished, and a goodly crowd of ironfolk from Dudley and Stourbridge assembled on the day appointed for its trial start. It was a curious looking machine, but ingenious enough, and, amid much excitement and suspense, steam was applied to it, and there was a sudden and impetuous moving of the wheels, and then a full stop. The machine had one radical defect. It would not work. There were shouts of derision, amid which Foley the Fiddler slunk away.

Once more Foley fiddled and worked his way to Sweden, and were not the ironmakers glad to see him once more, their long-lost minstrel! He played for them brighter and gayer tunes than ever, and one night he gave a crescendo of wonderful power, for he had discovered, after long hours of watching, the one thing needful to make his slitting machine a success. He came back to Stourbridge, had the old machine replaced with an essential addition, and success was the result—a success which redeemed from ruin an important branch of the Staffordshire iron trade, and which founded the fortunes of the notable family of the Foleys.—Hardwareman.

Sealed tenders, addressed to the undersigned, and endorsed "Tenders for Heating Public Building, Port Colborne, Ont.," will be received at this office until Thursday, October 9th, inclusive, for a hot-water heating apparatus at the Port Colborne, Ont., Public Building.

Plans and specifications can be seen and form of tender obtained on application to Wm. Armstrong, Caretaker, Port Colborne, and at the Department of Public Works, Ottawa.

Persons tendering are notified that tenders will not be considered unless made on the form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order.

FRED GELINAS, Secretary.

Department of Public Works,
Ottawa, 25th Sept., 1902.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

OCT 11 1902
RETURNED

Good Features.

Our hot water boiler has a host of good features about it. It's so constructed as to give constant satisfaction to the householder (is made without bolts or packing). Each section is an independent heater. It's called

"ECONOMY"

and is well named.

Write for Particulars and a New Booklet on Water Heating.

HEATING AND PLUMBING

BUILDING PERMITS ISSUED.

TORONTO.

THE following building permits have been granted during the week by the City Commissioner, Toronto: R. Smith, two-storey brick-detached dwelling, No. 39 Albany ave., $2,500; Andrew Nelson, two-storey and attic brick pair semi-detached dwellings, at 303-305 Manning ave., $5,000; George M. Rose, two-storey and attic brick dwelling, Albany ave., $2,000; John Dunlop, two-storey and attic brick, three attached dwellings, Givens street, $4,600; G. G. Woodley, pair semi-detached dwellings, two-storey and attic, 165-167 Avenue Road, $7,500; J. S. Sercombe, two-storey brick front and roughcast and frame dwelling, Yonge street, $1,300; Harold Davies, two-storey and attic brick and stone dwelling, 102 Spadina Road, $3,000; Weston & Spink, two-storey stone, brick and iron bakery, corner of Soho and Phoebe streets, $3,500; Jos. Booth, two-storey roughcast and brick dwelling, 540 Ossington ave., $1,000; John and Harry Alexander, pair semi-detached two-storey brick dwellings, Nos. 170-172 Delaware ave., $4,000; Mrs. Mary Philipps, pair semi-detached two-storey and attic brick dwellings, Dupont street, $3,000; A. Horton, pair semi-detached two-storey and attic brick dwellings, Nos. 92 and 94 Howard street, $6,500; B. Macdonald, one-storey brick dwelling, 575 Jarvis street, $1,200; J. D. Graham, two-storey and attic brick and stone dwelling, 240 Dufferin street, $5,000; Thos. Wright, three-storey brick and stone dwelling, 21 Chicora ave., $2,800.

OTTAWA.

During the past week twelve building permits, of an aggregate value of over $30,000, have been issued in Ottawa. The list is as follows: J. H. Holbrook, for a brick-veneered dwelling, First avenue, $1,600; Holbrook and Sutherland, two solid brick dwellings, Waverley street, $4,500; James M. Taylor, solid brick double dwelling, Patterson avenue, $2,300; Provost Brothers, iron-clad addition to store, Clarence street, $275; Mrs. James Shaw, double brick-veneered dwelling, on Somerset street, $3,000; Mrs. H. Heath, brick-veneered dwelling, Gilmour street, $2,000; O. Pommerville, brick-veneered dwelling, James street, $2,200; Dr. McArthur, stone and brick dwelling, Somerset street, $5,800; Felix McCullough, brick and stone dwelling, Stewart street, $3,800; Dey Brothers, iron-clad skating rink, Gladstone avenue, $3,500; Thomas Dean, frame dwelling, Cambridge street, $800; Wm. E. Harris, frame dwelling, McKay street, $600.

BUILDING NOTES.

D. G. Loomis & Sons, Sherbrooke, Que., have just been awarded a large contract from The Canadian Pacific Railway Company for the building of the company's new shops in Montreal, and the amount of the contract is about $100,000. The work will be commenced at once and has to be finished by next April. An office will be opened immediately in Montreal by Loomis & Sons, when the work will be rushed forward as fast as possible.

PLUMBING AND HEATING CONTRACTS.

Purdy & Mansell have secured the contract for heating the International Hotel, Windsor.

The heating and plumbing of the new Parkdale post office is to be supplied by Keith & Fitzsimmons.

J. E. & C. McDonnell, of Hensall, have secured the plumbing and steam fitting contract in the addition to the Gunn Hospital at Clinton.

The contract for heating the new factory of The Christie, Brown Co., Limited, has been secured by The John Ritchie Co., Limited.

The plumbing, steamfitting, lighting, etc., of the additional building erected by The American Cereal Co., in Peterboro', is being furnished by Purdy & Mansell, of Adelaide street, Toronto.

Guest & Co. are now installed in their new premises at 102 Church street. During the past week they have supplied the premises of A. Bollard and also Oak Hall with Lumo gas lighting.

Hamilton & Stott, of St. Thomas, have received two more contracts, the contract for vacuum system of steam heating in Thomas' Bros.' factory and the contract for plumbing for Wesley Norsworthy, Margaret street.

T. A. McLean Manufacturing Co., of Charlottetown, P.E.I., have secured the contract for the heating and plumbing for Richard Grant's new house on Water street; also Edward Kelly's residence, Southport.

J. Hurst, Toronto, has secured the contract for furnishing the plumbing for the dwelling of Mr. Snuggs, 119 Pape ave.; also of making extensive alterations in the houses of John Croft, York and Richmond streets.

PLUMBING NOTES

The master plumbers of Toronto met last Wednesday in Pythian Hall, and transacted routine business.

BUILDING OPERATIONS IN VANCOUVER.

THE value of buildings now in course of erection in Vancouver aggregates more that at any time in the history of the city, according to The Province. The cost of the new Hotel Vancouver and of the many brick structures on Granville atreet alone will run into hundreds of thousands of dollars. Substantial business houses and blocks are rapidly increasing the extent of the business of Vancouver, and hundreds of mechanics and laborers are being employed to bring these buildings to completion.

Only two weeks ago R. B. Johnston, Howe & Co., closed the sale of two lots in the business portion of the town on which some of the finest business structures in the town will probably be erected.

The Chinese firm of Wing Sang & Co. have a large building in process of erection on Dupont and Carrall streets, which, on the latter street, will have five stores. All modern arrangements, such as baths, heating and lighting, etc., will be introduced.

The excavation for a large department store, that of The Woodward Company, Limited, has been commenced. This building will be four storeys in height and will have a frontage of 132 feet on Abbot street. The total floor space of this building will be 46,548 feet, or about 3,500 feet more than an acre. The building will be either of stone or pressed brick. Mr. Whiteway is the contractor.

NEW HOTEL FOR WINNIPEG.

It is rumored that a syndicate of American capitalists have decided to erect a mammoth hotel in Winnipeg. These gentlemen have thoroughly investigated the question of hotel accommodation in Winnipeg and have found that it is insufficient to supply the transients who pass through that city. Several hotel keepers, indeed, are increasing their capacity, but, nevertheless, really first-class hotel accommodation is limited.

ONTARIO PLUMBERS' CONVENTION.

Notices of the semi-annual meeting of the Ontario Association of Master Plumbers, Gas, Steam and Hot-water Fitters have been issued this week by Mr. Meredith, secretary of the Association. The meeting has been arranged to take place in the Pythian Hall, Toronto, on October 16 (Thanksgiving Day), this date being chosen that the delegates from outside points in the Province might take advantage of the low rates granted for the holiday by the railroads.

Business of importance, of interest and of profit will be brought before the delegates, furthering of organization work will be discussed, reports of delegates to National Association will be presented.

All master plumbers throughout the Province are requested to attend this convention.

PAINT FOR THE FARMER'S BARN.

Now there is a season of Fall painting after the crop, and it's a good stroke of business to induce your farmer customers to go at it. Don't offer him the expensive house paints for his barns and roofs; it's not necessary, and most likely you wouldn't get the business. Tell him of **RAMSAYS OUTSIDE PAINTS** for just such work, sell them at $1.00 per gal. and make a handsome profit for yourself.

A. RAMSAY & SON, MONTREAL. ESTD. 1842. **PAINT MAKERS.**

MANUFACTURERS AND THEIR SELLING METHODS.

By "CANADIAN TRADE."

GOD in His providence has made bountiful provision for the wants of every living creature. With advancement in civilization has come increased requirements and desires for better surroundings.

He has so placed the provision to meet our wants, that investigation and intelligent work are necessary to obtain them. All things have a beginning. It is from the small that the larger is developed. It is this process of development that has called into existence the manufacturer from the humble handworkers, etc., of the various trades to the large manufactory well equipped with machinery. The manufacturer has to obtain materials from other sources, either from the mine, forest, soil or animal kingdom, so only forms a link in the chain of providing for the public wants.

Farmers, when living close to centres of population, can, and do market many of their products. I have noticed that the most shiftless farmer and his better-half come, as a rule, oftenest to the market, thereby neglecting duties at home. Accidents happen; cattle get into and destroy a grain field, etc., in their absence. His neighbor who stays at home and looks after the daily requirements conducts his farm to obtain the best results. When he goes to market it is with a full load, and while there he contracts to sell what he has for sale.

The point I wish to make is that the manufacturer can market his own goods directly to the customer in a limited way, but that he would obtain better results by giving attention to the improvement of his methods of manufacturing and more largely leave the question of distribution to the wholesaler and retailer.

The head of a large manufacturing concern, unsolicited, recently made the statement to me that a wholesale jobber could market goods cheaper than a manufacturer. The jobber collects his goods from many sources, and offers a larger variety to his customers. The retailer can get from one source a larger variety of goods, which is often quite a saving in freight and trips to the station for goods. It makes fewer accounts for the retailer to look after, and to provide for the payments in remitting, etc. In Eastern Ontario competition between manufacturers and jobbers divides up accounts, and is largely accountable for the pressure to book orders long in advance of the season for which they are required. The result is often that a dealer carries, when he can ill-afford to do so, stock from one season to another, with the probability of it deteriorating in value in so doing, both by lying around and from preventing newer and more desirable goods taking their place. Jobbers could afford to handle lines on smaller margins if they had not to divide up the trade with the manufacturer. Competition between jobbers would regulate prices. On the other hand, manufacturers having the selling of the goods off their hands, the expense of disposing of them could go towards reducing price and enabling them to meet competition. Some manufacturers have recognized this and have a fixed price at which goods will be sold to the retail trade, and provision made for the cancelling of commission allowed the jobber if he breaks prices.

AN INCIDENT IN THE LIFE OF A WESTERN TRAVELLER.

Samuel Vila, representing James Turner & Co., in the Northwest, sends them a photo showing how they cross rivers in Alberta in flood time. He also writes the following re the photo:

Mr. Vila's dangerous journey, while the "boys" are waiting to see if he will drop in.

"I am mailing you a small photo taken by one of my friends on our famous hand-car trip from Nanton to Calgary in July last. It shows the railway bridge across Sheep Creek, the only method of crossing this creek, the traffic bridge having been washed out. We left our hand-car from Nanton there, and secured another, as the section foreman positively refused to ride or run across by pushing it or to allow us to do so.

"The photo does not enable one to realize what bad shape the approach to the bridge was in. You can see how the superstructure is sinking on the right-hand side of the photo. The main current and force of the river left its old bed under the bridge and washed out all the approach, so that where I am in the middle is the lowest part of a practical but unintentional suspension bridge, all hanging merely by the fastenings (fish plates) from one rail to the other, the ties being suspended from the rails by the spikes. The reason one had to hang onto the rail as illustrated was that owing to the ties being old and spongy, and every once and a while, as you will see by vacancies, as soon as one was stepped on it would drop (15 feet) into the river, and the only way of saving yourself was to hang onto the rail."

WHY SOME MEN GO WRONG.

ANOTHER young man in the employ of the U. S. Government at Minneapolis post office has gone wrong. He has been opening letters to obtain the money they contained, and after doing it for a long time without detection, he has at last been found out. He had grown bold as well as hardened in his course, so that when decoy letters were arranged to come under his hand, he took the bait and was caught in the trap. This is what the public finds out at first publication.

Behind the scenes there is a longer story to tell. The temptation to do wrong came many times before the first really criminal act had been committed. It was very repulsive to even think of such a thing, and it never ought to have been thought of again. But the seeds of dishonesty were somewhere in the soil of that mind. There was not the instinctive uprising of a "Thou shalt not" when evil suggestions came. The start was wrong.

But every young man should view this and similar cases in a correct light, or many a one "who thinketh he standeth" may fall. The actual breach of strict honesty was committed when the young man decided he would be willing to commit the deed if he thought he would not be found out. The tempter gained a great advantage when the question of right and wrong was waived. Anyone who would commit a crime or a wrong if without the restraint of fear, is ready to cultivate a fearless spirit and take the chances.

If there is right and wrong, honesty and dishonesty, integrity and lack of principle, then there is but one safe position to occupy. One must conscientiously decide what is wrong, and stand for the right, whatever the circumstances. In this case there was no question. The act committed was a very grave crime, and its consequences will inevitably be very disastrous. But sometimes we must make up our minds where the question is not so easy to decide, and when conscience indicates the path to evil, we must count evil and danger as synonymous.—Eli, in The Commercial Bulletin.

W. C. Grant, blacksmith, Westboro', Ont., has added groceries.

Corbeille & Lamarre, painters, of St. Henri de Montreal, have registered.

Gillean & McLean, hardware merchants, London, Ont., are closing up business.

H. Elsworth, general merchant, of Corinth, Ont., is closing out business.

J. McNeil, general merchant, Arcola, N.W.T., has sold out to H. C. Hamelin.

H. C. Hamelin, general merchant, of Lander, Man., has sold out to W. Hopkins.

B. J. Smith, general merchant, Didsbury, N.W.T., has sold out to Cooper Bros.

Cruise Bros. & Ritchie, sawmillers, of Emo, Ont., have sold out to G. E. Campbell & Co.

Joseph Dupuis & Co., wood, coal and grain merchants, St. Henri de Montreal, have registered.

Jean Claustie, general merchant, Maple Creek, N.W.T., has sold out to Williamson & Fleming.

R. J. Hiscox, general merchant, Teeswater, Ont., has sold his millinery stock to Burgess & Bastendorff.

R. H. Scott, agricultural implement agent, Methven, N.W.T., has sold out to Nasmith & McNaughton.

G. H. Hasenflug, general merchant, of Teeswater, Ont., has sold his millinery stock to Burgess & Bastendorff.

Mann & Ewing, general merchants, of Teeswater, Ont., have sold their millinery stock to Burgess & Bastendorff.

FIRES.

Chas. Lanning, general merchant, of Dexter, Ont., was burned out.

J. E. Langlois, general merchant, The Brook, Ont., was burned out; insured.

J. Fred Williamson, machinist, St. John, N.B., was burned out; insurance, $1,800.

S. Marks, general merchant, Fernie, B.C., was partially burned out; insured.

The premises of Beaupre & Fils, foundrymen, Montreal, were damaged by fire; insured.

Simon Dragon, general merchant, of Fernie, B.C., has sustained loss by fire; partially insured.

DEATHS.

Donald Fraser, blacksmith, St. Thomas, Ont., is dead.

James Costello, general merchant, of Bridenell, Ont., is dead.

Enos C. Locke, general merchant, of Lockeport, N.S., is dead.

James Morris, of the estate of Theresa A. Morris, carriagemaker, Bowmanville, Ont., is dead.

Malcolm McDonald, partner of McDonald & Westaway, general merchants, Prince Edward Island, is dead.

"TERSE TANK TALKS."

A neat, well-gotten-up booklet containing a great many truths pertaining to the economical and convenient storage and handling of coal oil and gasoline is published by S. F. Bowser & Co., Fort Wayne, Indiana, under the title above given. Anyone interested in handling oil at a profit will do well to write this firm for their little booklet, which they will send postpaid free of charge.

SPECIAL TO THE TRADE

Every Fall, **immediately** before the winter railway freight rates are in force, we receive a large number of orders to be shipped "at summer rates." Even with an extra staff is is sometimes difficult to do this, because the teams available cannot haul away fast enough.

Our Friends will be better served if they will kindly forward their requisition at once and thus avoid the inevitable congestion which invariably occurs if orders are kept back. Every department is working full time and stocks are complete.

Orders to be shipped by boat should be in our hands not later than the 15th of October.

(PATENTED)

is boxed for counter display.

No other Can Opener has a blade like this, and none other works so quickly, cleanly and safely. We also make the **"SPRAGUE"** style. Send for catalogue.

Address—

The P R. Cumming Manufacturing Co., Limited, 90 Richmond St. East TORONTO

BLAST FURNACES PURCHASED.

THE entire plant and water-power, as well as mining lands and woods of the Londonderry Iron Co., at Acadia Mines, N.S., has been purchased by a syndicate composed of Geo. E. Drummond, Thos. J. Drummond, Jas. T. McCall, Lieut.-Col. Fred Henshaw and Edgar McDougall, all of Montreal, and Chas. W. Brega, of Chicago, who will shortly begin to overhaul and develop the property.

Up to about five years ago these furnaces and mills were operated by the Londonderry Iron Co., which concern, however, went into liquidation, throwing about 500 hands out of employment. For three years past, Drummond, McCall & Co., of Montreal, have manufactured pipe and castings at these mills, but the rest of the plant remained idle.

In some respects the plant is rather out of date, and it is understood the purchasers will immediately set about putting it in proper shape to compete with other modern plants. Some rebuilding may be necessary, and Mr. T. J. Drummond will superintend this and whatever new buildings may be necessary. The plant will be brought up to date in every respect, and pig iron and castings will be manufactured. The mines, from which the very best grade of iron was formerly obtained, will also be operated, and altogether it is expected that some 800 hands will be employed. The market in the Maritime Provinces is one of the best, and being easily accessible from Acadia Mines, the new company is confident that they can readily dispose of their product.

"CROWN HURON" STOVES.

The new stove manufacturing concern, the Western Foundry Co., Limited, Wingham, Ont., began active operations on September 23, when the first lot of iron was melted and the first stove was on view at the Wingham Fair the following Friday. The company will for the present make a specialty of ranges, in which some attractive designs are shown. A number of orders have been already booked and the company is now in a position to make prompt shipment. The company is distributing to the trade a pretty folder in which are illustrations of their new ranges, which bear the brand "Crown Huron." The firm's announcement will be found on inside back cover of this issue of HARDWARE AND METAL.

A VISITOR FROM THE EAST.

Mr. C. S. Archibald, of The Maritime Nail Co., Limited, and the Portland Rolling Mills, Limited, St. John, N.B., was one of the callers at the Montreal office of HARDWARE AND METAL this week. Mr. Archibald was in Montreal in connection with the meeting of the nail manufacturers on Thursday. He speaks highly of the industrial progress of the Maritime Provinces, particularly of the rapid strides which the iron industry is taking. His own company, the Portland Rolling Mills, Limited, have had great difficulty in keeping up with their orders; and although the present season is not the most active for nails, the Maritime Nail Co., Limited, are very busy.

GET YOUR SNIPS HERE.

The tinners' snips made by The National Cutlery Co., for which Decatur, Bull & Co. are agents, are forged from one piece of steel and a shear steel plate, of special quality, welded on the entire cutting edge and face, making their tinners' snips the only steel ride snips on the market. Hardened in water, and tempered by a patented method, they make a tinners' snip of excellent quality. Ask for catalogue. See their patent wire-cutting tinners' snips, put up in separate packets each pair.

INDUSTRIES OF BRITISH COLUMBIA.

The 15th annual report of the Vancouver Board of Trade is to hand. The condition and progress of each of the growing industries of the Province of British Columbia is thoroughly and comprehensively reviewed. As is to be expected, the greater part of the report deals with the rapidly-increasing mining and shipping industries, and the members of the Board of Trade show themselves keenly alive to all the industrial interests of the Province. The report is diversified by magnificent scenes depicting various features of the industrial life of this picturesque Province.

A VALUABLE CONNECTION.

Advertising might suitably be called "connection"—that is a connection between the things you have to sell and the people who ought to have them. A railroad train must necessarily have couplers with which to connect its cars. The engine drawing the train does not depend upon the couplers for its locomotion, yet without these couplers the train would be useless for the carrying of passengers. The head of the firm is the "engine" and the advertising the "coupler"—both are absolutely essential to draw trade. Good advertising aimed at the kind of people who require the advertising connection pays. A politician derives invaluable benefit from the prominence he receives through newspapers. A business house must also keep its name and goods constantly before the public notice to obtain proper recognition from the buying public. Advertising does it. It is the connection.

COPPER AT BENNETT.

A report from Arthabaskaville, Que., states that a miner who has been exploring in that vicinity has opened up some mines near the villege of Bennett. Some of the quartz taken out was sent to a Montreal assayer, who pronounced it to contain good copper, as well as valuable chromic iron ore.

CURRENT MARKET QUOTATIONS.

October 3, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

Announcement

RETURNED
NOV 18 1902

We desire to announce to our friends throughout the Stove and Hardware trade, that we are now able to assure prompt shipment of our **"Crown Huron"** line of Ranges.

In offering this, our **medium-priced** line, first, we do so, positive in the belief that we are filling a long-felt want amongst the stove trade—that of a **High-Class Range at a medium price**—and that we are placing before them the best value in this respect ever offered in Canada.

Our knowledge of Range-manufacturing covers years of practical experience, and all our efforts will be centred on this one branch of the business.

Our Plant and Patterns are entirely new, the Patterns being of the most modern and approved design and embracing everything that is new in Range construction up to the present.

Soliciting a sample order to convince you of the superiority of our Range over all others.

BOOKLET COMING— if you'll ask for a copy with trade discount.

The Rubber Belt is the Thresher Belt.

Other belts have had their waves of popularity, generally on account of price, but the threshers have invariably returned to Rubber.

WHY?

1. **BECAUSE** the rubber belt stands the weather.
2. **BECAUSE** the rubber belt adjusts itself best to the pulleys.
3. **BECAUSE** the rubber belt does not expand and contract with change of temperature, consequently the engine has not to be re-set when once properly placed.
4. **BECAUSE** the rubber belt is made for the thresher use and will best stand the work.
5. **BECAUSE** the rubber belt is honest in length. If you buy 100 ft. Endless, you do not get 97 ft.

Contracts are placed with us by all the large engine and seperator manufacturers.

WHY? WHY? WHY?

You take no chances

in buying all you use of Brass and Copper Sheets, Tubes, Rod and Wire from us. Everything is in your favor. Complete stock carried at our New York warehouse—our Mill at Waterbury for special gauges, sizes, etc. Connected with a private wire. Prompt delivery is a potent factor in any business, but in the hardware business it becomes an absolute necessity to the success of the enterprise. The dealer who is content to wait a week for his supply when it can be shipped the same day order is received is the same fellow who is always wondering how in time the other fellows make a living. Procrastination, pessimism, egotism, dry rot, creditors and sheriff—that's the rotation, but not if you get the "Waterbury habit."

SPECULATION AND ITS DANGERS.

ON account of the funds that are demanded for the movement of the crops in Canada and the United States, the money market has become much firmer during the past month. The effect this has had upon the speculative market is the most striking feature of the situation, the hardness of money having greatly moderated the bull movement.

This is not an unmixed evil. For some months the speculative fever in stocks has been rampant, and business men and their clerks have been as much affected by it as anyone. Many who were hitherto satisfied to make money by ordinary business methods now look askance at them. Years of labor are altogether too tedious for fortune-making. It must be accomplished by days, or at least weeks, of speculation. Many have made their fortunes during the past few months. And not a few have lost them within the last couple of weeks.

Periods of exciting speculation always produce their periods of reaction. In fact, they have within themselves the seeds of their own dissolution.

Speculation as ordinarily practised is always a dangerous thing. Many a good man has gone wrong and wrecked his own future, to say nothing of the friends he has disgraced by indulgence in it.

At the very moment in Toronto a trusted Government official, and one who has hitherto been highly respected, not only on account of his own qualities, but because of the excellent family with which he is connected, is under suspension because of alleged misappropriation of large sums of public money. How much only months of audit can determine. Rumor says it is $40,000. To speculation is attributed his unfortunate position.

And not only Government officials, but Ministers of the Crown have been and are plunging deeply into the speculative market. One Minister, we are informed, has over $700,000 invested at the moment.

Wealth is a good thing. Without it the natural industries of the country would lie to a great extent undeveloped and business enterprises would lack their chief motive power. But essaying to get wealth suddenly via the speculative market is about as dangerous as undertaking to suddenly generate steam in a boiler that is unfitted for the process.

WEAK LINSEED OIL MARKET.

LINSEED OIL is characterized at present by a decided weakness. The centre of the weakness is Chicago, but the Canadian market is naturally sympathetic. In Toronto, prices were reduced 2c. a gallon on Saturday.

The linseed oil market is usually somewhat irregular at this time of the year, on account of the uncertainty that prevails in regard to the crop of seed. The price of seed is now about 45c. lower than it was last spring.

It is estimated that the yield of seed in the United States this season will be about 25,000,000 bushels, which is larger than usual. Last year it was 22,000,000 bushels. The consumption of seed in the United States is about 20,000,000 bushels.

Another disturbing element, as far as the United States is concerned, is the fact that competition has reached an acute stage, the crushing capactity of the country being beyond its needs.

While in the flax-seed districts of Canada the yield is fairly good, it is said, as we pointed out in a previous issue, the percentage of oil produced therefrom is not as high as usual.

COUNTERFEIT BILLS.

A number of counterfeit Bank of Montreal and Molsons $5 bills have been found in circulation in Montreal. Some of them have the appearance of having been some time in use, this appearance doubtless being given to them on purpose by much handling in order to make the deception more complete. But they can be detected easily by the numbering.

The $5 bills issued by the Bank of Montreal are numbered in each series up to 300000. The counterfeit bills are numbered from 900000. Any bill bearing the number over 300000 is not one of those sent out by the bank. In the Molsons Bank bill the date is July 2, 1901, and the series number 214258B.

OIL AS A SUBSTITUTE FOR COAL.

WITH the present deplorable and alarming shortage in the coal supply of this continent, anxious manufacturers, merchants and housekeepers who hitherto have been entirely dependent on coal for fuel have been turning their attention to possible substitutes for this all-important substance. Naturally oil in its numerous varieties and grades has been suggested to supply the want.

Notwithstanding the apparent facility with which one would suppose oil could be employed for heating purposes, there are a few difficulties in the way of its successful use. No really practicable, economic method of utilizing regular fuel oil for domestic purposes has yet been discovered and, judging from the amount of time, thought and labor which have been expended on practically unsuccessful inventions, many people are led to suppose that, unless there came a call of dire necessity for such a contrivance, there never will be one invented.

Apart from this aspect of the case altogether, there is still another way of viewing the matter. Even granted that houses were provided with contrivances for heating by means of fuel oil, there would first be the unpleasantness and difficulty of handling the oil, which would make its use obnoxious to many. And, in the second place, under existing circumstances, the supply of fuel oil would not be sufficient.

Fuel oil is a heavy dark substance, which, as has been stated, is used, to a certain extent, by some industries in this country, such as The Massey-Harris Co., The Kemp Co., and The Canadian General Electric Co. Where intense heat is required for welding, it serves its purpose admirably, but, for general purposes, it is less economical than coal or the other fuels. The most practicable way in which it is used is by means of a double tube contrivance, one tube enclosed within the other. The oil passes down through the centre tube of funnel shape, while steam is forced through the surrounding tube. Ignited at the mouth of the tube, an intense flame bursts out, generating a great heat, which is spread out by the steam.

When it comes down to the practical question of house-heating, the best that as yet can be offered is the small coal oil stove, which has been so perfected that it is now a fairly useful appliance. These stoves can be used to heat single rooms or to take the chill off a room before the furnace is lighted. They are low-priced, selling from $4 up, and the coal oil burned in them can, at present, be purchased at 15c. a gallon and upwards. Steady burning uses up probably a gallon in 10 hours. As for the supply of coal oil, there is sufficient to meet all moderate demands, but, necessarily, if it were sought to use it generally as a substitute for coal, and a large demand arose, there would not be enough to supply the needs of the people. So great has been the demand for these coal oil stoves that at present there is difficulty being experienced in procuring a supply.

Down in Texas vast quantities of admirable fuel oil have been exploited within the past few years, and, owing to the plentiful supply, the oil can be secured at a very low figure. It has been applied with entire success to the running of engines and steamboats, and, because it is found close to the seaboard, its exportation to foreign countries has been perfectly feasible. The oil is burned by means of the same contrivance as that previously described. Unfortunately, owing to the cost of carriage from Texas to Canada, the importation of this fuel oil into this country has been rendered impracticable.

It is really only within the last few years that any attention has been paid to the subject of liquid fuel by engineers on this continent. This was owing to the fact that it was practically unobtainable in sufficient quantities to warrant its use for general purposes. However, the discovery of new and plentiful oil fields gave inventors the necessary impetus to set their brains working towards practical ends. So far three forms of apparatus have been attempted with a fair measure of success.

The first kind has the recommendation of simplicity and noislessness as its good points, but there are certain imperfections in its mechanism which hinder its economic working to some extent. In it the oil is discharged under a high pressure into what is termed the burner. This contrivance breaks the oil up into small particles, which will burn at the firing point of the fuel. By carefully lining the furnace with non-conducting material the greatest efficiency of working is obtained, for the furnace temperature has to be raised sufficiently to vaporize the greater portion of the oil before it is burned.

The second-class of apparatus is that already described in this article. It has so far proved the most successful method of utilizing the oil. To repeat, the oil is sent into the retort along with a spray of steam or air, which serves to ignite the particles of the oil. A mechanism for adjusting the supply of both components renders the apparatus useful for various qualities of oil. The most important drawback is that the supply tube may become clogged with particles of carbon. Such a result is due to the composition of the oil. Hydrogen and carbon are the chief components of all oils, but the proportions vary. Consequently the degree of heat to induce vaporization also varies and at certain temperatures there is a liability of the solid carbon forming.

In the third scheme, which by the way was first attempted as far back as 1867, the liquid fuel is introduced in the form of a vapor. This may be accomplished by heating the oil in a boiler and conveying its vapor to the furnace. Here, again, it is usual to find the retort becoming rapidly coated with carbon. Theoretically, the last scheme is the best, but as yet no very successful use of it has been made.

Marine engineers are looking to fuel oil as a solution of many difficult problems. When every little detail counts in making speed or saving room, there seems to be some use in at least experimenting along the lines of liquid fuel. Experiments are at the moment being made by the British and United States Admiralty boats. There would be a decided reduction in bunker space were oil substituted for coal and at least 50 per cent. reduction in the stokehold staff. In addition, there would be increased cleanliness, an absence of smoke, a reduction of temperature in the stokehold, an increased life of the boilers and an improved performance of the engines, owing to a greater regularity in the heat supply. All these considerations the engineers put forward as possible results of the proposed substitution.

OPINIONS REGARDING THE C.I.F. DEFINITION.

FOR three weeks a question of some importance to hardware importers has been discussed in the correspondence column of HARDWARE AND METAL. The question involves the interpretation of the commercial expression c.i.f. To obtain expert evidence on this point HARDWARE AND METAL has secured brief, pointed opinions from leading men of business in Toronto. The names of these men have been withheld at their own special request, but readers must not imagine, because of this, that the men are not competent authorities. One gentleman is at the head of one of the largest insurance companies in Canada. Another is an important grain merchant, a third is the solicitor of a transportation company, and others are the heads of large businesses.

THE CASE.

The Canada Hardware Company of Montreal, after receiving written prices, c.i.f. Montreal, from Mr. Gerald Lomer, agent for Suren, Hartmann & Co., of London, England, signed a contract for goods. The goods arrived in a rusty and unsalable condition. The Canada Hardware Company claim that, because the goods were not insured to cover such loss, the shippers are responsible. On the other hand, Mr. Lomer claims that the contract only called for ordinary insurance, and that therefore his firm are not liable. The difficulty evidently centres about the meaning of the expression c.i.f. and especially affects the insurance part of the contract.

C. I. F. DEFINED.

By a Prominent Grain Merchant.

C. I. F. — cost, insurance freight. It simply means that if I sell goods c.i.f. Liverpool, that the delivery under the contract takes place where the shipment is actually made and the invoice rendered. As soon as the goods leave my hands they are in the possession of the consignee, and, because he has signed the contract, losses in transit, if there be any, must be borne by him.

COMMON SENSE APPLIED.

By a Wholesale Hardwareman.

I am not in a position to cite the law on this question, for I have never experienced anything like it. I would simply apply common sense to it, if I were asked for an opinion. I should say that when prices on goods are quoted c.i f. the shipper is bound to cover these goods with the amount and kind of insurance that it is customary to place on them. Different goods are insured differently, and in every case the shipper ought to see that the general custom is followed. Then the consignee cannot hold him responsible for losses.

C.I.F. ABANDONED.

By a Wholesale Grocer.

I think the shipper ought to be responsible until the goods are actually in the hands of the purchaser, but, from a long experience of similar cases, I don't think the shipper can be touched here. We used to do a lot of purchasing c.i.f., but we had so much trouble with the insurance men at the other end, who would never pay any attention to us, that we do everything now c. and f., and have a regular local insurance man look after that side of it.

Notice To Advertisers.

Thursday next being Thanksgiving Day the forms of HARDWARE AND METAL will go to press one day earlier than usual for the issue of October 18.

Will advertisers please note that all new copy and changes must be in our hands on **TUESDAY, 14** inst? We cannot guarantee to change advertisements after that date.

THE PUBLISHERS.

THE INSURANCE CONTRACT.

By J. L. W., Toronto

A c.i.f. contract imposes only the responsibility on the shipper, so far as insurance is concerned, of providing for the account of the buyer the usual form of insurance by which the goods purchased are ordinarily covered at the place from which they are exported, and when such insurance is provided, and the goods placed on board the steamer, the responsibility of the shipper ceases and any claim for damage is a matter between the importer and the underwriters. In expressing the above opinion I am assuming that the importer gave no special instructions nor the seller any special undertaking with regard to any particular form of insurance.

A LEGAL OPINION.

By a Member of the Bar.

Upon a sale of goods, the property in the thing sold passes to the purchaser as soon as the goods are shipped to him by the vendor, and if a loss occurs during the transitas the loss falls upon the purchaser. In the case put, as an additional safeguard against loss, the purchaser requires the vendor to insure the goods as well as pay the freight to Montreal from London for the benefit of the purchaser. If the insurance so effected in accordance with the contract of purchase does not cover the loss sustained it, would seem that the purchaser has no further recourse against the vendor and that the latter is not liable.

THE INSURANCE ASPECT.

By an Insurance Expert.

The ordinary insurance is F.P.A. Any other insurance must be the subject of a special contract. So far as appears in this case, the purchaser made no special stipulation for any kind of insurance, and, the matter being one of negotiation between the parties, vendor and purchaser, the vendor seems to have carried out his contract by placing on the goods the usual kind of insurance. If the purchaser has not stipulated for the special kind of insurance covering the loss complained of, he must take the consequence.

VIEWS OF THE TRADE.

Interest in the c.i.f. question is gradually increasing, and our columns are at the disposal of our readers for its further discussion.

THE DEFINITION OF C.I.F.

The following has been received by HARDWARE AND METAL from W. L. Haldimand & Son, manufacturers' agents, Montreal:

"Complying with your request for our opinion as to what constitutes 'c.i.f.,' we beg to say that we understand this to mean 'cost, insurance and freight' to destination, and that, where no special conditions to the contrary are made in the contract, the insurance should cover all risks."

FAILURES FOR NINE MONTHS.

According to Bradstreet's, Canadian failures for the first nine months of 1902 numbered 851, a decrease of 18 per cent. from last year, while liabilities aggregated only $6,300,413, a decrease of 35 per cent. from last year.

Meader & Co., general merchants, Hazel Cliff, N.W.T., have sold out to McLaughlin & Rawson.

MANUFACTURERS AND DEPARTMENT STORES.

THE IRON AGE publishes correspondence directing attention to the injustice and disadvantage of manufacturers giving jobbers' prices to department stores who are only retailers. The correspondence is quoted :

To the Editor : A subject that will bear attention from the Hardware Dealers' Association is the matter of manufacturers selling direct to department stores, and in many cases giving these retail houses closer prices than are quoted to the small jobber. To be sure, these large retailers will often take quantities of goods in a specified time that no small jobber would undertake to handle, and have unquestionably a greater outlet than has any ordinary retail hardware store.

The manufacturer who sells regular trade-marked goods to the department stores, at prices lower than the retail hardwareman could buy same goods from a jobber, will find in time that his only customers will be the department stores and his entire trade on a very cheap class of goods.

It is useless to say, however, that the department store which has opened a hardware department shall not be recognized, or that the jobber or manufacturer shall not furnish these stores with goods. They will procure goods for which there is a demand, and having such selling capacities they are factors in the trade and must be recognized as such. But the manufacturer should not sell these retailers at lower prices than he quotes other retail houses, and if his policy has been to sell only the jobbing trade that policy should not be broken in the case of the department stores.

Much injury has been done all branches of the hardware business by manufacturers who have been willing to take business from these department stores at lower prices than the same goods are being sold other retailers. In all our larger city dailies advertisements can be often seen of the department stores offering lawn mowers, hammers, oil stoves, carpenters' tools, garden tools and perhaps mechanics' fine tools of well-known trade-mark and brand at extremely low prices, and lower than any retail hardware merchant can afford to sell them ; and in some cases, perhaps, at lower prices than he is buying. The large circulation of the daily newspaper throughout the country and even rural districts, giving great publicity to these advertisements, has the tendency, therefore, of breaking the price on such goods, not only in the immediate city trade, but through the country round about generally.

It is almost impossible for the hardware merchant to successfully meet these prices. In some cases he endeavors to do so, but in any case he is placed between the dunes and the deep sea. If he fails to meet the price his trade is gone, and if he endeavors to sell at the same price his profits are gone.

The hardware merchant will naturally stop selling brands of goods on which he sees no profit, and thus the demands through the regular channels will be cut off and the manufacturer will have only the department store trade. Finally, these stores, too, will drop his goods when they find other brands being pushed and advertised by the hardwaremen. Thus it is clearly for the manufacturer's own interests to protect his trade-marks and to sell department stores, if he is determined to have this trade, at such figures that they will be obliged to maintain fair retail prices on his goods.

I.

HOW SUCCESS CAME TO ONE MAN

NOT very many years ago, according to an exchange, D. H. Church was an itinerant watchmaker—a very good workman to be sure, but just a plain artisan. Of a roving nature, he left the east, where he was born half a century ago, and sought fortune in the West.

His bent was for mechanics ; he liked to tinker with machines. In St. Paul he met a watchmaker named Gridley, from who he learned his trade. While working at his bench one day Gridley stopped to examine a watch Church had been at work on.

"Is that the best you can do ?" he asked.

"Mavbe I might do a little better," replied Church.

"Then, young man," said Gridley, "you just begin and do it all over again, and remember this : Never leave a piece of work until you have done the best you know how to do."

The great watchmaker says that he began to achieve success from that day. He has always done his best.

Leaving St. Paul he drifted about the West, working at his trade. He wanted to travel and found a place with a watch company as an "advance agent" for its make of watches.

He was to travel through the West ahead of the sales agent, proclaiming the praises of their wares. After four weeks on the road he went back to the Chicago office and turned in the watches he was carrying.

"Here's your truck," he said to the manager. "I am tired of trying to make other folks believe things about these watches that I don't believe myself."

"Could you make any better watches?" asked the manager, jokingly.

"If I couldn't I wouldn't call myself a watchmaker."

"I'll take you at your word. I'll set you to work in the shops to see what you can do."

That was 20 years ago. Mr. Church had not been long in the factory before it was found that he was a rare genius. He told his employers that their watches cost too much to make. They were spending too much for raw material and their wage account was extravagant.

"Give me a free hand in this factory," he said, "and I'll save you money."

So Mr. Church was made mechanical superintendent of the works and told to go ahead and do whatever he liked.

He saw that men were performing purely mechanical operations that might better be done by machines, which could work more rapidly and more accurately.

He set himself to the task of devising the wonderful automatons that have made him the first watchmaker in America, if not in the world. Mr. Church is constantly at work making more wonderful machines, and more than 150 watchmaking machines bear his name and the stamp of his genius.

So rapidly does he work that the machine shop where his tools are made is five years behind his designs.

A LITTLE NONSENSE.

Mary had a little dog,
Its fleece was black and tan,
She tied it to her bicycle,
And by her side it ran.
One day while humming down a hill
A tom cat crossed the way.
! ! ! ! ! !
Mary's in the hospital,
The wheel is sold, they say.

• • •

"Our company, sir," said the salesman keen,
"Has perfected a noiseless typewriting machine,
And no other house has done it."
The victim, he cackled in counterfeit glee,
"But say, can they furnish us, friend," said he,
"With a noiseless girl to run it ?"

PIG IRON IN CANADA.

THE American Iron and Steel Association has received direct from the manufacturers the statistics of the production of pig iron in Canada in the first six months of 1902. The figures show a slight increase as compared with the last half of 1901, but a very great increase as compared with the first half of that year.

In the first six months of 1902 the production of all kinds of pig iron in the whole of the Dominion amounted to 157,804 gross tons, as compared with 149,952 tons in the last half of 1901 and 95,024 tons in the first half of the year. The increase in the first half of 1902 over the last half of 1901 was 7,852 tons, or over 5 per cent., while the increase over the first half of 1901 was 62,780 tons, or over 66 per cent. Of the total production in the first half of 1902, 12,000 tons were Bessemer and low phosphorus and 57,209 tons were basic pig iron. The coke furnaces made 147,892 tons and the charcoal furnaces 9,912 tons. Neither spiegeleisen nor ferromanganese has been made in Canada for several years.

The unsold iron held by Canadian pig iron manufacturers on June 30, 1902, none of which was intended for their own consumption, amounted to 37,721 gross tons, as compared with 59,472 tons on December 31, 1901, and 28,711 tons on June 30, 1901. Of the unsold iron on hand on June 30, 1902, less than 2,000 tons were made with charcoal, the remainder being coke iron.

On June 30, 1902, Canada had 14 completed blast furnaces, of which eight were in blast and six were idle. Of this total nine were equipped to use coke for fuel, four to use charcoal and one to use mixed charcoal and coke.

MINING DEVELOPMENT IN ONTARIO.

"In value of yearly output the minerals and mineral products of Ontario are but little behind the produce of the forest." This is the claim asserted in the report of the Bureau of Mines for Ontario, which has just been published. Last year witnessed a considerable development in the mining industry of the Province, especially in the iron, copper and nickel districts. In fact, since 1898, production has increased by 63 per cent. An important element in this increase has been contributed by the pure metallic products, which are now almost equal in value to the non-metallic output, comprising stone, brick, lime, etc.

Of the metalliferous output in 1901, copper amounted to 11 per cent., nickel to 37 per cent., pig iron to 33 per cent., gold to 5 per cent., silver 1.6 per cent., iron ore 3.4 per cent. and steel 6 per cent. Iron and its products comprise about 19 per cent. of the gross mineral production for the year. Nickel and copper mining are also reported to be in a healthy condition, with the output for 1901 the largest yet reached. In fact, in all departments, Ontario mining operations seem to be prospering.

A Helping Hand

If you want a helping hand to aid you to build up a profitable paint business—the best in your locality—write at once for a copy of the "B-13" booklet which describes fully how we help our agents make money out of their paint department.

THE SHERWIN-WILLIAMS AGENCY

has every element of success in it. It means paints and varnishes that never fail to give satisfaction—that build up business on a solid never-yielding foundation. It means advertising helps that will lift you up practically beyond the reach of competition. It means progress and up-to-dateness. It stands for all that is right and best in the paint business.

It will pay you to investigate the truth of these statements. The "B-13" booklet will help you do so. Write for it to-day.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

CANADA CAN CO. CHANGES HANDS

The Dominion Canister Co., Limited, have bought the business of the Canada Can Co., Dundas, Ont., and are moving from the present quarters into more commodious ones. They are arranging their machinery to double the output, so they will have a capacity of between six and seven million cans per annum. They will be ready to start business in the new factory about October 20.

A LESSON IN MATHEMATICS.

What's that, my son? Figures won't lie?

Oh, fudge! I've heard that before.

But you know I'm from Missouri.

Now, my boy, let me see.

We will begin the trouble by supposing two women each owned 30 chickens, which they agreed to sell and divide the proceeds share and share alike.

Behold! A peddler appears upon the stage of action.

He buys one woman's poultry at the rate $1 for two chickens, which makes $15 for her 30 egg-offsprings.

The other woman's chickens are less valuable, so the peddler takes her collection at the rate of $1 for three chicks, or $10 for the 30, making a total of $25 for the entire crowd of 60 chickens.

Now comes the division of the spoils. How much does each woman get on the split-up.

Twelve fifty, you say?

That looks all right on the face of the returns, but—

Let us see some more.

The first woman sold 30 chickens at the rate of two for $1. The second woman disposed of 30 chickens at the rate of three for $1. That makes a grand total of 60 chickens at the rate of five for $2, does it not?

Well, 5 into 60 goes 12 times—and 12 times $2 is $24—the sum received for the 60 chickens.

Therefore each woman quits the game with $12 in her fist.

Yet, my son, you say figures do not lie.

Then what became of that other $1. Eh?

FREIGHT RATES ON PAPER TO OTTAWA.

Editor HARDWARE AND METAL, — I noticed a reply by a member of the Tarred Paper Manufacturers' Association to "Wanderer's" letter of September 20, in which he says that Ottawa has not been a point of delivery since June 2 last, and that, under the circumstances, if he is unable to sell the above goods in Ottawa and surrounding country it must be from lack of enterprise, and not that he is discriminated against in any way in the matter of freights.

I would like to ask that gentleman, now that the price of paper is fixed by the manufacturers to the wholesale trade, with a severe penalty if broken, what personal charm or magnetism does he possess, or what logical argument would he use to convince the merchants north and west of Ottawa that it would be to their advantage under present circumstances to buy their paper in Montreal and pay an additional $2 per ton freight?

In the second place, he says that, terms being equal, the orders will naturally go to the nearest point of delivery. Granted that such is the case, should that not be sufficient preference to insure the "infant industry" a fair share of the trade? Does it not seem childish of a business man to expect to retain the double advantage? How long will the Montreal wholesale merchants endure this petty unfairness? I trust they will see that prices and freights are made equal. Grant the Ottawa firm the advantage of their location and the writer will rise or fall by the result.

"INTERESTED PILGRIM."

Arden, Ont., October 6.

CATALOGUES, BOOKLETS, ETC.

SPORTING GOODS.

The Canada Hardware Co., Limited, recently issued a sporting goods catalogue, which in design and completness of detail was both a handsome and very handy book. It has 48 pages, thick coated paper being used, suitable to show off their many excellent cuts to the best advantage. Arms and ammunition form a large part of the book, including smokeless powders, gun implements and gun greases, etc. Toward the back of the book one comes upon hunting coats, canvas vests, shell bags and belts, etc., and the catalogue closes with an array of skates, hockey sticks and other articles that will be in demand from retailers very shortly. The cuts in this catalogue have been very well printed, and can be easily examined. The trade will find this book very useful to order by. Send for one.

The real estate of A. Gagnon & Co., tanners, Victoriaville, Que., is to be sold.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

AMERICAN MACHINE TOOLS.

THE Fairbanks' Company have recently added to their business a machine tool department and have secured the Canadian agencies for a number of well-known American machine tools, as well as handling the output of several Canadian manufacturers.

They have on exhibition in their large warehouse a most complete line of machine tools, both of standard and special types. The accompanying cut represents

Twenty-inch wheel and lever feed square base drill.

one of their 20 inch wheel and lever feed square base drills. This machine has been designed with a view to extreme simplicity and convenience in operation without omitting any vital points found in the most modern tools of this class. The spindles are made of special hammered steel, and have ball bearings for taking up thrust, have quick return, and are counterbalanced ; the bevel gears are large in diameter and cut from the solid; the round table has slots for holding work, and is adjustable on the column by means of a screw-shaft, and can be swung out of position when work is being done on the base. This base plate is of extra weight, accurately planed and provided with T slots for clamping work ; the shifter is so located that the machine can be instantly stopped or started by the foot, thus leaving the hands free to hold the work. Following are the principal dimensions : Distance from face of column to centre of table, 10 inches ; greatest distance from spindle to base plate, 40 inches ; greatest distance from spindle to table, 25 inches ; traverse of spindle, 8½ inches ; end of spindle holds a No. 2 taper ; diameter of round table, 16 inches ; largest size of cone pulley, 8¾ inches ; diameter of driving pulley, 8 inches ; width of cone belts, 2 inches ; width of driving belts, 2¼ inches ; speed of countershaft, 300 revolutions.

A POWERFUL ENGLISH EXPRESS LOCOMOTIVE.

AS in other lines of industries England is wakening up from her conservatism in the matter of locomotive building. Some years ago, says The Scientific American, 1,200 to 1,300 square feet of surface heating was the maximum for an English passenger engine, but now there are thousands of engines in England which have this capacity. The greatest advance in this line has been made by the Great Western Railroad, and the latest engine designed by Mr. Dean, the locomotive superintendent of this railroad company, is the most powerful express locomotive in Great Britain.

Compared with the express engines of the New York Central Railroad, some of which have 3,500 feet of heating surface, the capacity of this engine is small, but for an English road the 2,410 square feet of heating surface of this engine is unprecedented. The engine is of the ten-wheeled, six-coupled, outside-connected type. The driving wheels are 80½ inches in diameter, and the loads on the wheels are equalized. The cylinders have a stroke of no less than 30 inches for a diameter of 18 inches. Both steam ports and exhaust ports have a circumference of 20½ inches, the width of the steam ports being 1⅞ and of the exhaust ports, 2 7-16 inches. The barrel of the boiler varies in outside diameter from 4 feet 10⅞ inches to 5 feet, the length of the barrel being 11 feet 8 inches. The outer dimensions of the firebox are : Height, 6 feet 6⅝ inches and 5 feet and ⅝ inch ; breadth, 5 feet 6⅛ inches and length, 9 feet. There are 287 2-inch tubes with a length of 14 feet 11⅞ inches. The area of the grate is 27.62 square feet. The working pressure is 200 lb. to the square inch, and the tractive force is 21,731 lb.

ELECTRICAL AND MACHINERY NOTES.

A 50 horse-power centre-crank engine was shipped last week by H. W. Petrie, Toronto, to R. G. Canning, Orangeville, Ont.

The Citizens' Water, Gas and Electric Company have installed an electric motor in the office of The Despatch, Strathroy, Ont.

It is rumored that The Canada Foundry Company are about to take over The Northey Machinery Company, but this report is so far unconfirmed.

A battery of four 80 horse-power boilers and a 150 horse-power engine are being shipped to The South River Lumber Company, South River, Ont., by H. W. Petrie, 141-145 Front street, Toronto.

The lack of sufficient threshing machines in Manitoba to turn out the immense quantity of grain handled there this fall is being remedied by a large influx of threshing outfits, with their complete gangs of men, from Dakota.

Mr. Shepherdson, Hillsburg, Ont., who has added a planer, matcher and moulder to his plant, purchased this machinery from H. W. Petrie. This company have also shipped a 50 horse-power centre-crank engine to R. J. Canning, Orangeville, Ont.

The Vancouver Power Company has awarded to The Westinghouse Electrical Company a contract for electrical apparatus necessary to generate 9,000 H.-P. The electricity generated will be used to run the car services in Vancouver and New Westminster.

The Lace and Braid Co. of Toronto Junction have purchased a lighting dynamo from The Kay Electric & Dynamo Co., Queen street east. The latter company has also furnished J. G. Ramsay, photographer, and John Fauclott, of Yonge street, Toronto, with motors.

The directors of The Toronto Railway Company have been authorized by the shareholders to increase the stock from $6,000,000 to $7,000,000. The purpose of this new issue is for development purposes. It is understood that part will be used for the purchase of the Metropolitan Railway, but nothing is mentioned regarding the radial railways or the project of bringing power from Niagara.

LAST WORDS ON POWER PLANT.

By CHARLES H. FITCH.

IN all the developments of power utility the path of least resistance, of greatest usefulness to the greatest number of people, and of greatest economy is in the direction of combination and connection. Whatever improvements may be made, we will never be relieved from the necessity of weighing relative advantages and of sacrificing some advantages that greater advantages may be gained. This is not merely a mechanical but a philosophical condition, and philosophical system is the ultimate apparatus of existence beyond which invention cannot go. When we know that a sacrifice must be made, it is the part of good generalship to make it fearlessly and decisively and get all the advantage that can be gained out of the making.

We must sacrifice isolated plant, individual powers, and reversals. We need not sacrifice the individual will, political integrity, or soul, provided we hold jealously to the law that things common shall be of inalienable access like ground and air. This done, there is but one solution in sight for all our power problems, viz., the wheel and the wire.

The spring and source of any great or radical improvement in steam plant has got to be ideal, and the more simple the idea the better it is worth following out, and the greater prospect is there that it will be found to possess elements of permanence and strength. The rotary ideas in engines, the steam wheels, oclopiles, Barker's mills, whirligigs of various kinds—all these are very ancient. Till recently they have held a place little esteemed among steam engineering details, because all attention has been given to the steam fluid, to conducting and restraining this fluid so that it shall not get away from us without giving up a certain measure of its power. Our resources have been devoted to holding it in until we were ready to use it—slowly.

The rotary idea has had ample use with heavy fluids, in water wheels, sampling machines, and pulp distributors, but in steam service it has bided its time until our mechanical requirements increased in speed until they approached the steam class.

The idea, as the Hindus say of the arch—never sleeps. Soon or late it will press its way. We have in the reciprocating engine the rotary idea mixed with other ideas, but mixed ideas are always weak in the joints, and lack homogeneity like a steel which has hard spots and soft spots and is inferior on both accounts where it might have had advantages on either account solely considered. The reciprocating engine is not designed with reference to moving power as a primary and chief consideration. It is part of a pipe system designed with reference to the enclosure, course and flow of fluids.

As the distinctively dynamic requirement (power or weight at speed) is increased we reach a point where the rotary idea must displace the conduit idea instead of being understudy to those arrangements in which tortuous passages of chest and valveway lead alternately to and from opposite sides of a striking piston. The piston always does strike. It is always a steam hammer, and while we speak of balancing it, this term is somewhat deceptive, seeing that the balance is never accomplished however we may make names and mathematical equations. That a two-ton piston starting and stopping 500 times a minute is dynamic can hardly be gainsaid, but design to suit such power must come to the purely rotary idea.

In a prospectus of forthcoming papers on steam practice by a marine engineer, the last subject named is the steam turbine. There is a significance in this which tells its own story, namely, that the last word in steam practice is the turbine.

The steam turbine cuts off many appendages of steam plant. It disposes of all the arrangements for getting oil into the steam and getting it out again. It lends itself ideally to superheat and condensation. If the small turbine uses 30 to 80 lb. steam per H.-P. we don't have to use little turbines. The large ones with all reasonable advantages taken use, say, 12 lb. When we turn to the steam turbine we turn to magnitude and combination, but in this age no one who would not attempt to stem Niagara will dissent from going this way.

In all invention there comes first the complex design, afterward the simplification. The steam turbine is the simplification in steam plant. It has been long in coming because we have been long in reaching sizes and speeds which demand it, which make it almost necessary. This requirement comes through electric power, but having once gotten used to the turbine, it will be applied in propulsion also. Because it must be close to a bulky steam generator, it will be chiefly a central station machine working with electrical distribution and application.

But is the steam turbine really the last word we may expect to hear in this direction? There is perhaps the gas turbine. There are nebulous possibilities of inductive forces which will demonstrate a power of mind over matter beyond our present horizon. When we reach the horizon on which the turbine looms up we may see further, but it appears now to limit our practical horizon.—Age of Steel.

THE GOODELL-PRATT CO.'S CHUCKS.

The Goodell-Pratt Company's chucks have been many years in use and are acknowledged a most perfectly constructed chuck. No spanner wrench is required with this chuck. It can be tightened and loosened easily without one. The shank or spindle is arranged to receive a stud which, as the shell is turned, forces the jaws forward and tightens the chuck. The three hardened and tempered steel jaws are held apart by separating springs, which draw the jaws back as the chuck is loosened. As there are many ways a chuck can be used, The Goodell-Pratt Company have for years made the chuck portion of their business a separate study and to-day can furnish you with any style of chuck, tap holder, brace shank, cross handle, pin vice or drill chuck; all well finished, strong and accurate. Each chuck is packed in a separate box. Decatur, Bull & Co. are the sole Canadian agents.

A $5,000,000 BRIDGE.

The bridging of the Strait of Canso between Cape Breton and the mainland of Nova Scotia is to be undertaken at once, according to The Acadian, Wolfville. The task is an immense one, involving great engineering difficulties and an outlay of $5,000,000.

J. A. L. Waddell, of Kansas City, has been engaged to oversee the work. He is a Canadian and a graduate of McGill, and has been knighted by the Emperor of Japan, where he was at one time professor of civil engineering in the University of Japan.

Mr. Waddell stated in a recent interview that the bridge would be a cantilever, with a span of 1,800 feet, the longest in the world, and have a height of 58 feet clear above high water. The bridge will span the Strait between Port Hastings on the Cape Breton side and Cape Porcupine on the Nova-Scotian shore, a distance of 2,800 feet. Two immense piers will be sunk near either shore, in about 90 feet of water. The bridge is designed for double tracking. Mr. Waddell stated also that it would be the finest bridge in the world. A tunnel, he said, would be practically impossible. An agreement has been reached between Mr. Waddell and the incorporators authorizing Mr. Waddell to proceed with the work. The construction of this bridge will remove all delays and inconveniences now experienced in crossing this Strait.

SHIPMENTS THROUGH CANADIAN SEAPORTS.

W. S. FISHER, St. John, N.B., in Industrial Advocate.

PERMIT me to elaborate more fully my views in re the resolution on transportation matters offered at the recent Maritime Board of Trade meeting at Sydney. I would say that in my opinion there is no subject of greater importance to Canadians than this, and I hope the matter may be taken up and discussed, especially with reference to the tremendous increase in Canadian trade through American ports.

With the remarkable increase in the volume of imports and exports that has taken place within a few years and with the rapid increase that is now going on in the development of the area of cultivated lands, especially in the Northwest, as well as in the extension of our mining and industrial enterprises, we shall shortly find ourselves face to face with the problem of transporting this vastly increased tonnage through Canadian channels.

Notwithstanding the apparently successful efforts that have been made during the past seven or eight years to divert the imports and exports of Canada from foreign routes to our own, the unfortunate fact remains that we have not by any means accomplished what we should have done; as, while the volume of traffic through Canadian channels has grown, it has not kept pace with the total increase in trade, as evidence of which I submit the following figures as given by the Canadian Statistical Department:

	1897.	1901.	Increase in round figures in four years. Per cent.
Total import and export trade of Canada.....	$257,168,000	$386,903,000	50
Deduct the import and export trade with the U. S. A.....	111,022,000	182,867,000	65
Balance being total oversea trade.....	146,146,000	204,036,000	39
Canadian imports and exports through U.S.A. ports.....	31,983,000	59,793,000	80

It will thus be seen that the oversea imports and exports of Canada through American seaports have increased over 80 per cent. in four years, as compared with a total import and export trade with other countries than the United States of only 39 per cent.

The best authorities seem to agree in feeling that the growing period for Canada is only just getting well under way and that the next ten years will show an increase in our exportable products of at least five fold.

Mr. Robert Meighen, president of The Lake of the Woods Milling Company, on his return from a recent trip to the Northwest, stated that he was bold enough to predict that within five years the Northwest would grow wheat enough to supply the British Empire.

Presuming that to be an extremely optimistic view, it is safe to say that our trade during the next few years is bound to develop enormously, and if our present shipping facilities are so utterly inadequate (as the figures above given would seem to indicate) to handle the present volume of trade, where shall we be if within a few years this is increased to even twice as much? The answer is not hard to find; unless in the meantime every nerve is strained to place our highways, whether on land or sea, in a position to handle this increased traffic.

The effort to do this should include not only provision for fast freight and passenger steamers, but the proper protection and equipment of our waterways, coastlines and harbors, and the placing of these in a position so that the largest traffic may be handled safely, speedily and economically through them.

It seems to me that it would be nothing short of a national calamity if, through any lack on the part of the Government of the country, conditions should arise, or be allowed to exist, whereby the precedence of the St. Lawrence route as the great national highway for Canadian commerce during the season of open navigation should be menaced or jeopardized. With equal force the same remarks apply to the Maritime Province ports where the traffic must be handled during the winter season, and no effort should be spared by the Government and the people of this Dominion whereby the great and growing stream of Canadian trade shall be conserved and kept within the bounds of our own country.

Nothing less than this should be the aim of every Canadian and by this means we can do more to build up national sentiment and remove sectionalism, and make every Canadian feel that no matter whether he is in the east or the west, the interests of the whole country are equally his and that it is each for all and all for each.

Our cousins to the south have shown us an example of this by the protection afforded to everything American. Let us be wise and follow along the lines of advancement which they have adopted under somewhat similar circumstances with such good results.

SOME WHYS.

WHY some merchants will call the same announcement, appearing in their space in the newspaper, day after day, and week after week, advertising, remarks Advertising World.

Why some merchants will have a well-kept stock and store, advertise regularly, changing their ad. frequently, and then employ an impudent, know-it-all clerk, who drives away more trade in one week than the merchant's advertising brings him in two weeks.

Why still other merchants will consider the advisability of employing an ad-writer and fail to supply him with sufficient facts about the business to enable him to prepare decent ads., or insist that the ad. shall be written and printed according to their (the merchant's idea) and then "kick" because the ads. do not pull.

Why some more merchants will not take the time and trouble necessary to have their show windows cleaned once in a while, so as to permit passers-by to tell whether they are selling clothing or snow-shovels.

Why some merchants will expect the advertising which they do a few weeks before the holidays to keep their stores busy for the next ten months.

Why some advertisers will continue to use in their retail ads. meaningless words, like "Hello!" set up in big letters, with the notion that such an ad. need not say anything in particular so long as it attracts people's attention.

Why other advertisers imagine that they can foist any kind of old merchandise upon the public, if they simply add the magic sentence in their ads., "Not in the trust."

Why some advertising firms pay high prices in good pulling mediums, do not more persistently follow up the replies received, with the purpose of turning those replies into orders.

Why otherwise well-managed firms will do clever advertising, use good stationery and printed matter, and then employ some bungling stenographer to typewrite their letters, thus giving their correspondence the appearance of being prepared by a ten-year-old boy.

Why some publishers don't quit telling advertisers the population of the county and State wherein their publications are printed, when questioned about circulations, and come right down to the exact statement of bona fide circulation.

Why some other publishers persist in setting up the ads. in their papers in out-of-date, obsolete, before-the-war type, when the neat, up-to-the-minute kind can be found in every type foundry.

Why a great many other useless and harmful things, too numerous to mention, are indulged in by otherwise rational, prudent and economical business men, seven days in the week, and 52 weeks in the year, when, by the investment of a small amount they can, at least, read a few good trade journals, and reduce to a minimum the inconsistencies in their business.

TO MAKE CLERKS THINK.

IN spite of all the advice, all the instructions, all the preaching, "firing" and rehiring, a clerk without imagination is but a machine, says an exchange.

Until that period of life comes that makes this clerk think—think of business as a business; until he realizes that he is doing for himself, when properly serving others, he remains mediocre at best.

When he begins to plan a business of his own he is breaking the shell that has confined his ideas.

BEGINNING TO PLAN.

He puts himself in the role of employer, and he sees the whys and wherefores that have been drummed into his ears, but which he understood not.

As he buys his stock, in his mind, he realizes that it is very important, not only to get prices, but desirable goods.

As he marks his goods, in his mind, he sees that this is a matter requiring skill and judgment.

When he gets to the point of selling his goods—showing, advertising, talking, etc.—he doubles and trebles in value to his employer.

He has a value because he is successful in building plans.

Some experienced man could advise him so that his failures would be fewer at the start but he would be short the real essential to success after this support is withdrawn.

Having thought out the plan of action for himself he knows what to remedy; he sees the weak points and finally learns to plan accurately and successfully.

WHEN PROMOTION COMES.

Sooner or later his ability is recognized and promotion comes. Here his imaginary experience comes to his assistance, and although he may find himself in a totally new role, he feels at home because he has travelled this road many a time in his mind. He sees things ahead that puzzle him, but when he gets to them they are familiar. He easily disposes of questions that would stagger ordinary clerks.

He is a thinker, a planner, a schemer, or even a dreamer if you like.

After mastering the business in which he is engaged he dreams of other things, things that expressed would cause his friends to laugh at him as a crank, but he plans just the same.

Sooner or later he takes his place among men as a "doer" because of his mastery of detail, and ability to think out the small problems that stick so many men.

VALUE OF HOME TRAINING.

If a boy has had the home training that stimulates thinking the question is practically solved. If, as in the large majority of cases, he has been allowed to drift along without the association and encouragement necessary to form the thinking habit he has doubtlessly formed habits that will hamper his application to business. He is always looking for a chance to get into some other position at a few dollars better salary.

He has no love for his employment; he has no idea of making this occupation his life work.

Suppose he obtains employment in a general store. He goes home and reports to his parents that he "got a job" at Blank's.

The parents will be interested only enough to ask how much salary he is to get. Possibly they will say that they are mighty glad that he is out of the way, or possibly say nothing.

PARENTAL ENCOURAGEMENT.

If the father and mother would ask him what he had done on his return from the first day's work, had him describe his trials and troubles, advised here and sympathized there; painted a word picture showing him a merchant some day, and showed him that this was his beginning, he would have returned to his work next day with renewed interest. Let the parents make this questioning, advice, sympathy and encouragement daily and soon this young mind will awake to the fact that it is not a question of wages, but a question of love for the work.

In a month's time he has thought out the details of his work, and once familiar with these details he does his work well.

Then he takes up the work ahead and thinks it out. If the clerk ahead needs help he is ready, or if a vacancy occurs he steps right in.

THE EMPLOYER'S DUTY.

In the absence of the home environments that will bring out these qualities the employer should assume the responsibility. That this boy has been deprived of the home training is not the boy's fault, and as it is absolutely necessary to get him interested to make him valuable as an employe, this interest should be aroused by assigning him work of a simple nature, explaining to him that he may be a merchant some day and to know all about the business, he must study to see how well he can do this work. Show him that his work is profitable or unprofitable depending on how well he does the work. If an errand boy, show him that the customer served promptly is the customer who comes back, and that he is now one of the firm in a sense, and must do everything to help the store along.

"Mrs. Smith wants this package by 10 o'clock. She is a good customer and we must not disappoint her. You must help us please her by delivering this promptly."

This explains and shows him his importance, and nine out of ten boys will exert themselves under such circumstances.

KEEPING UP THE INTEREST.

Presuming that he executes the errand promptly and returns to the store, a query as to what Mrs. Smith said, and an expression showing appreciation of his promptness will make him eager to do the next thing with all his might.

As with this boy so with the whole force. An expression of appreciation is a tonic that sharpens more wits and excites more interested effort, than the wage question. If more merchants would take time to observe and encourage this interest by kind words and due appreciation many clerks would grow into the business because of their love for it, who now only watch the clock and pay-envelope.

DON'T FLATTER.

Don't make the mistake of "jollying" them.

Some merchants by flattery seek to get more results but lose sight of the fact that this clerk is a reasoning being and will soon see through the mask.

To impress a clerk with the importance of politeness, show him the results of politeness. If he is tired and leans on the counter show him kindly just why it is objectionable.

Don't say, "That counter is nailed down, you needn't hold it down." Cutting remarks of this kind only serve to make the clerk more careful to see that the boss isn't around, but do not make him realize that the offence is objectionable.

The thinking employer makes thinking clerks. Thinking clerks make a store first in the thoughts of the people.

MARKING BLUE PRINTS.

It has become the custom to use a soda solution, using it as ink, and the result is a white line not very different from the print. The soda on the surface of the paper collects dirt and the lines fade and lose their original intensity. The right way is to write your figure in ink—ordinary Carter's or any other fluid that is acid-proof—then take your ruling pen and put a blot of soda over the spot. This whitens the background and turns the ink jet black, and it is done in half the time and twice as nicely as any other way. The white spot is there to stay and the ink will never fade.—The Draftsman.

MANITOBA MARKETS.

Winnipeg, October 4, 1902.

BUSINESS is good, and the lovely weather of the past week has had the effect of stimulating the demand in nearly all lines. Building hardware as well as all lines of shelf goods are selling freely, and in shelf hardware jobbers find difficulty in meeting demands, owing to delay at factory and shortage of cars for shipping. Travellers on the road are sending in heavy orders for both sporting and holiday goods. Household utensils are also being called for in large quantities; in fact, the class of trade being done shows the ability of buyers all over the country to get what they want.

PAINTS, OILS AND GLASS.—The linseed oil mills opened last week and are now in full operation. Flax is coming in slowly, as comparatively little has been threshed as yet, wheat taking precedence of all other crops. The quotations for flaxseed now appear regularly among other markets. The quality of seed offering is exceptionally good. The prices of linseed oil are without change for the week, but it is experted that with the increase of supply prices will be lower within the coming week. Turpentine has advanced in sympathy with the advance in the primary markets, and is now 79c. per gallon for barrel lots and 84c. for less than barrel lots. The demand for paints and glass is good and prices are without change. The stove and fuel question continues to absorb public attention to the exclusion of every other topic. Many are finding it necessary to alter their grates to burn soft coal. There is no hard coal on this market for sale now.

NOTES.

J. Thompson Black & Co., Selkirk, are selling off their hardware business at West Selkirk, and will retire from business. The firm have only been in business a short time, having bought out a bankrupt stock.

INQUIRIES ABOUT CANADIAN TRADE.

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London, Eng.:

1. A London firm having branches at Beira, Port Elizabeth and Cape Town, desires to get into communication with Canadian firms wishing to establish agencies in South Africa for Canadian produce and manufactured goods.

2. A firm in Portsmouth desires to open up business relations with firms in Canada who are exporters of fruits, such as apples, etc. They will undertake sales at a fixed commission.

[The names of the firms making the above inquiries can be obtained upon application to the Editor of HARDWARE AND METAL.]

Messrs. J. Norman Winslow and William C. Watson, of Woodstock, and Robert and George McElroy and Wallace Gibson, of Grafton, have applied for incorporation as the Woodstock Lumbering and Manufacturing Company with a capital stock of $24,000. They will acquire and operate the Grafton steam sawmill and the Woodstock wood-working factory, and 1,000 acres of lumber lands in the parish of Northampton.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, October 10, 1902.

HARDWARE.

SHIPMENTS of hardware of all kinds for the fall and winter trade have been quite heavy this week and the market is active all round. An increasing demand is reported for axes, sales of which have been large during the past week, and repeat orders are quite general. Some jobbers say the coal situation is accountable for this. The discount on "Monarch" brand horsenails has been changed to 65 per cent. off. The price of cut nails in carload lots is 2½c. higher. At the meeting of the nail manufacturers last week in Montreal, no change was made in the base price of any other line.

BARB WIRE.—This, as is usual at this time of the year, is moving but slowly, and the market is uninteresting. The price quoted is $3 per 100-lb. keg f.o.b. Montreal.

GALVANIZED WIRE.—There is no change to report. Prices are the same as those of last week and the demand is light and shows no improvement. Our quotations are now as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Quite a little hay-baling wire has been disposed of this week; this trade has been one of the best this year. In other smooth steel wires there is not much doing, and prices are as follows: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb., are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—Business in fence wire continues very quiet and no change in price has been made. The discount remains at 25 per cent. Net extras are as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is no change to report in these wires. Both are somewhat quiet, and are discounted at 62½ per cent.

FENCE STAPLES.—In staples, a small amount of business has been done in small lots, but the market is still quiet and prices are unchanged. We quote as follows: Galvanized, $3.25 per 100-lb. keg; bright, $2.90 per 100-lb. keg; 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—A moderate amount of business has transpired this week at the prices quoted below. The market, however, is not active. In small lots the price is $2.55 per keg and in carlots, $2.50 per keg f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—No change in the base price of cut nails in less than carlots was made by the manufacturers at their meeting in Montreal last week. In carlots, however, 5c. less is now charged instead of 7½c. less as formerly. This leaves cut nails at $2.45 for small lots and $2.40 for carlots.

HORSE NAILS.—"Monarch" horse nails have been advanced 5 per cent. The market is active, the manufacturers finding it easy to dispose of all their nails. The discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch," 65 per cent.

HORSESHOES.—These continue in active movement, the demand for fall and winter shoes constantly increasing. No quotable changes are reported. We quote as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2

The Cold Snap has Come

and brought people face to face with the immediate need of house heating, while the coal strike continues, and this fuel can hardly be bought at any price.

NOW is the time to push

"Famous" Oil Heaters.

If you are not handling these heaters you are losing business every day.

Place a sample or two in your show room and sales are sure to follow.

From dealers handling them we are receiving repeat orders daily.

and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—There has been no material change in this market. Business is somewhat quiet, though a few small sales have been made. The discounts are quoted as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—The trade in bolts continues quiet and the market is without feature The discounts are quoted as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

SCREWS.—While orders for screws are said to be a little better than last week, this cannot be taken as an indication of any improvement in the trade. Business is still quiet. Discounts are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—There is no quotable change to be reported this week. The market is quiet, but trade is likely to improve some before the close of navigation. We quote: Manila, 15c.; British manila, 13c.; sisal, 12½c. lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ½c. in carload lots.

BUILDING PAPER.—The demand for building paper, though not large, is quite satisfactory for the season, several fair orders having been received this week. In prices there is nothing new to report. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—The market is dull and featureless. The price is $1.37½ per 100 square feet.

POULTRY NETTING.—Trade in poultry netting is very quiet now, and nothing of importance has occurred on the market since our last report. The discounts on Canadian and English netting are: 50 and 10 per cent. off on 2 x 2 mesh, 19 wire and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used.

Canadian Distributing Agents for Grippin's Crack Filler.

HARVEST TOOLS.—There is still very little doing in this market at present. The discount for delivery in 1903 is 60 and 10 per cent.

FIREBRICKS.—Trade is still somewhat quiet, business being entirely of a jobbing nature. Prices are unchanged. English sell at $16 to $22 and Scotch at $17 to $22 per 1,000.

CEMENT.—In cement trade has been improving of late and a fairly good demand is reported this week. The market is steady and prices are unchanged. We quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—Jobbers all report a continued good demand for all lines of sporting goods, guns and ammunition being especially active. Following are the discounts on shells: Empty: Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded "Trap," 30 per cent.; American, 30 per cent.; "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SNOW SHOVELS.—There is a good business doing at unchanged prices. We quote as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—These continue to move out rapidly at unchanged prices, and our quotations are as follows: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

METALS.

On the local market metals of most kinds are moving well and the volume of business, as a result, is fairly large. Some lines, which usually move slowly at this time of the year, tend to bring down the average of sales, but, as a whole, the market is active and firm There is no striking feature to call attention to this week. Nothing has been learned from the English markets during the week and the impression is that metals there are steadier in price than they have been for the past few weeks.

BAR IRON.—Trade in bar iron is fairly good and no quotable change is reported. Merchants' bar sells at $1.95 and horseshoe iron, $2.20.

BLACK SHEETS.—These continue to move out fairly well. There has been nothing new to report in prices and we quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This is in fairly good demand, and our quotations are now as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

SOIL PIPE AND FITTINGS.—There is no change to report in this line, and discounts are quoted as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—The situation in pig iron is entirely unchanged. The inquiry keeps up from all parts of the country, but to contract for immediate delivery is out of the question. We quote: Canadian, $18.50 to $19 and Summerlee, $21.50 to $22 ex-wharf, Montreal.

INGOT COPPER.—There is some scarcity reported on this market at present. The price is 13c.

INGOT TIN.—Nothing of importance has occurred since our last report. A fair trade is doing at 30 to 31c. for Straits.

PIG LEAD.—This is quoted at $3.25. Business is of moderate proportions.

LEAD PIPE.—The demand for lead pipe keeps up. Composition and waste sell at 8c. and ordinary at 7c. The discount is still 37½ per cent.

IRON PIPE.—In iron pipe there is a fair inquiry and a moderate amount of business is being done. No quotable change has been made, and the prices are as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.-20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.-60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—The foreign market for tinplates is reported somewhat steadier. Locally, there is a fair trade doing at $4.75 to $5.25 for charcoals and $4.25 for cokes.

STEEL.—This sells as usual, with no new feature to note. Our quotations are now as follows: Sleighshoe, $2.05; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

CANADA PLATES.—There is a fairly good demand for Canada plates, and several good sales have been made. We now quote: 52 s, $2.70 to $2.80; 60 s, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60 s, $4.45 to $4.55.

SHEET STEEL.—There is no change. A light demand prevails., and we now quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; $\frac{1}{4}$, 5-16 and $\frac{3}{8}$, $2.40.

TOOL STEEL.—This is moving as usual at unchanged prices. We quote as follows: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, $7\frac{1}{2}$c.; Jonas & Colver's, 8 to 15c.; "Air Hardening, 45 to 60c.

TERNE PLATES.—No improvement is reported on this market, and terne plates are still quoted at $7.50.

COIL CHAIN.—Trade continues quiet, and no change in price has occurred. Our quotations are as follows: No. 6, $12\frac{1}{2}$c.; No. 5, $10\frac{1}{2}$c.; No. 4, 10c.; No. 3, $9\frac{1}{2}$c.: $\frac{1}{4}$ in., $7\frac{1}{4}$c. per lb.; 5-16, $5; 5-16 exact, $5.25; $\frac{3}{8}$, $1.25; 7-16, $4.05; $\frac{1}{2}$, $3.95; 9-16, $3.85; $\frac{5}{8}$, $3.55; $\frac{3}{4}$, $3.50; $\frac{7}{8}$, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is not much doing in this metal. The price remains selfs at 20c. and wire solder at 18c.

ANTIMONY.—Trade is still quiet. We quote 10c.

ZINC SPELTER.—There is no change. A small demand is experienced. We now quote 5c.

SOLDER.—This is moving out fairly well at unchanged prices. Bar solder 20c. and wire solder at 18c.

PAINTS AND OILS.

The market has been somewhat erratic during the week. Travellers on the road report that everybody's attention is so taken up with the coal situation, that as one expressed it, "It is worse than election times to get hardwaremen down to business to give orders." The consequence is that trade is not very brisk, and the raw, damp weather tends to accentuate the depression. While lead is in fair demand, vermilions, dry colors and varnishes, used in the larger shops, are being inquired after fairly well. Linseed oil is steady at the former quotations. Turpentine, however, is the exception, having advanced 2c. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25; No. 1, 4.77\frac{1}{2}$ to 4.87\frac{1}{2}$; No. 2, $4.40 to $4.50; No. 3, 4.02\frac{1}{2}$ to 4.12\frac{1}{2}$; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, $6\frac{1}{4}$c.; in 100-lb. kegs, $6\frac{3}{4}$c. No. 1 zinc, in casks, $5\frac{1}{4}$c.; in 100-lb. kegs, $5\frac{3}{4}$c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

Both Ornamental— and Practical

COD OIL.—35 to $37\frac{1}{2}$c.

PARIS GREEN.—Petroleum, bbls., $16\frac{3}{4}$c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, $17\frac{1}{2}$c.; 25-lb. drums, 18c.; 1-lb. packages, $18\frac{1}{2}$c.; $\frac{1}{2}$-lb. packages, $20\frac{1}{2}$c.; 1-lb. tins, $19\frac{1}{2}$c.; $\frac{1}{2}$-lb. tins, $21\frac{1}{2}$c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Rubber is $\frac{1}{4}$c. higher this week, and the feeling is somewhat firmer. Other lines are quiet and unchanged in price. Red brass is in a little better inquiry than copper or yellow brass, but the trade doing is not large. Quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, $8\frac{3}{4}$c.; light brass, 5c.; lead, 2 to $2\frac{1}{4}$c.; zinc, $2\frac{1}{4}$c.; iron No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, $6\frac{1}{2}$ to $6\frac{3}{4}$c. per lb.

GLASS.

Nothing new has occurred on this market. Trade is very quiet, and prices remain as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

Hides have declined 1c. all round. Calfskins are 2c. lower, while lambskins have advanced 10c. A fair trade is reported this week. We quote: No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. Calfskins, 8 to 10c.; lambskins, 60c.

MONTREAL NOTES.

Turpentine is 2c. higher.

Cut nails, in carload lots, are 5c. less than the base price, instead of $7\frac{1}{2}$c. less.

"Monarch" horse nails are now discounted at 65 per cent. instead of 70 per cent.

ONTARIO MARKETS.

Toronto, October 10, 1902.

HARDWARE.

ALL lines of hardware for the fall trade are in brisk demand, seasonable lines, like axes, handles, cross-cut saws, sleigh bel's, moving out freely. Manufacturers are now naming new prices on hay rakes for the coming season and have issued a new list, off which they give a discount of 40 per cent., the net base price being now $1.20 for the least expensive rakes. The price of cut nails, in carload lots, has been advanced $2\frac{1}{2}$c. per keg, and sash weights have been put up 25c. per 100 lb. Rope

halters have appreciated 5 per cent. The United States manufacturers are advancing the prices of building hardware. In harvest tools, the manufacturers will not guarantee the price ruling at present will continue for any length of time, and refuse to fill any orders that are not accompanied with specifications. There is an active demand for these tools and dealers, when ordering, should, to insure their orders being filled, send in their specifications. In stoves, the demand is much in excess of the ability of the manufacturers to fill. Jobbers are still behind with their deliveries in bolts and nuts, but some of their best customers are intimating that if the coal and coke situation continues unchanged, they will be obliged to close down for a time. If they do so it will give jobbers an opportunity to stock up. There has also been an advance of 10c. per bbl. in Portland cement.

BARB WIRE.—There is very little demand or inquiry for this article at the present time. The price is $2.65 in carlots and $2.77½ in less quantities f. o. b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—Nothing of any account is doing in this line, and our quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—A few orders keep coming forward for stove-pipe wire. The other lines are quiet. The discount is 25 per cent.

SMOOTH STEEL WIRE.—The condition of this market is inactive this week. We quote the base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—A good, steady trade is doing in wire nails. We quote $2.50 in carlots and $2.55 for less quantities. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—A small quantity of these are still going out. The manufacturers have advanced the carlot price 2½c. per keg. We quote $2.45 per keg and $2.40 in carlots.

HORSE NAILS.—In the coal situation keeps in its present unchanged condition the manufacturers of horse nails say they will not be able to keep up with the demand. Quite a good business is at present being done in these, and we quote the discounts as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—A fairly good, steady demand is reported. Quotations follow: Iron shoes, No. 2 and larger, light, medium and heavy, $3.15; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The situation is unchanged from last week. The demand is still heavy and jobbers are experiencing as much difficulty as ever in procuring supplies. We quote the discounts now as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—These are in about the same condition as the bolt and nut and screw markets. Quotations are as follows: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The inquiry for these is still heavy and is keeping the market bare of supplies. Discounts are as follows: Carriage bolts, common ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—The demand keeps up well. Jobbers are experiencing difficulty in procuring shipments from the factory, as the water has been let out of the factory at Gananoque while repairs are being made. Discount, 40 and 5 per cent.

ROPE.—Trade in rope is brisk, a good many orders being now placed for the coming spring trade. The prices are steady and it is likely they will be maintained firm for some time to come. Our quotations are as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11½c.; double, 12c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—A good many orders are coming forward. The trade seems to be under the impression that the present low prices of these articles will not be maintained for any length of time, and are sending in their orders for immediate delivery. The manufacturers, however, refuse to fill any orders that are not accompanied by specifications, and jobbers and retailers, in ordering these, should inclose specifications to insure delivery of the goods. The discount is 60 to 60 and 10 per cent.

EAVETROUGHING, ETC.—Quite a large quantity of eavetroughing is being forwarded to different parts of the country. We quote: Eavetrough, 10-inch, per 100 feet, $3.10; conductor pipe, 2-inch, per 100 feet, $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

BUILDING PAPER.—There is a heavy demand for building paper, and we quote: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—Quite a few orders of tinware are being sent out, principally in stove furniture, stove pipes, etc.

STOVES AND RANGES.—There is an active demand for these from all over Canada, and the manufacturers are unable to fill the orders with promptness. Wood burners are much wanted, and the trade seems to be hesitating whether to buy wood or coal stoves. To add to the difficulties of the manufacturers, a good many of them are hampered by the scarcity of coke, and should their supplies

STANDARD.
The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.

Dundas Axe Works, Dundas, Ont.
W.L. Haldimand, Jr., Eastern Agent, Montreal.

fail them they will be obliged to close down.

SPORTING GOODS.—These are still very active. The United States manufacturers have advised the trade in this country that they are crowded with orders and are not now in a position to fill them promptly.

CEMENT.—A delay in one or two contracts has enabled the manufacturers to catch up with their orders and a few new sales have been made at prices which are 40c. in advance of those ruling last week. As a general rule, those working on contracts are endeavoring to get as much as possible done before the cold weather sets in for the winter. The prices of all foreign cements are firm. We quote as follows: Canadian Portland cement, $2.80 to $3.20 and hydraulic, $1.35 up. At the works the prices are $2.50 to $2.70 per barrel.

METALS.

The general metal business is in a satisfactory condition, the demand for most lines being well maintained. Black sheets and Canada plates, in particular, are very active. The outside copper markets were stronger, but are again weak, speculative interest being lacking and the consuming demand slow. Tin is also dull outside and rather weak. Pig iron is quiet but firm, and the consumption of that metal and steel is becoming more and more restricted, owing to the great and increasing scarcity of coal.

PIG IRON.—A good local demand keeps up. Quotations at the furnaces are nominal at $23 for No. 1 and $22.50 for No. 2. On the track, Toronto, No. 2 Summerlee iron is quoted at $23.

STEEL BOILER PLATES.—Quite a demand is reported for these. We quote $1.80 in carlots on track, Toronto.

STEEL RAILS.—Quotations for these are unchanged at $30 for steam railways and $36 for electric railways.

TOOL STEEL.—A steady trade is doing in this steel. We quote as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—There is a good demand for this article.

BOILER TUBES.—A fair business is doing in this line.

SPRING STEEL.—The demand for this steel was active.

BAR IRON.—The market continues strong and active, with a scarcity in some of the sizes still felt. Our quotations are now as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There is a strong demand for these for shipment from stock. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Business is brisk and prices are firm. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10; all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—A steady demand keeps up for galvanized sheets, and we quote as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 guage; Gordon Crown, $4.50 for 28 gauge.

TIN.—A fair amount of business has been done this week. We quote $32 to $33 per 100 lb.

TINPLATES.—The volume of business keeps fair. We quote: Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—A fair demand is reported for ingot copper in small lots. A good amount of business is also being done in sheet copper. We quote: Ingot copper, $13.50 per 100 lb. and sheet copper, $22 to $23.

BRASS.—A fair amount of orders keep coming forward for brass. The discount is 15 per cent.

LEAD.—This metal is in fair demand. Prices are unchanged at $3.50 for pig lead and $3.75 for bar.

IRON PIPE.—Business is keeping up well. Quotations are as follows per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—The demand continues fair, and we quote 5 to 6c. per lb.

ZINC SHEETS.—These are in good demand. We quote: Cask lots, $6 to $6. and part casks, $6.25 to $6.50.

SOLDER.—Business is quiet.

ANTIMONY.—This metal is in fair demand. We quote $9.50 per 100 lb.

PAINTS AND OILS.

The chief feature in the paint and oil market this week is the continued stiffening in turpentine. There has been an advance of 3c. in the South with a rise in local market here of 2c. Linseed oil is very quiet, with a decline of 2c. in price. Gum and liquid shellac have advanced

2c. in the New York market, but so far no change has occurred in the price here. We quote :

WHITE LEAD.—Ex-Toronto, pure white lead, \$5 to \$5.25 ; No. 1, \$4.62½ to \$4.87½ : No. 2, \$4.25 to \$4.50 ; No. 3, \$3.87½ to \$4.12½.; No. 4, \$3.50 to \$3.75 in packages of 25-lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, \$5.02½.

RED LEAD.—Genuine, in casks of 560 lb., \$5 to \$5.12½ ; ditto, in kegs of 100 lb., \$5.50 ; No. 1, in casks of 560 lb., \$4 ; ditto, kegs of 100 lb., \$4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, \$6 to \$6.25 ; Lehigh, in cgsks, \$6.00.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to \$1 per 100 lb.

WHITING.—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., \$2.25 to \$2.35 ; white, \$2.35 to \$2.45 per gal. ; in less quantities, 10c. extra.

PUTTY.—Bladders, in barrels, \$2.25 ; bladders, in 100-lb. kegs, \$2.40 ; bulk in bbls., \$1.90 ; bulk, less than bbls. and up to 100 lb., \$2.05 ; bladders, bulk or tins, less than 100 lb., \$2.90.

PLASTER PARIS.—New Brunswick, \$2 per barrel.

PUMICE STONE.—Powdered, \$2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, \$1.20 to \$1.40 per gallon ; No. 1, \$1.10 per gallon.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 72c. ; boiled, 73c. ; 3 to 5 barrels, raw, 71c.; boiled, 74c.; 6 to 9 barrels, raw, 69c.; boiled, 72c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 76c. ; 2 to 4 bbls., 75c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 18¾c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

GLASS.

Glass has advanced materially in Belgium, owing, for the most part, to the threatened extension of the coal strike of France, and in the European markets all present quotations are withdrawn. In window glass there has been a still further reduction. Under 26 in., \$4.45 ; 27 to 40 in., \$4.75 ; 41 to 50 in., \$5.10 ; 51 to 60 in., \$5.35 ; 61 to 70 in., \$5.75 ; 71 to 80 in., \$6.25 ; 81 to 85 in., \$7 ; 86 to 90 in., \$7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

OLD MATERIAL.

This market continues brisk. In zinc, the prices remain at 3c. In the iron market the accumulation has reduced the prices, and we now quote: Heavy copper and wire, 10c. per lb.; light copper, 8c. to 8½c. per lb.; heavy red brass, 9½c. ; heavy yellow brass, 8 to 8½c.; light brass, 5c to 5½c.; lead, 2¼ to 2½c.; scrap zinc, 3c. ; iron, No. 1 wrought, \$11.50 per net ton; No. 2 wrought, \$5.50; machinery cast scrap, \$13 to \$14 ; stove plate, \$10 ; malleable and steel, \$6 to \$6.50 ; old rubbers, 5 to 5½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—Trade is moderate. The prices are unchanged. We quote : No. 1 green, 8½c.; No. 2 green, 7½c.; No. 1 green, steers, 9c.; No. 2 green, steers, 8c.; cured, 8½ to 9c. per lb.

SKINS.—Trade is somewhat dull and prices remain unchanged. We quote : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive. No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; shearlings, and lambskins, 50 to 55c.

WOOL.—This remains quiet at the same quotations : Fleece wool, 13½c. and unwashed, 7½c. per lb.

TALLOW.—The prices are low at 6¾ to 7c. per lb.

SEEDS.

The export demand for alsike is much better. Red clover is now offered in limited quantities. We quote : Alsike, \$6 to \$6.50 ; timothy, \$1.40 to \$1.60 ; red clover, \$5.50 to \$5.75 per bushel. For fancy grades a little extra is offered.

COAL.

Soft coal of all kinds has advanced \$2, and is now impossible to obtain at less than \$10.

PETROLEUM.

There has been an advance of 5c. in the crude oil in the United States, which will doubtless affect the local market in time, but so far prices here are unchanged. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra) ; Americam water white, 17 to 17½c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16c. to 16½c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Cement has been advanced 40c. per bbl.

The price of cut nails, in carlots, has been advanced 2½c. per keg.

Rope halters have gone up 5 per cent. and sash weights, 25c. per 100 lb.

Hay rakes have also advanced, the lowest price being now \$1.20 per dozen instead of \$1.10 as formerly.

NOVA SCOTIA MARKETS.

Halifax, October 7, 1902.

THERE has been a gradual increase in the volume of the hardware business for the last two or three weeks, and now a very active business is being done in many lines. Dealers report the volume and tone of business very satisfactory, and comparing favorably with that of other years. Some firms claim to have done a very much larger business so far this year than last. Trade conditions are most favorable everywhere and the prospects are bright for the autumn and winter trade. Payments are well in line with former years, while losses by failures have been very light indeed.

* * *

Considerable business has been done this season in sporting goods—for athletic sports, and also in guns and ammunition for the fall shooting season. Just now there is considerable trade being done by the retailers in household goods. Cold weather is coming on and now coal hods, shovels, etc., are being called for largely.

* * *

But it is the stovemen that are doing the business just now. The city uses about 25,000 tons of anthracite coal every year, in base-burners and other stoves, but largely in hot-air or hot-water furnaces. There are only about 100 tons of the coal available, with 900 tons on the way from Wales. There is consequently a run on cheap, convenient soft-coal stoves, which will serve the purpose until " the cruel war is over." People who have base-burner stoves wish they hadn't, and people who have stuck to the Nova-Scotian bituminous are happy.

* * *

The fishing vessels are now coming into port in large numbers, bringing fish, farm produce, or coal. As each has more or less fitting-up to do, there is considerable small trade in canvas and cordage. Some good sales have also been made of lumbermen's gear, such as peavies, chains, etc., in preparation for the coming winter's work.

* * *

The exports from Halifax, for the last two weeks, amount to \$369,425, apportioned as follows : West Indies, \$144,579 ; Great Britain, \$124,448 ; United States, \$46,135 ; Newfoundland, \$21,817 ; France, \$16,169 ; various other foreign ports, \$15,937. The total shipments from June 30 amount to \$2,052,344, which is \$142,999 better than in the corresponding period of last year.

* * *

Frank Wetmore, formerly with Stairs, Son & Morrow, has been engaged by A. J. Grant as traveller.

R. C. H.

THE YUKON TRADE.

About 80 per cent. of the supplies now finding their way into the Yukon are Canadian goods," said Mr. Robert Kelly, wholesale grocer, Vancouver, while in Ottawa the other day. Mr. Kelly attributes this welcome change in Yukon trade conditions largely to the successful efforts put forth by Canadian manufacturers, especially canners of food products, to rival the productions of Oregon and California. For several years the trade in canned goods was almost exclusively in the hands of Americans, but now that Canadian canned fruits and vegetables have been pushed into the Yukon they have come to be preferred, even by Americans, to similar articles imported from the United States. To illustrate the importance of the trade, Mr. Kelly observed that he had secured for the Yukon one consignment of 15 carloads of canned vegetables and fruits from two establishments in Central Ontario.

HEATING AND PLUMBING

WRINKLES FOR THE PLUMBER AND STEAMFITTER.

(By K. S. R.)

THE man who is alert enough to profit by his spare moments can do many little things for his customers that will keep them coming to his shop in spite of the efforts of competitors to secure their trade. Study your customer, the whole family and their needs, suggest whatever would add to their comfort and name the price for it. Use your knowledge of your business for their comfort. It will brighten your wits and increase your value to yourself in the additional revenue that comes from the special work that you will get. The more you know how to do the more you can do in special lines that do not interfere with your regular trade. Brighten up and try making a profit out of your wits. As an incentive here are two profit winners that I have used that may be of interest to somebody :

A RADIATOR WARMING CLOSET

Warming closets for food and dishes are convenient and desirable for use in winter, and would undoubtedly be more generally used in connection with steam radiators if it were not for the considerable expense involved, and for the fact that the size of the radiator must be increased in order to preserve the requisite amount of heating surface to heat the room. This extra bulk of radiator, moreover, cannot be reduced during the summer months, when neither radiator nor warming closet is in use. An effective and sightly substitute, which may be removed when desired, may be provided at a comparatively slight expense. A stamped steel portable oven of proper size, such as is used on gas and oil stoves, is fitted with lugs and clips to make it set firmly on the radiator top. It may then be taken to the bicycle shop and enamelled in any desired color and style to suit the finish of the room or pantry in which it is to be placed. Such a warming oven will repay many times the expense involved in the degree of comfort it affords.

TO REPAIR A CAST-IRON SINK.

It sometimes happens that the ordinary cast-iron sink becomes broken or cracked while in use. Obviously, the best way to remedy such a condition of affairs is to replace the broken sink with a new one. The writer was called on to repair an old-style odd-sized sink which was split across the entire width of the bottom. New wood work and copper work had been fitted to the sink only a few days before, and the owner objected strongly to the removal of the old sink. The following successful repair was quickly made :

As the iron of which the sink is composed had been under strain, one edge of the break stood higher than the other, and it was necessary to fasten them together. Two ¼-in. holes were carefully drilled and countersunk in the line of the break, and the parts were drawn together with 3-16-in. bolts and washers. A mixture of glycerine and litharge of the consistency of cream was then applied to the break on both sides, and the cast iron was carefully heated by means of a gasoline torch until the litharge had hardened. Another application of litharge and heat completed a repair which has stood the test of hot and cold water for more than a year and a half.

In the case of single holes all that is necessary is to ream and countersink the holes and insert a stove bolt with rubber and iron washer beneath, taking care that the rubber washer shall bind closely on the thread of the bolt. A steel sink may be soldered or may be repaired by means of a copper rivet carefully flattened.—The Metal Worker.

BATHROOM SETS DESTROYED.

Four hundred sets of bathroom work were destroyed in the fire at The Goderich Organ Company's factory on Wednesday, besides 90 organs, which were to have been shipped the following day to Liverpool. It is said the total loss will exceed $75,000.

PLUMBING AND HEATING CONTRACTS.

Fiddes & Hogarth are furnishing two houses on Jarvis street, belonging to Mrs. Roberts, with heating and plumbing.

J. & A. Fiddes, 177 King street east, are furnishing the plumbing and gas fitting for the premises of G. Davy, Queen street east, Toronto.

Guest & Co. are furnishing the premises of R. Gregory, 204-208 Wilton avenue, with plumbing and heating. A No. 4 water motor is being installed in an Anglican church, Brantford, Ont., by this company.

The new branch of the Bank of Hamilton, now in course of erection at the corner of Queen street and Spadina ave., is to be furnished with heating and plumbing apparatus by The Bennett & Wright Co., Limited.

The dwelling and store of Peter Macdonald, jr., Sherbourne street, Toronto, is being supplied with Auer heating and plumbing by Mashinter & Co. This company are also supplying Sullivan's hotel, corner of King street and Leader Lane, with plumbing and steam heating.

The Bennett & Wright Company, Limited, have secured the contract of furnishing the heating and plumbing for the Bank of Montreal, at the corner of Queen and Yonge streets, Toronto ; also the heating and plumbing for the new Bell Telephone Company's building on Temperance street.

BUILDING PERMITS ISSUED.

THE following building permits were issued during the past week from the office of the city commissioner, Toronto : E. H. Drummer, pair semi-detached two-storey brick dwellings, Pearce street, $3,300 ; M. S. and C. R. Harris, two-storey and attic brick dwelling, 67 Glengrove avenue, $2,500 ; C. and S. E. Plowman, pair semi-detached two-storey and attic brick and stone dwellings, 98 and 100 Macpherson avenue, $5,000 ; Grand Trunk Railway Co., one-storey offices and freight house, frame, covered with iron, Cherry street, $2,500 ; American Abell Engine Co., two-storey brick machine shop and pattern shop, 48 Abell street, $10,000 ; Geo. M. Bryan, pair of semi-detached two-storey brick dwellings, Walker street, $3,800 ; F. C. Kean, pair semi detached two-storey brick and stone dwellings, Dovercourt Road, $3,000 ; Dignum & Monypenny, five-storey stone, brick and steel building, Wellington street, $22,000 ; Western Printing Company, three-storey brick and stone printing office, corner of Queen and Duncan streets, $4,000 ; N. M. Wilson, pair semi-detached two-storey and attic brick dwellings, 253-255 St. Clarens avenue, $1,000 ; R. S. Unwin, pair semi-detached two-storey and attic brick and stone dwellings, 576-578 Bathurst street, $5,000; A. Batho, pair semi-detached one-storey and mansard brick front, roughcast sides, 21-23 Trafalgar avenue, $2,000 ; Charles McLelland, pair semi-detached two-storey and attic brick and stone dwellings, Rosebery avenue, $6,000 ; R. F. Rowland, 2½-storey stone and brick dwelling, 242 Rusholm Road, $2,800 ; John Hillock & Co., three-storey stone and brick factory, 152 George street, $6,000 ; Redford & Co., pair of frame dwellings, Tenty ave., $2,500 ; H. Wood, two-storey brick detached dwelling, Crawford street, $1,500 ; T. Chantler, two-storey and attic brick dwelling, 98 Crawford street, $3,000 ; J. O. Patterson, two-storey and attic brick-detached dwelling, 215 St. Patrick street, $3,000 ; Thos. F. Robertson, pair semi detached two-storey and attic stone and brick dwellings, Delaware avenue ; H. W. Williams, 2½-storey pair semi-detached brick and stone dwellings, 34-36 Walmer Road, $6,000 ; W. J. Hodgson, two-storey and attic brick dwelling, 49 Albany avenue, $3,200 ; F. D. Manchee, two-storey and attic brick and stone detached dwelling, Searth Road, $7,000.

INCREASE IN GAS PLANTS.

According to recent statistics the operations in the gas line in America have increased enormously during the last decade. The 712 gas companies of 1890 increased to 877 in 1900, while, during the same ten years, the quantity of gas sold increased 83.7 per cent. and the value of the plants increased 114.7 per cent.

PAINT FOR THE FARMER'S BARN.

Now there is a season of Fall painting after the crop, and it's a good stroke of business to induce your farmer customers to go at it. Don't offer him the expensive house paints for his barns and roofs; it's not necessary, and most likely you wouldn't get the business. Tell him of **RAMSAYS OUTSIDE PAINTS** for just such work, sell them at $1 00 per gal. and make a handsome profit for yourself.

MONTREAL—THE FAIRBANKS COMPANY—VANCOUVER

INDUSTRIAL GOSSIP.

THE Canada Foundry assessment problem was again under consideration at the meeting of York Township Council the other day, and after a lengthy discussion the by-law fixing the assessment of the company's property at $150,000 for a period of 20 years was passed.

Former Mayor Truelson, Alfred Merritt and A. E. Lewis, of Duluth, are at Black Sturgeon Lake where they are about to secure an iron location, the purchasing price of which is $7,000.

Alex. Frasor & Son, of Ottawa, have purchased from T. and R. Ritchie 100 acres of land on Lake Deschene, upon which they intend erecting a fireproof sawmill. The price has not been made known.

The ratepayers of Guelph have granted a bonus of $40,000 and a free site to Wallace W. Near, manager of The Page-Hersey Co., of Montreal, and his associates, for the establishment of an iron pipe and tube mill.

The dredging of the dry dock in Collingwood is progressing rapidly. Large quantities of steel and concrete are arriving for the Collingwood Shipbuilding Co., and the machinists in the machine shops are now engaged in preparing the steel plates for the first steamer.

The new steel freight steamer Tadenac, of the St. Lawrence and Chicago Navigation Co., was launched at the Bertram shipyards Toronto, on October 5. She is a large package freighter and built in a manner that enables her to pass the Welland canal and navigate from Lake Superior to Quebec. Her capacity is 105,000 bushels of grain.

Oil has finally been struck in Wheatley, Essex Co. Since last spring this locality has been exploited by the Standard and the United Gas and Oil Companies, but it was only on October 6 that a well was sprung which yielded oil in large quantities. It is stated that over two acres is flooded by this well, and that the greatest excitement prevails. The companies are leasing land largely in the vicinity.

BONUS FOR A NEW FOUNDRY AT SYDNEY.

The ratepayers of North Sydney have unanimously decided to grant I. C. Thompson & Co. $5,000 bonus, besides free water and exemption from taxes, in consideration that the firm begin at once a large foundry business there. In addition to stoves and tinware, the company will also manufacture hot-water and steam furnaces. Over 300 men will be employed in the new works.

THE TAYLOR FORBES CO.

Incorporation has been granted John McPherson Taylor, of Guelph; George D. Forbes, of Hespeler, and Adam Taylor, Emma Taylor and Jas. S. Taylor, of Guelph, to manufacture hardware, radiators, boilers, and all the machinery connected with plumbers', engineers', steam-fitters' and gas-fitters' supplies, etc., with all the privileges incidental to the carrying on of this business, under the name of The Taylor-Forbes Co, Limited, with a total capital stock of $300,000.

NEW LINSEED COMPANY.

The Canadian Midland Linseed Company is now asking for incorporation in Manitoba. Its capital is fixed at $500,000 and the purposes and objects for which incorporation is sought are as follows: To carry on the business of millers; to purchase any and all grains and seeds; to manufacture and sell all useful products therefrom; to erect and operate all necessary mills, plant and machinery; to erect and operate all necessary elevators and warehouses; to act as grain dealers in the purchase and sale of all grains and seeds.

The operations of the company are to be carried on throughout the Province of Manitoba, and the company's chief place of business is to be at Winnipeg.

The names in full, addresses and callings of the applicants are as follows: Eldredge C. Werner, president of the Midland Linseed Co., Minneapolis, Minn.; Sumner T. McKnight, capitalist, Minneapolis, Minn.; George Frank Piper, manufacturer, Minneapolis, Minn.; George C. Christian, miller, Minneapolis, Minn.; Walter Donald Douglas, capitalist, Cedar Rapids, Iowa.

Eldredge C. Warner, Sumner T. McKnight, George Frank Piper, George C. Christian and Walter Donald Douglas are to be the first directors of the company.

COULD NOT GET THE ORE.

A despatch from Nanaimo, B.C., says: "The steamer Bermuda, of Vancouver, has returned from the Texada iron mines without a cargo. The Bermuda went with an order to take all the ore, ever 300 tons, from the mines to the Crofton smelter, but found that there was not 300 tons there. This and other failures of the Pacific Steel Co., who are operating the mine on an option, will likely result in the forfeiture of the option on the grounds of breach of contract with the owners, the Paget Sound Iron Co.

"The contract calls for an output of 200 tons per day, and for some time past the daily average production has been away below that mark. The Pacific Steel Co. has all along had trouble with its employes, who claim they went to work regularly and are not paid. To day only four men are at work. Twenty Chinamen who were working in the mine went on strike about four weeks ago because wages were not duly forthcoming, and a settlement has not yet been made. W. H. Lee, representing the Puget Sound Iron Co., is now at the mines. He says if his company regains possession the property will be worked extensively. It is very rich."

NEW BRUSH FACTORY.

Operations in the new broom and brush factory of Thomas Bros., St. Thomas, Ont., commenced a week ago last Monday. These manufacturers have also a factory in Norwich, but it is needless to state that this mammoth factory in St. Thomas, the main building of which consists of three storeys and is 50 x 400 ft. in dimensions, will be the headquarters of their business.

Besides the main building there is a back addition 100 feet long by 50 feet wide, which is equipped with the latest improved machinery. At present there is but one boiler, a 200 horse power Goldie & McCullough, but space is left for another if required.

In the building there are 400 windows and over 5,000 lights of glass. The cost of erection alone was the sum of $35,000. The contractors were: George A. Ponsford, brickwork; C. Riddle, gravel roofing; Ingram & Davey, galvanized ironwork; Hamilton & Stott, plumbing, and C. Lovson, painting.

It is expected that this firm will employ over 150 men.

PERSONAL MENTION.

Mr. W. T. Best, of the Gilmour Paint Works, Bedford, Que., and Mr. U. Beaumoyer, of St. Hyacinthe, both well-known paint were in Montreal this week.

Mr. Chester Marshall, who has been for some months with the Hobbs Hardware Co., London, has retured to Galt. He has accepted a position with Mr. Theron Buchanan, jr.

Mr. H. S. Chestnut of the firm of R. Chestnut & Sons, Fredericton, was united in marriage September 24 with Miss Annie Isabette, B.A., eldest daughter of Deputy Provincial Secretary R. W. L. Tibbitts.

The plant at Sault St. Marie, Ont., of W. J. Hill, builder, Deer Park, Ont., is advertised to be sold by tender.

The real estate of T. J. K. Alexander, general merchant, St. Agathe Des Monts, Que., is to be sold October 14.

An item appeared in the last issue of the HARDWARE AND METAL to the effect that John C. Hay, coal and wood dealer, Listowel, Ont., had sold out; this was incorrect.

CHANGES.

J. A. Vincent, sash and sawmiller, Acton, Que., is starting.

S. Stevens, sawmiller, Fort William, Ont., has sold out to A. H. Dale.

Jutras & Parizeau, sash and sawmillers, Acton, Que., have sold out.

Adam Zephir, blacksmith, St. Eugene de Grantham, Que., is starting.

D. Turenne, blacksmith, St. Eugene de Grantham, Que., is out of business.

C. P. Easton & Co., pulp wood and lumber merchants, Quebec, have registered.

James Dalrymple, blacksmith, Moosejaw, N.W.T., has sold out to T. Rusk & Son.

Tremblay & Riendeau, wholesale and retail lumber merchants, Montreal, have registered.

George M. Webster has registered for Webtser Bros. & Parkes, manufacturers and importers of mantels etc., Montreal.

FIRES.

J. H. Stanford's saw mill, etc., Chester, N. S., have been burned out.

Thomas M. Linkletter's saw and grist mills, Miscouche, P. E. I., have been burned out.

H. Chambers, general merchant, Springfield, Ont., has sustained loss by fire; insured.

DEATHS.

S. H. Caswell, of S. H. Caswell & Co., bankers and general merchants, Qu'Appelle Station, N.W.T., is dead.

To ALL who make a specialty of

CARRIAGE PAINTERS' SUPERFINE COLORS

In CANADA, the **CANADA PAINT COMPANY** manufacture from the first processes onward a full range of carriage colors, every line of which they warrant for purity, fineness of texture, brilliancy, permanence, fineness in working and hardness in drying.

GUARANTEE

We guarantee the superiority of our Carriage Painters' Superfine Colors for the following reasons:

The colors are all of our own manufacture.

The Japans in which they are ground are also manufactured by us and tested before use.

Every batch of our specialties for carriage purposes, whether Primer, Rough Stuff, Rub Lead or Fine Color, is proved by actual test before leaving our premises.

We continue to solicit the business of all firms who desire to sell first-class paints for first-class work.

For Varnishes and Carriage Painting material of every description, address,

A CRITICISM OF BUSINESS METHODS.

Editor HARDWARE AND METAL,—In the preceding articles of this series I endeavored to point out that manufacturers should confine their lines of manufacture to as few lines as possible, and that the distribution to the retail trade should be largely left in the hands of the wholesalers.

Both manufacturers and wholesalers should recognize that retailers are entitled to the local trade, including public institutions, the rule being that unless bought for sale again the trade should go to the retailer.

We all have to live. The interest of all will be better served by recognizing the other man's right to business existence. Any saving a customer makes is often more imaginary than real. What is saved in first cost is lost by the inability to obtain the advice and experience of the local dealer.

A short time ago a general store merchant was in the city. He was opening a new store, and had picked out his dry goods and grocery lines. He came to the hardware house and inquired for the traveller whom he knew and had bought goods through. It was his first meeting with the local salesman; also the proprietor. When solicited to place his orders he would not, remarking: "I am tired buying and will hold for your traveller, as he knows what I want better than I do myself."

A leading Methodist clergyman in a sermon said: "I have as much resaon to thank the clerk or merchant that sells me something that I require as he has to thank me for my money. He has rendered me a service."

Knowledge and experience are factors in business that may be more valuable to the consumer than any saving of dollars and cents in a purchase.

Being connected with the wholesale trade, I could buy many lines for personal and domestic use at wholesale prices, but I do not, for three reasons:

1. I have to lose more time to obtain requirements.

2. I cannot get the personal service.

3. Because I get from the retailer in the quantities that suit my requirements, not as a favor, but as a business transaction.

Neither do I patronize departmental stores. Legitimately conducted they have claims for recognition as distributors of commerce. My living comes from the sale of goods. For advertising purposes, they resort to cutting of prices of staple lines, and often sell at a loss. This demoralizes the sale of that line through regular dealers, and renders it difficult to obtain a legitimate profit. It is a line in one business to-day, another to-morrow. I reason that the bait is put out expecting to make up on lines that the average customer knows nothing about.

Every self-respecting merchant should use his influence against this method of business and be in favor of legitimately conducted businesses.

You may well ask here: "What have these things to do with developing 'Canadian trade?'" A chain is only as strong as its weakest link. The retailers have rights that should be recognized. Their businesses should not be rendered unprofitable by wrongful competition. They have a place in the distribution of goods to consumers.

Retailers should have a thorough knowledge of their businesses, conducting it to make a living for themselves and those depending on them. Competitors have to live. To down them by cutting prices or other undesirable methods may rebound. Rather become associated in obtaining better results and fighting evils that exists in business. Retailers will find it in their interest to become members of the Retail Association of Canada. It has done good work; stronger membership will enable it to do more.

"CANADIAN TRADE."

LEADING THE LEADERS.

There never was a time when competition in manufactured goods was as keen as at present. The firm that would secure and retain a strong hold on Canadian trade must not only put skill and money into the manufacture of their goods, but they must put conscience and business integrity into them as well. When they do this they quickly become leaders. In no case has these conditions been more fully incorporated into business than in the case of the United Factories, whose goods stand right in the foremost of the race for recognition on merit by the dealers in high-class Canadian manufactured goods. They lead the leaders.

THERE ARE NO OTHERS!

Decatur, Bull & Co., Montreal, are sole Canadian agents for The National Cutlery Co.'s shears, who are not connected with any combination, who make their own malleables, and manufacture the only tinners' snips and shears in the world made with a steel ride. There are no soft spots or soft edges, and each is thoroughly guaranteed. Each pair of these shears is put up in a separate packet.

MAN'S WORK.

No man is born into the world whose work
Is not born with him; there is always work
And tools to work withal for those who will;
And blessed are the horny hands of toil!
The busy world shoves angrily aside
The man who stands with arms akimbo set
Until occasion tells him what to do.
And he who waits to have his task marked out
Shall die and leave his errand unfufilled.

—James Russell Lowell.

Apollo galvanized iron is all alike; if not, send back to your jobber at our expense—we shall hear of it.

CURRENT MARKET QUOTATIONS

October 10, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

CARE OF THE STOCK.

NO part of a merchant's business is more important than the care of the stock. Unless the stock is properly kept it is impossible for the business to be in a really healthy condition.

The stock, like the blood in the body, must be kept circulating if life is to be preserved. Consequently it needs constant and systematic attention. And to successfully do this is no small task.

Stock books, or something that will be a good substitute cannot be done without. But these in themselves can be of very little use unless entries are promptly made when certain lines are running short. Besides, it is also well to have a record of how this and that line sells, a guide thus being secured for the merchant when he is buying.

But stock books can also be utilized as a help to the merchant in keeping his stocks down, as well as keeping them up, for the latter is even a more difficult problem than the former.

Merchants and clerks who are successful stock-keepers are close students of the trade papers and the markets. Indeed, they can scarcely be the one unless they are the other.

Possibly some of our readers would not object to describing through our columns their methods of taking care of their stock.

AN INSURANCE LOSS.

Never can the necessity for a careful examination of and adherence to the conditions of an insurance policy be emphasized too frequently. The courts are constantly dealing with cases where, through some irregularity, a policy-holder has lost his insurance money.

The latest case occurred just recently when the Walkerville Match Company tried to recover $3 083 45 under a contract entered into with the Scottish Union and National Insurance Company. The case was tried without a jury at Sandwich, and Chief Justice Falconbridge has just handed out judgment in favor of the defendants. The defence was that the defendants were not bound by a receipt issued in the name of one Davis, who had been an agent, but who was superseded. The insurance was not entered on the register, the money for the premium did not reach anyone who could be called an agent of the company till after the fire, and it did not appear that anything was known about the risk at the defendant's head office. It was held that under these circumstances the plaintiffs could not recover damages.

It is no doubt the intention of the proposed $75,000,000 plough combination to plough up old methods and cultivate larger profits.

SHORT BROOM-CORN CROP.

AN investigation has been made of the broom-corn crop of Illinois, U.S., and the plant was found to be fully 25 per cent. less than last year. The old stock left over from former years is the smallest since 1899. The yield indicates that it will hardly be up to last year, the old crop as a whole being deficient in hurl. Heavy yields with long corn is expected. The long and heavy rains and cool nights of the summer produced a large growth of stalk, but the cold nights during the maturing season of the bush served to shorten up the length of the same.

The broom-corn harvested in August, during the excessive rainy season, is much off color, rather poor growth and much of it shed stained; but the bulk of the crop has been harvested in September, under more favorable weather conditions, and shows the best fibre for years—plump in growth, fair to good color, and, as a rule, may be classed as tipped corn, very short of hurl, but, as a whole, very profitable stock to manufacturers, and it is thought will show more dozens per ton than former years.

Three-quarters of the broom-corn of the world is grown in Central Illinois.

BINDER TWINE AND THE TARIFF.

THE agitation now in progress on the part of many manufacturers and politicians of both parties for a higher protective tariff for the industries of the Dominion is viewed from widely different standpoints by the public, according as one is a disciple of free trade, moderate or high protection. It is only the exception when there is not as much to be said on one side as the other.

Among the industries which the Government is likely to be asked to protect shortly is that of the manufacture of binder twine. This is an industry which, with the increasing volume and importance of the grain crop of Canada, becomes of interest to a larger number of our people each year. A Quebec newspaper has characterized as "self-apparent nonsense" a certain Canadian statesman's idea of equally protecting the manufacturer and farmer. But in the case of binder twine, the latter's interests are identical with those of the former. In the West, the farming population, who are free traders as regards most industries, are not at all satisfied with present conditions of the binder twine situation, and, according to a gentleman who has lately returned from Manitoba, are quite willing that the Canadian manufacturer should be protected in order that they themselves may not be thrown wholly on the mercy of the United States manufacturer.

There are ten independent concerns manufacturing binder twine in Canada at present, namely: The Consumers' Cordage Co., Limited, Montreal and Dartmouth; The Independent Cordage Co., Limited, Toronto; Kingston Penitentiary, Kingston; Richelieu Cordage Co., St. Johns; Brandon Twine Co., Brandon; Farmers' Twine Co., Brantford; Ontario Farmers' Cordage Co., Brantford; Chatham Binder Twine Co., Chatham; Walkerton Binder Twine Co., Walkerton, and the Canada Cordage and Manufacturing Co., Peterboro'. These companies are able to manufacture more than twice the amount of binder twine consumed in Canada. But in spite of the fact that their machinery is of the latest and best, their labor as skilled as American labor, and their management all that could be desired, about 75 per cent. of the binder twine used in Canada comes from the United States. Without proper protection to Canadian manufacturers, this importation of American goods must increase, until our manufacturers have been practically driven from the market.

To say nothing of the loss of capital invested that such a condition would bring about, of the hundreds of men and women who would be thrown out of employment, let us see how the farmer would be affected.

At present, when there is a large crop of grains throughout the United States, American manufacturers have no more than enough for their own markets, and little if any is exported to Canada. When crops are small, however, in the United States and there is more than enough binder twine on the market, then it is that the Canadian market is made a dumping ground for American twine, which is sold here at almost any price in order to be rid of it. It does not take much discernment to realize the position that our farmers would find themselves in if Canadian manufacturers of binder twine were forced out of business. At a time of good crops in the United States the farmer in Canada would find himself without binder twine. He could not obtain it at any price. This state of affairs would add materially to the cost of growing wheat, which is a most serious matter for this country.

In addition to being placed at the disadvantage of having the market every now and then flooded with American twine, our manufacturers are also handicapped by the American tariff as well as our own. In this way: Binder twine is composed chiefly of manila fibre produced in the Philippines. An export duty of ¾c. per lb. is imposed by the United States Government on all hemps going out of the Philippines to foreign countries. Going into the United States, for consumption there, it is free—or rather the duty is refunded, which amounts to the same thing. On the manufactured twine coming into Canada from the United States we charge no duty, but on that going into the United States from Canada a duty of 45 per cent. is charged.

Even were American manufacturers to compete on fair terms the conditions would not be so adverse to the industry in Canada. But the competition is most unfair. A huge company, absorbing practically all the agricultural implement companies in the United States, has been formed, with which binder twine is merely a side issue to be sold along with their binders at an unprofitably low figure. But the sale of this twine at such figures is not a thing that either Canadian or American farmers could count upon—certainly not the former should the company gain control of this market.

In the event of our binder twine mills being forced to close down—a contingency to be seriously considered if the present unsatisfactory conditions are to continue—this great American company, making as it does about 90 per cent. of the binder twine of the United States, could charge our farmers whatever price it wished. "Could the Canadian manufacturers not start up again, then?" we ask. Not in time to save the farmer from paying an exorbitant price for his twine, as the hemp for its manufacture must be purchased in August or September, it taking nearly four months to reach this country, and the prices are not issued until the following March or April, when it would be too late to do anything.

There is not the remotest possibility of any combine to raise or maintain prices being formed in Canada should a duty be placed on binder twine, because there are many factories, most of the shareholders themselves being farmers, in addition to which the Government manufactures binder twine at Kingston.

CANADIAN FAILURES.

Last week the number of failures in Canada for the third quarter of 1902 was noted in this column. This week a more detailed statement of these failures can be supplied. Among manufacturers there were seven failures each in the wood manufacturing and milling industries, four in the clothing industry, three each in the printing and leather industries, two in the tool industry and one each in the iron, wool, liquors and earthenware industries. Besides there there were nine miscellaneous failures.

Of trading businesses, 54 general stores and 30 grocers form the largest class of failures.

BUSINESS MEN IN PARLIAMENT ORGANIZE.

VARIOUS expedients have been devised at different times by the business men of Great Britain to meet the growing competition of United States manufacturers, but none seems to be so much to the point as the latest move, recently explained in a letter to The London Times. This is no less than a commercial committee of the British Parliament. This regularly constituted committee has been the outcome of a series of meetings attended by such members of the House of Commons as were interested in the development of the trade and commerce of the country. They met with the belief that, by means of their concentrated action in Parliament, more could be accomplished than if the initiation of movements rested solely with individuals or with the Government.

A committee of 130 members was accordingly drafted, in which all the political parties were represented, with the expressed object of studying from a non-partisan standpoint the commercial needs of Great Britain and giving legislative effect to the points decided upon in conference. The name of British Parliamentary Trade Commission was bestowed on the new organization.

The movement forms a practical demonstration of what HARDWARE AND METAL has long advocated. Its readers will recall many instances in which it has referred to the election of business men to Parliament with the utmost approbation. The idea of combining these business men into a working committee carries but a step further this predominant idea, and this has been the second plank in HARDWARE AND METAL'S commercial policy. No legislative movement can be made except through Parliament. Manufacturers' associations and commercial commissions may serve as educative and executive factors but it remains for Parliament to carry legislative reforms. Obviously, if the Canadian Parliament or any other Parliament be composed mainly of representatives of those classes in the country, which are but indirectly in sympathy with commercial movements, little practical good can be accomplished. Business men are needed right at the centre of activity and if these business men are so organized as to make their influence more widely felt, so much the better for the nation.

At present in Canada there are a few business men in Parliament who exercise purely an individual influence, or, at best, but a party influence. Now that deep commercial problems are looming up more prominently, it is becoming daily more necessary for the business men of Parliament to come together, and, putting party considerations to one side, go to the very root of the matter and decide what line of policy it behooves them to adopt.

Being in touch, as they doubtless are, with the commercial organizations of the country, they are in a position to know the feeling of their business constituents. To get for this feeling its proper consideration, some organization and combined effort in Parliament becomes absolutely necessary. Such an organization HARDWARE AND METAL advocated prior to the last session of the Dominion Parliament and it again takes this opportunity of doing so.

The vexed question of the tariff will soon be up for consideration. At such a time unbiassed opinions and an unbiassed action are desirable. So long as business members adopt the party views of the question without getting together and uniting on the best policy for the nation's welfare, there is little reason for expecting that the best results will follow.

BUSINESS MEN OF THE EMPIRE.

AT the meeting of the council of the Montreal Board of Trade on October 9. it was decided to recommend that the next meeting of the Chambers of Commerce of the Empire be held in that city, beginning on August 17. If this were done the members could proceed at the close of the conference to Manitoba in order to inspect the wheat harvest.

A letter favoring this plan has been received from the London Chamber of Commerce, in which the opinion was expressed that the different Chambers of Commerce throughout the Empire would be willing to make Montreal their next place of meeting.

The importance of this to Canada can scarcely be overestimated. The delegates, being practical business men, will naturally take a business interest in the Dominion, which is, of course, the interest most to be desired.

The Montreal Board of Trade is to be congratulated on its enterprise, and it is to be hoped it will receive the hearty cooperation and aid of every commercial body in Canada.

A POPULAR HARDWAREMAN.

J. B. Skelton, who has for some time past been in charge of the hardware department of J. W. Shields' general store, Grand Valley, Ont., has gone to take charge of the old-established hardware business lately carried on by Mr. Lynch, of Palmerston. Before his departure, the citizens of Grand Valley held a dance in his honor and presented him with an address and a gold watch and chain.

CANADA AT JAPAN EXHIBITION.

The plans of the International Exhibition of Osaka, Japan, have been received by the Minister of Agriculture. There will be 19 buildings scattered over a large area. The Canadian building is about the centre of the grounds and has a space of 7,200 ft.

Mr. George Anderson, of Toronto, was commissioned by the Department of Trade and Commerce about five years ago to proceed to Japan to investigate the chances for Canadian trade. He reported that there were many openings for our goods, and strongly recommended manufacturers to look after their interests in the ever-increasing markets of the East. Some of the specially mentioned articles were flour, canned goods, condensed milk, biscuits, foodstuffs generally, leather, rubber and gutta percha goods, books and stationery, asbestos, cotton, lumber, pulpwood, paper, electrical apparatus, etc., so this Exhibition will be a good opportunity, and all interested should communicate with the Commissioner of Exhibitions at Ottawa.

H. Dixon, Collingwood, has decided to erect a larger foundry. He has purchased a site at the water's edge on Birch avenue and is already building and hopes to be ready for business in a short time. The present building is frame on a stone foundation. This to be followed by a brick or stone moulding shop. Both these are on modern plans and will be greatly superior to the old structure.

THE C.I.F. DEFINITION.

ANOTHER MEMBER OF THE BAR.

If the vendor undertakes, for a certain price, to hold the goods sold insured in favor of the buyer until the delivery, say, at Montreal, who is responsible for injury from salt water during transit, if the insurance does not cover the case?

"ANOTHER MEMBER OF THE BAR."

CRITIC'S STANDPOINT.

Editor HARDWARE AND METAL,—In following up the opinions given in your last issue, I would like to ask "A Prominent Grain Merchant" who it was who insured the goods, he or his client, and if there are not at least two parties to a contract?

The seller agrees to insure the goods. He sells them at a price including insurance and freight to a certain point (say, Liverpool). Having signed such a contract, he holds himself responsible for all he signs, namely: Insurance and freight, plus cost of goods until goods arrive at Liverpool, and it must be a sure thing the consignee is not responsible for goods until he has taken delivery of same. By the way, our Montreal grain merchants insure A.A.R. (against all risk).

To "WHOLESALE HARDWAREMAN,"—

Different goods are insured differently. You must be right, I agree. You cannot insure black sheet iron on the same basis you would insure axle billets or other similar goods.

To "J. W. L.," Toronto, Ont.—

An insurance contract is made with the shipper at his request by the insurance company, and they can issue any kind of policy he wishes to suit his goods, and cover them properly, and as the shipper knows well what particular kind of goods he ships, he should provide for the right kind of insurance, as he should know that if he sold on c.i.f. basis he has pledged himself to deliver the goods in good order and condition at point of delivery.

To "AN INSURANCE EXPERT,"—

I understand ordinary insurance is F.P.A. and a policy covering all risk is A.A.R. Why have you different kinds of insurance? Because shippers have different classes of goods to ship?

Why should one policy be the subject of a special contract more than the other? Because your charges are different and suitable to perishable or non-perishable goods?

The seller undertakes to pay all charges up to Montreal, and should arrange for an A.A.R. policy specially for perishable goods. He would not think of paying part freight only, why part of insurance?

If the seller had written F.P.A. in the contract I doubt if the buyer would have signed it. If he did he would be the one to suffer the consequences; but, as it is, I should judge the seller is "it."

CRITIC.

AN IMPORTANT QUESTION OF TERMS.

EDITOR HARDWARE AND METAL,—Since writing our last letter we have received the following correspondence from one of the largest manufacturers and exporters in England, which, we think, goes to prove that when goods are sold f.o.b. the other side, the shippers' responsibility ceases when goods are on board the ship. On the other hand, it proves that goods sold c.i.f. Montreal binds the shipper to deliver in good order in Montreal, and, as we always insure against all risk, it means a sale this time.

THE CANADA HARDWARE CO., LIMITED.
A. M. St. Arnaud, Manager.

The letter is as follows:

In reply to yours of 27th inst., re 300 boxes Canada plates, ex SS. Montery.

These plates were delivered f.o.b. Liverpool, and the damage has likely been caused by sea water, and you will therefore have to claim on the insurance people for amount of loss.

HY. ROGERS, SONS & CO.

Editor HARDWARE AND METAL,—With regard to the trade term of c.i.f., I have not the slightest hesitation in stating that it is the habit and custom of business to mean that the goods are sold cost, insurance and freight at destination, and that the insurance protects the buyer against any or all loss through damage in shipment, and the insurance policy is always understood to read A.A.R. Certainly the F.P.A. is used in insurance on such lines as pig lead, pig iron or billets, but only with the understanding between the seller and the buyer.

I may state in conclusion, that in all my c.i.f., and whenever requested by customers to insure their goods, the policy is written A.A.R., and we have been doing this for quite a number of years past.

MANUFACTURERS' AGENT FOR ENGLISH FIRMS.
Montreal, October 15, 1902.

INDUSTRIAL GOSSIP.

IN an interview with the Victoria Board of Trade, the Hon. A. G. Blair said that from a conversation he had with Mr. Hill, the Great Northern magnate led him to believe that he was ready to carry forward the Victoria, Vancouver and Eastern Railway, when the present depression was past, and that he would build without asking Government aid.

Tenders will be received until Saturday, October 27, for the erection of a steel bridge at Point Ellice, Victoria, B.C.

Huntsville and The Lake of Bays Navigation Co. are building a new steel frame steamer, modern in all her appointments, to accommodate 500 passengers; also a railway between Lake of Bays and Peninsular Lake, and a dry dock on Lake of Bays.

Peat works are being established at Newington, near Ottawa, and it is hoped to have a plant in operation capable of turning out 50 tons of peat per day. It is felt that the time is opportune for testing the utility of the peat bogs in that district, as it may not only relieve the present situation but be of permanent use. A brick dwelling, 100 x 25 ft., is now building and machinery is being imported from Germany.

Corry & Laverdure, Ottawa contractors, who have been five or six years over the work, have just completed the lift lock on the Nassau Little Lake section of the Trent Canal. It is the largest lock of its kind in the world, the lift being 65 feet, and the only one on this continent.

A. Dunbar & Son, Woodstock, are enlarging their buildings by the erection of a machine shop, 120x45, which will be fitted up with all the latest appliances for conducting an iron manufacturing business. They are also putting up a new foundry, 85x40, and will use their old one for a wood-working shop.

Vigars & Co. are building an addition to the C.N.R. shipping dock at Port Arthur, which will give the company a shipping shed of over 600 ft. This addition was necessary on account of the large increase in freight handled at that point and for freight that is to be stored there this winter, mainly consisting of 5,000 tons of barbed wire. The shipment of flour east via C.N.R. is steadily increasing, every Northern Transportation steamer taking a large consignment. There is a large staff of men employed in trucking freight night and day.

John A. Whaley, general agent of The Superior Portland Cement Co., and W. H. Jackson, of Toronto, managing director, were in Brantford on Fair Day. The capital stock of the company is placed at $500,000 in 50,000 shares of $10 each, and the works are at Orangeville. Marl from their properties in Caledon and Garafraxa was analized by Thos. Heys, consulting chemist, Toronto, who compares it favorably with that used in the manufacture of Portland cement in England, and is of the opinion that it will make a cement equal to the best English, Canadian or American grades.

HAMILTON, ONT.

A TRIBUTE TO SHEFFIELD.

AT Sheffield, Eng., on September 30, the Cutlers' Feast—the 279th in the series—was held. Among those who spoke was J. H. Choate, the United States Ambassador. The following is an extract from his speech in reference to Sheffield :

"I have come here to-night as a legitimate representative of your best customers and your nearest relations, (Cheers). Sheffield and the United States have been bound together for more than half a century literally by links of steel, and they are more closely united now than they ever have been before. (Cheers). In fact, the name of Sheffield is a household word in America, and has been for many generations. It is significant of absolute good faith, and is a synonym in America always for the genuine article. (Cheers). Let me give you an illustration. Half a century ago the American boy thought he was in luck who carried in his pocket a knife on which was stamped the name of Joseph Rogers & Son, Sheffield. (Cheers). They knew they had got the best that could be had the world over, and if there is any representative of that ancient house present at this table I desire to thank him in the name of the American boys of my generation for the splendid service the firm rendered them. And so it has been from that day to this, and the constant and increasing trade between Sheffield and the United States is but confirming the good relations that ought to exist, and do exist, between these two kindred nations."

It was in 1624 that the first Cutlers' Feast was held.

OTTAWA AND THE BUILDING PAPER TRADE.

Editor HARDWARE AND METAL.—In reply to "Wanderer" and "Interested Pilgrim," permit me to say that if these gentlemen have good grounds for complaint against the Tarred Paper Manufacturers' Association, I think it would be more courteous and businesslike if they were to lay their case before the above Association, through the secretary, instead of airing their supposed grievances in your journal.

The Tarred Paper Manufacturers' Association is not composed of would-be autocrats, but of business men who fully realize that the success of their Association depends upon the fair and equitable treatment of all their customers. The officers and members of the above Association not having been endowed with the brilliant intellects and marvellous executive ability of "Wanderer" and "Interested Pilgrim," have, no doubt, made several unintentional errors of judgment, but have always showed a willingness to rectify their mistakes when approached in a reasonable manner.

I feel safe in safe in saying that no other association in Canada has worked with less friction or given better satisfaction to the trade than has that of the tarred paper manufacturers.

If the above manufacturers tried to gratify and please the selfish desires of everybody they would succeed in pleasing nobody, and break up their association into the bargain. In the particular case now under discussion, I can assure "Wanderer" and "Interested Pilgrim" that the interests of the Montreal wholesale houses were not overlooked when Ottawa ceased to be a point of delivery in June last, and the present arrangement for equalization of freight places Montreal and Ottawa dealers on exactly the same footing, so far as the sale of building papers, etc., is concerned. The Montreal houses were duly advised in regard to this matter, and if they want any further information they can procure it by simply communicating with the secretary of the above Association.

As I have explained to these two gentlemen that they are mistaken in their ideas, and have also told them the proper course to follow when they think their interests are suffering at the hands of the Tarred Paper Manufacturers Association, this controversy is ended, so far as I am concerned.

"MEMBER TARRED PAPER MANUFACTURERS' ASSOCIATION."

"GOOD ENOUGH."

Any paint is not "good enough" for you to sell. You can't afford to sell anything but the best—the paint that will give satisfaction to your customers.

THE SHERWIN-WILLIAMS INSIDE FLOOR PAINT

is a paint that is "good enough"—it's the best floor paint that can be made. It dries over night with a good gloss. It is easily applied and covers the maximum surface. It is made to walk on and to stand hard wear. It's a paint you can make money out of. That's sure.

The Sherwin-Williams Inside Floor Paint sells well in every locality. We help the dealer to bring it to the front in a short time. We give him every possible aid to enable him to work up a profitable sale on it.

If you are not selling The Sherwin-Williams Inside Floor Paint now, it will pay you to write us for prices and further information.

CATALOGUES, BOOKLETS, ETC.

WESTERN FOUNDRY CO., LIMITED.

THE Western Foundry Co., Limited, Wingham, Ont., have issued a catalogue illustrating their "Crown Huron" range. This range has been remodelled and is now fresh from the pattern shops equipped with all the desired modern appliances. Besides being of excellent quality, and moderate in price, it is artistically decorated with nickel ornamentation. A reliable thermometer tests the temperature of the oven, while the fire-box can be fitted with either wood or coal grates. For a medium-priced range the "Crown Huron" is one of the best manufactured.

THE J F. PEASE CO., LIMITED.

The J. F. Pease Furnace Co., Limited, Toronto, have issued a catalogue concerning their "Economy" heater, termed "Comfortable Homes." This booklet is magnificently gotten up, and outside of the interest pertaining at this time especially to heating devices, this catalague would induce perusal by the style of the paper and the lucidity with which the excellencies of the "heater" are expounded. The construction of the boiler, smoke flues, etc., are such as to secure the utmost efficiency in the production and distribution of heat.

These "Economy" boilers are made in nine sizes, and will carry 250 to 2,500 ft. of radiating surface in addition to the mains.

EXCELLED BY NONE.

The National Cutlery Co.'s bankers' or paper shears are now in use in many of our banking institutions, and leading paperhangers at once recognize their superiority in shape and quality. They have no spots, no saw edges, and are fully guaranteed, and made with a steel ride. They are acknowledged to be excelled by no other make. Each pair is put up in separate pockets. Ask for catalogue. Decatur, Bull & Co., Montreal, are Canadian agents.

CLOSE OF COAL STRIKE.

With a gradually increasing tension extending over the past five months, the strike of the anthracite miners of Pennsylvania has at length reached a crisis and a solution is at hand. The operators have agreed to an arbitration committee appointed by President Roosevelt and all that remains is for the miners to ratify the agreement. A convention will be held on Monday next, at which it is expected the President's appointees will be accepted by the miners.

Reputation - Builders.

A single Gun that will do for twenty years what is expected of it by thousands of users will build for itself a reputation that

Glass just arrived, and can fill all orders for large and odd-sized windows for dwellings, etc. Heavy stock of all kinds of Window Glass, and can make prompt shipment. Prices are right. It will pay you to send us your specifications.

Hobbs Manufacturing Co., Limited, London, Canada.

CASKET OF CUTLERY FOR KITCHENER.

The Lord Mayor presented Lord Kitchener with a casket of fine cutlery, manufactured by George Butler & Co., Trinity Works, Sheffield, and 62 Holborn Viaduct, London, E.C. The contents are fine examples of the cutler's art, illustrating the staple trades of the city. Each article bears the firm's extra quality trade mark, "Cavendish." They are mounted in finest ivory and sterling silver. A special feature is a full seven day set of Butler's "Keen" razors, the finest examples of full hollow grinding done on their own premises. The contents are enclosed in a satin-lined case with silver mounts. The shield on top is engraved:

Presented to
VISCOUNT KITCHENER, G.C.B., O.M., etc.,
By
Alderman Semor, J.P., Lord Mayor of Sheffield,
September 30, 1902.

Messrs. Butler have well maintained he historic fame of Sheffield for cutlery of the highest class.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

THE STATE OF TRADE.

BUSINESS in the machinery line is very brisk at present. The large manufacturers say that a larger trade has not been done for years than that doing at present. They are anxiously awaiting the settlement of the coal strike, so that soft coal will again come within a reasonable price. Some of the manufacturers are so busy that they were compelled to work on Thanksgiving Day.

NEW COMPOSITION SOCKET BUSHING.

The Canadian General Electric Company, Limited, Toronto, are furnishing the trade with a sample of their new style composition socket bushing, No. 756. It is made to suit the requirements of the underwriters' rules, and is very convenient. This company deserve great praise for the unique way in which they are advertising their business. The composition socket bushing is attached to a private post card, very neatly designed and printed.

THE PASSING OF THE FIRE ENGINE

At a convention of the International Association of Fire Chiefs, held in New York City, the chief of the Baltimore Fire Department read a paper on the fire departments of the future in large cities. The paper started a discussion on the merits of mobile fire engines as compared with stationary pumping plants, standpipes, and sprinkler systems. The chief of the Chicago Fire Department declared that 92 steam engines in Chicago could be dispensed with if 12 pumping stations were at hand. A representative from Boston gave it as his opinion that the clang of the engine through the cities' streets will soon be as out of date as the old vamp brake pump.

ELECTRICAL POWER FOR AGRICULTURE.

In a paper read before a recent conference of German electrical engineers, Dr. Haas, of Hanover, referred to the electric power supplied to agriculture in that neighborhood. The greatest demand for current was for the operation of threshing machinery, although energy was also used for driving pumps, hay presses, straw-cutters, etc. Of the total horse-power installed, 77 per cent. represented purely agricultural operations, and 8 per cent. factories, although the former only yielded 53 per cent. of the receipts. On an average the annual revenue per horse-power installed amounted to £6.73 (as compared with from $17.03 to $36.50 in towns) at a price of 57 cents per kilowatt hour, and the average period of use did not reach 150 hours, as against 500 hours in towns. There is little demand for light in the villages, as the people retire early. The author concludes, from the experience in the Hanover district, that satisfactory results are possible in agricultural operations only where cables already exist for the transmission of power, or for electric tramways, which can readily satisfy the small and occasional demand for agricultural purposes.

THE ANGLO-BELGIAN TELEPHONE.

U. S. Consul G. W. Roosevelt writes from Brussels, September 11, 1902:

"The Anglo-Belgian telephone service will be inaugurated in about two months. The submarine cable stations are located at St. Margaret's Bay, near Dover, and at La Panne, a Belgian seaside resort. The work of laying the cable is completed, and the company is now placing the aerial extensions in both England and Belgium. The cable is 90 kilometers (55,422 miles) in length and has two circuits. The total cost when completed will be about 2,000,000 francs ($386,000), to be shared equally by England and Belgium. Belgium will communicate with England from the cities of Brussels and Antwerp only. If communications are numerous and the new line is profitable to the Government, the service will be extended to other cities. The rate of communication has been fixed at 10 francs ($1.93) per three minutes."

TWO RECENT NOVELTIES.

Two recent novelties are found in a railway inspection car that has just been brought out by The De Dion Company in France, and an agricultural motor that has made some interesting exhibitions in England. The former weighs but 660 lb., is fitted with a 3½ horse-power motor, and is capable of carrying three persons as fast as 36 miles per hour. The operator is seated on a saddle back of a cross-seat arranged for inspection purposes. The lvel agricultural motor, the invention of Mr. Dán Albone, of Biggleswade, is designed to draw anything from a wagon to a plow, and it can be used, when stationary, for grinding corn, etc., about the farm. It is propelled by a double cylinder, 8 horse-power motor. When used for ploughing the cost of fuel worked out at about 16c. per acre.

MARKET FOR CHEAP FARM MACHINERY.

Mr. J. C. Jardine, Canadian commercial agent to South Africa, in a report to the Department of Trade and Commerce, dated Pretoria, September 8, encloses a list of current prices there for goods which might be supplied from Canada. He says: "A very large demand has arisen for the cheapest and most simple classes of agricultural machinery, cultivators, ploughs, harrows, etc., of the most inexpensive kind, suitable for the thousands of expatriated Boers, discharged Australians, Canadians and British irregulars remaining here. The Imperial Government is placing these people on the land and giving them a start. I went yesterday to interview Major Leggatt, an Imperial officer, who is at the head of this movement. One of his assistants is a Canadian officer, and both are exceedingly anxious to place orders with Canadian firms if machinery of the kind can be made promptly, rather than buy in the United States, as they say British implement makers cannot compete, being a different class. Major Leggatt has kindly promised to mail to Cape Town next week a descriptive list of the articles required, and I will send it to you. Agricultural firms in Canada in a position to make these cheap ploughs, etc., should let me hear from them at once, as about 50,000 settlers of this class are to be put on the land, and these articles are to be paid for by the Imperial Government. Canadian firms by acting promptly will most likely obtain a share of this trade."

A 50-YEAR FRANCHISE.

A 50-year franchise, 20 years' exemption from taxation and right-of-way over the township roads are given by the Westminster township council to The Southwestern Traction Company of London, Ont., in the by-law passed on the 7th inst. The road, when completed, will extend from Ingersoll to Glencoe, passing through London.

ELECTRIC MACHINERY FOR PEAT.

NOW that a dearth of anthracite coal has become a reality, former speculation regarding the means of obtaining an efficient fuel outside of this most convenient article, has now intensified, and ingenious minds are casting about in every direction to discover how to obtain the most available as well as the cheapest substitute.

Oil has been utilized to some extent by many for heating purposes, but while this is present in sufficiently large quantities in Texas and the Southern States for this purpose, in other parts its use is impracticable.

Peat, which is present in enormous quantities in many countries in Europe, especially in Austria, Hungary, France, Germany and Ireland, has long been used to some extent at least for fuel, but owing to its comparatively small heating capacity, it has never hitherto been considered a serious rival to coal.

The former method of preparing peat for heating pnrposes was through pressure by machine, whereby the wet material, obtained directly from the bogs, was transformed into fuel which contained, however, but 30 to 50 per cent. of carbonaceous matter.

Latterly, it has been discovered that peat transformed into peat-charcoal has a heating efficiency quite equal to that of coal, and the sole problemn to be solved was the carbonization of the wet peat.

This question has been solved, it is claimed, by Mr. P. Jeksen, of Dale, Norway, whose invention has materialized in an electrical plant for peat manufacture at Stangfjorden, Norway, described in a recent issue of Scientific American.

According to this invention, the partially dried peat is heated in hermetically closed retorts by electric heat, derived from dynamos driven by water power, with the aid of turbines. The carbonized fuel obtained by this method contains 76 per cent. of carbon, and ignites readily, spreading an immense heat with but a small amount of soot.

To drive the machinery for this operation 128 H.-P. are required. The peat is now brought to the factory direct from the bogs in lighters of 100 tons capacity, which are discharged by mechanical power. After being subjected to a five H.-P. press, the peat briquettes are then subjected in the retorts to heat and an air draught.

Over 1,000 of air-dried peat blocks can be produced by this machine in one day. It is shipped to many parts of Norway, and enjoys a ready sale.

EXIT THE HORSE.

Owing partly to the automobile and partly to the trolley car, the horse is rapidly disappearing from various large cities of Europe. Thus in Paris the total number of horses in 1901, according to a municipal census of these animals, was 96,698, while this year it is only 90,796, a falling off of about 6 per cent. In London, in the same period, the equine population has decreased 10 per cent., while in Berlin, Vienna and even in St. Petersburg the same falling off is to be noted. In the United States the supercession of the horse by the trolley car has been absolutely astonishing in its extent. Probably to-day in New York there are not more than two-thirds as many horses employed as were used 20 years ago. So far the automobile appears to have made no great inroads into the horse business, and it is likely that the extension of the use of automobiles will have to wait upon the growth of more scientific ideas regarding street paving and road-making. However, the decadence of the horse is upon us, and his disappearance may be looked for sooner or later. On this point The Electrical Review ventures the opinion that the progress of engineering will develop methods that will totally extinguish the horse as a beast of burden.

ELECTRICAL AND MACHINERY NOTES.

GUEST & CO., Toronto, are shipping two water motors to Mr. Seagram, Waterloo, Ont., and one to The Verity Plow Co., of Brantford, Ont.

A semi-portable boiler and engine has been shipped to Andrew Murdock, Hamilton, by H. W. Petrie, Toronto.

The Polson Iron Works are installing a new Heine boiler in The Toronto Carpet Company's Works, King street west.

Fiddes & Hogarth, Toronto, are installing the electric fittings in the new premises of Mrs. Roberts, Beverley street.

A 35-inch Leffel water wheel was shipped to James Grant, Mulgrave, N.S., a few days ago by H. W. Petrie, Toronto.

McDonald & Wilson, Yonge street, Toronto, are putting in the electrical fixtures in the additions to both Havergal and Wycliffe Colleges, Toronto.

A shipment consisting of a shingle machine, shingle bolter and edger has been made to Thomas H. Thompson, Haileybury, Ont., by H. W. Petrie, Toronto.

The Canadian Iron Company has been organized at Youngstown, O., with a capital of $200,000. The incorporators are J. Craig Smith, Edward Ritchie, Grant S. Whitslar, Grant L. Cleveland and Frank Brown, all of Youngstown. The company has acquired the property of The Abbott-Mitchell Iron and Steel Company, located at Belleville, Ont. The plant, which for the present is inactive, manufactures bar iron, bar steel, cut nails, horseshoes, railroad spikes, track bolts, washers, etc. The price paid was $17,000.

AFTER THE SHUTTERS ARE UP.

ONCE two beautiful white eggs laid side by side in a new nest. A big man gathered them up with his rough hands and sold them to a grocer. And one little egg was a good little egg and went into an angel cake, but the other little egg was a very, very bad little egg, and got mashed on an actress.—Town Topics.

* * *

A teacher in the Dallas county public school recently received the following letter :

Sir,—Will you in the future give my son easier soms to do at nites ? This is what he's brought hoam two or three nites back : " If fore gallins of bere will fill thirty to pint bottles, how many pints and half bottles will nine gallons of bere fill ? "

Well, we tried and could make nothin' of it at all, and my boy cried and laughed and sed he didn't dare to go bak in the mornin' without doing it. So I had to go and buy a nine-gallin keg of bere, which I could ill-afford to do, and then he went and borrowed a lot of wine and brandy bottles. We fill them, and my boy put the number down for an answer. I don't know whether it is right or not, as we split some while doin' it.

P. S.—Please let the next some be in water, as I am not able to buy more bere.—Mobile Register.

* * *

The publisher's private secretary was, above all else, a young woman of refinement, both of conduct and of language. Brought up in New England and educated at a college famous for its niceties and elegancies of existence, she was as far removed as possible from the slang-using, bang-wearing, gum-chewing stenographer of the comic papers. Next door to the publisher's establishment a young Englisgman, striving with moderate success to establish himself here as a landscape architect, had opened an office. In due course of time he became acquainted with the publisher, who, in turn, introduced him to the private secretary. One day, when the private secretary was sitting serene and dignified at her desk, there entered precipitately the Englishman.

" How do you do ? " she said sweetly.

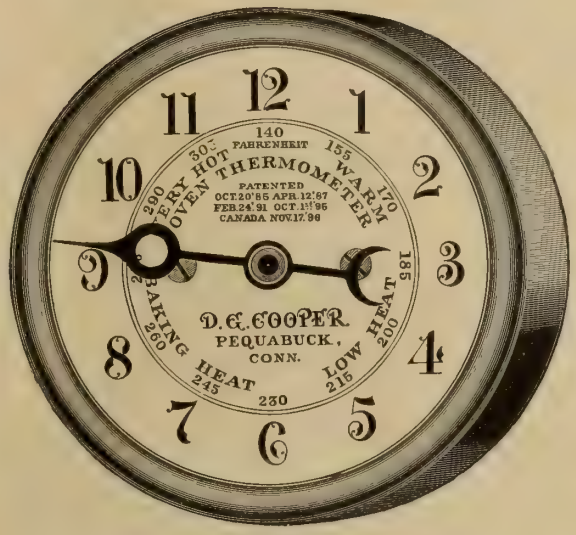
" I beg your pardon," said the Englishman, " but could you spare me just a little of your gum ? "

" Gum ! " she explained in horror. " Surely you don't think I——"

" Really, I beg your pardon," ejaculated the Englishman, a second time, in still more confusion. " How stupid of me. I remember now you say mucilage in America."

The Cooper Oven Thermometer

The First, Best and only thermometer ever used on stove oven doors which is of any real value to those who do baking. This is no loose advertising talk, but statements easily verified by facts.



FULL-SIZED CUT OF DIAL.

Many of them have been in constant use thirteen years, and many thousands of them from eight to ten years. Used by over forty manufacturers of the highest-grade ranges in the U.S. and Canada.

Since the use of the Cooper Thermometer has shown the necessity for such an instrument on oven doors, within the past five or six years there have been some half dozen devices put on the market called oven thermometers.

They do not deserve to be so-called.

Their bad working is depopularizing the NAME of oven thermometer with the public, who do not understand the difference between them and a good one.

Fortunately, unlike a watch, their value can easily be known by their faces.

Twenty degrees difference in the temperature of an oven is sufficient to make "good luck" or "bad luck" in baking many kinds of food.

Unless an oven thermometer will plainly indicate such change, by a movement of the hand SUFFICIENT to be EASILY SEEN, such thermometer is positively worthless, by which to regulate the fire and heat of an oven. An attempt to use them for that purpose only produces disappointment and disgust, more or less of which attaches to the stove on which they are used. Between normal temperature, and extreme baking heat, there is a difference of 325 to 400 degrees. If for such a change of temperature, the whole movement of the hand of an oven thermometer is only two or three inches, it is plain that with a change of 20, 30 or even 40 degrees the movement of the hand would be too slight to be noticed by those who usually do baking, at least without a magnifying glass, which is not commonly used in a kitchen. The hand on the Cooper thermometer moves over six inches with such change of temperature, PLAINLY shows a difference of 8 or 10 degrees in the heat of the oven, and even 2 degrees can easily be seen, by a slight knock on the oven door.

Next to good working, DURABILITY is the most valuable quality in an oven thermometer. Thirteen years of satisfactory working is a very good record for the Cooper thermometer. Not being obliged to increase the radius of the hand in order to give it sufficient movement to be noticed, the dial on the Cooper thermometer is only as large as is necessary to be plainly seen by those using it, thereby making the danger of breaking much less than if it had a larger diameter. Those who use them do not say they "Do not think an oven th mometer amounts to much, anyway." The most common expressions of those who use the Cooper thermometer is, "I would not TRY to keep house without my oven thermometer," or "I don't know how I ever got along without it."

It is easily adjusted to either a swing or drop door, and is the best selling point ever put on a stove or range. However highly it is praised by the seller, it is more than verified when used. Do not buy a worthless article because it can be bought for a few cents less. It is sure to be far more costly in the end. An honest TILE is preferable to a "make-believe" oven thermometer.

The price of the Cooper thermometer is very low indeed, when cost and VALUE are considered.

Every thermometer carefully adjusted, and tested by heat, before sending out.

MANUFACTURED AND SOLD BY THE INVENTOR,

D. G. COOPER, - PEQUABUCK, CONN.

THE ADVERTISING ARENA.

ADVERTISING is by no means confined to newspaper publicity, and a merchant should not forget this important point. A man's correspondence is a great indication of what his business is like. Even if he cannot afford a typewriter, he should at least see that his letters are neatly written and that his letter-head is well printed. This is an indirect form of advertising. Then, there is the tying-up of parcels. If this department is not carefully handled, an air of sloveliness may creep into the business which will tend to keep some customers away. Then, again, if a delivery wagon be used, it should be kept spick and span, both as regards the wagon and harness. A smart-looking turnout is sure to create a favorable impression in the minds of the public. Cleanliness, of course, is always deserving of praise, and if a customer feels that his or her purchases are handled carefully, he will be more inclined to patronize the shop that looks after this matter.

* * *

In making a contract with a newspaper it often pays to have a clause inserted to the effect that, during the period the contract runs, the advertiser is at liberty to use space between certain limits. That is, there is a maximum and a minimum space, which he can use at will. Very often it is unnecessary to use a large space, as, for instance, after Christmas or after a country fair. At such times it is economy to be able to resort to a smaller space at a lower price. No publisher is likely to repudiate a contract which provides for the use at will by his client of one of three spaces.

* * *

Good business methods are based upon the ability to keep track of public opinion regarding merchandise and follow it with as few mistakes as possible. Good advertising is simply the application of the same methods to the exploiting of that merchandise. Therefore, the successful merchant is usually successful in advertising. He may lack the ability to write ads., but his knowledge of what the public wants or does not want is of far more importance to his advertising than the mere literary work. The trained ad-writer can set forth his wares in the best light, using his knowledge of display, mediums, argument and pictures to let the public know what the merchant has in stock, but the knowledge of the public's likes and dislikes is the largest factor in the campaign. Not all the word-juggling in the world will induce it to buy what it does not want, nor will any lack of advertising keep it from buying what it does want. Advertising simply facilitates the work of bringing merchant and buyer together.—Printers' Ink.

* * *

Such an amazing amount of literature is published nowadays about advertising, in which its advantages are made to transcend every other consideration, that one cannot blame a merchant if he jumps to the conclusion that returns to advertising are as certain as dividends on Bank of England stock. There is nowadays so much excellent advertising done, that it becomes every day more difficult to write convincing ads. This is not said to discourage would-be advertisers, but merely to warn them not to build their hopes too high. Everybody knows that advertising has paid many who have tried it. There is no reason why others should not derive advantages from it as well. Only in starting an advertising campaign, don't expect too much at first. Perseverance in it, as in every branch of business, is requisite to success.

* * *

Ask an intelligent inhabitant of any town who is the leading grocer or the leading drygoodsman or hardware merchant in that town and it will usually be found that it is the man with the greatest publicity. It may be in some cases that the publicity has come from the business, while in other cases it may be that the business has sprung from the publicity. (By publicity is not necessarily meant newspaper advertising, but everything about the business which makes it known to the people. The little corner store out on the border of the town is known to but a few people in comparison with the handsome downtown store. The latter has the greatest publicity.) The point is that business and publicity go hand-in-hand, and if the two are so guided and directed as to work in harmony, great results are certain to follow. There should be progress in both departments. The business may be pushed on with no conscious thought of the publicity, but such progress is slow in comparison with what it might be were the publicity watched as well.

* * *

"Why don't you trade with me?" said a close-fisted merchant to a customer the other day. "Because," replied the customer, "you have never asked me. I have looked through all the papers for an invitation in the shape of an advertisement, but in vain. I never go where I am not wanted." The time to put forth special efforts is the time when people will not buy unless specially urged to do so. It is a mistaken idea to sit still in dull seasons; the time to push business is when business needs pushing. It stands to reason that when things are lively people are going to buy anyway, and it takes less efforts to secure patronage, but the merchant who hesitates to put forth advertising expenditures in dull seasons is only adding to his burden, for instead of judiciously expending money in advertising to induce people to buy, he sits idle, letting regular expenses run on and hoping when the busy season does come along to catch up the loss.

* * *

The best advertisement that can be written is that which puts you in communication as directly as possible with those to whom you appeal and at the same time does not put you on a false footing with them.

* * *

Don't surround your ideas with typographic obstructions, nor let anything in your advertisement become more prominent than the one thing that is going to make customers of your readers.

* * *

An illustration should, as nearly as possible, convey some idea of what your business is. Do not fill your valuable space with something foreign to your product.

* * *

The first object of an advertisement is to cause the reader of it to believe that he needs the article advertised, and the second, to leave him in such a frame of mind that he will take the trouble to learn more about it.

* * *

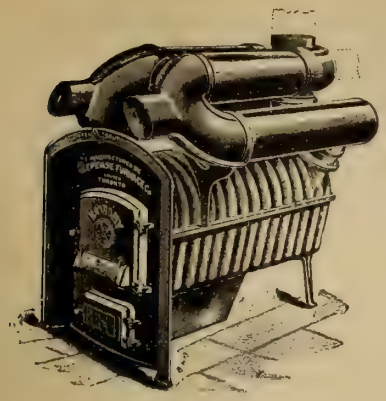
The man who has a horse to sell selects his prospective customers, and then tells them about the horse. This is advertising, and it is about as far as advertising can go. What the man with the horse for sale tries to do is to get someone enough interested to look at the horse, then salesmanship comes in to do the rest.

* * *

Most failures in advertising come from the belief on the part of the advertiser that the only thing necessary is to state in the newspapers or other publications what he has to sell, and then sit down and wait for the orders to come in. Active salesmanship is required to cinch the business.

* * *

The country merchant, or the purely local advertiser in any line, can generally get assistance from the publisher of his local paper, and to him he should go for advice and help. The merchant knows what he has to advertise and what he wants to say—someone connected with the paper can help him say it so that it will attract the eye and impress the mind.



Wood Furnaces.

Our "Economy" Wood Furnace is acknowledged to be the best thing in that line on the market. The castings are made from original patterns by our Company—are of even thickness.

It has an extra large combustion chamber and ample feed and ash-pit doors. It works easily and gives a good steady heat.

MAKING PIG TIN FROM TIN SCRAP.

THE reclaiming of pig tin from tin scrap by the process generally known as detinning, resulted, according to Mineral Industries, in the reclaiming of about 825 tons of pig tin in 1901. Of this amount 500 tons were recovered by The Vulcan Detinning Company, of Philadelphia, which was chiefly converted into chlolride of tin and about 250 tons were recovered by Johnson, Jennings & Co., of Cleveland and Chicago, which was partly made into pig and partly into tin oxide. Otherwise there was no production of pig tin in the United States during the year 1901. Some experimental work was carried on in the Black Hills, South Dakota. Five tons of selected ore was concentrated into 1,361 lb. of tin oxide—cassiterite—which contained gold to the value of $10.

The total value of the product was reported to be $1,525. Several hundred tons of low-grade ores have been mined for exploitation purposes, but as yet the tin industry of the Black Hills has not been placed on a commercial basis.

A discovery of stream tin on Buhner Creek, in Alaska, 10 miles east of Cape Prince of Wales, in York gold field, has been made, two or three feet of gravel overlie the red rock which consists of arenaceous schists, often graphitic and graphitic slates.

The stream tin is concentrated on the bed rock with small amounts of magnetite, limonite, pyrite, fluorite, garnets and gold.

A second location is on the Anaovik River into which the Buhner Creek flows, and is about half a mile from the latter deposit.

Recoveries from 150 to 200 lb. of cassiterite per cubic yard are reported.

ASSOCIATION OF GAS STOVE MANUFACTURERS.

The gas-stove makers for several years have complained that evils have existed in their trade that had a pernicious effect on the profits, and considerable effort has been expended to accomplish a change. Evidently the activity of the trade this year has brought an acute feeling of these evils to many who have heretofore suffered them in dogged silence. This has developed a desire to brush away the obstacles to a more satisfactory business, and effort is being made to organize the gas-stove manufacturers. A preliminary meeting of the manufacturers in the territory adjacent to Chicago and having branches there was held in that city recently to arrange for the organization of an association on lines similar to those of the National Association of Stove Manufacturers. Another meeting will be held in about two weeks to complete arrangements for a permanent association. This is a step in the right direction, and it is to be hoped that an association will result that will be strong enough to effect those reforms, which will put this branch of trade on a more satisfactory basis than now exists.—The Metal Worker.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

JOHN W. BRAY, hardware merchant, Port Arthur, Ont., has assigned to Alex. W. Thompson, and a meeting of creditors will be held on the 20th instant.

A. L. Trudeau, general merchant, of Brompton Falls, Que., has assigned.

C. J. Upton, general storekeeper, of Elmvale, is offering to compromise.

S. Bertrand, general merchant, Notre Dame des Anges, Que., has assigned.

Chartrand & Turgeon are the curators of P. Morin, general merchant, St. Tite, Que.

David Genest, general storekeeper, Ste. Gertrude, has assigned to Lamarche & Benoit.

Watts & Co., general merchants, Walsh, Ont., have assigned to Osler Wade, of Toronto.

A meeting of the creditors of Isaie Pigeon, general storekeeper, Montreal, was held on the 14th inst.

Adrien Barrette, general merchant, St. Tite, Que., has assigned, and his creditors held a meeting on October 13.

PARTNERSHIPS FORMED AND DISSOLVED.

Clarke & Connolly, contractors, of Toronto, have dissolved partnership.

Reid, Campbell & Co., general merchants, Moyie, B.C., have dissolved.

W. Fallon, general merchant, Atikokan, N.W.T., has admitted —— Hutchings as partner.

D. McPherson, general merchant, Basswood, N.W.T., has admitted James Atkin as partner.

H. H. Coleman & Co., importers of hardware, London, Ont., have dissolved partnership.

Kirkham & Stewart, of Lethbridge, Alberta, hardware merchants, have dissolved partnership. D. Stewart continues the business.

SALES MADE AND PENDING.

Louis Loblow, blacksmith, of Yorkton, Manitoba, has sold out.

John Waddle, of Port Dover, Ont., is advertising his planing mill for sale.

Geo. W. Welz, tinware dealer, Elora, Ont., has sold out to A. R. K. Macdonald.

The assets of J. A. Lomme, general storekeeper, St. Johns, Que., have been sold.

The assets of A. Lafontaine, general merchant, Drummondville, Que., have been sold.

The stock of Mrs. A. E. Hainsworth, general storekeeper, Meadow Lea, Ont., was sold by auction.

The assets of Alfred Bouchard, of Les Eboulements, Que., sawmill and carpenter shop, have been sold.

Alex. McKercher, agrigultural implement maker, of Petrolea, Ont., has sold his business to J. Kerrigan.

CHANGES.

F. A. Moore, general merchant, Petrel, Man., is succeeded by Wm. Currie.

G. H. Miner, general merchant, Moyie, B.C., has closed his branch there.

Ledgerwood & Lytte, agents for agricultural implements, Arnprior, Ont., are to be succeeded by Ledgerwood & Rollins.

The Spicer Shingle Mill Co., Limited, Vancouver, B.C., are applying for permission to change their name to Woods & Spicer, Limited.

The Perkins Mills Lumber Co., Perkins, Que., lumber and general merchants, have disposed of their general store business to Edward Smith.

FIRES.

George Reid, general merchant, St. Felix de Valois, Que., was burned out; insured.

The premises of C. G. Folkes, general merchant, Manotick, Ont., have sustained damage by fire; partially insured.

DEATHS.

John Rooke, builder, Toronto, is dead.

Matthew Chester, wagonmaker, of Norway, Ont., is dead.

John Eagan, general storekeeper, of Ketch Harbor, is dead.

Mary A. Tomlin, general storekeeper, of Ashville, N.W.T., is dead.

HARDWARE SPECIALTY MAKERS TO UNITE.

A despatch from Providence, R.I., says: It has become generally understood here that The R. Bliss Manufacturing Company, of Pawtucket, is to join its interests with the new company, which is being organized to take over all the leading firms of the country engaged in the manufacture of novelties and hardware specialties. It is reported that the new corporation will comprise about 40 different concerns, large and small, throughout the country, and the capitalization will be between $7,000,000 and $10,000,000. The new company, which will be known as The American Novelty Company will be organized under the laws of New Jersey.

The R. Bliss Company has a capital of $150,000, and is one of the largest concerns of the kind in the United States. Some of the other big firms are located at Grand Rapids, Mich., South Bend, Ind., Chicago, Freeport, Ill., and throughout New York State and the Middle West.

It is said that by December 1 the reorganization plans of the new corporation will be perfected and the transfer of stock of all the shareholders interested in the new company will be effected.

MANITOBA MARKETS.

Winnipeg, October 13, 1902.

THE demand for hardware is increasing in many lines and all the jobbing houses are very busy. No change has occurred in hardware prices for the week. In paints, oil and glass there is no change. The local oil mills are now running, and linseed oil has dropped 7c. per gallon and may go lower, as the supply of first-class flax is large this season. Turpentine remains at the advance quoted last week, but the further advance in some of the primary markets has made the price here very firm. Glass is in heavy demand, but strange to say it is cheaper in Winnipeg than perhaps anywhere else at the moment, as for some reason the dealers have not advanced their prices in sympathy with the movement elsewhere, and at present they are selling glass at considerably less per box than they could lay it down here for, were they obliged to replenish their stock. Prices in all other lines are without change.

NOTES.

Kirkham & Stewart, hardware merchants, Medicine Hat, N.W.T., have dissolved partnership, Mr. Stewart continuing the business.

The Codville Company have let the contract for the erection of a new coffee and spice mill. It is understood the work is to go forward immediately.

The G. F. Stephens Company have let the contract for the foundation of their new warehouse, which will adjoin their present one on Market street east. Only the foundation will be put in this fall, and the building completed as early as possible next spring.

Hardwaremen report a perfect boom in the sale of wood stoves. Many people are putting in air-tight heaters with a view to burning wood, for heating, until such time as the very cold weather begins. Everybody talks fuel these days, and every second man has a plan for getting over the difficulty.

MORE STEAMSHIPS TO USE OIL FUEL.

Every vessel but one of The Pacific Mail Steamship Company's fleet is now in commission, and plans have been prepared for fitting them all to burn fuel oil. Nine of the vessels are now in the trade between San Francisco and Panama, and three others are on the run t Asiatic ports. According to the plan, it is proposed to establish oil-supply stations at Panama, at Honolulu and at one of the Japanese ports. The station at Panama may be supplied from the wells in Peru and the one on the Orient from Russia.

Mary Rogers, general merchant, of Atwood, Ont., was burned out.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, October 15, 1902.

HARDWARE.

BUSINESS in wholesale hardware circles has continued quite satisfactory, and in spite of gloomy predictions no material effect on sales has come from the unprecedented situation in coal. Several changes in prices are reported this week, among them barb wire, which is quoted 10c. lower for shipment from stock. A new list on wood hay rakes has been issued, which will be found below. Galvanized plain wire has also been reduced in price. Common sad irons are now quoted at $4.20 instead of $3.50, as formerly. Plated are worth $4.50.

WOOD HAY RAKES.—The new list on these is as follows: 313, No. 2, straight wood bow, $2; 314, No. 2, bent wire bow, $2.10; 315, No. 1, straight wood bow, $2.20; 316, No. 1, straight wire bow, $2.30; 317, No. 1, bent wood bow, $2.50; 318, No. 1, bent wire bow, $2.55; 319, extra finish, wood bow, $2.80; 320, extra finish, wire bow, $2.90; 321, extra finish, wood bow, oil head, $3.10; 322, extra finish, wire bow, oil head, $3.25; 323, XX American pattern, wood bow, oil head, $3.50 per dozen. Discount, 40 per cent.

BARB WIRE.—This is now quoted at $2.90 per 100-lb. keg f.o.b. Montreal. The price will likely remain in force until the end of the month. The price f.o.b. Cleveland is $2.55.

GALVANIZED WIRE.—Prices have been reduced all round on this wire, and we now quote as follows: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20.

SMOOTH STEEL WIRE.—Trade in most lines continues quiet. Quotations are as follows: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb., are now as follows: Coppered wire, 60c.; tinned wire, $2.; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The demand for fine wire continues light and the market shows no new feature. The discount is 25 per cent. with net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—Trade continues quiet and the prices are unchanged. The discount on both wires is 62½ per cent.

FENCE STAPLES.—There is no improvement in this market. Galvanized staples are worth $3.25 and bright, $2.90 per 100-lb. keg; 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—A fair trade is doing in wire nails. The price is $2.55 per keg in small lots and $2.50 per keg in carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is no change. We quote $2.45 in small lots and $2.40 in carlots.

HORSE NAILS.—There is an active movement in this line and no quotable change is reported. The discounts are: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch," 65 per cent.

HORSESHOES.—Business in horseshoes continues brisk at steady prices. We quote: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—No change has been made in the price of these articles, which are not in active demand at present.. The discounts are as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—There has been some business put through during the week, but trade is not active. Discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3⅝c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—There is not much doing in this line. The discounts are unchanged, and our quotations are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—No binder twine is being offered now and we have withdrawn the prices until those for next season are fixed. In cordage, trade continues rather quiet. We quote: Manila, 15c.; British manila, 13c.; sisal, 12½c. and lathyarn, 11½c.

BUILDING PAPER.—The market is without feature this week and business is quiet. Quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—There is no change. The price is still $1.37½ per 100 square feet.

POULTRY NETTING.—The discounts are unchanged, and our quotations now are: Canadian and English netting: 50 and 10 per cent. off on 2 x 2 mesh, 19 wire and 50 per cent. off on 2 x 2 mesh, heavier. Canadian list used.

HARVEST TOOLS.—There is no change. For 1903 delivery the discount is 60 and 10 per cent.

FIREBRICKS.—But a light demand is experienced and the prices are unchanged. English selling at $16 to $22 and Scotch at $17 to $22 per 1,000.

CEMENT.—The demand for cement is good and the market is active. We quote as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—Trade this fall has been of the best and a good demand is still felt. Discounts on shells: Empty: Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded "Trap," 30 per cent.; American, 30 per cent.; "Leader" and "Ideal," smokeless

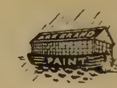
A Painter's Paint



is a paint that it will pay you to handle. It will mean an enormous increase in your sales.

"Ark Brand" Paint

is the only prepared paint that the painters will use **and guarantee.**

Read an extract from a letter just received from our Baysville customer:

"I am glad to tell you that I am going to supply the paint for a "very nice house built here during this summer. I heard the party "was going to use —— Paints. However, I saw the party and con- "clusively showed him that the 'Ark Brand' was superior in quality, "***and, if it did not turn out as I stated, I would do the work "again for nothing.*** Being a practical painter of many years' "experience, besides having a reputation through this country for "first-class work, was quite sufficient to convince my customer. I "have used many brands of prepared paints, but must say yours "have been the most satisfactory of any, and I purpose, all being "well, to carry a much larger stock next year, to meet the growing "demand for 'Ark Brand' paints.

brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SNOW SHOVELS.—The market continues active, and our quotations are still as follows: "Habitant," $2.25 to $2.40; "Victor," 30 per cent. off; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—Business in this line is fairly good. We quote as follows: No. 70, 38½ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.; No. 65, $1.37½ to $1.45; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21; No. 9, $1.52; No. 11, $1.82.

METALS.

Nothing of importance is reported on the local metal market this week. There is a continued good demand for all lines in season, and both manufacturers and jobbers are very busy.

BAR IRON.—There is a fairly good demand for this metal. The price is $1.95 for merchants' bar, while horseshoe iron sells at $2.20.

BLACK SHEETS.—There is no change. A good demand keeps up, and we now quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Prices on galvanized iron are unchanged. We quote now as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾-oz., $4.40; Fleur de Lis, $4.15; Comet, $4.25; "Bell" brand, $4.30. For less than case lots 10c. extra is charged.

SOIL PIPE AND FITTINGS.—Our quotations are now as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—No change in the price is reported. There is a heavy demand. We quote: Canadian, $18.50 to $19 and Summerlee, $21.50 to $22 ex-wharf Montreal.

INGOT COPPER.—We quote 13c. A fair demand is experienced.

INGOT TIN.—There is a fairly good movement in tin. No quotable change has been made. Straits is worth 30 to 31c.

PIG LEAD.—The price remains at $3.25 with a fair trade doing.

LEAD PIPE.—There has been no change. Composition and waste are quoted at 8c. and ordinary at 7c. The discount is 37½ per cent.

IRON PIPE.—A moderate inquiry prevails for iron pipe and a fairly good business is doing this week. Quotations are as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—In this metal there is no quotable change to report. Nothing further has been reported from the English market, and a moderate business is done on a basis of $4.75 to $5.25 for charcoals and $4.25 for cokes.

STEEL.—There is a steady demand for this at unchanged prices. Our quotations are now as follows: Sleighshoe, $2.05; tire, $2.20; bar, $2.05; spring, $2.85; reeled machinery, $2.75; toecalk, $2.70.

CANADA PLATES.—Business in Canada plates continues active and the prices are firm. Our quotations are now as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

SHEET STEEL.—There is not much business doing this week. We quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is no change. A fair movement is reported at the following prices: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

TERNE PLATES.—The market is quiet. We quote $7.50.

COIL CHAIN.—No improvement is noted this week and only a light inquiry is experienced. Quotations follow: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼ in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—We quote $5.85 to $6.25. There is not much doing.

ANTIMONY.—We quote 10c. The demand is light.

ZINC SPELTER.—Very little business has been done this week. The price remains at 5c.

SOLDER.—A good, steady demand continues for solder, bar solder selling at 20c. and wire solder at 18c.

PAINTS AND OILS.

In response to the short shipments from the source of supply at the South, turpentine has been advanced 2c. on the local market. It is thought that this advance can be maintained and perhaps added to slightly before long, as an active demand has set in from the large furniture and other factories. White lead is moving out at a lively pace, and some manufacturers of putty are running on extra time in order to meet the demand. The general paint trade is steady, without particular feature, excepting as above noted. Glue is quiet. Dry colors are in fair request at steady figures. We quote :

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25 ; No. 1, $4.77½ to $4.87½ ; No. 2, $4.40 to $4.50 ; No. 3, $4.02½ to $4.12½ ; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 72c.; boiled, 75c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 74c. ; 2 to 4 barrels, 73c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

EASTLAKE SHINGLES

ARE SO EASY TO HANDLE.

They fit together perfectly by means of their patent side lock—can be quickly laid by any handy man—and last so long, being absolutely Fire, Rust, Leak, and Lightning Proof. These are the points that commend them to your customers.

You're not doing all the business you might do, unless you keep Eastlakes in stock.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

SCRAP METALS.

There has been no material change in the scrap metal market, which continues quiet. Prices are unchanged, and we quote : Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2¼c.; iron No. 1, wrought, $15 ; No. 2, $7 per ton ; machinery scrap, $16 ; stove plate, $12 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb. ; old rubbers, 6½ to 6¾c. per lb.

GLASS.

The local glass market continues entirely unchanged. Trade is quiet. Prices remain as follows : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

There is a fair business doing this week. No change in prices is reported. We quote as follows : No. 1 hides, 9c. ; No. 2. 8c. ; No. 3, 7c. Calfskins, 8 to 10c. ; lambskins, 60c.

MONTREAL NOTES.

Turpentine is 2c. higher.

Galvanized wire is lower.

Common sad irons have advanced 70c. per dozen.

Barb wire has been reduced 10c. per 100-lb. keg.

ONTARIO MARKETS.

Toronto, October, 17, 1902.

HARDWARE.

A BRISK demand for all lines of fall hardware continues, and some manufacturers are experiencing a good deal of difficulty in procuring supplies of coal and pig iron. If the high prices which are at the present time asked for these articles should prevail for any length of time, most lines of hardware will have to be advanced materially. The makers of sad irons, patent coat hooks, registers, axle pulleys, scales, pumps, and similar goods claim they are at present losing money on these, as the cost of the raw material is higher than usual. There has been a large demand for oil stoves, gas stoves and gas tubing during the last week or ten days, but the reports coming to hand that the coal strike was on the point of terminating have, this last day or so, quieted down the demand for these and stimulated the sales of coal stoves. Wood stoves and heaters have been selling at such a rapid rate that the manufacturers have been entirely unable to fill their orders, and the same holds true of oil and gas stoves. The price of barb wire has been reduced at Cleveland 10c. for carlots and less quantities per 100 lb. The new quotations are only for immediate shipment and not for spring delivery, the prices for spring having not yet been made. It is not expected that much wire will be moved out at this reduction, as trade at this time of the year is very quiet.

BARB WIRE.—The manufacturers of barb wire have reduced the price at Cleveland 10c. per 100-lb. keg for carlots and less quantities. Prices for spring delivery have not been made yet, these quotations being only for immediate shipment. The price is $2.55 in carlots and $2.67½ in less quantities f.o.b. Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—Trade in galvanized wire is at a standstill. Prices are unchanged, and we quote : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—There is still some call for stove-pipe wire. The discount is 25 per cent

SMOOTH STEEL WIRE.—There has been no improvement in the demand for this wire. The base price is: $2.60 per 100

lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—These are moving out freely. We quote as follows: $2.50 in carlots and $2.55 for less quantities. The delivery points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—These continue in fair demand. Prices are unchanged at $2.50 per keg for less than carlots and $2.40 in carlots.

HORSE NAILS.—The good demand reported last week for horse nails keeps up and the prices are unchanged. We quote the discounts as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent. "Countersunk" head, 60 per cent.

HORSESHOES.—Trade in this line continues good and the prices are maintained. Quotations are as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws has slackened off a little, enabling jobbers to catch up in their deliveries. Discounts are as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—These are still in good demand. The market continues bare of supplies, and the discounts are as follows: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand for bolts and nuts is not quite so heavy as it was, but manufacturers are still slow in their deliveries. The discounts are as follows: Carriage bolts, common ($1.0 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—The manufacturers of spades and shovels are beginning to make some shipments, the factories at Gananoque being now in a position to go on manufacturing these articles. The discount is 40 and 5 per cent.

ROPE.—A fair business keeps up in this line, and the prices are steady and unchanged. We quote as follows: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11½c.; double, 12c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—A good many orders are still coming in for harvest tools at the present prices. The discount is 60 to 60 and 10 per cent.

EAVETROUGH, ETC.—There is still a good call for eavetroughing and conductor pipe, and our quotations are now as follows: Eavetrough, 10-inch, per 100 feet, $3.10; conductor pipe, 2-inch, per 100 feet, $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

BUILDING PAPER.—Business in building paper keeps up well, and we quote as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

TINWARE AND ENAMELLED WARE.—A good many orders still come forward for tinware and enamelled ware.

STOVES AND RANGES.—These are moving out as fast as deliveries can be obtained from the factories. Oil and gas stoves and heaters have been very active up to the present, and the same is true of wood stoves, but later reports coming to hand are to the effect that reports of a speedy termination of the coal strike have lessened the demand for the oil and gas burning stoves and stimulated trade in the coal stove line.

SPORTING GOODS.—A good demand keeps up for these. A leading manufacturer of rifles in the United States has notified his customers that he is already 18 days behind in his deliveries.

CEMENT.—This market keeps strong. Very few new orders are being taken, the manufacturers being rushed to their utmost capacity. Our quotations are as follows: Canadian Portland cement, $2.80 to $3.20 and hydraulic, $1.35 up. At the works the prices are $2.50 to $2.70 per barrel.

METALS.

The metal market continues in a healthy condition with a good demand for most lines, and there does not appear to be any accumulation of stocks. The New York tin market is strong with sellers asking higher prices. Little is doing. In the iron market outside, the outlook is now favorable for an improvement in business from this time forward.

PIG IRON.—The local demand keeps up well. Quotations at the Canadian furnaces are as follows: $23 for No. 1 and $22.50 for No. 2. On track, Toronto, No. 2 Summerlee iron is quoted at $23.

STEEL BOILER PLATES.—The market for these is strong. Prices are unchanged at $1.80 in carlots on track, Toronto.

STEEL RAILS.—These are still quoted at $30 for steam railways and $36 for electric railways.

TOOL STEEL.—The demand keeps steady, and quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—Trade in mild steel remains steady.

BOILER TUBES.—The situation is unchanged.

SPRING STEEL.—A large number of orders keep coming forward.

BAR IRON.—Some sizes are still scarce and the demand is well maintained. Our quotations are as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—There is a heavy demand at present for the lighter gauges by reason for the heavy call for gas and oil stoves. We quote: Common, $3.15 for

The Ottawa Plant Works, Ottawa, Ont.

28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—There is a good, steady trade doing. We quote: All dull, $2.90 to $3; half-polished, $3 to $3.10; all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—These continue active and unchanged. Quotations are now as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 guage; Gordon Crown, $4.50 for 28 gauge.

TIN.—Some business is doing in small lots. We quote $31 to $32 per 100 lb.

TINPLATES.—These are in moderate demand. We quote: Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—Ingot copper is active. We quote: Ingot copper, $13 per 100 lb. and sheet copper, $22 to $23.

BRASS.—Business is fair. The discount is 15 per cent.

LEAD.—A fair demand is reported and prices are unchanged. We quote: Pig lead, $3.50 and bar lead, $3.75.

IRON PIPE.—There is a heavy demand and the article is very scarce at present, owing to some of the manufacturers at Montreal closing down for repairs. Our quotations are now as follows per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—This metal is more active. We quote 5 to 6c. per lb.

ZINC SHEETS.—There is a steady demand. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—Business is more active than it was last week.

ANTIMONY.—The market is quiet and we quote $9.50 per 100 lb.

PAINTS AND OILS.

In the paint and oil market turpentine this week has advanced another 3c. and raw and boiled linseed oils have declined 2c. The cause of the appreciation in spirits is the increased strength of the Savannah market, where there are said to be strong indications that spirits may continue to go up perhaps 10 points more. The bull factor is the shortage in receipts, which last week at Savannah were 3,957 casks, while the shipments

were 10,622 casks. The reduction in oil was made in anticipation of lower markets outside. The English markets keep strong, the new crop of linseed is coming on the market shortly and this is the cause of the decline, for although the crop in Ontario has been a poor one the yield in Manitoba and the United States has been heavy. Trade in white leads ground in oil has been fair, but there are still coming forward quite a few sorting-up orders for mixed paints. Shellac has advanced 2c. in sympathy with appreciations of the product in New York and Calcutta. The last-named market at present is reported to be in an excited condition, there being plenty of buyers with few job lots offering. We quote :

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25 ; No. 1, $4.62½ to $4.87½ : No. 2, $4.25 to $4.50 ; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½ ; ditto, in kegs of 100 lb., $5.50 ; No. 1, in casks of 560 lb., $4 ; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25 ; Lehigh, in casks, $6.00.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 37c.; in less than cases, 42c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal. ; in less quantities, 10c. extra.

PUTTY.—Bladders, in barrels, $2.25 ; bladders, in 100-lb. kegs, $2.40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon ; No. 1, $1.10 per gallon.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 72c. ; boiled, 73c. ; 3 to 5 barrels, raw, 69c.; boiled, 72c.; 6 to 9 barrels, raw, 67c.; boiled, 70c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 79c.; 2 to 4 bbls., 78c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 18¾c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

GLASS.

Prices remain firm at the advance of last week. The demand for both "Star" and "Double Diamond" is heavy. Quotations are : Under 26 in., $4.15 ; 27 to 40 in., $4.75 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

OLD MATERIAL.

The market is brisk. There are a few changes in prices. Our quotations are as follows : Heavy copper and wire, 10c. per lb. ; light copper, 8 to 8½c. ; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $12.50 per net ton ; No. 2 wrought, $4.50 ; machinery cast scrap, $14 to $15 ; stove plate, $10 ; malleable and steel, $6 to $6.50 ; old rubbers, 6 to 6½c. per lb., and country mixed rags, 50 to 60c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES.—There has been a decline of ½c. all round in the prices of green hides. Trade in hides is quiet and the Chicago market is very weak. Dealers here will do nothing until the prices are steady over there. We quote : No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green steers, 7½c.; cured, 8½ to 9c.

SKINS.—These are in good demand at unchanged prices. We quote as follows : Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive. No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each ; shearlings, and lambskins, 50 to 55c.

WOOL.—The prices of wool are weak and unchanged. We quote : Fleece, 13½c. and unwashed, 7½c. per lb.

TALLOW.—The prices are unchanged at 6¾ to 7c. per lb.

SEEDS.

Owing to an improved export demand alsike is again higher and good stock is worth $6 to $7 per bushel outside. Red clover is also firmer, on account of reported damages to the crop. Prices ranged from $5.50 to $6 for prime and choice seed at outside points. Timothy is worth $1.40 to $1.60 per bushel. Extra choice to fancy seed will bring a little more than the above prices, while low grades would have to be bought at considerably lower figures to yield a fair profit.

COAL.

The settlement of the coal strike will have the effect of increasing the deliveries of soft coal and reducing the prices. The quotations at the international bridges are $7 to $8 per ton for soft coal at present.

PETROLEUM.

A good active trade is doing in this line. Sarnia water white has been advanced ½c., and our quotations are as follows : Pratt's Astral, 17 to 17½c. in bulk (barrels extra) ; Americam water white, 17 to 17½c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Turpentine has advanced 3c.

Sarnia water white petroleum has advanced ½c.

There has been a decline of 2c. in raw and boiled linseed oils.

The price of barb wire for shipment from Cleveland has been reduced 10c. per 100 lb.

SILVERWARE FOR KING EDWARD HOTEL.

Part of the samples manufactured by The Toronto Silver Plate Co. for The King Edward Hotel Co., Limited, were on exhibition for about ten days during the latter part of September in Ambrose Kent & Sons' window, on Yonge street. It is to be regretted that the window was not large enough to display all the samples belonging to the splendid outfit made by Canadian manufacturers for this grand hotel. The goods are worthy of the hotel, which is saying a good deal, as it is fully the equal of anything on the continent, and every Canadian should be proud that we have factories and artizans capable of turning out such products in our own country.

HEATING AND PLUMBING

SEMI-ANNUAL CONVENTION OF ONTARIO PLUMBERS.

THE first semi-annual meeting of the Ontario Provincial Association of Master Plumbers, Gas, Steam and Hot-Water Fitters was held at the Pythian Hall, October 16, 1902.

The chair was taken by the president, Wm. Mansell, of Toronto, at 11 a.m. There was a good representation of the master plumbers of the Province present.

The following is a ltst of the delegates :

Wm. Mansell, president, Toronto.
S. P. Gourlay, past president, St. Catharines.
J. H. Wilson, treasurer, Toronto.
W. H. Meredith, secretary, Toronto.
H. Mahoney, Guelph.
C. Taylor, Brantford.
T. A. Cowan, Brantford.
Wm. Smith, London.
B. Noble, London.
Thos. Rich, London.
C. T. Bull, St. Thomas.
Geo. Clapperton, Toronto.
G. S. Ransom, Toronto.
W. G. D. Adams, Toronto.
Jos. Wright, Toronto.
R. Ross, Toronto.
J. A. Neelands, Barrie.
R. G. Sturgeon, Peterboro'.
Mr. Coppings, Woodstock.
Mr. Hogarth, Toronto.
K. Allison, Toronto.
Mr. Fitzsimons, Toronto.
Mr. LeGrow, Toronto.
R. H. Harrison, Toronto.
C. Robinson, Toronto.

PRESIDENT'S REMARKS.

In opening the Convention the President said : "It gives me great pleasure to welcome you to this the first semi-annual meeting of our newly organized Association, the first Provincial Association in the Dominion since our inauguration meeting on Good Friday last. It has been the aim of your executive officers to extend the bounds of our Association to all parts of this Province, and I am glad to say that those efforts have been rewarded as you will see by the secretary's report, and by the number of letters that have been received from different parts of the country. It is also gratifying to report the wave of prosperity which is sweeping over our whole Dominion, and especially that part embraced in this Province, and if the bountiful harvests that have been given us, and for which thanks to the Almighty for His goodness are being tendered throughout the land to-day.

"While it has been a very busy season for all branches of our business, I am sorry to say that financially it has not been what it should have been for the amount of work that has been contracted for in the plumbing and heating lines, as in several instances advances have been made in prices of material after contracts have been signed, and in many of our cities wages

Wm. Mansell, President, Toronto.

have been advanced which have eaten into the profits expected to materialize, and also work has been so plentiful in other branches that it has been impossible to procure the necessary help to carry on the work in a profitable manner, and with all the work in hand, and the amount to be tendered for, competition is more keen than it should be, while we see it practised every day by the new quotations received by us. Other lines are benefitting by the good times to a greater extent than is our profession.

"While in session, several matters will be brought before us for consideration. Let us give them our best attention, and especially those that bear on our individual interests and the advantages to be derived by thorough organization. Let us all put our shoulders to the wheel and have a perfect master plumbers' association in the Province of Ontario before our next annual meeting."

The secretary, W. H. Meredith, reported verbally upon his work during the past six months, and stated that the following towns and cities had in that time joined the association : Guelph, Berlin, Barrie, Smith's Falls, London, Hamilton, Brantford, St. Catharines, St. Thomas, Ottawa, Toronto, Windsor, Petrolea, Peterborough, Woodstock.

The question of appointing an organizer occasioned considerable discussion. The need of one was admitted by all, but it was felt that, in its present early stage, the association was hardly strong enough financially to permanently support one. Ultimately, it was left with the executive to arrange with its members to visit different towns and cities from time to time as in its judgment it should deem wise.

London was decided on as the next place of meeting, time and date being left to the executive.

W. H. Meredith tendered his resignation as secretary, owing to pressure of other engagements, which was most regretfully accepted by the convention. Mr. Le Grow, of Toronto, was elected in the room of Mr. Meredith.

Mr. Meredith, in appropriate terms, bespoke for the new secretary the hearty support and cooperation of the members of the association.

A vote of thanks was unanimously tendered to the retiring secretary and suitably responded to.

A motion for adjournment to meet again in London at the call of the executive brought to a close what was considered a most successful and enthusiastic convention.

STATE OF THE PLUMBING TRADE.

The plumbing and heating trade appears to be very busy at present. The large dealers complain of a scarcity of men, and do not seem to be over anxious for new contracts at present. It seems to be the general impression that a rush in the jobbing trade will ensue immediately upon the settlement of the coal strike, as a number of people are waiting to see if they can get caal at a reasonable figure before installing new furnaces.

PAINT FOR THE FARMER'S BARN.

Now there is a season of Fall painting after the crop, and it's a good stroke of business to induce your farmer customers to go at it. Don't offer him the expensive house paints for his barns and roofs; it's not necessary, and most likely you wouldn't get the business. Tell him of **RAMSAYS OUTSIDE PAINTS** for just such work, sell them at $1 00 per gal. and make a handsome profit for yourself.

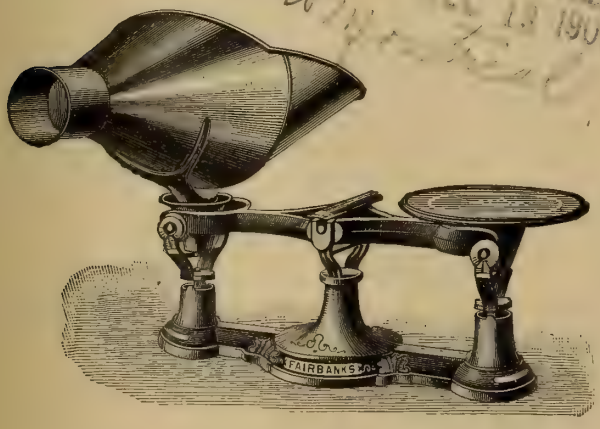
WHAT WE DO--



We build Scales.

Everyone has heard of

FAIRBANKS STANDARD SCALES

Their reputation is world-wide. We do not claim to make the cheapest Scale on the market. We build the best, the most reliable, accurate and longest-wearing—the Scale it pays to handle. See our Catalogue.

Look for us next week. We have something else we want to say.

MONTREAL—**THE FAIRBANKS COMPANY**—VANCOUVER

BUILDING PERMITS ISSUED.

TORONTO.

THE following building permits were issued during the past week : R. McDowell, two storey brick blacksmith shop, Davenport Road, $1,800; W. T. Thomson, two storey roughcast dwelling, Boustead avenue, $600; Asylum (Ontario Government), one-storey brick building, Queen street west, $300; J. O. Patterson, two storey and attic brick detached dwelling, St. Patrick street, $3,000; Thos. F. Robertson, pair semi-detached two-storey and attic stone and brick dwellings, Deleware avenue, $3,600; W. H. Williams, pair 2½-storey semi-detached brick and stone dwellings, Walmer Road, $6,000; W. J. Hodgson, two-storey and attic brick dwelling, Albany avenue, $3,200; R. W. G. Walton, alterations, Sussex avenue, $250; C. Smith, one-storey brick store, Bloor street, $525; J. T. Troy, pair of wooden verandahs, Close avenue, $400; T. D. Manchee, two-storey and attic brick and stone detached dwelling, Scarth Road, $7,000; A. Pollard, two-storey and attic brick and stone dwelling, Dewson street, $4,500; Bank of Hamilton, three storey and basement brick and stone building, corner Queen street and Spadina avenue, $50,000; J. O. Patterson, two-storey brick stable, Denison avenue, $800; Eby, Blain Co., Limited, 2½-storey brick and frame building, corner Cumberland and Yonge streets, $3 000; H. J. Ashfield, two storey roughcast dwelling, Galt avenue, $700; Morgan T. Evans, two-storey and attic brick dwelling, Brunswick avenue, $4,800; M. C. Ellis, two-storey and attic brick and stone detached dwelling, Lennox street, $2,500; W. W. Vickers, 2½-storey brick dwelling, Dowling avenue, $5,000; R. Hills, one storey stone and brick vestibule, St. George street, $1,000; Thos. Brown, two-storey and attic dwelling, Bedford Road, $2,000.

PLUMBING AND HEATING CONTRACTS.

Drayton, Ont., is advertising for tenders for heating and ventilating the town hall.

Fiddes & Hogarth are refitting the C.P.R. building, corner King and Yonge streets, with plumbing and heating.

The plumbing and heating for the new residence of Wm. Ray, Grange avenue, is being furnished by Power Bros.

Fiddes & Hogarth, Toronto, are furnishing the house of Mrs. Roberts, Beverley street, with heating and plumbing.

Power Bros., Queen street west, are furnishing the plumbing for the two new houses for James Simpson, University avenue.

Guest & Co., Church street, have the contract for the plumbing for the new premises of Mr. Orford, Danforth avenue.

The plumbing and heating for the new premises of The Canada Furniture Co., King street east, is being put in by Fiddes & Hogarth.

GAS AND OIL HEATERS IN DEMAND.

Dealers in gas and oil heaters have had an unusua ly large demand durirg the past week or ten days. One retail dealer boasts of clearing three dozen in two days. They attribute the demand to the scarcity and high price of fuel.

One manufacturer last week had to turn down an order for 1,500 oil heaters. Of this number, one-third was wanted for shipment to South Africa, one-third for New York, and the remainder for the home market.

TRADE CHAT.

A fire that is believed to be of incendiary origin, as it is the second in two weeks, completely destroyed the building and contents of Anderson's hardware store at Atwood.

We regret to announce the sudden death of Dome Pilon, head clerk in the hardware establishment of David Madore, St. Paul street, Montreal. He leaves a widow and six children.

William Owen, C.E., London, England, has completed arrangements with a company in Toronto for the purchase of a patent machine for making brick. It is claimed this machine will manufacture 150 000 brick per day.

NOVA SCOTIA MARKETS.

Halifax, October 11, 1902.

WHOLESALE hardware houses report a very satisfactory business since the first of the month, and there is every indication of a large autumn business. Favorable reports are sent in by the travellers from all parts of the territory covered, as to the general activity and healthy conditions of trade. Payments are being met fairly well, and, if anything, better than at this time last year, which was a remarkably good one.

* * *

There will be considerable continued activity in the building line this autumn and winter, if weather conditions are favorable, and the dealers are expecting a good trade in builders' materials, for which there has been an unusual demand all through the spring and summer. Just now there is a good retail trade in paints and oils, etc., for fall re[illegible].

* * *

Prices, generally, are firm. Considerable interest centres in the line of cordage, and prices are liable to advance any time. There has been an advance in the United States markets, and as this country controls the output of the Philippine Islands, the advance will affect Canadian producers. One reason given for the advance is the remarkable increase in the use of binder twine at this season of the year, and the demand in this direction has increased year by year until it has assumed tremendous proportions.

* * *

There is also an upward tendency in oils. Kerosene oil was advanced last week three-quarters of a cent per gallon—on the claim that both Canadian and United States wells were putting out less crude oil. Turpentine has advanced 2½c. per gallon. Linseed oil is easier, but there has been no reduction in the local market as yet.

* * *

The export business for the last week amounted to $136,002. This is small compared with the same week last year, but the total since July 1, $2,256,511, is over $40,000 ahead of the same period last year. The exports are apportioned as follows: Great Britain, $44,577; West Indies, $36,158; United States, $20,069; various ports, $19,810; Newfoundland, $8,804; Italy, $4,390; Germany, $2,114.

R. C. H.

There is no use in buying advertising space unless one fills it up so as to get results. One might almost as well adopt the method sometimes seen in country papers, "This space will be filled by John Jones when he gets time to write an advertisement," as to advertise goods that cannot be delivered—unless capital is so great that it can afford to store up reputation for future use.

T. B. Carruthers, general merchant, of Kimberley, Ont., is retiring from business.

APPLY YOUR KNOWLEDGE.

WHEN you think a scheme is good for any other place than yours, it is proof that you can use some portion of that scheme for your own business or it would not have met with your approval, remarks Drygoodsman and General Merchant. If a clerk thinks that a certain bit of advice would be a mighty good thing if he were in some other position, he can make up his mind that it is at once applicable to him or he would not have such an opinion.

This attitude of thinking matters do not apply personally gets a great many people into trouble, or rather allows a great many people to fall into ways they otherwise would not fall into. Too many people about a store are always ready to think a correction or a suggestion is not meant for them, but is applicable to the rest of the force.

The clerk may read of the conduct of business in big department stores, or some section of the country where conditions require different methods than will apply to his work, and he immediately fails to find where such a thing is applicable to him. It is applicable every time, if he will think over his own conditions and work the idea to his needs.

The head of a small house thinks that matters which are of vital importance to big concerns need not fit his case in the slightest particular, but he has only to think that all business is alike with the exception of size and the changes in demands for attention and details which the different sizes require.

For the good of every business it behooves all connected with it to keep eyes open every minute for something that can be applied to its workings. It makes no difference where it comes from, so long as it is something that can be applied to the business either directly or after changes. Store people are apt to think that ideas for their uses can be obtained only from sources that have some sort of connection with their kind of business. While it is a fact that such sources will furnish the quickest and most readily adapted ideas, it is also a fact that some of the best ideas of trade and the handling of business are gathered from sources that are almost entirely foreign to store life.

WHY THE NEW ONES SUCCEEDS.

The retailer who has plugged along in the most honorable sort of a way for many years sometimes finds that the trade of his town or section goes to a new man who seems to do things in a way that calls people to him. The old retailer does not understand that the new man is just as square and honest and treats the people in just as good a manner. He is apt to think that some underhanded method is being attempted and bewails the fact that shall put the faithful and honest man in the rear of the procession while the smart one gets in the lead through fooling the people, or something of that sort.

The clerk watches the progress of the new fellows who come into the business and finds one who seems to get along faster than any of the others. The fast one gets next to the best customers and seems able to sell goods that no one else in the store can sell in the same way or the same quantity. The young fellow meets the approval of the firm and begins to go past the other fellows who have been so long in the ruts of doing the things that seem easiest.

The advancement is made because of the manner in which the young man catches hold of everything that can push forward the business. He is the fellow who gets a business of his own sooner than anyone else in the store.

BRIGHT FELLOWS ARE WANTED.

Why is it that the demand is so great for fellows who are determined to make a go of whatever they take hold? It is because there are so many who get up in the morning and go to bed at night, in the meantime doing their work because it has to be done and not because they want to do it or because they are trying to do it in some newer and better manner.

Every line of trade at the present time is demanding men who can go ahead with everything placed in their charge and be depended upon to get all there is out of it. Too many are asking for the good things and are either not able to give the work demanded or are not willing to do more than is actually required.

Every man who will go at it with a will to apply whatever he sees in some way to the work which confronts him every day and make a success out of it will soon find the place he now has too small for him and another opening ahead. If he is in business for himself he will see where every day he is making a better thing out of his opportunities and the trade is coming his way.

It pays to keep your head working all the time.

AXE COMBINATION.

A despatch from Alexandria, Ind., under date of October 9 say: "The formation of the long-expected axe trust, known as The American Axe and Tool Company, is practically completed, The Kelly Axe Works of this city, one of the largest concerns, having been absorbed. The promoter is Chas. D. Gates, of New York. The respresentatives of the various firms met at Louisville yesterday for further organization. The Kelly factory in this city works 600 men and turns out about 10,000 finished axes daily. Options, it is said, have been obtained on nearly all the more important plants in the trade."

To ALL who make a specialty of

CARRIAGE PAINTERS' SUPERFINE COLORS

In CANADA, the **CANADA PAINT COMPANY** manufacture from the first processes onward a full range of carriage colors, every line of which they warrant for purity, fineness of texture, brilliancy, permanence, fineness in working and hardness in drying.

GUARANTEE

We guarantee the superiority of our Carriage Painters' Superfine Colors for the following reasons:

The colors are all of our own manufacture.

The Japans in which they are ground are also manufactured by us and tested before use.

Every batch of our specialties for carriage purposes, whether Primer, Rough Stuff, Rub Lead or Fine Color, is proved by actual test before leaving our premises.

We continue to solicit the business of all firms who desire to sell first-class paints for first-class work.

For Varnishes and Carriage Painting material of every description, address,

The P. R. Cumming Manufacturing Co.,

LIMITED.

NO. 22.

No. 33 (double blade) is similar in construction and finish.

Something New!

THIS is an entirely new style of mincing knife of our own design. The shank is a flat tinned steel band, drawn tightly into a groove encircling the handle, the blade being riveted between the ends. This construction does away with any hole in the handle, which consequently cannot split or come loose. The handle itself is stained and shellacked, the whole making the neatest and strongest mincing knife ever put on the market.

MADE ONLY BY

The P. R. Cumming Manufacturing Co., Limited, Toronto.

BENEFITS OF A TRADE PAPER.

AN address was recently delivered in Seattle, Wash., before a local trade paper association by E. C. Damon on "Benefits to be derived from a Trade Paper." In part, it was as follows: First, let me ask: Do you take a trade paper? Second, Do you read it? In both cases: If not, why? Look over this broad land of ours. We find millions of people reading the daily papers. That is where they get their information. That is where they get their food for thought, that makes our people the most enlightened people on earth, the most progressive, the most ambitious. Yes, the most successful.

Gentlemen, I say to you to-night, as the daily paper is the educator of the masses, so the trade paper is the educator of the merchant.

Show me a progressive, enterprising up-to-date merchant, and I will show you a student of the trade paper.

I might go further. Show me an ambitious, wide-awake clerk, and I will show you a trade paper advocate.

Do not in any wise construe anything that I may say at this time appertaining to this subject as criticizing our local or State trade papers. Nor by any means suspect that I am going to ask for your subscription for such papers. However, I might say that I am a subscriber for three trade journals and positively I would not be without them.

Nay, not for twice the fee of subscription. There is not an issue that I do not get some good out of. The subjects discussed in these papers give me thoughts; stimulate me in my work; give me a foundation to build upon. I find articles by competent writers on such subjects as "Credits," "Advertising," "System," "Full Measure," "Short Measure," on "Leaks and how to stop them." Gentlemen, I say to you that a well-written article on any of these subjects is worth times innumerable the price per annum of your trade paper.

I might admit at this time that I am an enthusiast, but, gentlemen, no man can make a success unless he is an enthusiast.

I find articles on "trade abuses." I find articles on "organization" and "why for?" I find articles on "confidence in your fellow merchant," and I want it publicly known that such confidence judiciously used will do much to overcome many petty annoyances.

I find articles on "coffee," "tea," "sugar," "beans," "rice," "sago," "tapioca," "pork," "spices," "pickles," "olives," etc.; will I go clear down the list? No, gentlemen, but I will say to you that any man desiring to serve his patrons intelligently and well must know something of the commodities in which he deals.

A man doing business without a trade paper is doing business without his "price current," or, in other words, is like a boat adrift without a rudder.

I find articles on "profit." I am a believer in a revenue. The merchant's revenue is his profit. No nation, State nor city can exist without a revenue. No merchant, big or little, can exist without a revenue. I say to you, gentlemen, a well-written article on this subject (profit), distributed in every city, town and hamlet in this State, would do much toward building up this organization.

Can we but find means to impress that word "profit" into the grocer's vocabulary, we will be doing much to help him hold his head erect and "stand as a man among men."

I find articles on "window dressing," on "quality," "honesty," and "fidelity to business."

Gentlemen, I say to you that a trade paper stands in the front rank of commercial progress to-day. The trade paper can help make that friendship lasting that to-day exists between the wholesaler and the retailer; can help to weld it together; can rivet it aright. The trade paper can stimulate the merchant to better effort. It can teach him to say "no," and stick to it. It can teach him to give honest measure and demand the same. It can teach him to use home-manufactured goods—all things being equal. It can teach him that the "full dinner pail" is the foundation of all large cities. It can teach him that the shrill sound of the whistle, the blast of the furnace, the roar of the engine, brings dollars back into his pocket.

The other evening as I sat by my window at home, looking out on the placid waters of Elliott Bay, a steamer passed on its way to its mooring place. 'Twas grand to look upon, yea, magnificent. A blaze of light from stern to stem, but it passed on, and as it passed the water closed behind it. Not a trace was left of where the steamer had been. No mark, no record left behind to tell of what success. Is it to be so with us in this world of progression? We pass on through this life into the Great Beyond. Will we leave a mark, a record? Will posterity know that we were here?

Ah, gentlemen, unless we make that mark broad it will soon be erased. Unless we take the knowledge at hand and use it. Unless we take the "pulse of commercialism," and I say to you, gentlemen, the trade paper is that pulse. Unless we grapple with the hordes of this world and conquer, we will not leave a broad mark. Is your soul or mine so dormant, or your ambition or mine so weak, that we would not that your child or mine, when they pass over this same road, could cry out: "My father passed here!"

FIRST CARGO OF IRON IN 15 YEARS

A cargo of 3,000 tons of pig iron from Middlesboro', England, recently unloaded at South Boston, is said to be the first full cargo of English iron received at that port for 15 years.

Wm. Knox. general merchant, MacGregor, N.W.T., has sold out to H. C. Hamelin.

To good management men and tools, add Apollo galvanized iron.

There is no way to do so good work or to make so much profit on it.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

COUNTRY AND DEPARTMENT STORES.

A WEEKLY newspaper published in a Western Ontario town recently urged upon its readers the necessity of examining the prices quoted by local merchants in comparison with those quoted by the department stores in the catalogues which they from time to time issue, it being claimed that they would discover that the latter's figures were higher rather than lower than those ruling in local stores.

It is a pity that country newspapers did not do more of this kind of educational work. Country storekeepers, as a rule, are well able to compete with the department stores, as far as prices are concerned. The trouble is, however, that the fact is not sufficiently brought home to the consuming public. The secret of the department stores' success is largely due to the fact that they publish prices broadcast throughout the land. The figures may be high or low, but to the average consumer the very fact that they are quoted at all seems to convince them that they are low, or else they would not be quoted.

Country merchants should, from time to time, impress upon the publishers of the local newspapers the necessity of educating their readers along these lines. But the merchant's duty does not end here. In his advertisements he should, as far as possible, mention the prices just as the department stores do. He may claim that this is giving his figures to his competitors, but while this may be so to some extent, it should not be forgotten that he has the start of his competitors, and that the advantages far outweigh the disadvantages.

It is the merchants who strike out for themselves, giving no thought to what their competitors may think or do, that are the most successful in business.

OPPORTUNITIES FOR SUCCESS.

In spite of what pessimists may say to the contrary, business methods are steadily improving. It is apparent in the factory, in the office, in the warehouse and in the shop. The fact that the demand for efficient men is so keen is an evidence of it. And there never was a time in the world's history when efficiency was more readily recognized or when better opportunities for success were afforded.

HELPING CANADA'S PRESTIGE.

THE announcement that the Grand Trunk Railway has declared dividends on its second preference stock will no doubt interest a good many people other than those actually concerned in them. We refer to all people who take a lively interest in the affairs of the Dominion and who are students of its history. It is not so many years since that the Grand Trunk, on account of the poor results obtained by the capitalists in Great Britain who had invested in the stock, caused financial men on the other side of the Atlantic to look askance upon Canada.

No doubt a great deal of the bad name which the railway possessed was largely due to lack of proper management, but this, however, was not sufficiently taken into account by the financial papers in Great Britain. Since, however, radical changes have been made in the management, and more power has been given to the company's authorities in Canada, there has been a marked improvement in the attitude of capitalists, not only toward the railway itself but towards the Dominion as a whole. Of course, a great deal of the improvement in the financial position of the railway is due to the material development which has taken place in the industrial life of Canada; but, at the same time, had the company continued to be managed in the same old way it is very improbable that it would now be paying dividends on the second preference stock.

It does not matter how prosperous a country may be, railways, like ordinary commercial enterprises, must be properly managed in order to secure satisfactory results.

CONSTITUTIONAL PRECEDENT AND BUSINESS ABILITY.

OF course, the most interesting event this week in commercial as well as in political circles is the exit of Hon. J. I. Tarte from the Dominion Cabinet. The Department of Works, over which Mr. Tarte has presided for the past six years, is essentially a business department ; but the prominence which the honorable gentleman has obtained through his advocacy of a higher Customs tariff is what gives particular zest to the interest of business men in the event which promises to be a political nine-days' wonder.

Whatever may be one's views as to the political opinions to which Mr. Tarte has recently been giving expression so vigorously, one cannot but regret his departure from the Cabinet.

Whatever may be his faults, he has at any rate been an exceptionally good Minister. The Department of Works was certainly never administered better ; and it has certainly had men at its head who were a great deal less efficient. He was not a theorist in the administration of his Department; he was a practical man. Not merely satisfied with the reports of subordinate officials, he travelled day and night to ascertain for himself the necessities of each particular case. Had he been presiding over the destinies of a purely private business enterprise his zeal could scarcely have been more ardent or his efforts more untiring.

A Canadian he certainly is ; and for the welfare of the Dominion he is undoubtedly jealous. It was this jealousy, however, that was at the root of his indiscression ; for indiscreet he most assuredly has been.

His advocacy of a tariff war against the United States was scarcely a wise thing. Tariff wars, like physical wars, are costly. We have the recent tariff wars between France and Italy and Germany and Russia to remind us of this.

But his unpardonable sin lay in the fact that he not only acted without Cabinet authority in the policy he enunciated, but he assumed the championship of a policy to which the Cabinet is opposed. In other words, he was running in the face of constitutional precedent. And constitutional precedent, like the laws of the Medes and Persians, appears to be unalterable. At any rate, the Hon. Mr. Tarte had to be sacrificed to constitutional precedent.

One cannot but regret, from a business standpoint, that it had to be so, for it must be remembered that it was not for inefficient administration of his Department that he had to step down and out.

Mr. Tarte is thus in the position of a valued partner in a commercial enterprise who, by giving expression to views displeasing to the other members of the firm, is compelled to sever his connection with the same.

It is evident that in political affairs constitutional precedent carries more weight than administrative ability.

Had it been Sir Richard Cartwright, the Minister of Trade and Commerce, who had been guilty of the indiscretion, business men would scarcely have regretted it, for Sir Richard, unlike Mr. Tarte and such Ministers as Messrs. Mulock, Fielding, Paterson and Fisher, is an obstacle rather than an assistance to the Department which he administers.

THE CANADIAN-SOUTH-AFRICAN SERVICE.

ON October 18, the steamer Ontario, of the Allan Line, sailed from Montreal for Cape Town, Port Elizabeth and Durban, inaugurating the new Canadian freight service to South Africa. Her cargo consisted of a considerable quantity of butter, 250 tons of compressed fodder, 2,000 tons of flour, besides shipments of enamelled ware, stoves, carriages, joiners' work, autoharps and dressed lumber.

At the farewell luncheon, Capt. Gambell stated that he expected the trip to Cape Town, 7,170 miles, would occupy about 28 days.

These are the principal facts concerning the sailing of the first steamer of the South-African service. Next month an Elder-Dempster liner will leave Montreal, and in December a Furness liner. All these vessels have been equipped with ample cold storage accommodation. Being only freight steamers, they will not carry passengers. This side of the service will be developed later.

The significance of this initial trip is considerable. Since the war all the more important commercial nations have been making a grab for South-African trade. Besides the several British and United States lines doing business with South Africa, there are two German lines, one French line and one Austrian line trading direct with Cape Town. The fact that Canada can start a line for herself speaks well for the energy of this country.

The present state of South-African shipping discloses some interesting developments, from a knowledge of which Canadians should benefit considerably. There is in the first place the monopoly or attempted monopoly of the English shipping ring. This conference of steamship lines, as it is called, has been formed to keep up rates and keep out competition. By a careful system of rebates, these companies are able to keep business. A merchant who trades with a rival company forfeits his rebate, and this forms a powerful reason for maintaining good-will with the ring. At present Mr. Huston, a powerful ship-owner, is making an attempt to fight the combine. He is prepared to drop a cool million to do it, and the public hope he will succeed. As it is, the prevalent high rates charged, which, of course, fall on South-African consumers, are most prejudicial to the British interests in South Africa.

The New York lines have not been slow to take advantage of this state of affairs. In fact, a rate war has been started among the different companies to secure African trade, and rates fully 21s. below the lowest English rates have been quoted.

Thirdly, the Germans have been quietly building up an East Coast trade and now practically control the shipping to East Africa. This enables them to strike also at South-African shipping, for they are right in the neighborhood.

Under these circumstances it is just as well for British prestige that Canada has entered the field in however unpretentious a manner. Though Britain does control the greater portion of the £40,000,000 sterling of commodities that enter Cape Colony and Natal, such may not be the case for long and Canada has many of the commodities which are needed there.

THE ART OF WINDOW DRESSING

SOME HINTS FOR RETAILERS

A FEW WORDS TO THE BEGINNER.

AS I have at different times received letters from young men desirous of becoming window trimmers requesting me to give them some idea of how to start in the profession, the necessary qualifications, etc., I submit the following :

Learning how to dress modern windows is very much like learning music. If it be natural, or a gift, you are very fortunate and will learn quickly and will be successful. If you have not the talent, no study, practice, or years of experience will finish you as an artist. You will work mechanically, and never become proficient. As others have said : "It must be born in you."

The first qualification necessary to one learning window dressing is a fairly good knowledge of the value of goods, consequently a couple of years' experience behind the counter in the various departments is necessary. I have seen some very fair window trims (that is the arrangement of the goods was very neat), but the window was evidently trimmed by someone inexperienced in the value of goods. Another fault was that the best values were arranged in the rear of the window, while the poorer ones were the most conspicuous.

If you have had some experience and feel that you have a tact or the ability to become (with experience) a window trimmer, my advice would be to "try your hand" every chance you get.

Subscribe to every magazine that has anything to say on the subject ; observe closely the window trims of others more advanced.

Many people have an idea that window dressing is simple and easy. Let them try it. It is one of the few arts that cannot be acquired in a short space of time unless it is really a natural talent, and unless it is, every act is hard labor. You are also exposed to all extremes ; in summer the window is "an oven," and often below zero in winter—quite different from being in a comfortable temperature where there is plenty of air.

There is one thing I would advise a young man who is starting out in the business, and that is to make it a point to have your ideas as original as you can.

There are too many men to-day who are earning their wages "on other men's brains as it were." These men do not hold their positions long as it does not take their employers many weeks to find them out.

Remember it is no credit or honor to you nor justice to the man whose brains furnished the design to steal his idea, and the public can tell very quickly who's who. Watch your competitor and profit by his success or failure, but do not acknowledge him your superior by imitating him.

Another point to remember is that after you have become fairly well advanced and have been successful in getting in a few good trims that have possibly brought you (as they generally will) some very flattering remarks from the press or public, do not get the "swelled head." I know of several instances during the past month where young men "got the grin" for assuming that "haughty air," and "once upon a time" the writer, in his early career, almost got it himself. Of course, that was years ago, and I have profited by my former experience.

This is one of the "thorns" in the path of the average trimmer just as soon as he begins to receive flattery from the press or others. But nowadays there are very few merchants whose business will not go on just the same as ever even if the "best man in the house" vacates his position. There is generally another man who is "just as good," and perhaps better, who will "fill his boots."

Therefore "modesty" is a great assistant in reaching the top.

A WINDOW THAT ATTRACTED.

McDonald & Hay, hardware merchants, North Bay, Ont., had an attractive display in their window a few weeks ago. The accompanying cut is from a photograph of the display. The centre of attraction is, of course, the fish, one of which, it will be noticed, weighed 41½ lb. The bottom fish in the display was not so heavy, but in length it was nearly five feet. McDonald & Hay did not allow the fish to monopolize all the attention, for it will be noticed that rifles, guns, fishing tackle, shells, etc., wese brought well into evidence. The display proved particularly attractive to tourists and was the means of drawing a good deal of trade. A tourist from St. Louis wanted to buy the heavy fish for a museum in that city. "I want to show what kind of fish you have in this north country," he said. But Mr. McDonald informed him that it was not for sale.

A Display That Attracted.

CONVERTING THE BOSS.

Many trimmers find it a difficult matter to get suitable fixtures in sufficient quantity for their trimming. There is a reasonable chance he may get what he wants if he goes about it in the right manner. A great many merchants are "grouchy" in the matter of expenses, and think because they have got along for years without an outlay for fixtures, that the trimmer ought to be able to do without them. The trimmer should wait until an opportunity presents itself, when the "Boss" is in good humor, then approach him on the subject and explain to him in a business-like way the necessity for a few up-to-date fixtures, and demonstrate to him that they are something which would materially benefit the store service by their employment. There are some older merchants who began their careers before the time for trimming was recognized as one of the most important factors of the retail business. If these men are approached properly they will come to the understanding of the good results of the good window work (with the proper facilities), just as they have come to see the good results and the real necessity of advertising.

THE C.I.F. QUESTION.

A GREAT deal of interest is still being taken in the C.I.F. question, as the following additional letters show :

Editor HARDWARE AND METAL, — Regarding the discussion of the question of C.I.F., I think it is well known and has been for years that this term means cost (entire), insurance and freight. Such a policy should always be written A.A.R., but it is always understood to read that way. On goods that lose little or no value through rust, an F.P.A. policy is often taken out ; but I should certainly think never without the understanding of the buyer. It is always wise, however, to have the policy written A.A.R.

MONTREAL WHOLESALER.

Editor HARDWARE AND METAL,—I have been buying goods for the last 15 years and I have always understood when I was quoted an article C.I.F. it meant full cost, full insurance and full freight. If the carrier charged me more freight than I was allowed on my invoice, I, in every case, claimed from the vendor the difference and got it refunded. Why should it be otherwise with the insurance? The reason that perishable goods must be specially insured has nothing to do with the buyer ; the vendor sold his goods C.I.F. That means full insurance as it means full freight and full cost.

IMPORTER AND WHOLESALE GROCER.

Editor HARDWARE AND METAL,—As requested, I have pleasure in giving you my understanding of the term C.I.F.

My experience is that goods sold C.I.F. are at risk of the seller, whose business it is to insure the goods against all risks, in the case of goods liable to damage by water or otherwise, unless stipulated in the contract that the insurance only covers F.P.A., when it is the buyer's duty, if not satisfied with this, to arrange for insurance to cover P.A.

The matter of insurance is goverened by the custom of the trade as to whether the goods are damagable by water or exposure, and, unless this is specially stipulated for, the seller, I think, is bound to cover the shipment against P.A. A. G.

Editor HARDWARE AND METAL,—With reference to the discussion in your journal over C.I.F., F.P.A., A.A.R., I think this a three-cornered discussion, 1st, the manufacturer ; 2nd, his client, and 3rd, the insurance company.

The manufacturer solicits his client for an order which he undertakes to deliver C.I.F., meaning cost, insurance and freight to destination. The insurance man is now introduced and asks the manufacturer: What kind of insurance do you wish on your sale, C.I.F., F.P.A., A.A.R., or not any ?

The manufacturer has four options: He has agreed to deliver goods to their destination and can insure them at his option. If insured C.I.F. and the vessel goes to the bottom, will he give his client 10 per cent. of his receipts for loss of his profits ? If he had not intended assuming entire responsibility of the delivery he would have sold F.O.B. his factory, or European port.

DICK.

CATALOGUES, BOOKLETS, ETC.

MACHINE TOOLS.

LIST No. 26, published by The Garvin Machine Co., of New York, is one of the most comprehensive lists of machine tools issued in America, embracing nearly every kind of tool in use, both new and second hand. This firm has a reputation for honesty and fair dealing second to none in the United States, and our readers in need of machine tools should certainly see this list before purchasing. In this catalogue a number of new and improved machines are contained, all bearing the high standard of efficiency which is a feature of the product of this house, as in each successive stage of manufacture every part is subjected to the most rigid inspection. The facilities, not only for construction but also for shipping, are unexcelled, and, in addition, customers are given the protection, against loss or delay in executing orders, of the absolutely fireproof building shown in the accompanying cut. This building is the largest machinery store in the world, containing over 110,000 square feet of floor space.

OFFICE, SALESROOM AND FACTORY

1903 CALENDAR.

A true "art calendar" is that just issued for 1903 by The United States Wire Mat Co., Decatur, Ill. It is a reproduction in colors of the painting "At the Opera," by J. Ross Bryson, an American artist whose beautiful women have given him a more than national reputation. In this reproduction the color work has been kept wonderfully like the original painting, and the picture is almost as beautiful as the painting itself.

MR. HUNTER LEAVES DURHAM.

James A. Hunter, of the widely-known Durham, Ont., departmental store, has disposed of the business to Alex. Russell, of Elora.

The Hunter establishment, which has been doing business for well on to a half-century, is one of the landmarks of the County of Grey, and the dropping of the name Hunter in connection with it will be regretted by all of the old-timers, who in a great many respects are of a highly conservative nature.

Mr. Hunter has left for Minneapolis, Minn., where he will join his brother in the life insurance business, as one of the representatives of the Canada Life Assurance Co.

ELIAS H. LYONS DEAD.

Mr. Elias H. Lyons, of New York, died suddenly in that city last Wednesday. Mr. Lyons was well-known in Toronto, being for a number of years with M. & L. Samuel, Benjamin & Co., Toronto. He went to New York some years ago, and has since then held important positions in the commercial houses there. Mr. Lyons' death was sudden, and came as a shock to his many friends in Toronto.

He leaves two brothers, Mr. Abraham Lyons, of Lyons & Marks, Toronto, and J. Lyons, of Sydney Sheppard & Co., Buffalo.

Deceased will be buried in Toronto. HARDWARE AND METAL extends its sympathies to his surviving relatives and friends.

WHAT IS STEEL?

SUCH a question as "What is steel?" would seem to be only of concern to scientists, but, over in Sheffield, England, the lawyers have recently been investigating the problem. The trouble arose over a suit brought by the Cutlers' Company of Sheffield against Mr. Edward Kain, who carried on a business as the "Sheffield Scissors and Fork Co." The defendant was charged by Mr. Henry Goddard, table-fork maker, that he was selling forks descibed as steel forks, which were not actually made of steel. Naturally the whole interest of the trial centred on whether or not the forks in question were made of steel.

The stipendiary magistrate, before whom the case was brought, hastened to prime himself by referring to the pages of the Encyclopædia Britannica. He was then in a position to listen to the pros and cons of the witnesses summoned by both sides in the action. After hearing a great deal of conflicting evidence, it was agreed that the whole matter under discussion should be referred to two arbitrators, who were practical manufacturers and accustomed to tempering and hardening all kinds of steel.

The arbitrators set to work and made five distinct trials, from which they concluded that the material in the forks was steel, but steel of a very inferior quality. Consequently, the magistrate dismissed the complaint, and allowed the defendants £6 6s. costs.

Steel, according to the Century Dictionary and Cyclopædia, is a form of iron in which the amount of carbon is intermediate between that in wrought and that in cast iron, and this carbon does not exist in the steel in the form of graphite, but is either combined with or dissolved in it. The quality of steel varies with the amount of carbon present, and the effect of this latter element varies with the amount of impurity (silicon, etc.) present in the steel. The larger the amount of impurity, the larger is the quantity of carbon required to give to the iron the character of steel—0.3 per cent. and 2.0 per cent. of carbon seems to be the limits separating steel from bar iron and wrought iron respectively. In his summary, the magistrate stated that he found that in well-marked steels the amount of carbon ranged from 0.4 to 1.8 per cent., though an amount of 2 per cent. was to be found in some steels, which were admittedly steels.

The metal from which the forks was made appeared to be a mixture, containing three main ingredients, that was to say, a mass of 20 cwt. of it would contain some 5 cwt. of waste from similar fork-makings, 3 to 3¼ cwt. of boiler-plate punchings, and 11¼ to 12 cwt. of cast or pig iron. The exact process through which these ingredients were mixed up into the metal from which the forks were manufactured and the exact process through which the metal was manufactured into the forks, were said to have a secret somewhere in them, or at least in one of them, and this secret, whether discoverable or undiscoverable, was hidden, as far as Mr. Kain could hide it. All that his evidence adduced was, that the forks had been hardened and that he had found them elastic and what forks should be.

On the other hand, the complainant, Mr. Goddard, gave in evidence three tests that he had made. The fork was taken and put on an anvil just as it was when bought, and was then hammered at the tang-end when it was cold. Another fork was taken, and its tang end was put in a fire and heated to a faint red heat, and hammered at the tang-end when hot; and the one which had been tested at the tang-end when hot was further tested at the prong-end. That end was put in the fire, and was heated steadily just to a black heat—not very hot—it was then put into cold water to cool, then put in the fire again to temper it, and then put to cool again. The results of these tests were that the tangs split all to ribbons or went to pieces when they were hammered, that the prongs broke and came off when put to the ordinary pressure or spring test, and that Mr. Goddard satisfied himself that the metal would not harden or temper as a steel.

The Magistrate, however, would not place any stress on Mr. Goddard's evidence, as it was, on the face of it, the evidence of a manufacturer of high-class steel, who only considered as steel what was of a certain high quality.

Accordingly, he based his decision on the five experiments of the arbitrators, reported as follows:

No. 1 was heated to a red heat, plunged in cold water in the hardening tub in constant use, tempered to a dark straw color, and one tine broken, which showed a decidedly crystalline frracture. No. 2 was similarly heated and cooled, with unsatisfactory results, only one part of the fork really hardened (this was not tempered). No. 3, heated and hardened in water, one prong fractured, was then tempered to a blue, the two remaining prongs then possessed a proper amount of elasticity. No. 4, also heated and hardened, one prong broken off, then tempered to a dark blue, remaining prongs possessed fair amount of elasticity. No. 5. This fork was hard when received by us. Was heated to red heat, and allowed to cool slowly, was not put into water, and is now perfectly soft.

From these experiments the arbitrators drew the conclusion that the metal could be hardened though it became brittle, while in tempering it evinced a fair amount of elasticity. On the whole, they were led to regard it as steel of a very low grade. With this decision the court seemed fairly well satisfied.

Let's Talk it Over.

The best building proposition in the paint line to-day is

THE SHERWIN-WILLIAMS AGENCY.

It's a money-maker for the dealer. It gets the business. It holds it. It keeps all the trade of the store. It's profitable. It means success in paints. It means good goods, good methods, and good advertising—the elements of success in business.

We want you to have our agency for your town if we're not already represented there. We want you to give us a chance to prove to you the trade it can bring. We'd like to talk the matter over with you and if you say the word will have our representative call to see you. A post card will bring him.

Have you received a copy of the "B-13" booklet? If not, write for it to-day.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND. BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

SILVER-PLATED WARE.

A line which hardware merchants can carry with little or no risk of loss and with good chances of a handsome profit, especially at this time of year, is silver-plated ware. The silver-plating business in Canada has grown to very large proportions during the last few years, giving evidence of the increasing demand for this class of goods.

There is nothing more suitable, perhaps, for gift purposes than silverware. It combines the useful with the ornamental and has an additional advantage in being sold at a price within the reach of a moderate-sized purse. It is an article which can be handled all the year around, admirably filling the requirements of a wedding present, birthday present, tourists' souvenir, etc., to say nothing of the immense demand at Christmas time. Most of the silverware manufacturers sell direct to the retailer, so that he is in a position to buy at closer prices, and can retail at a good margin of profit. Many dealers are making inquiries with reference to this class of goods in time for Christmas trade.

A WELCOME VISITOR.

J. E. Elliott, of the firm of McLennan, McFeely & Co., the wholesale hardware firm of Vancouver, B.C., and Dawson City, was at the windsor Hotel, Montreal, last week en route to New York. Mr. Elliott, who is an experienced hardwareman having "graduated" at Brampton and Fergus, looked the picture of health and reports that his firm is extremely well satisfied with the outlook and prospects of Vancouver, having concluded to build an additional commodious warehouse on Water street, that city, which will be situated upon the Canadian Pacific Railway Co.'s tracks and be modern and up-to-date in every particular.

A number of Mr. Elliott's old time friends called upon him at the Windsor, and the experiences related were "racy" and extended far into the "dim and misty" past. Old "saws" were related and some of the jokes were veritably "keen cutters" creating roars of laughter in the classical and gossipy rotunda of the Windsor Hotel. Mr. Elliot speaks well of HARDWARE AND METAL, and says it assists him in keeping posted as to the eastern markets.

PERSONAL MENTION.

Mr. Geo. V. Desrochers, of The Canada Hardware Co.; Mr. A. E. Bregent, hardware merchant, and Mr. Treffle Lamontagne, of the hardware firm of J. A. Denis, have just returned to Montreal from a trip to New York, where they visited the various hardware establishments, with a view to picking up new ideas for their respective houses.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

STEAM HEATING ADVANCED BY COAL SCARCITY.

IT is evident that a quite general opinion exists that profit can be derived from the erection of a central steam-heating plant to furnish heat to consumers along the line from the vigor with which franchises for such plants are sought and the readiness with which capital can be secured for such enterprises, according to Metal Worker. Reports from every town of any considerable size where an electric lighting or some other plant has exhaust steam to spare are to the effect that mains are being laid in the streets, sometimes traversing more than a mile, for supplying heat to residences and other buildings along the line. Advices from various sources state that steam fitters are busy, and in many cases, owing to inability to secure at a reasonable figure a suitable supply of the customary fuel, applications are being made to the operators of neighboring heating plants for a steam supply for heating. In some towns houses that have not had steam-heating apparatus or have not been heated from a central plant are now being piped and equipped with radiators to avoid discomfort from lack of fuel and heat this winter. This demand is sufficient to cause the heating companies to extend their mains considerably and complaint has already been made that the equipment cannot be supplied in time to afford the comfort which the customers expected. There can be no doubt that such a method of heating tends to a more general economy, for there will be less waste of fuel and less expenditure for labor where the heating is done by such a method than if each individual operated a furnace, heating boiler, or a number of stoves. It is also pointed out in some instances that where such heating systems have been in use and have expanded this has had the effect of reducing the sale of separate heating apparatus. The manufacturers of steam and hot-water radiators are also enjoying an exceptional demand; in fact, sharing with the manufacturers of gas and oil heaters the trade that otherwise might go to the coal stove dealer. The scarcity of radiators is causing delay in the shipment of some sizes, styles and kinds of radiators. The final effect of this experience will be watched with some interest, as it is improbable that those who have avoided the dirt, noise and labor of getting coal in and ashes out, as well as care of the fire, will be willing to return to old conditions after having enjoyed a relief from them through the heat supplied from a street main. The demand for heat to be supplied to customers from such sources has very greatly increased this year, notwithstanding that the heating companies have found it necessary to make a substantial advance in their rates.

SIGNAL FOR ELEC. CAR CROSSINGS

Until a few months ago, the method in vogue in Leipzig, Germany, of avoiding accidents at crossings of electric street railways was either to station a flagman at the crossings, or to have the conductor run forward to see if the other line was clear. An automatic signal lantern has been introduced by the street railway company, which does away with these inconvenient methods. The lantern consists of two boxes, arranged one above the other, each having two sides fitted with red and the other two with green glass, the red being above the green. The cars on one line cause the incandescent lamps in the upper box to burn; the cars on the other line, the lamps in the lower one. This causes, owing to the arrangement of the glass in the boxes, a green light to appear to the first line, which indicates "free passage," and a red light to the second line, which means "stop." Signals are also visible in day time, as reflectors shut out the light of the sun, and the lantern is well lighted from the inside.

SUCCESSFUL TEST OF A TOWER ELEVATOR.

An experimental 400-foot drop of the Philadelphia City Hall tower elevator recently proved that the safety-air cushion device installed will probably prevent any serious accident. Within the short distance of 84 feet the speed of the car was reduced from 12½ miles a minute to zero. Scientific American says that in the car were placed eggs, delicate incandescent light bulbs and rats. When the car reached the bottom most of the eggs were found in good condition, the incandescent light bulbs were intact and the rats alive and well. The trip was made directly under the Penn statue, 372 feet 9 inches above the bottom of the shaft. The particular safety device used is the Ellithorpe safety-air cushion.

ELECTRICAL NOTES.

McDonald & Rivest, electricians, Montreal, have dissolved.

The Electric Trades Association of Canada has been incorporated with a capital stock of $2,000.

Tenders are closed for the extension of the City Hall electric plant, Toronto. There is keen competition for the job.

The Eastman-Colwell Electric Company, 118 Bay street, Toronto, is a newly organized company, and will deal exclusively in electrical supplies.

R. S. Lear & Co., Richmond street west, Toronto, claim that the majority of new buildings being erected are being fitted up with electric fixtures instead of gas.

A contract worth £500,000 has been placed with the Westinghouse Company, London, by the Clyde Valley Electrical Co., Glasgow, for equipment of their generating stations, which are to supply electrical power for industrial purposes over an area of 755 square miles. The stations will be ready in about eighteen months' time.

GREAT BRITAIN GETS THE CONTRACT.

The contract for the construction and operation of the electric traction system to be built in the foreign settlements of the city of Shanghai, China, has been awarded, jointly, to The British Brush Electric Engineering Company, Limited, and The British Electric Traction Company, Limited, of London. Work will be begun almost immediately on the construction of nine and a half miles of double and eight miles of single line. The rails to be utilized will be girder ones of 90 lb. weight. Between 50 and 60 cars will be called into requisition in the first instance. The concession is for 21 years, after which period the Shanghai municipal council reserves the right to take over the road on certain terms. The construction of the system, which is expected to be completed by the end of 1904, is estimated to entail an expenditure of about $1,600,000.

ENGINES FOR KING EDWARD HOTEL

The Robb Engineering Company, of Amherst, N.S., have secured the contract for installing four large engines in King Edward Hotel, Toronto. It is generally understood that Alex. Storer will be chief engineer at the new hotel.

GROWTH IN ELECTRICAL ENGINEERING.

THE increasing use of electricity in all parts of the world has given a powerful impetus to electrical engineering, and this has reacted favorably on all existing industries. In Germany, over half of the steam engines and turbines manufactured during the past year are being used for driving dynamos. In several industrial branches electricity has acted as a stimulus, offering many new problems, the solution of which is being pushed forward in all parts of that country.

There are 80 electrical joint-stock companies in Germany, with a total capital of $125,000,000. Last year these companies carried out the following orders from foreign countries :

Country.	Tons.	Value.
Belgium	629	$ 266,084
France	242	92,106
Great Britain	1,512	575,722
Italy	1,650	628,082
Holland	478	182,070
Austria-Hungary	1,122	427,210
Russia	2,650	1,009,120
Sweden	389	148,036
Switzerland	354	133,408
Spain	972	369,852
Total	10,068	$3,831,690

The leading companies in Germany are :

Company.	Capital.	Workmen employed.
Allgemeine Elektrizitats Gesellschaft	$75,000,000	13,000
Siemens & Halske	35,000,000	8,000
Schuckert & Co.	30,000,000	8,000

*No data.

The Dusseldorf Exhibition, now in progress, has some wonderful exhibits in electric machinery. One company are showing a huge plant of 13,000 horse-power, which is more than twice the power required to run every branch of the exhibition. Another exhibit is a complete electric pumping plant. The pump can handle 1,210 gallons of water per minute, while the three-phase motor has a rated capacity of 650 horse-power at 2,000 volts per minute.

If we inquire how German electric engineering came to gain such a leading position in the world's markets, we discover that it is the profound scientific training they receive. There are over 2,000 electrical engineers in Germany who have received their training in the technical universities of that country.

The preparation of the electrical engineer keeps pace with the development of the science, thereby fulfilling the conditions which enable the German electrical engineer to successfully retain the distinguished position he has reached by means of his industry, perseverance, and technical training.

THE LARGEST AUTO. IN THE WORLD

The White Steam Wagon Co., Indianapolis, Ind., have built a vehicle that has a carrying capacity of 12,000 pounds. It is of 35 horse-power, with 225-lb. steam pressure. The platform is 20½ feet long and 8 feet wide. The carrying platform alone is 19 feet long, 6½ feet being taken up by the cab. The wheels carry 12-inch tires. One man operates the machine. It is capable of maintaining a speed of 6 miles an hour, with its load of 12,000 lb., without "throwing the shoe" or "sweating a hair." In its trial trip, the machine was loaded with 10,000 pounds of pig iron.

ELECTRIC WORKS ON BURRARD'S INLET.

The Vancouver Power Co. is constructing works on Burrard's Inlet to generate power to be used in running the car services of Vancouver and New Westminster, and a contract has been awarded to The Westinghouse Co. for apparatus to generate 9,000 horse-power.

BRANCH TO BE STARTED IN NEW YORK.

The Robb Engineering Company, of Amherst, N.S., will establish a branch of their business in New York State. They have been incorporated in New Jersey under the title of The Robb-Mumford Boiler Company, for the manufacture of boilers, engines and marine engines, and as they are unable to meet the high duties, propose to make their goods in the States. As the products of their Amherst works are selling in competition with American manufacturers all over the world, they have no fear of the results.

The Robb Company, at Amherst, has one of the finest plants in America, and their new move is exciting great interest.

PERU MARKET FOR MACHINERY

The British Consul-General at Callao, Peru, recently sent in to the Foreign Office a report on the conditions governing the market for agricultural and mining machinery and implements in Peru.

The report states that, with the exception of plows, few agricultural implements are made in the country. Those used in inland Provinces are usually made by native blacksmiths and are of the most primitive kind. The coast belt is planted with sugar cane, rice, cotton, maize, beans, etc., for the cultivation of which machinery and implements are imported. Sugar-grinding machinery and distilling apparatus are imported to some extent, but stills are also made in Lima and Callao.

Steam engines and boilers are imported from the United Kingdom, the United States, France and Germany. Those of more than 25 horse-power are brought from England, but the smaller varieties are mostly supplied by the United States. Pumping machinery of various kinds is imported, principally from the United States, and most of the steam-threshing machines and corn-grinding mills are from the same country. Reapers, mowers and plows, other than steam, are chiefly of United States makes, while cane-grinding machinery and distillery apparatus are mainly of British origin, though one French firm, one German, and a few United States firms transact some business in these lines. Lubricating oil, for machinery, is largely imported from the United States.

It is stated that the use of electricity for purposes of illumination is increasing rapidly in Peru. Most of the installation comes from the United States. British machinery of this class is practically unknown in the country, and German dynamos and motors have been tried, but are regarded as too complicated. Telephonic lines in the Departments of Lima, Piura, La Libertad, Arequipa and Ica, the total length of wire being probably over 3,000 miles. Most of the telephonic appliances employed come from Sweden.

MACHINERY NOTES.

The McLachlan Gasoline Engine Co. report business very good.

A large band re-saw was shipped to The Preston Furniture Co. by H. W. Petrie, Toronto.

Hudson & Augustin have registered in St. Hyacinthe, Que., as dealers in boilers, engines, etc.

The Canada Foundry Co. are shipping about 100 feet of their iron fencing to H. S. Holt, Montreal.

Montreal has ordered a $40,000 electric pump to take the place of the present pumping engines at the high level station.

The Goodenow Gasoline Engine and Motor Co., 115 Simcoe street, Toronto, is a new company manufacturing gasoline engines and pumps.

A 15 by 16-inch bed, screw-cutting engine lathe and a 20-inch upright drill were shipped to John McEnteer, Belle River, Ont., by H. W. Petrie.

Hube & McLean, of Toronto Junction, have purchased of H. W. Petrie a 14 inch by 6 ft. Porter lathe and a 10 ft. by 15 Boynton and Plummer shaper.

Gas engines using blast furnace gas will be installed to furnish the blast for four new furnaces now building by The Lackawana Steel Co., at Stony Point, near Buffalo. This power has long been used in Europe, but this is its first appearance in America for this purpose.

NEW MACHINE COMPANY.

The Buffalo Tool and Machine Co., of Buffalo, N.Y., are opening a branch in Toronto. They will have temporary quarters at 116 Bay street. This is their first branch in Canada, and they intend to start on a large scale. They make a specialty of the manufacture of tools and wood machinery.

Beware of Counterfeits...

Get the old, original and only reliable John Lucas & Co.'s Imperial French Greens. None genuine without the Lucas brand stamped in head of every package.

Lucas Imperial French Green

more than pleases. It confirms our belief that it pays to make a green that is the painters' stand-by. Lucas Imperial French Green is durable and practically unfading, is positively non-poisonous, brilliant in color and has great covering qualities. It has been analyzed by almost all the painters' associations in the United States and Canada and has come out of the test always with great credit. DRY AND IN OIL. It can be used wherever a green is needed.

Write us for sample cards showing the shades and our reasonable prices.

A Silent Salesman that Talks Goods

YOURS FREE

The "NEW GEM" Safety Razor.

Send your order for our following "sure sellers" and this silent salesman is yours.

We have made these selections from our knowledge of the goods most demanded by your trade. You have the privilege at any time of sending back for exchange any *"New Gem"* sets that are not found ready sellers

The accompanying illustration conveys but a poor idea of the beauty of this show-case attractive in size, unique in construction —all in all a fixture that any merchant may well be proud to place where the customer's eye can best be caught.

	Wholesale.	Retail.
6 "New Gem" Razors	$6.00	$12.00
1 Strop Machine	.92	1.50
2 Cases No. 1	3.00	5.00
1 Case No. 2	2.25	3.50
1 Case No. 3	2.96	4.50
1 Case No. 4	3.67	5.50
1 Case No. 18	1.25	2.25
	$20.05	$34.25

For sale by Cutlery Jobbers all over the world.

PAINT, OIL AND BRUSH TRADES

Handling Paints in the Hardware Store—The Markets.

HANDLING PAINTS IN A HARDWARE STORE.

DOES it pay to handle paints in a hardware store? This question has occurred time and time again to many and has been answered in the negative as well as in the affirmative. "A. M. P." in The Iron Age says it pays decidedly, and backs up his statement by the following reasons:

It seems absurd to think that some hardware dealers who are otherwise very progressive and in line with whatever tends to better their trade should allow business which by every natural right is theirs to go to such a foreign place as the drug store. If a man wants bolts and locks and fire grates and the thousand and one things in the building line for his house he doesn't go to the drug store for them, and why should it be necessary for him to go there for paint, when paint essentially belongs to the building trade, and therefore by every natural right to the hardware dealer? If hardware dealers generally, were more fully alive to this fact there would be fewer druggists and other like merchants handling paint to-day, and the enormous business that has been developed in this line in late years would be diverted to the channel in which it properly belongs.

In the old days, when lead and oil were the only forms in which paint was sold, it is very true paint was not a desirable article to sell. It was not a cleanly commodity; it required considerable investment in time, space and money to carry a stock that would be at all adequate to the requirements of any fair sized community; and it was more often the case than otherwise that the profit, if any, was far from commensurate with the investment and trouble involved.

But things are different to-day. Prepared paint has come into the market, and it is one of the most profitable and desirable building-trade accessories that a hardware dealer can sell. It is brought to the store attractively labelled in neat looking packages; it requires very little shelf room; it presents a splendid appearance on the shelves, and instead of detracting from the general orderliness of a well-conducted store lends a tone by its effective display and eye-catching qualities, and it affords a margin of profit ranging from 33 1-3 to 50 per cent.

As an example of the profit that good prepared paint affords the dealer: In a small town in Maine, a hardware dealer thoroughly progressive and systematic and up-to-date in everything, arranged his stock so that those articles which paid him the best margin of profit would be up in front of his store—the stock graduating towards the rear according as the profit on each line was lessened. When through with his arrangement the paint stock was found to have the place of honor.

Then, too, there is no other line the hardware dealer handles that is so well and forcefully advertised as the leading brands of good prepared paint. A paint stock of a reputable maker brings with it advertising helps in the way of daintly designed display cards, well-printed color cards, strong posters, etc., helps that do much not only to build up paint business, but also by their general selling qualities to attract trade to the store that would unquestionably go elsewhere.

Some of the leading paint makers are even going further and have organized a system of personal solicitation of the property owners by personal letters in the interest of their customers that in itself would be an inducement for hardware dealers to consider seriously and long before they allow some indirect competitor in their town to get the benefit of it.

Unlike the days of lead and oil, a dealer in good prepared paint is thoroughly protected from ruinous competition in his own locality by the protection which the agency plan affords him. Prepared paint makers do not place their goods with every Tom, Dick and Harry in a town and then set them flying at one another's throats and slashing prices in the scramble to control the trade. On the contrary, when the agency is taken for any well-known brand of a reliable paint manufacturer, it is confined strictly to one dealer and it is certain that any effort than may be put into the sale of the goods will result solely to the credit of the agent or dealer and to no one else.

The number of hardware dealers who are handling good prepared paint is constantly increasing, and we hope the day is not far distant when we shall see the paint business of the country under the control of the hardware dealer, to whom by every logical right it belongs.

In one of the thriving Massachusetts towns there is a hardware dealer who put in a stock of a well-known prepared paint a little over three years ago. At that time he was not very sure that the paint stock was a profitable investment. In the short time he has been selling paint his business in it has grown to such proportions and his profit is so satisfactory he has even considered the handling of paint exclusively. Of course, that would be unwise, as the sale of hardware helps the sale of paint, and vice versa.

THE PRICE OF FLAX IN WINNIPEG

No. 1 flax, and a very good grade at that, has been coming forward to Winnipeg in quite large quantities this week. The price paid here by Body & Noakes, who are the only buyers for local account, is $1.08 per bushel The price paid at Chicago for cash flax to-day is $1.26 and at Duluth, for October delivery, $1.22. The reason for the difference in the price here and at American points was given by Mr. Bott, of the Body & Noakes' mill. He states that a market has to be found in the east and in England for the manufactured oil cake, and to compete against other manufacturers it is necessary to sell at as low a figure as they do and at the same time be put to additional expense in the longer carriage. Prices are regulated by Montreal and not by Chicago as is done in wheat. The duty on flax is 25c. per bushel, and to this would have to be added the freight charges. The price is rather disappointing to the producers, who expected that a higher figure would be given.—Free Press.

PAINT AND OIL MARKETS.

MONTREAL.

Turpentine has again advanced, this time 4c., and the market continues very firm. The advance is on account of continued short supplies from the South. Linseed oil has declined 4c., and is very weak. Business in the general list of paints has been fairly brisk as is usual at this time of the year, when dealers are looking forward to the advance in freight rates. Staples in the paint and oil departments are now cut so fine that even a slight increase in the rates becomes an important factor over the first cost. Dry colors, and especially oxides, graphites and vermilions are being ordered pretty freely. Colors ground in oil are not quiee so active, but japan colors, for carriage work are in good demand. Liquid paints are quiet, business being now of a sorting-up character. All varnishes, owing to the high price of turpentine, are firmly held. Gum shellac has been reported to be dear, and in consequence black varnishes are somewhat higher. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25; No. 1, $4.77½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks: kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 68c.; boiled, 71c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 78c.; 2 to 4 barrels, 77c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ¼c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

TORONTO.

The paint and oil market is very brisk at present. The shellac market has advanced about 3c. and is still very much excited in New York and Calcutta, with the prospects of a still further increase. Putty is moving freely at the present quotations. Glass is very active, which is accounted for by the temporary decrease in price. Turpentine is going freely and the Southern markets are active. An advance in price is looked for. We quote as follows:

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ¼c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in cgsks, $6.00.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 40c.; in less than cases, 42c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY.—Bladders, in barrels, $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

PREPARED PAINTS.—"Ark" brand, $1.25 per gal.; "British Navy" Deck, $1.50 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 70c.; boiled, 73c.; 3 to 5 barrels, raw, 69c.; boiled, 72c.; 6 to 9 barrels, raw, 67c.; boiled, 70c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 79c.; 2 to 4 bbls., 78c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 18¾c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

WINDOW GLASS.

MONTREAL

There is nothing new to report in this market. A few odd orders are being received, but trade in general continues quiet. We quote: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

TORONTO

The market is active. There is some talk of an advance if the trouble in Germany is not settled shortly. Our quotations are: Under 26 in., $4.45; 27 to 40 in., $4.75; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

BROOM CORN CROP POOR.

Mr. Emil C. Boeckh, of United Factories, Limited, was interviewed by our representative a few days ago on the question of broom corn.

"Yes, the crop is certainly very inferior this year," replied Mr. Boeckh, "but good corn can be bought, and that is the only kind we purchase. We do not intend to raise the price of brooms if we can avoid it, although we would be justified in doing so, owing to the inferior crop and great scarcity of labor. Brooms will certainly be no cheaper, however, for some time to come."

THE WORLD'S PRODUCTION OF IRON AND STEEL.

FIGURES of pig-iron and steel production during the half century 1850-1900 have been compiled by The Iron Age. It is not claimed that all the figures given are strictly accurate, as in some instances it has been necessary to make estimates from the best data obtainable. In the matter of steel, while most of the figures refer to ingots, especially in later years, some are known to have referred to finished steel. Nevertheless, the tables given are of value for purposes of comparison. Efforts have been made to put all figures in gross tons.

Taking up pig iron, the world's production in 1850, in gross tons, according to countries, is believed to have been about as follows :

Great Britain	2,300,000
United States	563,755
France	405,653
Germany and Luxemburg	350,000
Austria-Hungary	250,000
Russia	227,555
Sweden	150,000
Belgium	144,452
Other countries	10,000
Total	4,401,415

The world's production in tons for each fifth year from 1855 to 1900 is given in the following table, which shows how rapidly the output has grown in the last half century:

1855	6,150,000	1880	17,950,000
1860	7,400,000	1885	19,100,000
1865	9,250,000	1890	27,157,000
1870	11,900,000	1895	28,871,000
1875	13,675,000	1890	40,087,616

The production in gross tons for 1900 was divided as follows among the several countries producing pig iron :

United States	13,789,242
Great Britain	8,959,691
Germany and Luxemburg	8,381,373
Russia	2,859,815
France	2,669,906
Austria-Hungary	1,431,989
Belgium	1,001,872
Sweden	518,253
Spain	289,315
Canada	86,090
Italy, Japan, Mexico, etc	100,000
Total	40,087,616

Turning to steel, it is remarkable how little the world used so recently as 1850. Its production at that time was limited to the old process of crucible conversion, cementation or puddling. Necessarily but small quantities were produced at each heat or operation, and the cost was high. Not until well into the decade after 1860 was steel produced to any extent in large quantities by the Bessemer or open-hearth process. The manufacture of Bessemer steel on a commercial scale began in England in 1857 and in this country in 1865, while open-hearth steel began to be made on a commercial scale in England in 1864 and in this country in 1868. According to the best information at hand, it is believed that in 1850 the world's production of steel was not over 85,000 tons, distributed as follows :

Great Britain	40,000
France	15,000
Austria	14,000
Germany	10,000
Russia	2,000
United States	2,000
Sweden, Belgium, etc	2,000
Total	85,000

From that time the world's production of steel in tons for every fifth year is given in the following table, the figures for the period up to 1875 being necessarily based on estimates for some countries :

1855	120,000	1880	4,274,000
1860	200,000	1885	6,147,000
1865	350,000	1890	12,231,000
1870	700,000	1895	16,449,000
1875	2,000,000	1900	27,130,815

The details of production in gross tons for 1900 are as follows :

United States	10,188,329
Germany and Luxemburg	6,257,745
Great Britain	5,050,000
Russia	1,800,366
France	1,569,481
Austria-Hungary	1,126,942
Belgium	644,132
Sweden	295,636
Spain	148,184
Canada and other countries	50,000
Total	27,130,815

A CATCHY IDEA.

EVERY merchant knows the truth of the old saying, "Goods well displayed are half sold," and The Gem Cutlery Co., with their usual business sagacity and their desire to assist the trade, have embodied this idea in a most attractive and unique showcase for the display of their goods, the well-known sellers, the "New Gem" safety razors. They do not ask the trade to buy this handsome display case, they present it with a very small order of their goods, and give the privilege of returning any of their lines that the retailer does not find ready sellers. A most fair and reasonable offer, and one which every merchant will appreciate, for it shows plainly that they desire to guarantee the sale, and relieve the merchant of any responsibility or anxiety concerning the sale of their goods whatsoever. This generous offer will at once be taken advantage of by the trade, who are always open for good opportunities to increase their sales without any additional expense, and are ever ready to respond to any firm who shows such a strong desire to work with the merchant, and not only back up his efforts but further him and assist him in selling their goods. This has always been the policy of The Gem Cutlery Co., by which they have built up their immense trade, for their goods are now sold all over the world. Every merchant feels in dealing with such a company he is safe. This company ever recognize the interests of the merchant who sells their goods. The "Silent Salesman" advertised in another column is positive proof that The Gem Cutlery Co. is ever and always on the alert to make the part of the merchant in selling their goods as easy as possible.

HIGH-CLASS TAILORS' SHEARS.

The National Cutlery Co.'s tailors' shears in A, B and C shape and bolt, are worked with extraordinary ease, because they are the only tailors' shear made with a steel ride, and laid with a special steel of superior quality and tempered by a patent method. They have no soft spots, no feather edges. They are fully warranted, and put up in separate pockets, each pair. See the cut. Ask for catalogue. Decatur, Bull & Co., Montreal, are the sole agents.

INTO LARGER QUARTERS.

Alexander Gibb, 13 St. John street, Montreal, has found it necessary to have larger quarters for his office and sample-room, and in consequence removed this week into the apartment which has been occupied by R. C. Jamieson & Co. for many years. The new rooms are in the same building, just across the passage from those formerly occupied by Mr. Gibb. By the change almost double the floor space is gained, and a splendidly lighted and ventilated office is provided. The sample-room in the new place is at the rear, the office facing on St. John street.

James L. McAvity has purchased the iron foundry business of McLean & Holt, City Road, St. John, N.B. J. B. McLean and Bart. J. Holt are retiring.

WIDE-AWAKE RETAILERS.

Hints and Ideas of Interest.

A COMMERCIAL TALK.

THERE is no royal road to success. To climb the heights strong, persistent work is required, and, of course, work of both body and mind. The business man who has made a success of his vocation is found to have been the man who worked the hardest and planned the most. "The Hustler," in Stoves and Hardware Reporter, philosophizes in this way :

A great many people go into business with the idea firmly impressed on their minds that they are going to have an easy time of it and will make a success from the start. These people have at least one advantage in their favor and this is the fact that they have confidence in themselves, a condition which is always a good one unless it is overdone. The man who firmly believes he is going to succeed has a better chance than the man who gets down in the mouth and is a chronic growler against himself and his prospects.

——

There are no soft snaps in business. It is a time-worn saying that it is better to be born lucky than rich, yet I am a firm disbeliever in the theory of luck, and so will you be if you stop to consider the matter. There may be such a thing as luck, but it is only an exceptional factor in business or personal affairs. Many a man has received a tribute to his luck or a selfish condemnation for having it when he is entitled to a very large credit for the persistent, intelligent and active way in which he handles his business.

——

Just as there are no soft snaps in business so are there many opportunities to make a failure unless the business is conducted along lines of a thorough system. Set a trap to catch a rat, and unless you set it right and bait it properly you are not going to catch any of these pestiverous rodents. Customers are sometimes very much like the animals in question : They must be caught before their purchases can be captured. But it is a mistake to act on the idea that customers are to be treated as if it were thought necessary to set a trap for them.

The best way of all in which to conduct a business properly is after methods that will suit customers. Human nature is not always aggressive or suspicious. It wants to be treated fairly and to be done by just as it wants to do unto others, but never wants to be done up. I believe that the best rule for the treatment of customers in the purchase of goods is to put yourselves in their places and treat them exactly as you expect to be treated when buying your own goods. I believe that very few of you, if any, have received discorteous treatment when buying goods from a manufacturer or jobber, but I have had sufficient experience with the retail trade to know that dealers do not always treat their own customers in the way that they themselves have been treated by those who have sold them their goods. It may be in the difference of the size of things.

——

This may seem to you as a rather broad statement, but it is a true one so far as my knowledge of such matters goes, and I think that this knowledge is a rather broad one. It may seem queer to you at times that certain people do not patronize your store. This is a fact which is not one of the soft snaps. Probably the trouble is with yourselves. You haven't made a sufficient endeavor to win their confidence and respect, or possibly your stock of goods is not what they want. Such people compose one of two classes. They can afford to be particular in making selections or else your store is too rich for their financial blood. The best-managed store in most lines of merchandise is the one that adapts itself to all classes of customers unless it is in an exclusive territory. If it contains goods for the wealthy class alone it will not receive any patronage from those of moderate means, but unless it is so conducted that it suits every one with even a small want and a proportionate sum of money to pay for that want it is not going to be a success unless other conditions are more than favorable.

This goes to show that there are no soft snaps and no luck in business. A man may be fortunate in selecting his location or in the choice of his stock, but in nine cases out of ten it is probably a fact that this supposed luck is the result of a careful judgment exercised at the right time and in the right way. Business is a system, and unless it possesses this qualification it cannot be successful.

——

A GOOD SCHEME.

An enterprising merchant of Sullivan, Ill., is the originator of a clever stunt. He believes in making his bargain department known :

"THE FAIR."

A. J. Woit. Sullivan, Ill.

On Saturday, the 10th of May,

Call at "The Fair" store and get a real live and happy gold fish absolutely free, given away with every purchase. Ten thousand now on the way from New York for this purpose. Bring a glass jar with you, and the same will be filled free of charge. The fish we give away are valued from 25c. to $1 each.

——

The fish cost Mr. Woit about 2½c. apiece. A woman will want more than one and is almost sure to buy four or five.

Mr. Woit sells them at almost 50 per cent. profit. This is a good advertisement, as well as a good business deal.

Few country merchants handle fish. City merchants often get orders from country retailers. The people in the country like these little luxuries just as well as city people. Here is a good field for the bargain man in the country.

INQUIRIES ABOUT CANADIAN TRADE.

Among the inquiries received by the Canadian Section of the Imperial Institute, London, Eng., were the following :

1. A Welsh firm of coal shippers desires the names of Montreal wholesale coal dealers.

2. The manufacturers of a popular briar pipe wish to appoint a suitable Canadian resident agent.

3. A Birmingham house possessing a large connection in box shooks wishes to hear from Canadian firms who can supply same in large quantities.

4. A London company manufacturing tobaccos, cigars and cigarettes wishes to be placed in touch with Canadian importers of these lines.

[The names and addresses of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, October 24, 0902.

HARDWARE.

ORDERS for hardware have been arriving freely during the week and business is expected to continue on the increase until the winter freight rates are put in force. Stoves appear to be a little scarce, manufacturers not being able to keep up with the demand. Wholesalers have several orders now on hand, but cannot get the goods. Blacksmiths' coal has advanced about $1 during the week. It is now quoted at $8 in carlots on board cars.

BARB WIRE.—The price of barb wire is now $2.90 per 100.keg f.o.b. Montreal and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—No further change in prices is reported this week. We quote as follows: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20.

SMOOTH STEEL WIRE.—Business is still quiet and prices are unchanged. We quote as follows: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb., are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is but little doing in this line. The discount is 25 per cent.; net extras are as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—The discount on both these wires is 62½ per cent.

FENCE STAPLES.—These are moving slowly. The price of galvanized fence staples is $3.25, while bright staples sell at $2.90 per 100-lb. keg, with an extra of 25c. for 25 and 50-lb. packages.

WIRE NAILS.—There is no change. A moderate demand prevails and business is done on a basis of $2.55 per keg in small lots and $2.50 per keg in carlots, f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—These are moving out fairly well at $2.45 in small lots and $2.40 in carlots.

HORSE NAILS.—Business in horse nails is still brisk and the discounts are unchanged. We quote as follows: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch," 65 per cent.

HORSESHOES.—The demand for horseshoes is still heavy and the market is active. Our quotations are now as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; featherweight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—There is not much doing in this line, and nothing of importance has occurred on the market since our last report. Discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—There is only a light demand for bolts and nuts, and the discounts are: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts.

NOV 7 1902
RETURNED

The "Famous Active" Range

The most successful and best known cast-iron Range on the market.

The oven is ventilated and lined with asbestos.

Fire-box is deep and fitted with "McClary's Special" duplex grates.

Has thermometer and basting-door in large oven door.

The cast-iron linings last longer and give better results than the brick and cement found in common ranges.

A rich nickel dress combines with its artistic carving and well-proportioned outline to make the "Famous Active" unquestionably the most attractive range in Canada.

Has proved a rapid seller by all who handle it. If you are handling an old-fashioned or unsatisfactory line of ranges write to us about our leader.

MIDLAND, ONT. Limited

50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

SCREWS.—These are moving out as usual at this season of the year. The market is quiet. The discounts follow: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—This is quiet and unchanged in price. We quote: Manila, 15c.; British manila, 13c.; sisal, 12½c. and lathyarn, 11½c.

BUILDING PAPER.—A fair movement is reported. We quote as follows: Tar red felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—There is no change. The price is still $1.37½ per 100 square feet.

POULTRY NETTING.—A few orders have been received for 1903 delivery, the discounts on which for Canadian and English netting are: 60 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, heavier.

HARVEST TOOLS.—Wholesalers have refused to book orders for 1903 delivery, unless accompanied by full specifications. The discount for delivery in 1903 is 60 and 10 per cent.

FIREBRICKS.—There is not much movement in these. English are quoted at $16 to $22 and Scotch at $17 to $22 per 1,000.

CEMENT.—Cheap grades of cement appear scarce, and jobbers report some difficulty in obtaining them, especially the Canadian cements. Our quotations are as follows: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—There is still an active movement in all lines of fall and winter sporting goods. Shells are now discounted as follows: Empty: Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded "Trap," 30 per cent.; American, 30 per cent.; "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SKATES.—These are selling rapidly. Prices are: Halifax pattern, 36c. per pair; nickel-plated, 65c.; ladies' nickel-plated, 60c.; ladies' concave nickel-plated, $1.35 plain hockey, 27c. to $1.35; nickel-plated hockey, 60c. to $2.50; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—These are going well at the following prices: Best second-growth, goal keepers', $1.20 per dozen; ash, $2.90; elm, $2.25; boys' elm, $1.10; common, 90c. Regulation pucks, $1.50 per dozen.

SNOW SHOVELS.—No change has been made in the price. A good trade is

Canadian Distributing Agents for Grippin's Crack Filler.

doing. We quote: "Habitant," \$2.25 to \$2.40; "Victor," 30 per cent. off; steel railroad shovels, 40 and 5 per cent. off.

FIRE SHOVELS.—There is a good demand for these at the prices here quoted: No. 70, 38$\frac{1}{2}$ to 40c. per dozen; No. 55, 55 to 60c.; No. 57, 82$\frac{1}{2}$ to 90c.; No. 60, 82$\frac{1}{2}$ to 90c.; No. 65, \$1.37$\frac{1}{2}$ to \$1.45; No. 80, 50 to 55c.; "Duplex," No. 7, \$1.21; No. 9, \$1.52; No. 11, \$1.82.

LANTERNS.—Orders for lanterns are now arriving freely. Prices are as follows: Tilt, lift or hinge, No. 0, \$4 per dozen; Cold Blast, \$7 per dozen; dashboard, No. 0, \$5.75 per dozen; cold-blast dashboard, \$9 per dozen. Extras are as follows: Japanning, 50c. per dozen; copper-plating cold blast, \$2 per dozen. The prices quoted are f.o.b. London, Hamililton, Toronto, Belleville, Kingston and Montreal.

METALS.

Business in metals, generally speaking, has been fairly active and prices in most lines are steady, but firm. The market has been characterized by no unusual feature during the week. Pig tin, we are quoting a little lower, but other lines are unchanged as to price.

BAR IRON.—In this there is a good movement at unchanged prices. Merchants' bar sells at \$1.95; horseshoe iron, \$2.20; extra refined, \$2.35.

BLACK SHEETS. — A fairly good amount of business has transpired since our last report. Prices are steady. We quote as follows: 28 gauge, \$2.65; 26 gauge, \$2.60; 20 to 24 gauge, \$2.50 and 8 to 20 gauge, \$2.50.

GALVANIZED IRON.—There is some movement in this, but the demand is light. We quote: No. 28, Queen's Head, \$4.40; Apollo, 10$\frac{3}{4}$-oz., \$4.40; Fleur de Lis, \$4.15; Comet, \$4.25; "Bell" brand, \$4.30. For less than case lots 10c. extra is charged.

SOIL PIPE AND FITTINGS.—Trade in this line is somewhat quiet at present. Our quotations are as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—There is no change. We quote: Canadian, \$18.50 to \$19 and Summerlee, \$22 ex-wharf Montreal.

INGOT COPPER.—A moderate inquiry exists. The price is 13c.

INGOT TIN.—This is lower this week. Straits is quoted at 29 to 30c.

PIG LEAD.—There is a fair demand. The price is \$3.25.

LEAD PIPE.—A moderate trade is doing on a basis of 8c. for composition and waste and 7c. for ordinary. The discount is 37$\frac{1}{2}$ per cent.

IRON PIPE.—There is no change in the prices. Trade is fair, and our quotations are as follows: Standard pipe, per 100 feet, in lengths under 19 feet: Black, $\frac{1}{4}$, \$2.40; $\frac{3}{8}$, \$2.65; $\frac{1}{2}$, \$2.85; $\frac{3}{4}$, \$3.65; 1-in., \$5.20; 1$\frac{1}{4}$, \$7.35; 1$\frac{1}{2}$, \$8.95; 2-in., \$12.55. Galvanized, $\frac{1}{4}$, \$3.20; $\frac{3}{8}$, \$3.45; $\frac{1}{2}$, \$3.85; $\frac{3}{4}$, \$5; 1-in., \$7.20; 1$\frac{1}{4}$, \$10.05; 1$\frac{1}{2}$, \$12.20; 2-in., \$16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows: Black, $\frac{1}{2}$, \$4.20; $\frac{3}{4}$, \$5.25; 1-in., \$7.55; 1$\frac{1}{4}$, \$10.55; 1$\frac{1}{2}$, \$12.75; 2-in., \$17.60. Galvanized, $\frac{1}{2}$, \$5.20; $\frac{3}{4}$, \$6.65; 1-in., \$9.55; 1$\frac{1}{4}$, \$13.25; 1$\frac{1}{2}$, \$16; 2-in., \$21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—The price of tinplates remains unchanged. We quote: Charcoals, \$4.75 to \$5.25 and cokes, \$4.25.

STEEL.—This moves out fairly well. Nothing of importance has occurred on the market. We quote: Sleighshoe, \$2.05; tire, \$2.20; bar, \$2.05; spring, \$2.85; reeled machinery, \$2.75; toecalk, \$2.70.

SHEET STEEL.—Trade in this line continues quiet. We quote: Nos. 10 to 20, \$2.50; 3-16, \$2.50; $\frac{1}{4}$, 5-16 and $\frac{3}{8}$, \$2.40.

TOOL STEEL.—Some business is doing this week, but the demand is not heavy. We quote: Black Diamond, 8c.; Sanderson's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7$\frac{1}{2}$c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—The market is active and firm. No quotable change is reported. We quote: 52's, \$2.70 to \$2.80; 60's, \$2.85 to \$2.90; 75's, \$2.80 to \$2.85; full polished, \$3.75 and galvanized, \$4.25 to \$4.35; galvanized, 60's, \$4.45 to \$4.55.

TERNE PLATES.—Trade is still quiet and the prices remain at \$7.50.

COIL CHAIN.—Business in coil chain is of a quiet nature. We now quote: No. 6, 12$\frac{1}{2}$c.; No. 5, 10$\frac{1}{2}$c.; No. 4, 10c.; No. 3, 9$\frac{1}{2}$c.; $\frac{1}{4}$-in., 7$\frac{1}{4}$c. per lb.; 5-16, \$5; 5-16 exact, \$5.25; $\frac{3}{8}$, \$4.25; 7-16, \$4.05; $\frac{1}{2}$, \$3.95; 9-16, \$3.85; $\frac{5}{8}$, \$3.55; $\frac{3}{4}$, \$3.50; $\frac{7}{8}$, \$3.45; 1-in., \$3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Trade is dull. We quote \$5.85 to \$6.25.

ANTIMONY.—There is not much doing. The price is unchanged at 10c.

ZINC SPELTER.—There is no change in the price. Spelter is moving out slowly at 5c.

SOLDER.—Trade is solder continues fairly good. Bar solder is quoted at 20c. and wire solder at 18c.

SCRAP METALS.

The market remains quiet on almost all lines. The only quotable change occurs in zinc, which has advanced slightly. We quote: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½c.; iron, No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½ to 6¾c. per lb.

HIDES.

No quotable change is reported. The market is steadier and prices a little firmer. We now quote: No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. Calfskins, 8 to 10c.; lambskins, 60c.

MONTREAL NOTES.

Turpentine has advanced 4c.
Linseed oil is 4c. lower.

ONTARIO MARKETS.

Toronto, October 24, 1902.

HARDWARE.

THERE is still a heavy business in all lines of hardware, especially as the drawing near of the close of navigation is causing a big rush of orders, which have to be shipped by water to their destinations which can be reached in no other way. The manufacturers in Toronto, Hamilton and other Canadian points are very busy and they are having great trouble in keeping jobbers supplied with staple goods. A heavy demand keeps up for radiators, gas stoves, lanterns and all lines of tinware. Owing to the scarcity of cast iron hollow ware there is an increased demand this year for cast iron and graniteware pots and pans. The manufacturers of screen doors and windows have published their new list for the coming season and quite an active trade has set in for them for the spring delivery. Things in general are not much changed from last week.

BARB WIRE.—The recent reduction in the price of barb wire is still in force and prices have not been made for spring shipment. We quote: $2.55 in carlots and $2.67½ in less quantities from Cleveland. From stock, Toronto, $3.

GALVANIZED WIRE.—Very little is doing in this wire and the prices are unchanged. We now quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base from Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

FINE STEEL WIRE.—There is little demand for fine steel wire. The discount is 25 per cent.

SMOOTH STEEL WIRE.—Trade in this line is quiet. The base price is $2.60 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points Toronto, Hamilton, London and Montreal, with freights equalized on these points.

WIRE NAILS.—A good demand keeps up for wire nails. Quotations are as follows: $2.50 in carlots and $2.55 for less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—The volume of trade in cut nails is fair. Quotations are steady at $2.50 per keg for less than carlots and $2.40 for carlots.

HORSE NAILS.—The demand for horse nails is fairly good. Prices are firm with an upward tendency. We quote the discounts as follows: "C" brand, oval head,, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent.; "Countersunk" head, 60 per cent.

HORSESHOES.—A good business is reported in horseshoes. Quotations follow: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—The inquiry for these is very active and supplies are as hard to get as ever from the factories. We quote as follows: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—These are much in demand and jobbers have very small stocks on hand and are finding the manufacturers very slow in their deliveries. We quote: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—There is still a great scarcity of these and the demand is much more than the jobbers can supply. The factories are six to eight weeks behind in their deliveries and are much hampered by the scarcity of bar iron, and we now quote the discounts as follows: Carriage bolts, common ($1.0 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—There is a very good demand for these, scoops especially being very active. The discount is 40 and 5 per cent.

ROPE.—Trade keeps up in rope very well and the market continues strong. We quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11½c.; double, 12c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—The market is still in an active condition. The discount is 60 and 10 per cent.

EAVETROUGH, ETC.—There is a fairly large quantity of eavetroughing still going out. We quote: Eavetrough, 10-inch, per 100 ft., $3.10; conductor pipe, 2-inch, per 100 feet, $3; 3-inch, $4; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

BUILDING PAPER.—There are still a good many orders going out to all parts of the country. Quotations are as follows: Dry sheathing, grey or straw, 35c. per roll; tar sheathing, grey or straw, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

ASH SIFTERS.—Trade in this line is very active. The price is $13.20 per gross.

TINWARE AND ENAMELLED WARE.—The fall lines of tinware are much in demand and a good many orders keep coming forward for enamelled ware.

STOVES AND RANGES.—These are at present very active, the demand being

For Yourself

you choose reliability and endurance when it comes to building.

Choose the same for your Customers.

Then you are certain of harmonious conditions and ever-increasing sales and prestige.

We make every conceivable need in Sheet Metal Building Materials—honest, capable goods that give the acme of artistic effect, as well as enduring reliability.

With our lines in stock, you'll never have an apology to make to your patrons.

Consider—these things count for much.

Metallic Roofing Co., Limited

TORONTO. MONTREAL. WINNIPEG.

greater than the factories can supply and the shipments have been much delayed. Oil stoves and radiators also are much wanted.

SPORTING GOODS.—There is a big call for rifles and ammunition. Jobbers are short of some of the sporting sizes of the ammunition.

CEMENT.—There has been no change in the cement situation since last week. The factories are now busy shipping their orders and are endeavoring to get as many off their hands as they can before the frosty weather sets in. We quote as follows: Canadian Portland cement, $2.80 to $3.20 and hydraulic, $1.35 up. At the works the prices are $2.50 to $2.70 per barrel.

SCREEN DOORS, ETC.—There is a brisk trade in screen doors and windows for future delivery. A new list of prices for the coming season has been issued. We quote: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60; stained, yellow or green, $6.80; in natural colors, oil finish, $8.15; 4-in. style, 20c. per dozen extra.

METALS.

The general conditions of the metal market are about the same as last week. The country seems to be able to absorb all the material going forward. Tin, outside, continues rather erratic, firm one day and weak the next, and an easier tone was reported in the copper market abroad. There is a better feeling in the iron trade of the United States this week, but the coke shortage is worse than it has ever been in the history of the trade. This is seriously affecting the production of pig iron.

PIG IRON.—A heavy local demand continues. Quotations at the Canadian furnaces are as follows: $23 for No. 1 and $22.50 for No. 2. On track, Toronto, No. 2 Summerlee iron is quoted at $23.

STEEL BOILER PLATES.—A good market is reported for steel boiler plates. Prices are unchanged at $1.80 in carlots on track, Toronto.

STEEL RAILS.—These are quoted at $30 per ton for steam railway rails and $36 for electric railways.

TOOL STEEL.—The situation is unchanged. Quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c.; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEEL.—A steady demand still keeps up for this steel.

BOILER TUBES.—These continue unchanged.

SPRING STEEL.—A good business is reported in this line.

BAR IRON.—There continues a great scarcity of this article on the local market and manufacturers of bolts, etc., are much hampered in consequence. Our quotations are as follows: $1.95 to $2.05 base. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—Trade in black sheets, though not as brisk this week, is still very good. We quote: Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are meeting with a good demand and bright plates are scarce. We now quote: All dull, $2.90 to $3; half-polished, $3 to $3.10; all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—The active demand reported for these last week continues, and we quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 29 gauge; Bell brand, $4.30 for 28 guage; Gordon Crown, $4.50 for 28 gauge.

TIN.—Business in tin this week has been more active. The outside markets are unchanged. We quote $31 to $32 per 100 lb.

TINPLATES.—These are unchanged. We quote: Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—A good business is doing in ingot copper. We quote: Ingot copper, $13 per 100 lb and sheet copper, $22 to $23.

BRASS.—This metal is more active. The discount is 15 per cent.

LEAD.—This commodity is in good demand. We quote: Pig lead, $3.50 and bar lead, $3.75.

IRON PIPE.—There is a heavy demand for iron pipe and the stocks here are very low. The manufacturers outside are filled up with orders and are unable to make deliveries promptly. The prices are unchanged. Our quotations are per 100 feet: ¼-inch, $2.40; ⅜-inch, $2.65; ½-inch, $2.85; ¾-inch, $3.65; 1-inch, $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—A good market continues for zinc spelter. We quote 5 to 6c. per lb.

ZINC SHEETS.—The orders coming forward are numerous and principally for small lots. We quote: Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—This metal is unchanged.

ANTIMONY.—Business in this line is more active. There has been a decline of 50c. per 100 lb. Prices are now $9 per 100 lb.

OLD MATERIAL.

The market continues brisk, considerable stock is being offered, and the demand is good. Prices remain about the same. Our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 8 to 8½c.; heavy red brass, 9½c.; heavy yellow brass, 8 to 8½c.; light brass, 5 to 5½c.; lead, 2 to 2¼c.; scrap zinc, 3c.; iron, No. 1 wrought, $12.50 per net ton; No. 2 wrought, $4.50; machinery cast scrap, $14 to $15; stove plate, $10; malleable and steel, $6 to $6.50; old rubbers, 6c. per lb. and country mixed rags, 50c. per 100 lb.

HIDES. SKINS AND WOOL.

HIDES.—This market is dull and prices remain weak with no quotable change. We quote as follows: No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green steers, 7½c.; cured, 8½ to 9c.

SKINS.—The prices are well maintained and the market is active. We quote: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do., 15 to 20 lb. inclusive. No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings, and lambskins, 50 to 55c.

WOOL.—This market is weak and unchanged. We quote: Fleece, 13½c. and unwashed, 7½c. per lb.

TALLOW.—The market is weak and the prices are likely to decline. We quote 6¾ to 7c. per lb.

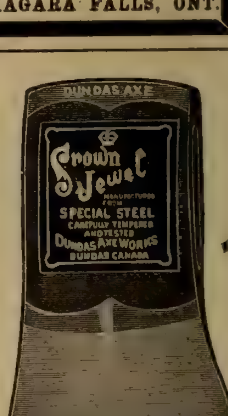
STANDARD.
The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.



Dundas Axe Works, Dundas, Ont.
W.L. Haldimand, Jr., Eastern Agent, Montreal.

SEEDS.

The export demand for alsike has been heavy and the prices are firm at an advance of 25c. per bushel. Timothy and red clover are also moving freely. We quote: Alsike, $6.25 to $7.25 for choice seed; red clover, $5.50 to $6 and timothy, $1.40 to $1.60 aboard at outside points.

COAL.

There is no hard coal arriving in the city, and the prices remain about the same for soft coal. The prices at the international bridges are $7 to $8 per ton for soft coal.

PETROLEUM.

Trade is good in this line. We quote as follows: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); Americam water white, 17 to 17½c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in bbls. Lily white, Canadian, 14 to 14½c. in bbl.; Silver Lead, American, 16 to 16½c. in bbl.; Crystal Spray (water white), American, 18 to 18½c. in bbls.; Pennoline (choice fancy brand), 19 to 19½c. in bbls. In bulk, 2c. per gallon less.

MARKET NOTES.

Antimony has declined 50c. per 100 lb.

An advance is daily looked for in the price of shellac.

Dealers in old material say that the demand is excellent.

There is no hard coal offered on the market at present.

The manufacturers of screen doors and windows have issued a new list.

The temporary drop in the price of glass has caused it to be very active.

BEHIND THE COUNTER.

THE man behind the counter is a less important factor in the sale of goods than quality or price, says Merchants' Review. But let a customer be gruffly or flippantly treated, just once, only once, and that particular customer at least will have a vivid impression that there is nothing so important in storekeeping as manners.

Everybody has felt that way at some time or another, and not even the consciousness of having acquired a big bargain will efface the recollection of neglect or open insolence suffered at the hands of folk behind the counter.

The writer sympathizes with the people who "stand and wait"; he knows how much they have to bear. On the other hand, he knows that to bear the snubs or irritating ways of ill-bred or thoughtless customer is not beyond the power of any person with ordinary self-control, and he also knows that to surrender to the temptation to speak sharply to the employer's patrons may mean the loss of a considerable proportion of that employer's trade.

The clerk who deliberately or carelessly offends and alienates an employer's customers is as much of a criminal at heart as the prodigal whose reckless, spendthrift ways have brought him to a felon's cell.

While we believe in holding the assistant to strict accountability in regard to the treatment of the employer's customers, we also believe in holding the cords of discipline very loosely in regard to some other matters that come within the grocer's province.

We believe, for instance, in the encouragement of young ideas in respect of window dressing, shelf arrangement, advertisement, etc. The clerk may have some bright impulse regarding window dressing that would mean greater profits for the boss if the impulse were allowed to take shape unchecked. The very youngest assistant in the store may have a talent for placard-writing almost akin to genius, but hardly know he possesses it because he has never been invited to display anything of the kind for the general good.

We say "general good," because every hardware store ought to be like a well-managed family, each member of the staff of assistants working to advance the business, and the owner supervising everything and rewarding individual worth whenever it is recognized.

When the employer cold-bloodedly ignores the ordinary relations of boss and clerk, and shows no interest in the welfare of assistants, the business will always show a lack of something. It will fail of the highest development, no matter how much brain and energy and capital go to its building up.

INDUSTRIAL GOSSIP.

WORK has been commenced on The Nova Scotia Steel and Coal Co.'s new ore pier, and it is to be completed by the first of the year.

A. C. Thompson is erecting a foundry on the western side of King street, Sydney, near the Intercolonial Railway, with which it will be connected by a siding. The buildings will be of wood and cost $12,000.

The new foundry at Stratford, Ont., is now well in running order. The new steam whistle put in this week certainly makes itself heard. The brass works are also overrun with orders, and could find employment for more men.

A company to carry on a manufacturing and foundry business at Campbellton, N.B., is applying for incorporation as The Restigouche Foundry and Supply Co., Limited. The capital stock is $100,000, divided into 1,000 shares of $100 each.

Meyer Bros., Church street, Toronto, manufacturers of the "Queen" stove, are very busy. They say that the demand is so great that they are working two gangs and still are several weeks behind in their orders. They expect to send out 10,000 of these stoves before the last of the year.

The export duty which British Columbia imposed on lumber a few months ago has driven a number of United States sawmills across the line, and largely prospered the Canadian lumber trade. The United States Consul says shingles made in Canada go across the line notwithstanding the duty, and there is a demand for 5,000 or 6,000 men to work in the mills and logging camps, although the wages offered are lower than in the United States.

SHIPBUILDING TRADE IN TORONTO.

The shipbuilding business in Toronto during the past year has been an active one, and prospects are still better for next year. In an interview with a representative of HARDWARE AND METAL, the manager of The Polson Iron Works said that the great drawback was in the delivery of material bought in the United States. He claims that they can buy their material in England and have it delivered here in half the time it takes to bring it from the United States. He also claims that if they secure one-half the contracte they have in view they will have to run two gangs next year.

This firm has secured four acres on the shores of Toronto Bay, and intend to have a new shipyard in the future. All machinery used in boats built by The Polson Company is of their own manufacture.

Following is a partial list of their contracts for the past season :

An 8-yard dipper dredge for W. J. Poupway, contractor, Montreal. This is one of the largest dredges ever manufactured in this country. It cost $62,000. On the way to Montreal a couple of weeks ago the dredge was caught in a gale and the tug which was towing her was compelled to let her go and she sank.

They also built a ¾-yard dipper-dredge for the Dominion Government to be used in the Arrow Lakes, B.C.; value, $20,000.

A steam yacht for John McDonald, of New York, 63x93 ft. This yacht was fitted up with compound engines and guaranteed to travel 12 miles an hour; value, $7,000.

They built a supply boat for The Hudson's Bay Co., 80x18x9 ft., fitted with compound engines. This boat steamed all the way from Toronto to the Hudson Bay. It cost $20,000.

The Lord Stanley, a Government boat, was overhauled to the extent of $3,000.

BUSY NORTH BAY.

Mr. McDonald, of McDonald & Hay, retail hardware merchants, North Bay, was in Toronto this week. He reported business good and the outlook most promising, particularly in view of the fact that the Temiscaming Railway will touch North Bay.

"On Thursday night last," he said, "250 men arrived at North Bay to work on the Temiscaming railway and I was informed that 175 men are to be obtained at both Ottawa and Montreal."

A large staff of surveyors are at work and McDonald & Hay have been fortunate in securing the contract for supplying them with materials appertaining to the hardware trade.

"Besides what the Temiscaming railway is doing at North Bay," said Mr. McDonald, "the C.P.R. is spending $250,000 on its yards within the town limits."

DAMAGED BY FIRE.

About 5 a.m. on Thursday fire broke out in the premises of Coulter & Campbell, brass and copper founders, George street, Toronto, and did damage to the extent of $5,000. The copper department was gutted, while the wing used for brass manufacturing only suffered from water. It will be some time before the firm will he in shape to fill their orders, of which they have several large ones at present. The loss is fully covered by insurance.

ONTARIO'S WATER POWER.

The best substitute for coal in Ontario would be electricity generated by water power. There is only one reason why electric energy is not generally used for heating and cooking, and that reason is that inventive genius has not yet evolved an electric heater which can be used at a cost so low as to make it a formidible rival of the coal furnace and self-feeder. But electric heating is by no means uncommon. The Carmelite Monastery at Niagara Falls is heated throughout with electricity, and all the cooking for the institution is also done in electric ranges. The problem of cheap electric heating will yet be solved. When that time comes, Ontario with its widely-diffused water powers, will be able to get along without coal. The pressing necessity for such an invention, and the great rewards in store for the successful inventor, should bring the solution of the problem before long.—Hamilton Herald.

HIGHWAYS FOR AUTOMOBILES.

In one of the leading English periodicals Mr. B. H. Thwaite, C.E., projects an automobile highway from London through the centre of England to Carlisle, and thence to Glasgow, Edinburgh, and Inverness. The road would have a foundation of concrete and a surface of specially hard creosoted wood blocks with asphalt joints, the surface curvature being sufficient for thorough and rapid drainage. Its central portion would be used exclusively for motor cars, and there would also be side paths for bicyclists. Mr. W. K. Vanderbilt, jr., is authority for a statement that a similar road is soon to be built in this country from Long Island City to Roslyn, a distance of 20 miles. This road will be entirely on private ground, and will be designed for speeding purposes mainly.—Scientific American.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Drill Hall, London," will be received at this office until Friday, 7th November, 1902, inclusive, for the construction of a Drill Hall, London, Ont.

Plans and specifications can be seen and form of tender obtained at this Department, and at the office of Messrs. Moore & Henry, Architects, London.

Persons tendering are notified that tenders will not be considered unless made on the form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order.

FRED GELINAS, Secretary.

Department of Public Works,
Ottawa, 17th October, 1902.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

THE following is a list of the building permits issued by the City Commissioner, Toronto, during the past week: Morgan T. Evans, two-storey and attic brick building, Brunswick Ave., $4,800; M. C. Ellis, two-storey and attic brick and stone dwelling, Elm ave., $15,000; T. Ferry, two-storey brick dwelling, Lennox street, $2,500; W. W. Vickers, 2½-storey brick dwelling, Dowling ave., $5,000; R. Hills, one-storey stone and brick vestibule, St. George street, $1,000; Thos. Brown, two-storey and attic brick building, Chicora ave., $2,000; Robt. Corbett, two-storey brick and roughcast dwelling, Bloor street, $2,500; Geo. C. Watson, two-storey and attic brick and stone dwelling, Close ave., $2,500; T. C. Thomson, one-storey brick addition to dwelling, Dunn ave., $450; Mrs. Emily C. Cairns, pair semi-detached two-storey and attic brick dwellings, College street, $4,000; G. G. Dernitt, pair semi-detached two-storey and attic brick dwellings, Smith street, $2,800; E. L. Lewis, two-storey roughcast dwelling, Salem ave., $400; J. & T. H. Hirtop, one-storey warehouse, Alma ave., $1,000; E. A. Drummer, two-storey detached brick dwelling, $1,000; T. J. Madill, two-storey and attic brick dwelling, Summerhill ave., $2,300; R. D. Malcolm, two-storey and attic brick dwelling, $4,500; Geo. Farhall, two-storey and a half storey brick and roughcast dwelling, Fuller street, $600; Frederick Elliott, two-storey and attic brick and roughcast dwelling, Pendrith street, $1,100; J. Wheeler, three-pairs semi-detached two-storey brick dwellings, Smith street, $9,000; J. Buckner, two-storey brick dwelling, Grant street, $1,000; Gowans, Kent Co., additional storey to warehouse, Front street east, $6,000; H. M. Death, two-storey and attic pair detached brick dwellings, Concord ave., $4,000; F. Sanderson, two-storey and attic brick dwelling, corner of Crescent Road and Clemmy ave., $8,000.

CLAY PIPE FOR GAS MAINS.

The high price of iron, gas and water pipe has stimulated several companies to experiment with vitrified clay pipe, in the hope of being able to use it for gas and water mains. Tests made at the clay working department of the Ohio State University, showed that a section of clay pipe 2 feet long, 6 inches in diameter and ½ inch thick would sustain a weight of 2,800 pounds suspended from the middle of the pipe. Trial mains of a few hundred feet were laid by gas companies in Columbus, Ohio, and Denver, last fall, great expectations were had of success. The following spring numerous bad leaks were found, in nearly every case being caused by the cracking of the bell at one end of the pipe, where it joined the next pipe. This was evidently caused by expansion. The joints were made tight with cement and hemp yarn, and remained perfectly tight until the ends of the pipes cracked.

The best authorities state it will be necessary to produce an entirely new kind of clay pipe from any yet made before the method can be a success. There would be an immense demand for the clay pipe if it could be made reliable.—Popular Mechanics.

PLUMBING AND HEATING CONTRACTS.

All dealers are fairly busy in the jobbing line, but say contracts are a little slow.

Guest & Co., Church street, are installing two boilers—hot water and steam—in the residence of Chas. Brown, corner of Gerard and Sherbourne streets.

TO TRY SEWAGE WORKS.

The Canada Water and Sewage Purifying Co., of Windsor, desires to install and operate a sewage disposal plant for that portion of Toronto east of the Woodbine.

The letter which accompanies the offer remarks that it would be better for the city to be indemnified against loss in case of the failure of the septic tank system than to take the risk itself. The letter says that the septic tank system has proved to be an everlasting source of expense in every case it has been used as far as the company knows, and that it had never given the satisfaction expected from the system. With the septic tank system there are many contingencies to be met, arising from climatic conditions, from snow and rain, heat and cold, and from acid and alkaline sewage.

The letter says in conclusion that if the city allows the company to install this system, the aldermen will be better able, after observing its operation, to elucidate the problem of sewage disposal for the entire city.

SHOULD WATER IN HEATING SYSTEM BE REMOVED?

IN reply to an inquiry in The Metal Worker as to whether water in heating systems should be removed, a correspondent of that paper writes: "I would state that probably in the larger percentage of house heating systems in the United States the same water that was originally run into them is still being used, with such renewals as are necessary to keep the systems full. The old idea was that when water had once been boiled and all the air in a system had been expelled it was better to use the same water over and over again instead of running the risk of securing an influx of sediment or mineral water to be deposited on heating with each renewal of the water supply. Others incline to the opinion that the circulation in a system tends to bring the sediment to the lower points, where it may accumulate to such an extent as to interfere with the circulation. In consequence they hold to the opinion that it is well to draw off all the water and give a chance to wash out this sediment. Some explain that it is far better to have the water heating systems empty during the summer season and point in support of this opinion to the steam heating systems which during the summer season never have water above the water line in the boiler. The further point to the fact that when the system is filled with water it is kept at a lower temperature than when it is empty. This, it is claimed, is conducive to the condensation of the moisture that is in the atmosphere and which is likely to circulate through the heater and uniting with the acids in the soot start a more active rusting than would otherwise take place. It is the experience of many with whom I have conversed that the most destructive rusting in a boiler is from the outside and not from the inside, and they recommend that the boiler should be cleaned thoroughly in the spring of the year wherever soot, ashes or smoke has come in contact with it. Some go so far as to recommend that the boiler be thoroughly oiled with good machine oil. To return to the original question, I feel satisfied that most hot water heating systems are not emptied and doubt if any greater destruction has occurred in them than has occurred in the few systems that have been emptied each year."

DEATH OF A PLUMBER.

William O. Hallett, of The Dominion Steam Heating Co., died on Saturday at 312 Carlton street, aged 26 years. He was formerly a plumber in Winnipeg. The body will be taken to Minneapolis, where the rest of the family reside.

THE ADVERTISING ARENA.

MR. LARKIN'S VIEWS ON ADVERTISING.

"SALADA" Ceylon tea is a name so familiar to every man, woman and child in this country, that it may with truth be called a household word. The extraordinary publicity it has attained, has, in the first place, been due to the up-to-date methods by which it has been advertised, and, in the second place, to the quality of the article itself. Both combined have caused the "Salada" tea business to grow by leaps and bounds during a comparatively short period of time.

The other day I called on Mr. P. C. Larkin, the head of The "Salada" Tea Company, and on stating my desire to learn something of the advertising side of his business, was very courteously received by him, and all my questions were fully answered.

"You ask about the effect advertising has on this business," said Mr. Larkin. "Well, I only repeat what I have very often said, and that is: If you have five dollar bills to give away for four dollars and are extremely anxious to give them at that price and you do not tell the public about them, you will never be able to sell any of them because the people who would purchase would not know of your inclination. Therefore, it follows in business, if you can serve the public well—better than they are served in any other way—they will never know of the fact unless you tell them of it. The question is which is the best way to get their ears. I think, and I speak from ten years of experience, that the press is.

"We started this business 12 years ago. At that time China black teas and Japan green teas were practically the only teas in Canada. There were a few Ceylon and Indian teas handled here, but they had made extremely slow progress, and I believe that the sole reason was because the public knew little of them and the retail grocer was conservative and kept to the kind of tea the consumer had been getting and was apparently satisfied with. Now, being a tea expert myself, I knew that Ceylon and Indian tea was very much the superior of any China tea, and yet of the same character, both being black. I thought the best way to the public's favor was to give them a Ceylon tea in sealed packets, offering the grocer a fair margin for selling it, and we did make some headway for two years, but very slowly. I then made up my mind that without advertising, and, as life was short, by the time I did have anything like enough business to exist on, it would be time to retire, therefore I concluded that I had better commence to advertise. I commenced with one paper in the city of Toronto, found it beneficial, increased the space I used and used other mediums, until today there is not a paper in the Dominion of Canada that "Salada" tea advertisements do not appear in.

"During the past few years we have extended our business to many parts of the United States and there we use the press very largely, and we are looking forward to the day when there will be no paper published on this continent that will not contain 'Salada' Ceylon tea advertisements. For, after all, although the expense is very great at first, as your trade increases the cost of advertising per lb. of tea becomes a small fraction of a cent. Now, the question comes up, could such a business as this be built up without advertising? We think not. Whatever the merits of the article, how can the public know of them unless you tell them of them. Remember, if your article is not exceptionally good you cannot hope to benefit by advertising, for all advertising does is to get the consumer to try one packet. If it is not fully what is described in the advertisement they never try it again, no matter whether you advertise till the day of judgment. Consequently advertising an article that is not of a high standard of quality would prove disastrous.

"The moral, I think, is: If you have a most excellent article, and if you can serve the public better than they are being served, or even as well as they are served in any other way, advertising will pay; nothing will pay you as well. There is no great business in the world to-day that has not been established by advertising equally with serving the public well."

"How often do you change your advertisements?" I asked.

"We never run the same advertisement twice in the same paper," answered Mr. Larkin. "It is altered daily. But, remember, one advertisement may appear in 500 different papers, therefore, a very small bunch of advertisements will go the rounds of hundreds of newspapers."

Next I inquired about the source of the name "Salada."

"'Salada,' explained Mr. Larkin, "was the name of a small garden in India and also the name of a post office there. An object in getting a name for any goods, I think, is to get a name easy to pronounce and resembling something so familiar that people can remember it easily. A hard name to pronounce is a mistake, I think, because people going into a store don't want to be smiled at if they don't pronounce it correctly."

"What is the extent of your advertising and what kinds have you found most beneficial?"

"We advertise in trade journals and the daily and weekly press, and we place enamel signs on windows. We have tried street cars. We do some programme advertising, we have used bill boards, and we have demonstrated, that is, served tea at exhibitions and in grocery stores. In fact, there is no scheme of advertising we have not tried, and, after all, we have found none so effective as the trade journals and the daily newspapers."

MANITOBA MARKETS.

WINNIPEG, October 20, 1902.

BUSINESS continues good in all lines. Prices are firm, and in hardware are without change for the week. In paints and oils, linseed oil is firm at the drop of last week. The oil mill is now working full time, and the quality of flaxseed coming forward is very fine. Price for flax is $1.02 per bush. for farmers' loads, or about $1.05 for cars on track, weight and quality guaranteed. Considerable buying is also being done for eastern firms. There is a steady demand for turpentine, and the price is unchanged. Glass remains at last week's quotations, but there is a tendency to cut prices, which no one seems quite to understand in view of the situation abroad.

Prices for the week are :

NOTES.

The Manitoba Frost Wire Fence Co. is applying for incorporation. The capital will be $40,000, and the headquarters of the company will be Winnipeg.

H. T. Ireland, general merchant, Smithfield, Ont., has sold out to W. S. Kemp.

The reason for using Apollo galvanized iron is: it is the best iron: works easiest: makes the best job, and costs least for labor.

American Sheet Steel Company, New York

Montreal

YOU NATURALLY EXPECT THAT THE GOODS **YOU** BUY WILL GIVE ENTIRE SATISFACTION TO **THOSE** WHO BUY FROM YOU. WHEN YOU PURCHASE

2 AND 3 PLY READY ROOFING,
BUILDING PAPERS,
SHEATHING AND CARPET FELT,
COAL TAR PRODUCTS,
HANGING AND PRINT PAPER,
BROWN AND MANILLA WRAPPING

from us your expectations will be realized. Our lines are all guaranteed to give entire satisfaction. Quality, the best.

ALEX. McARTHUR & CO., 82 McGill Street, MONTREAL.

PAPER MILLS: JOLIETTE, QUE. FELT FACTORY: HARBOR AND LOGAN STREETS, MONTREAL.

CURRENT MARKET QUOTATIONS.

October 24, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

Some Good Reasons Why we claim your trade

FIRST—The brass we make is the standard by which all other brass is judged.

SECOND—It was good enough for good people 40 years ago, and now that we are making a better brass, it ought to be good enough for the younger generation.

THIRD—WE ARE ON THE SPOT with a full and complete stock for shipment same day order is received. This alone is worth a good many dollars in these rush times.

FOURTH—We have issued a comprehensive catalogue classifying over a Million Pounds. It's here for the asking.

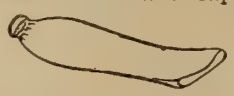
OUR TRADE A MARK

AUER LIGHT MANTLES
LONGEST LIFE & BRIGHTEST

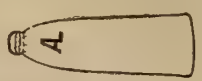
OUR TRADE A MARK

The Value of Annealing.

Annealing is the most costly step of mantle making—consequently a cheap mantle cannot be properly annealed—That is the reason a cheap mantle caves in like this if you lay it on its side, after burning off the coating—Try one—They injure your trade.



Mantles branded A are thoroughly annealed over pressure gas—They fit the burner—They don't shrink—They stand up this way—They are reliable—They help your trade.



—We are the sole manufacturers of A mantles.
—Write us if you are interested.

Lowest prices on Mantles, Shades, Chimneys, Globes and Sundries.

AGAINST UNFAIR COMPETITION.

BETWEEN the honest and the out-and-out dishonest conducting of a business a good deal of pretty questionable work is carried on. The quality of goods is oftentimes said to be better than it really is, trade marks are unlawfully appropriated, opponents' businesses are disparaged, and in a thousand little ways unfair advantages are taken. In this country and in most countries none of these acts are criminally liable. Only in a few cases is a criminal procedure made possible by special law. The only protection afforded to the trade is through a civil action, and the inconvenience and expense of bringing such actions makes recourse to them unusual. The evil is winked at and allowed to continue.

In Germany, the most progressive nation on the face of the earth, so far as the handling of commercial problems is concerned, the difficulty is being faced in no uncertain manner. The criminal law has been called into operation by legislation of July 1, 1896. It strikes in the main at five evils:

1. Fraudulent advertising, i.e., false declarations concerning methods of production; make-up or prices of wares; source of supply; reason for selling; possession or ownership of trade marks. In the above cases, every business man or group of business men has the right to bring suit against the offending party, calling for the suppression of the above practices, also for damages. A fine not exceeding 1,500 marks ($357) can be imposed; repitition of such an offence is punishable with imprisonment not exceeding six months.

2. Detraction of a competitor, i.e., spreading false reports concerning the trade of another, his person, the manager of his business, or his wares. Offences of this nature are punishable with a fine not exceeding 1,500 marks ($357), or imprisonment not exceeding one year.

3. Misusing another's name in such a way that an unfair advantage is gained. Offending parties must pay damages, and are compelled to discontinue such practices.

4. Disclosing business secrets during time of employment. A fine not exceeding 3,000 marks ($714) or imprisonment not exceeding one year can be imposed, and, in addition, judgment of damages sustained. Any competitor using information gained in this way, as well as any third person disclosing such information to him, is liable to a similar punishment.

5. Deception as to the quality of goods. The Federal Diet has been empowered to prescribe that certain articles are to be sold at retail only in certain quantities, lengths, according to certain numbers, etc., etc., or with declarations as to number, weight, etc. The punishment for every infringement shall not exceed 150 marks ($35.70).

ADVANCE IN STOVES AND RANGES.

An advance of 5 per cent. was made on Thursday in the price of stoves and ranges.

For some months the demand for stoves and ranges has been unusually heavy, and some of the largest manufacturers realize that they will be unable to fill many of their orders.

The stove manufacturers in the United States advanced their prices some weeks ago.

The prices of hollowware have also been put up 5 per cent.

COMPETITION OF CITY STORES.

A renewed effort to capture the trade of the towns and country is said to be on foot by the departmental stores. These businesses have grown both in the cities and in the country, but they have extended more proportionately in the cities. The reason for this has been due to the increased vigor shown by the suburban stores which has enabled them to successfully oppose the departmental stores. To reach this country population the city businesses are calling on the services of the press and requiring the city dailies to extend their circulations throughout the country. By this means they hope to build up a huge mail-order business. It remains to be seen how the country merchants are going to meet the difficulty.

AN ADVOCATE OF COMMERCIAL RETALIATION.

ANDREW CARNEGIE, the multi-millionaire, has a penchant for saying things which attract world-wide attention. None of his contemporaries possibly has it to a higher degree. Like a few other men whose words are eagerly gathered up and scattered broadcast by the daily press, Mr. Carnegie, no doubt, essays to pose as an authority on subjects upon which he is less qualified to speak or write than a good many others who, however, would attract no attention did they give public expression to them. Money, we are told, talks. At any rate, he who possesses great wealth will certainly be listened to when he talks. And this is the explanation of the readiness with which nearly everything Mr. Carnegie says, no matter upon what subject, is flashed from one continent to another.

But whatever subjects upon which he may not be qualified to speak, it is certain that he is entitled to attention when he gives publicity to his views on business matters.

A good many may question the methods by which he has accumulated his millions, but the fact that the measure of his commercial success transcends that of most men in any age stamps him as a great business man. On business matters he is therefore an authority. And when he dwells upon them, it is better that we should turn a listening and not a deaf ear towards him.

A few days ago, when delivering his installation address as Chancellor of St. Andrew's University, he startled the political as well as the commercial world by calling upon the Emperor of Germany to undertake the formation of an United States of Europe in order to meet the competition of the United States of America. He meant, of course, a commercial and not a political union.

It is not the first time such an union has been proposed in recent years, but it is the first time that the head of a great State has been, publicly at any rate, requested to take up the burden. And certainly not by anyone who is to all intents and purposes a citizen of the American Union. A couple of years ago Count Goluchowski, the Austro-Hungarian Minister of Foreign Affairs, pleaded for such an union. Whether or not the appeal of Mr. Carnegie will be more successful than that of the Austro-Hungarian Minister remains to be seen. But one thing is certain, it will give added interest to a subject which already has a good many advocates in Europe.

It is quite possible that the consummation of an United States of Europe, within the confines of which low tariffs or free trade toward each other may rule, and high tariffs against the United States of America dominate, will never be realized; but at the same time its realiztion is not impossible. Whether or not, therefore, Mr. Carnegie's remarks stir up the countries of Europe to take common action against the United States of America, they should further open the eyes of the latter to the fact that their present policy of industrial exclusiveness threatens to array their European customers against them. And it is, of course, to Europe that the United States exports the greater part of their surplus products.

To the European continental countries to which Mr. Carnegie made his appeal, the United States export more than $500,000,000 worth of products, while their export trade with Europe, taking into account what they send to Great Britain, aggregates over $1,000,000,000. What is termed the favorable balance of trade is nearly $250,000,000 with continental Europe, and nearly $500,000,000 including Great Britain in the valuation.

It is a well-known economic law that "when the produce of any particular branch of industry exceeds what the demand of the country requires, the surplus must be sent abroad and exchanged o r something for which there is a demand at home."

The United States ignore this law. The more they develop industrially the more they need foreign markets for their surplus. They recognize this, but they do not want to buy anything in return. And they frame their tariff with that end in view. The consequence is that on the continent of Europe, in Great Britain and in Canada a spirit of retaliation is developing. And now Mr. Carnegie, who has profited as much as anyone by the policy of exclusiveness, is giving the nations lessons in the art of retaliation and industrial exclusiveness.

A NEEDED POSTAL REMEDY.

AMERICANS visiting Canada on business or pleasure frequently inadvertently use postage stamps of their own country instead of those issued by the postal authorities of the Dominion. Canadians visiting the United States frequently make the same mistake when mailing letters to their homes. Letters thus improperly stamped are sent to the dead letter offices of their respective countries. That a great deal of inconvenience and loss, particularly to business men, is caused thereby is evident.

The methods of dead letter offices have lost a great deal of the crudeness that characterized them a few years ago; but there is still room for further improvement. And one of them is in regard to international mail matter.

Mistakes of all kinds we usually have to pay for, but it is unreasonable that letters, no matter how important they may be, should be consigned to the dead letter office because of a mistake which anyone in an absent-minded moment is liable to make.

It seems to us that the proper thing to do would be to forward to destination the letter that bears the stamp of the country to which it is sent instead of that of the country in which it is mailed, and there collect from the receiver, say, double postage. It ought not to give the postal authorities any more trouble, while it would, at the same time, be a much more business-like method.

Sir William Mulock, the Canadian Postmaster-General, has always shown a readiness to adopt newer and more modern methods in the administration of his Department. And here is another opportunity for him to exercise this faculty by entering into negotiations with the postal authorities in the United States for the purpose of remedying the present unsatisfactory and inconvenient state of affairs.

BAR IRON SITUATION.

The market for bar iron is very strong at present, and prices are likely to go considerably higher. The quotations have been advanced to a $2.05 basis in Toronto, and some handlers have even asked $2.25 per 100 lb. The demand for this article is heavy and has been so all summer. Shipments from the furnaces have been slow, and the manufacturers of bolts, nuts, etc., in Canada have been much hampered in their operations in consequence.

Raw material, in the shape of coke and scrap metal, at present is scarce, and this is what is giving the market its bullish turn. Many jobbers are expecting a decided advance in the prices of this product before long.

INDUSTRIAL GOSSIP.

A FURNITURE factory, with a capital of $75,000, and to employ 75 mechanics, is offering to locate in Berlin, Ont. The company asks for a free site and exemption from taxes for ten years.

Ross, McRae & Battle have been awarded tenders for the construction of the Temiscaming Railway from North Bay to Lake Temiscaming, a distance of 110 miles.

The sub-contract for the first 30 miles of the Temiscaming and Northern Ontario Railway has been given out, M. Doughney & Donovan taking the first six miles. A gang of 20 men are now at work and others are arriving daily.

The Pratt-Letchworth Co., of Brantford, contemplate building an addition to their foundry which will double their capacity. When their new buildings are completed they will employ 600 hands. They are now giving work to 300 persons.

It is hinted that the Mississaga Lumber Co. intend to build a large sawmill in Algoma, if only a suitable site can be found. A shingle mill is also spoken of. This is a big industry there, and the present shingle company are working overtime.

The Booth Copper Co., Limited, Toronto, have had an exceptionally busy season. They have just completed installing two 12-ft. vacuum pans in the Dresden sugar factory. There are over 90 tons of iron and copper in these two pans.

The Silicate Brick Co., of Sydney, C.B., are only awaiting the arrival of machinery to commence operations. The output of the company will be 20,000 bricks per day, and they are expected to take the place of imported pressed bricks in the local market.

Another blast furnace will be constructed by The Nova Scotia Steel and Coal Co. at Sydney, C.B., as soon as the one now on the way is finished, which will be in a short time as the work is being pushed rapidly. The output of the new furnaces will be about 300 tons each per day.

An asbestos deposit has been discovered on the shore of Lake Temiscaming by Wellington Mackenzie, of Toronto. This is said to be the only known deposit of asbestos in Ontario, and will be developed at an early date. Samples of the article show the fibre to be unusually long and clean.

A project is mooted to erect a marine railway capable of taking vessels up to 4,000 tons at North Sydney. Both Cape Breton and outside capitalists are interested, and the cost is to be about $500,000, and concessions will be applied for. The shipping at the port of North Sydney is increasing rapidly as it is open all the year round.

The Dominion Peat Co. at Newington, near Ottawa, are about ready to commence work, and on November 1 the Ottawa public will be able to purchase this Canadian fuel. The fuel will take the form of bricks, and the company claim that the price laid down in Ottawa will be much less than coal.

The Kemp Manufacturing Co. offer to purchase from the Toronto City Council land to the east of their factory on Bell street and some other small parcels in the same neighborhood, as they wish to extend their factory and also to establish direct communication by siding, with the railways.

Mayor Hendrie, of Hamilton, is looking out for another new industry for that city, and is quite hopeful of success. A large concern that has its headquarters in Detroit and manufactures heavy machinery has for some time been contemplating a Canadian branch, and they apparently have a preference for Hamilton.

The Great Northwest Mining Co., with an authorized capital of $3,000,000, has been incorporated under the laws of Ontario to develop mines in New Ontario, principally in the Rainy River District. The Canadian head office will be in Toronto, and the United States headquarters will be in New Jersey. The capital is said to come from the United States.

W. W. Harper has erected a new woodworking factory at Charlottetown, P.E.I., in the place of his old one that was burned down a short time ago. The new building is 26 x 48, has a conerete floor, iron doors, and a boiler house at the rear end, and is bricked on four sides. A new engine has been installed, and also a band saw, moulder, sandpaperer, power-mortising machine, and a combination cutting off and ripping saw table.

A capitalist of London, Eng., Victor Blagden, is reported to have been in Sydney, C.B., recently considering the advisability of establishing a plant there for the manufacture of the products of coal tar. Amongst the products of this tar which would be turned out by this company of Mr. Blagden's are crude naptha and carbolic acid. Mr. Blagden was accompanied by E. R. Gabbitt, of London, and John Craven, of Manchester.

A Parry Sound correspondent says that the grading of the tracks and switches of the James Bay line to Dufferin street station will soon be completed. The station building is a neat and commodious one. The engineers are busy completing the survey from French River back to Cedar Rapids, and will make still another survey from Canal Rapids to French River by way of Wilson and McConkey. When a thorough survey determines the best location for the main line, the contract for the construction of the section of the railway from Parry Sound to French River will be let.

For the purpose of manufauturing refrigerators, screen doors and windows, pails, buckets, etc., Brantford capitalists have organized the Harold-Sanderson Co., Limited, capitalized at $40,000. The company will operate in Paris in the factory formerly occupied by the Adams' Wagon Works, and will employ at the start 30 men, increasing this number to 100 within a year. The Paris Council has promised exemption from taxation and fire protection for ten years. Machinery to the value of $7,000 will be installed at once, and work will be commenced as soon as possible. Mr. John Harold, Brantford, will be the manager of the new concern.

TRYING TO MAKE STEEL.

The Baldwin Iron Works, Ottawa, are making a series of experiments with a view to determining whether they could turn out at their works steel suitable for cutlery and fine hardware. If a good quality of steel can be produced the making of hardware will be proceeded with immediately. During the past year the company have erected two foundries and a machine shop, which they have equipped well with machinery. For the year their business has been very prosperous. The following are the directors of the concern for the year ensuing: Geo. G. Roe, J. H. Gervan, Dr. D. C. McLaren, Geo. M. McLaren and R. C. Roe.

NEW IRON WORKS AT LONDONDERRY.

A large iron-working plant is being erected at Londonderry, N.S., by the Londonderry Iron Works, a company, the controlling interests of which are in the hands of T. J. & J. J. Drummond, Geo. Beatty, and J. C. Clark, of Montreal. The cost of the works will be about $75,000, and several new buildings will be erected and old ones utilized. The blast furnaces are to have a capacity of 40,000 tons of pig iron a year, and the iron foundry and pipe shops will turn out, when in operation, castings at the rate of 80,000 tons a year. The company will mine all its own ore on its Londonderry properties and operate the foundries, blast furnaces and pipe shops at their full capacity. The works are likely to be in running order early in the new year.

THE C.I.F. TERMS.

THE number of additional communications in regard to the C. I. F. question shows that a lively interest is still being taken in it. A feature of the communications which are published below is the fact that one of them is from a Manchester, England, firm, showing that the subject is beginning to excite some interest there.

Editor HARDWARE AND METAL,—The complications in the business expression C.I.F. seem to be innumerable. This discussion, however, is centred upon the expression "insurance." Apparently the purchaser provided for "insurance" upon his goods when contracting his purchase. When he agreed that "insurance" should be included in his purchase money, he took it for granted that "insurance" of the generally accepted meaning would be effected, and I claim that the word "insurance" in that phrase C.I.F. means insurance against all risk. If there be a difference of opinion as to its meaning, then the seller has a loophole through which to escape, otherwise he has to deliver his goods in perfect order at the destination agreed upon at time of purchase.

H. B.

Editor HARDWARE AND METAL,—We have watched with much interest the discussion going on in your columns lately in regard to the C. I. F. question, and can only say that we had a case ourselves about a year ago, in which about 100 tons of galvanized wire were involved, which fortunately turned out all right, but which brought the question of the seller's liability up, and they acknowledged that they were liable until the goods were delivered in good order in Montreal. This view coincided with that of some of the oldest men in the trade here, whom we consulted on the subject. We would have refused to accept delivery of the goods if they had not been in good order.

JAMES HUTTON & Co.

Montreal, Oct. 28.

Editor HARDWARE AND METAL,—As exporters in a large way we have been interested in the letters in your valuable paper respecting the terms of a C. I. F. sale, and notice a remark in Mr. St. Arnaud's letter of October 4, which we do not think is correct. He says that the buyer "has nothing to do with freight and insurance." What we find to be the generally accepted reading of a C.I.F. sale is that the seller merely pays freight and assurance for and on behalf of the buyer. In support of this, the buyer frequently demands insurance policy, to which, if the insurance did not concern him, he would have no right; further, in case say of a steamer being lost, it is a general custom with Canadian importers to claim the value of their goods together with a percentage (10 per cent. generally) for loss of sale. If the insurance were covered by the seller for his own account, all he could be expected to do in case of such a loss would be to send out another shipment to replace the lost one, and the buyer could not claim any damage, as the seller would be covered by the "force majeure" clause, which is now invariably inserted in contracts. This all goes to show that importers, as a general rule, accept the insurance as being covered for their account. Accordingly it rests with the importer alone to say whether the goods shall be insured against total loss alone, or whether a higher premium shall be paid to insure against all risks. Unless the importers in the present case gave the sellers instructions to cover the insurance against rust, then the whole occurrence is through an omission on their part, for which they alone are responsible. As exporters, this is the position we should take.

"MANCUNIAN."

Manchester, October 14.

Editor HARDWARE AND METAL,—I have noted with a great deal of interest the controversy in your columns re the matter C.I.F., and I think that the letter in your recent issue (October 25), signed "Importer and Wholesale Grocer," is the most forcible I have yet read on the matter. It puts the case in a "nutshell."

I certainly contend with him, and with others who have already written you, that when goods are sold C.I.F. the party selling the goods is responsible for their safe delivery in good order, and it is therefore his duty to protect himself by whatever insurance best suited, if F.P.A. or A A.R.

Why should the buyer have to concern himself about what class of insurance is placed on the goods he is buying? Nine cases out of ten the buyer does not go into the question of what class of insurance the goods are to be placed under, and it is only later on when a loss is made that he is told —"Oh! the insurance we had your goods under does not cover your loss."

This is not right and it is a subterfuge to tell a merchant that the goods are going to be insured when, in reality, it is only a part insurance

We had exactly a similar case to this some time ago in which we received a quantity of wrought iron pipe from England and which was damaged in transit. We refused to pay full value for the pipe, claiming that, as the goods were sold C.I.F. Quebec and therefore insured, the insurance company should cover the loss. Our shippers told us that the insurance did not cover loss of this kind and if we did not pay up they would sue us for the amount. After consulting several leading hardware merchants they told us to let them sue. However, we eventually compromised and agreed to allow half the amount of damage.

In order that a definite conclusion might be reached on this question I would advise that the matter be brought to the notice of the various associations in Canada, viz., Canadian Manufacturers' Association, the Canadian Wholesale Hardware Association, the Wholesale Grocers' Association and any others you, Mr. Editor, may deem necessary. I would hardly think that after a careful decision had been reached by these gentlemen that the law would upset the rendering they would give to the term C.I.F.

MECHANICS SUPPLY CO.,
Per W. H. Wiggs.

Quebec, October 27, 1902.

THE TRENT CANAL LIFT LOCK.

Chas. G. Knott, of The Canada Screw Co., Toronto, has returned from a trip to Peterboro' and while there inspected the new "lift lock" in the Trent Canal, which, it is claimed, is the only one of its kind in America. The lock has already cost the Canadian Government $400,000 and has been building for several years. By means of hydraulic power vessels are lifted or lowered, as desired, a height of 65 feet. The lock is made of a mass of concrete and two wells have been drilled in the solid rock, nearly 100 feet deep, to supply the hydraulic power to lift the vessels which pass through the canal. The work is a wonderful device, and when the canal is completed a wonderful saving in distance will be effected in carrying grain from the Northwest.

CATALOGUES, BOOKLETS, ETC.

CHRISTMAS GOODS CATALOGUE.

The new Nerlich catalogue contains many lines of interest to the dealers who handle Christmas specialties. In addition to a very large showing in fancy goods, toys and dolls, a special fancy china department has been added, where is listed a big variety of fancy cups and saucers, plate sets, bread and butter plates, cake plates, berry sets., etc.

A post card to Nerlich & Co., Toronto, will bring any dealer a copy of this catalogue.

HAMILTON, ONT.

CANADA AT FOREIGN FAIRS.

THE following exhibitions in which Canada is expected to take part will be of great interest to our readers. There are to be two in South Africa, one at Cape Town a year hence, and one at Johannesburg during the latter part of 1904. Canada has not yet decided, as a Government, in participating, but communication is being held with Lord Strathcona regarding the scope and importance of these two exhibitions. And action must be delayed until these communications are received.

The Government will be represented at the Osaka, Japan, Exhibition in 1903, and will occupy its own building. The Government will make a large display of agricultural and food products and in fruits and forestry, and the rest of the space, which is small, will be devoted to manufactured articles. It is somewhat difficult to determine what articles to exhibit to promote trade between two countries, but articles selected by the Government and commission will have freight charges paid, and an agreement made as to value so that in case of loss the matter could be adjusted without difficulty.

The Government has a collective exhibit or St. Louis in 1904 of our four great natural resources, namely, agriculture, horticulture, forestry and minerals. The rules and regulations preclude a collective exhibition of manufactures, as all articles have to be shown under their respective groups. Space will be supplied free to manufacturers who apply through the commission, and any information can be obtained at the Department of Agriculture, Ottawa. Mr. Hutchison, Exhibition Commissioner, will be in Toronto this week to confer with intending exhibitors.

SHIPPING FACILITIES AT HAMILTON.

The Grand Trunk Railway improvements at Hamilton for handling freight will be very complete when finished. The company has purchased the property on Ferguson avenue, extending from Robert to Barton streets, and intend erecting buildings to meet the demand of the "Ambitious City's" steady increase as a distributing centre. This will save a long haul to and from wholesale houses, and will allow loading and unloading to be done promptly.

CANADIAN GOODS FOR CURACOA.

Jacob Jesurun, the agent of the Canadian Manufacturers' Association at Curacoa, is visiting this country with the object in view of promoting trade between the Dominion and the West Indies and South America. He intends establishing an exhibition of Canadian products in Curacoa, and believes there is an excellent opening for establishing a trade. The prices should be low and the quality good to establish a trade, as prices can be advanced after, if quality is right.

Attention should be paid to light weight in packing as Customs duties can be greatly reduced thereby. Drugs, perfumes, soaps, etc., should be tastefully packed.

Mr. Jesurun desires to secure agencies and representatives for Curacoa, Venezuela, Columbia, Hayti and St. Domingo.

He has with him a number of samples of South-American products.

A Bit of History.

We began making paints over thirty-five years ago. We started with a small, one-story building; to-day we operate four large factories, in Cleveland, Chicago, Newark, and Montreal, and have offices and warehouses in seven other cities. We are the largest paint and varnish makers in the entire world.

High quality products, persistent, intelligent advertising, straightforward, honest dealings, and a dollar's worth for a dollar every time are the principles upon which we have built up our business.

The same principles applied to any business anywhere will bring like results. They are the principles that have made our agencies all over the United States and Canada pre-eminently successful.

No matter how much business you may be doing now, THE SHERWIN-WILLIAMS PAINTS and THE SHERWIN-WILLIAMS METHODS will help you do more.

Our booklet "B-13" tells why this is so. Write for a copy to-day.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

A CHEAP WAY.

A Missouri dealer took three new silver coins—a dime, a quarter and half-dollar—and stamped his initials on each one. He then put these in circulation through separate channels. After a week he took liberal space in his daily paper and advertised to give ten dollars in gold for the return of each one of the coins. The consequence was that he had everybody for miles around examining their money. He claimed that every time a man, woman or child in his territory came into possession of coins of this denomination they at once looked for the initials, and while doing so unconsciously thought of his store. The rather strange part of it is that, although this offer has been made for nearly a year, not one of the coins has been returned.—St. Louis Grocer

RETAIL MERCHANTS' CONCERT.

The Toronto Branch of the Retail Merchants' Association of Canada will celebrate the King's birthday by holding a concert in Massey Hall, Toronto, on the evening of November 10, at which several talented and popular entertainers will render selections.

"NOVO."

William Abbott, agent and importer of iron, steel, etc., is now keeping a stock of steel in Montreal of the high-grade quality known as "Novo" air hardening, especially adapted to the high speed obtained by the most modern machinery. It is also most suitable for dies, milling tools, etc., being easily annealed and worked into any shape or size.

HARDWAREMAN MARRIES.

On Thursday, October 23, a pretty wedding ceremony took place at Ste. Rose, Que., when J. G. Manseau, of the office staff of The Canada Hardware Co., was married to Miss Anna Nantel, of Ste. Rose. After the ceremony the young couple went on a trip to the west. Mr. Manseau is a popular member of The Canada Hardware Co.'s staff, and the felicitations he has been receiving have been many and hearty.

Walter Mitchell, general merchant, Port Stanley, Ont., has sold out to Hawkins & Dales.

QUEBEC IRON MOULDERS STRIKE.

The twenty-three employes of Terrault & Racine, ironfounders, of Quebec city, are out on strike. The wage question is the trouble. At present the moulders are paid $1.50 per day, and they want $2.25 as a minimum wage.

The strike is not likely to spread to the other foundries of Quebec, as those are members of the Founders' Association, in which the hours of labor and rate of wages have been fixed for the year.

As the cost of living has increased in Quebec, and wages are low as compared with those in other places of Canada and the United States, where they range from $2.40 to $4.00 per day, the moulders think their strike is justified, and also that it will hardly be possible to fill their places with skilled workmen at the wages now being paid. Meanwhile, the foundry of Terrault & Racine is closed down.

THESE WILL SELL.

The National Cutlery Co.'s ladies' shears have been much appreciated by the fair sex for their neatness and quality. They have no soft spots, no saw edges. The patent process of tempering insures a perfect edge, which, together with a steel ride, makes them the ladies' ideal. They are full nickel plated or enamelled, put up in separate pockets. Made in all sizes—3 in. up to 7 in. See the cut. Ask for catalogue.

THE SECOND STEAMER FOR AFRICA

The Elder-Dempster steamer Melville, which sails from Montreal for South Africa on November 18, is filling up rapidly with freight. So far, she will carry 2,000 tons of flour, 4,000 cases of butter, 3,000 barrels of apples and 2,000 cases of ham, in addition to cottons and woollens and agricultural machinery. The prospects are that she will go out as well filled up as did the Ontarian. Inquiries are already being received by Jas. Thom, manager of The Furness-Withy Company, for tonnage in their steamer sailing from St. John in December.

NEW HARDWARE PREMISES.

The Toronto Hardware Manufacturing Co., who have been in business for the past 21 years on Queen street west, Toronto, are erecting new premises on Dufferin street. Business has increased so rapidly during the past few years that they were forced to take this step. The new building will be 300 ft. long and 70 ft. wide and will be built of brick and iron. The corner-stone was laid on Saturday last by Mr. Wm. Ince, sr., in the presence of the members of the firm and a large number of friends.

They expect to be located in their new premises about the first of next year. The proprietors of the firm, Patterson & Gouinlock, are looking forward to a heavy winter's work.

MACHINERY AND ELECTRICAL SUPPLY DEPARTMENT

INCREASED USE OF OIL FUEL.

By E. P. WATSON.

THE discovery of new sources for the supply of fuel oil has reawakened the possibility of using it in Atlantic liners and other high-speed vessels. The objections hitherto have been uncertainty as to the continuance of the present oil fields, the slight margin of saving in comparison with coal in many localities, and want of success in obtaining good results through inexperience in the management of oil fuel, but these disappear, in great part, with the apparently unlimited production of the Texas and other new oil wells, and new types or systems of burners which are an improvement upon their predecessors. Many of the naval powers are now fitting out war vessels to use oil fuel, and others are experimenting with a view to its adoption later on. The German Admiralty have used oil on their China station for auxiliary purposes for months in lieu of coal. The Hamburg-American Company has four ships using liquid fuel wholly, and the North German Lloyd two, while the Dutch mail and cargo boats in the Far East employ oil solely as fuel. There are over 30 depots or stations now where oil can be procured regularly by vessels, and more are being laid down as rapidly as possible.

Oil fit for fuel purposes has the following chemical composition: Carbon, 88 per cent.; hydrogen, 10.75 per cent.; oxygen, 1.25 per cent. The other two impurities present in the mass are water and sulphur. The action of water is obvious, while the sulphur, if free, not in chemical combination, attacks both iron and steel, and mechanical means to separate the water, if oil is used on shipboard, are necessary. Recent experiments show that two tons of oil are equivalent to three tons of coal, while by volume 36 cubic feet of oil are equal to 67 cubic feet of coal as ordinarily stowed in bunkers. This increases the radius of action of a war vessel 50 per cent. upon the bunker weight allotted and nearly 90 per cent. upon the bunker space, without any alteration of the ship. It is also urged in favor of oil that it is easily supplied in mid-ocean—from transports—while coal presents great difficulties under the same conditions. In commercial work the gains predicted for oil vs. coal are surprising. In high-speed ships the weight and space occupied by the propelling machinery leave no room of any account for freight. The change from coal to oil would add nearly 2,000 tons to the carrying capacity of a given ship, while, as oil fires never have to be cleaned, the speed would be constantly maintained. With these and many other advantages in favor of liquid fuel it is not unreasonable to look for its general adoption in the near future, both on land and sea. Many locomotives are now using it, and others are being built for oil service, both in this country and abroad.

A HUGE BOILER.

John Inglis & Son, Toronto, are placing a huge boiler in the Gas Works. It weighs 50 tons. While being conveyed from the foundry to the gas works it broke through the pavement on King street in several places. It was drawn by 16 horses.

ELECTRICAL NOTES.

The United Electric Company have secured the contract for the lighting of the town of East Toronto.

The Board of Control, Toronto, has awarded the contract of lighting the City Hall to The Canada General Electric Co.

ELECTRICAL PLATE HARDENING.

A new method of the face hardening of steel plates invented by an officer of the American navy, is reported as being a success. The process is based on directing heavy currents of electricity upon the armour plate while in a heated condition, the action of the current through the carbon and into the plate carrying bodily into the mass of metal, a portion of the carbon. Plans are on hand for a continuance of practical experiments to further demonstrate its efficiency. It is claimed that by this process the time required by the Harvey and Krupp process will be reduced from three weeks to about five hours. There will also be a considerable reduction in weight of from 20 to 50 per cent. below that of a Krupp plate possessing equal power of resistance. In the matter of cost, it is claimed that by the electrical process the face hardening of armor will be as low and probably less that that of the present plan, and that for hard-face plate for commercial requirements it will be possible to reduce cost away below the present basis.

A NEW INCANDESCENT ELECTRIC LAMP.

OSMIUM has the highest melting-point of any metal, viz., about 2,600 deg. C., and it can therefore be used at a higher temperature than carbon in an incandescent lamp, making the efficiency correspondingly higher. The lamp was the invention of Dr. Auer von Welsbach, and The Auer Company, who are making it, will shortly be letting out lamps on hire. Owing to the rarity of osmium, it is found worth while to employ the metal remaining in the filaments after they have burned out. The chief difficulty appears to be the low resistivity of osmium. Owing to this, up to the present, lamps of 25, 35 and 50 volts only have been produced, and the smallest candlepower of a 35-volt lamp has so far been 40. The lecturer described experiments made with a 20-volt lamp at different pressures. At 25.5 volts the lamp gave 22 candle-power, and required 1.48 watts per candle. At 25 volts, the efficiency rose to 0.99 watts per candle and the candle-power to 46. At 30 volts the figures were 0.654 watts per candle and 99 candle-power; at 35 volts, 0.487 watts per candle and 171 candle-power; at 40 volts, 0.38 watts per candle and 275 candle-power; and at 50 volts, 0.32 watts per candle and 460 candle-power. At this pressure the lamp burned out. A life-test was made on another lamp at its normal pressure. This lamp required 1.5 watts per candle at the commencement, dropped gradually to 1.36 and 1.32 watts per candle, and finished at 1.4 watts per candle after 1,100 hours. During this time the candle-power, which started at 14.7, rose gradually to 16.8 after 250 hours, and then dropped to 15 candle-power after 1,000 hours' use.—Scientific American.

NEW ELECTRIC POWER HOUSE.

The new power-plant erected by H. A. Connall at the mouth of the Meduxnekeagt, Woodstock, was started on October 16. This plant was only 12 weeks in the course of construction.

The water-wheel is one of James Leffell's "Samson" turbine wheels, 56 inches in diameter, and is rated as giving 297 horse-power. The dynamos are of 250 k.w., each compound wound, and are capable of running 2,000 16 candle-power lights.

MACHINERY NOTES.

THE Mica Boiler Company of Montreal have received a large order for boiler coverings for steel plants from The De Beers Mining Company, of Kimberley, South Africa; they are also supplying their coverings for the boilers and steam pipes of a new British warship, now being constructed.

There are over 2,000 tons of steel rafters used in the new King Edward Hotel, Toronto.

Thayer & Vanslyke, dealers in machinery, buggies, etc., Aylmer, Ont., have dissolved.

The Polson Iron Works are putting a boiler in the new addition to The W. A. Murray premises on King street east.

H. W. Petrie, Toronto, has sold J. A. Knox & Co., 48 Wellington street, Toronto, an 11 inch x 5 ft. Barnes lathe.

The marine engineers are busily employed at packing the machinery of the boats that have laid up for the winter.

The McCormick Harvesting Machine Company, Montreal have dissolved and ceased doing business in the Province of Quebec.

A semi-portable boiler has been delivered to Chas. Turp, corner of Bloor and Dundas streets, Toronto, by H. W. Petrie, Toronto.

A fine tool in the shape of a 14-inch x 6 foot Porter lathe was delivered to J. J. Zock & Co., Adelaide street west, by H. W. Petrie, Toronto.

A No. 6 "Jewel" automatic engine and a 40 horse-power boiler have been shipped by H. W. Petrie, Toronto, to Oelschlager Bros., of Baden, Ont.

Shaw & Dunbar, Guelph, Ont., are installing two new 75 horse-power boilers in Bell's brick shop, Guelph, from which they have removed the old boilers.

The Polson Iron Works, Toronto, have closed a contract for the construction of two large lightships for the St. Lawrence River. They will cost $250,000.

B. F. Sturtevant, Boston, Mass., have placed three large power fans in the King Edward Hotel, Toronto. These fans are to be used to carry away all foul odors from the premises.

The Sylvester Manufacturing Company of Lindsay, Ontario, have been awarded the highest honor, a bronze medal, for their stationary gasoline engines and launches at the Toronto Exhibition, and are justly proud of their success.

Webb Bros. have the contract for the big addition to the sub-station of The Cataract Power Co., on North Victoria ave., Hamilton. They have about completed the brickwork on The Otis Elevator Works, but a chimney 75 feet high has to be erected before they will hand the buildings over to the company.

JUBILANT ORILLIA.

The tawnspeople of Orillia, Ont., are jubiliant these days as they are independent of coal and wood in running their light and water plants, and their manufacturers can look with condecending pity on those of other places who have a difficulty in procuring fuel. The present is a good time for impressing outside manufacturers with the advantages Orillia offers in the matter of cheap, convenient and reliable power.

CONTRACT FOR ELECTRIC LIGHT AWARDED.

The Toronto Junction Council held a meeting on October 19 and awarded the contract for the new electric light system to The Canadian General Electric Company for $3,580. The Western Electric Company, of Chicago, also tendered for the job, and their tender was $150 lower than The Canadian General Electric Company's, but the council chose the latter on the priociple of Canada for Canadians.

NEW WINDMILL CO.

A new company is being formed at Woodbridge, Ont., to be known as The Canadian Centrifugal Windmill and Manufacturing Co., to acquire the rights to the letters patent for Canada from T. M. Minnier, of Kansas City, maker of centrifugal windmills there. A good deal of the stock has already been subscribed for, not only in Woodbridge and vicinity, but also in Toronto, Weston, and other places, and a by-law is to be submitted for the purpose of granting a bonus to the company and exemption from taxes.

SOME SHOP TALK.

It was midnight in the machine shop, and all was silent until the rasping voice of the file was heard to say:

"I have rubbed up against lots of hard things in my life, but this Harveyized steel job has completely worn me out."

"Well, said the lathe, sympathetically, "I have done many a hard turn myself."

"Life is a great bore," supplemented the gimlet.

"A continual grind," put in the emery wheel roughly.

"With many a broken thread," added the steam pipe in hollow accents.

"Calm yourselves," advised the damaged fly-wheel "there may be a revolution soon."

"Don't mind him," said the soldering fluid acidly. "Every one knows he is cracked."

And in the confusion that followed the gas escaped.—Judge.

A NEW BRICK-MAKING MACHINE.

A Toronto firm has just acquired the American rights from Wm. Owen, C.E., London, Eng., on a brick-making machine calculated to produce daily 150,000 bricks as hard as granite. This is fifteen times the capacity of the machines now in use. The materials of the new bricks are lime and sand pressed and put through a hardening process involving chemical reaction.

A PRACTICAL DEMONSTRATION.

A practical demonstration in the use of the thermit invented by Dr. Goldsmidt, of Rouen, was given in the presence of a number of prominent railway officials at the works of Ballantyne & Co., 159 St. Antoine street, Montreal, and consisted of the welding of iron tubes, showing how it could be applied to flawed castings, and the welding of steel rails. The test was carried out by burning a hole through a half-inch steel plate in 30 seconds, and the welding of a heavy two-inch tube in 52 seconds.

THE TAYLOR-FORBES CO., LIMITED.

The Taylor-Forbes Company, Limited, whose advertisement appears for the first time in this journal, have just taken over the plants of Woodyatt & Co., manufacturers of general hardware, and The Guelph Malleable Iron Works in Guelph city. They purpose to enlarge their plants in the various departments, and, in fact, have since the first of April last increased their number of employes nearly 40 per cent., and they have building plans ready for further extensions just as soon as the weather will permit commencing operations. This firm have adopted the policy of the old Woodyatt Company of catering only to the jobbers to whom they will leave the distribution of their goods.

The experience of the members of the new firm in the foundry business is too well known to the general hardware trade of Canada to require any notice here. Suffice it to say that there is no one of the younger manufacturers of the day who have had anything like the experience of the head officers of The Taylor-Forbes Company, Limited. We may expect from this onward to hear a good deal of the new firm and its doings.

The officers of the new company are:

Jno. M. Taylor, president and general manager.
Geo. D. Forbes, vice-president.
Adam Taylor, secretary treasurer.
Joseph A. Hewett, assistant secretary.
Harry F. Moulden, general sales agent.

HARDWADE AND METAL
MONTREAL. TORONTO.

Persons addressing advertisers will kindly mention having seen their advertisement in The Canadian Hardware and Metal Merchant.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Drill Hall, London," will be received at this office until Friday, 7th November, 1902, inclusive, for the construction of a Drill Hall, London, Ont.

Plans and specifications can be seen and form of tender obtained at this Department, and at the office of Messrs. Moore & Henry, Architects, London.

Persons tendering are notified that tenders will not be considered unless made on the form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honorable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order.

FRED GELINAS, Secretary.

Department of Public Works,
Ottawa, 17th October, 1902.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

PAINT, OIL AND BRUSH TRADES

Methods of Cleaning Paint—The Markets.

METHODS OF CLEANING PAINT.

AN exchange gives several methods for cleaning painted surfaces. With a piece of clean flannel dipped in warm water and then squeezed nearly dry take up as much whiting of the best quality as will adhere. Apply this, rubbing the paint work moderately, and afterward wash the surface with clean water and rub it dry with a chamois leather. This method is better than the use of soap. It requires but half the time and labor and leaves the surface clean and as good as new.

Another way is to dissolve half an ounce of glue and a bit of soap the size of a walnut in about three pints of warm water and with a well-worn whitewash brush well scrub the work, but not sufficiently to take off the paint, and rinse with plenty of cold clean water, using a wash leather. Let it dry itself. Work done in this manner will often look equal to new

Again, first take off all the dust with a soft brush and a pair of bellows. Scour with a mixture of soft soap and fuller's earth and use lukewarm water. If there are any spots which are extra dirty, remove these by rubbing with a sponge dipped in soap and water. Commence the scouring at the top of the door or wainscot and proceed downward and dry with a soft linen cloth. When cleaning paint, it is always better to employ two persons, one to scour and the other to rub dry.

Still another. The best and easiest way to clean all paint work, either varnished or even the most delicate paint, is to use a soft flannel dipped in paraffin oil. Rub on all dirty finger marks or even all over doors and wainscoting. Then rinse with clean cold water, and you will be delighted with the result; can also be used for cleaning furniture with the best results.

PAINT AND VARNISH EASILY REMOVED.

The practical difficulties that confront the painter when he finds it necessary to remove old varnish or paint are all resolved into easy work by the use of Adel-ite, the liquid and semi-paste varnish and paint remover made by Adams and Elting Company of Chicago. The manufacturers guarantee this solvent to be absolutely free from water, alkali or acids and objectionable odor and that it will not injure the hands. Yet it works like magic when applied to a painted or varnished surface. One coat brushed on and allowed to stand for a few minutes will so soften the varnish or paint that it can be readily removed with a piece of cloth or cotton waste saturated with benzine. It is invaluable for removing paint from glass, metal signs or window panes, or for cleaning brushes that have been thoroughly clogged with paint, and is a staple article for painters' use.

A SUCCESSFUL SUMMER.

The painting trade has had about as much work as it could handle during the past summer. There has not been what is called a slack week since the season opened last spring. Painters have been scarce at all times and work was much delayed on that account. Of course, the season is about at an end, but the majority of painters can see lots of work for the winter. They expect to have enough work all winter to keep the bulk of the men employed.

TURPENTINE OPERATORS PLEASED.

The past year is regarded as having been very good for the turpentine operators of Mississippi, as both turpentine and rosin have maintained uniformly good prices—turpentine averaging 33c. per gallon and rosin $1.75 per barrel of 280 pounds.

On the line of the Mobile, Jackson and Kansas City Railway, from Mobile to the present terminus at Wingate, there are 26 stills, each producing an average of 16 barrels of turpentine and 48 of rosin per day. The 26 distilleries make 416 barrels of turpentine a day, or 12,480 per month, a grand total of 99,840 barrels for the season. There is an average of 50 gallons to the barrel, so the grand total for the 26 stills will this year easily foot up to 4,992,000 gallons. Turpentine has been steady at an average of 33c. per gallon for all this season, so the cash consideration for this important product of the pine forests nets $1,647,360, or probably about $63,360 to each distiller.

There is a persistent story, as old as the distilling of turuentine, that the recipts from rosin pay the entire expenses of the naval stores manufactory. If this be true, the gentlemen engaged in that business have enjoyed a profitable season; and if it be not the fact, they have made a profit entitling them to congratulations.—Paint, Oil and Drug Review.

LACQUER FOR BRASS AND COPPER.

ACCORDING to Dr. Theodore Koller, the best method to lacquer brass and copper is with the so-called celluloid lacquer.

To prepare this it is necessary to dissolve the plain celluloid in a mixture of strong alcohol (methylated spirit) and ether, which must then be well shaken and left to settle down for six or eight hours. Subsequently the undissolved residue sinks to the bottom, and the clear fluid is ready to be drawn off.

This clear celluloid lacquer is then ready for use, giving a splendid brilliant polish, or it may be colored by the addition of aniline dyes.

There is another and cheaper method of making celluloid lacquer, which, however, has not the lasting qualities of the above mentioned process, and cannot be recommended.

A good celluloid lacquer may be applied to the thickness of a quarter of an inch, and it will always form an even, hard and durable surface. To dye celluloid lacquer it is necessary to dissolve the aniline dyes in strong spirits of wine, which is then added to the lacquer and well shaken.

To cover the articles with this lacquer is, however, rather difficult. The process is as follows: The articles must be free from all grease and dampness as if being prepared for electro-plating. They must be immersed in the lacquer in order to get an even surface. The immersion is accomplished by the aid of a thin wire, which is attached to the articles to be lacquered. They must be immediately withdrawn, drained and dried in a room heated to about 55 deg. Fahr. All articles must remain in the drying-room until free from any smell and thoroughly dry.

A LARGE PAINTING CONTRACT.

The contract price for the painting and decorating of the King Edward Hotel amounts to $85,000. The contract was let to American firms, but nearly all Toronto mechanics are employed on the work. The decorating is magnificent and shows to good advantage both for the contractors and men engaged on the job. This work will not be completed for several months yet. There are at least 200 painters and decorators at work on the job at the present time. The walls are all covered with linen first and then painted.

PAINT FOR STRUCTURAL WORK.

"Diamond" graphite paint is used universally among all foreign machinery and structural iron manufacturers. It is the only pigment known that can be used successfully on iron and stand the tests of atmospheric action on iron. Roofs and bridges painted 12 years ago are still in good state of preservation. No other paint known to-day, it is claimed, would stand such tests.

One gallon of this paint thinned out with linseed oil to the consistency of thin cream will weigh less than 12 lb.

and will cover 1,000 square feet of iron work.

Manufacturers in machinery and structural work, who are not yet acquainted with the lasting and economical properties of "Diamond" graphite paints, which is supplied to the home and foreign markets in the dry paste and liquid forms, likewise in paste form for iron filling should write for further information The Canada Paint Company, who are the only miners and grinders of the "Diamond" graphite paints in Canada.

SOFT PUTTY.

Soft putty is made of whiting and boiled linseed oil with white lead in the proportion of one-tenth of the whiting. A small quantity of salad oil is then to be added in order to prevent the white lead from hardening and cracking off, as common putty often does in certain situations.

GILDING IN OIL.

The method is to cover the wood upon which the gilding is to be laid with a coat of gold size, made of drying linseed oil mixed with yellow ochre. When this is nearly dry the gold leaf is laid on with great care and pressed down with cotton wool. When entirely dry the ragged edges are rubbed off with cotton.

PETROLEUM NOTES.

The Queen City Oil Company, Toronto, report business good this fall.

The O. K. Crude Oil Company, of Newport, R.I., have increased their capital stock from $1,000,000 to $1,400,000.

The Carroll Oil Well and Drilling Company, of Beaumont, Texas, declared a dividend of 150 per cent. on the August and September business.

PAINT AND OIL MARKETS.

MONTREAL.

BOTH turpentine and linseed oils have remained unchanged in price during the week. The latter is still somewhat easy. The demand for ordinary paints and painters' materials has kept up well and prices have been well maintained all round. This satisfactory condition of things is likely to keep up until the winter freight rates have been put into force. The inquiry for japan colors, for carriage work, is still of the best, the fall business being quite up to the mark of former years. There is not much doing in liquid paints, which are now moving out only for sorting purposes. We quote :

GROUND WHITE LEAD.—Best brands, Government standard, $5.15 to $5.25 ; No. 1, $4.77½ to $4.87½ ; No. 2, $4.40 to $4.50 ; No. 3, $4.02½ to $4.12½ ; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, 4 months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5.25 in casks : kegs, $5.50.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c. No. 1 zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No.2, 6c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 68c.; boiled, 71c. In 5 to 9 bbls., 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gal. advance.

TURPENTINE.—Single barrels, 78c.; 2 to 4 barrels, 77c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

TORONTO.

The market is quite active at present. Varnishes are firm, especially those of the better quality, while linseed oil is easing off a little. Turpentine has seen a slight decrease during the past week, although the prices, locally, remain about the same. We quote :

WHITE LEAD.—Ex-Toronto, pure white lead, $5 to $5.25 ; No. 1, $4.62½ to $4.87½ : No. 2, $4.25 to $4.50 ; No. 3, $3.87½ to $4.12½.; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards ; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $5 to $5.12½ ; ditto, in kegs of 100 lb., $5.50 ; No. 1, in casks of 560 lb., $4 ; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25 ; Lehigh, in cgsks, $6.00.

SHINGLE STAIN.—In 5-gallon lots, 60 to 75c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 40c.; in less than cases, 42c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal. ; in less quantities, 10c. extra.

PUTTY.—Bladders, in barrels, $2.25 ; bladders, in 100-lb. kegs, $2.40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c per lb. in less quantity ; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon ; No. 1, $1 10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 9 to 9½c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 2 barrels, 70c.; boiled, 73c.; 3 to 5 barrels, raw, 69c.; boiled, 72c.; 6 to 9 barrels, raw, 67c.; boiled, 70c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 bbls. and over of linseed oil sold only f.o.b. Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 79c.; 2 to 4 bbls., 78c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

GASOLINE AND BENZINE.—We quote: Benzine, 18¾c. and gasoline, ordinary, 21¼c. and engine, 22¼c. f.o.b. Toronto.

NOTES.

Prepared paints are having a large sale at present.

Varnishes, especially the better grades, are firm and in good demand.

WINDOW GLASS.

MONTREAL.

The market for glass is not active. A number of small orders are being received, but on the whole, the volume of business is small. Our quotations are now as follows : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

TORONTO.

The local market continues to be brisk at about the same prices as last week. Indications point to a change very shortly. We quote: Under 26 in., $4.25 ; 26 to 40 in., $4.65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75 ; 71 to 80 in., $6.25 ; 81 to 85 in., $7 ; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount, 15 per cent.

PITTSBURG FLAX MARKET.

A recent fire in the warerooms of The Pittsburg Plate Glass Co., Chicago, resulted in the complete gutting of the building and the destruction of most of the stock, with a total loss of over $250,000. The insurance was $200,000.

DULUTH'S FLAX MARKET.

Chicago never in its history did the amount of business that is now being done at Duluth in the flax trade. The receipts for one week at the head of the lakes were 2,083,000 bushels, which surpasses any previous record anywhere. Sales run from 1,000,000 to 2,000,000 bushels per day and immense quantities are being taken for shipment east to domestic and European crushers. The position of Duluth as the chief flax market of the United States is stronger now than ever.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, Ortober 31, 1902.

HARDWARE.

AS usual at this season of the year the demand for hardware for immediate delivery is very active, and jobbers are exceedingly busy making shipments to various parts in the Province and country. There have been but few changes in prices during the week. Some houses have advanced the price of standard screwdrivers about 5 per cent., but the market value remains unchanged. The new "Holdfast" screwdriver, lately put on the market, has been well received by the trade.

BARB WIRE.—Business in this line remains dull and the market is entirely without feature. The price quoted is $2.90 per 100-lb. keg f.o.b. Montreal and $2.55 f.o.b. Cleveland.

GALVANIZED WIRE.—There is not much demand for galvanized wire at the present time. No quotable change has been made. We quote: Nos. 6, 7 and 8 gauge, $3.20; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55; No. 17, $4.95; No. 18, $5.20.

SMOOTH STEEL WIRE.—There is but a light demand. Nothing of importance has occurred on the market, and the prices are unchanged. Our quotations are as follows: Bright and annealed, $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb., are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The market continues quiet and prices show no change, the discount being still 25 per cent., with net extras as follows: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is no change to note. Both wires are discounted at 62½ per cent.

FENCE STAPLES.—Not much business has transpired on this market, and trade continues quiet at unchanged prices. Galvanized staples now sell at $3.25 and bright at $2.90 per 100-lb. keg with an extra of 25c. for 25 and 50-lb. packages.

WIRE NAILS.—Business in wire nails is of moderate proportions. The market has developed no new phase and prices remain unchanged at $2.55 per keg, in small lots and $2.50 in carlots. f. o. b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a fair trade doing in cut nails, business being done on a basis of $2.45 in small lots and at $2.40 in carlots.

HORSE NAILS.—The market is active but there is no special feature to note. Prices are unchanged. Quotations are: "C" brand, 40, 10 and 7½ per cent. off; on "M" brand, "Oval," 57½ per cent.; "New City," 57½ per cent.; "New Countersunk," 66 2-3 per cent.; "Monarch," 65 per cent.

HORSESHOES.—Business in horseshoes continues brisk. No change has been made in prices. Our quotations are as follows: Iron shoes, light and medium, pattern, No. 2 and larger, $3.35; No. 1 and smaller, $3.60; snow pattern, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.45; No. 1 and smaller, $3.70; feather-weight, all sizes, 0 to 4, $5; toe weight, all sizes, 1 to 4, $6.25. Shoes, more than one size in a keg, 10c. per keg extra. F.o.b. Montreal only.

RIVETS AND BURRS.—The demand for rivets and burrs is light, as usual at this time, and the market is somewhat quiet. No change in the discounts is reported this week. We quote as follows: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers'

rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS.—Not much business has been done this week. We quote the discounts: Norway carriage bolts, 55 per cent.; common, 50 per cent; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—Trade continues quiet and prices are steady and unchanged from last week. Quotations are as follows: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

CORDAGE.—There is no change. The demand is light and the market is still quiet. Prices are as follows: Manila, 15c.; British manila, 13c.; sisal, 12½c. and lathyarn, 11½c.

BUILDING PAPER.—A number of good orders have been booked during the past week or so. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—There is nothing doing in this market. The price remains at $1.37½ per 100 square feet.

POULTRY NETTING.—A few orders continue to be received for netting for delivery in 1903. The discounts on these for Canadian and English netting are: 60 per cent. off on 2 x 2 mesh, 19 wire, and 50 per cent. off on 2 x 2 mesh, for heavier.

HARVEST TOOLS.—This market is reported quiet. For 1903 delivery the discount is 60 and 10 per cent. off.

FIREBRICKS.—The demand continues light and no change in prices is reported. We quote: English, $16 to $22 and Scotch, $17 to $22 per 1,000.

CEMENT.—There is a fairly good movement in cement at steady prices. We now quote: Canadian cement, $1.90 to $2.25; German, $2.20 to $2.30; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per barrel ex-wharf, and American, $2.10 to $2.20 ex-cars.

SPORTING GOODS.—The market is active and prices are steady. The discounts on shells are as follows: Empty: Canadian, 25 per cent.; American, 10 per cent. advance on list. Loaded "Trap," 30 per cent.; American, 30 per cent.; "Leader" and "Ideal," smokeless brands, 37½ per cent. Brass shot shells, Dominion, 55 per cent.; American, 40 per cent. Primers, Dominion, 30 per cent.; American, $1.60 per 1,000.

SKATES.—There is an active demand for skates at present. Quotations are as follows: Halifax pattern, 36c. per pair; nickel-plated, 65c.; ladies' nickel-plated,

THE FRANCIS-FROST Co. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

60c.; ladies' concave nickel-plated, $1.35 · plain hockey, 27c. to $1.35 ; nickel-plated hockey, 60c. to $2.50 ; double-end hockey, $1.50 to $3. Skate straps, 35c. to $1.35.

HOCKEY STICKS.—These are moving out rapidly. We quote : Best second-growth, goal keepers', $4.20 per dozen ; ash, $2.90 ; elm, $2.25 ; boys' elm, $1.10 ; common, 90c. Regulation pucks, $1.50 per dozen.

SNOW SHOVELS.—There is an excellent movement. We quote : "Habitant," $2.25 to $2.40 ; "Victor," 30 per cent. off ; steel railroad shovels, 48 and 5 per cent. off.

FIRE SHOVELS.—No change is reported. Business is brisk at steady prices. Our quotations are now as follows : No. 70, $38\frac{1}{2}$ to 40c. per dozen ; No. 55, 55 to 60c.; No. 57, $82\frac{1}{2}$ to 90c.; No. 60, $82\frac{1}{2}$ to 90c.; No. 65, $\$1.37\frac{1}{2}$ to $1.45 ; No. 80, 50 to 55c.; "Duplex," No. 7, $1.21 ; No. 9, $1.52 ; No. 11, $1.82.

LANTERNS.—The demand for lanterns is heavy at present and the market is steady. Our quotations are as follows : Tilt, lift or hinge, No. 0, $4 per dozen ; Cold Blast, $7 per dozen ; dashboard, No. 0, $5.75 per dozen ; cold-blast dashboard, $9 per dozen. Extras are as follows : Japanning, 50c. per dozen ; copper-plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

METALS.

There is a good demand for most metals. Some lines, like iron pipe, are scarce. Straits tin is quoted lower this week, but otherwise there has been no actual change in prices. The feeling, in general, is firm. In structural material the deliveries are increasing and the outlook is somewhat brighter.

BAR IRON.—Wholesalers are booking quite a few orders this week and the market is active. We quote : Merchants' bar, $1.95 ; horseshoe, $2.20 ; extra refined, $2.35.

BLACK SHEETS.—There is a fair trade doing in black sheets. No quotable change is reported and prices remain as follows : 28 gauge, $2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge, $2.50 and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is only a moderate demand for galvanized iron at present, and no quotable change has been made. We quote: No. 28, Queen's Head, $4.40 ; Apollo, $10\frac{3}{4}$-oz., $4.40 ; Fleur de Lis, $4.15 ; Comet, $4.25 ; and "Bell" brand, $4.30. For less than case lots, 10c. extra is charged.

SOIL PIPE AND FITTINGS.—There is only a fair demand. We quote : Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Canadian pig iron is difficult to obtain. Some dealers have refused to take any more orders. Summerlee is now quoted at $22.50 to $23.50, on wharf, exclusive of handling.

INGOT COPPER.—There is some business doing, but the market rules quiet at 13c.

INGOT TIN.—Straits tin is quoted at 28 to 29c. this week. The demand is not heavy.

PIG LEAD.—A few good orders were received during the past week. In carlots pig lead is quoted at $2.90 and in smaller lots at $3.25.

LEAD PIPE.—There has been no change in the price. Trade is fair. Composition and waste sell at 8c. and ordinary, 7c. The discount is $37\frac{1}{2}$ per cent.

IRON PIPE.—Some scarcity is reported. Some mills cannot deliver in large quantities before December, being well booked ahead. Prices are unchanged. Quotations are as follows : Standard pipe, per 100 feet, in lengths under 19 feet : Black, $\frac{1}{4}$, $2.40 ; $\frac{3}{8}$, $2.65 ; $\frac{1}{2}$, $2.85 ; $\frac{3}{4}$, $3.65 ; 1-in., $5.20; $1\frac{1}{4}$, $7.35; $1\frac{1}{2}$, $8.95; 2-in., $12.55. Galvanized, $\frac{1}{4}$, $3.20 ; $\frac{3}{8}$, $3.45 ; $\frac{1}{2}$, $3.85 ; $\frac{3}{4}$, $5 ; 1-in., $7.20 ; $1\frac{1}{4}$, $10.05 ; $1\frac{1}{2}$, $12.20 ; 2-in., $16.85. Extra heavy pipe, plain ends, are quoted per 100 feet as follows : Black, $\frac{1}{2}$, $4.20 ; $\frac{3}{4}$, $5.25 ; 1-in., $7.55 ; $1\frac{1}{4}$, $10.55 ; $1\frac{1}{2}$, $12.75 ; 2-in., $17.60. Galvanized, $\frac{1}{2}$, $5.20 ; $\frac{3}{4}$, $6.65 ; 1-in., $9.55 ; $1\frac{1}{4}$, $13.25 ; $1\frac{1}{2}$, $16 ; 2-in., $21.90. For threads and couplings 5 per cent. is added.

TINPLATES.—There is no change here. The English market continues weak. We quote : Charcoals, $4.75 to $5.25 and cokes, $4.25.

STEEL.—No quotable change has occurred. There is a fair demand and the prices are as follows : Sleighshoe, $2.05 ; tire, $2.20 ; bar, $2.05 ; spring, $2.85 ; reeled machinery, $2.75 ; toecalk, $2.70.

SHEET STEEL.—The market is quiet and featureless. We quote : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; $\frac{1}{4}$, 5-16 and $\frac{3}{8}$, $2.40.

TOOL STEEL.—There is a fair trade doing at unchanged prices this week. We quote : Black Diamond, 8c.; Sander-

son's, 8 to 12c., according to grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 8 to 15c.; "Air Hardening," 45 to 60c.

CANADA PLATES.—The market is steady under a fair demand. We quote as follows: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60's, $4.45 to $4.55.

TERNE PLATES.—There is no change. Business is quiet. We quote $7.50.

COIL CHAIN.—There is some demand, but nothing special is doing. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is not much doing. The price is $5.85 to $6.25.

ANTIMONY.—The market is without feature. No change in the price has been made. We quote 10c.

ZINC SPELTER.—This sells at 5c. and the market is quiet.

SOLDER.—The movement is solder continues fairly good. Bar solder is quoted at 20c. and wire solder, 18c.

SCRAP METALS.

There has been no further change in prices. The market is quiet. We now quote: Heavy copper and wire, 10c. per lb.; light copper, 8c.; heavy red brass, 10c.; heavy yellow, 8¾c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½c.; iron, No. 1, wrought, $15; No. 2, $7 per ton; machinery scrap, $16; stove plate, $12; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½ to 6¾c. per lb.

HIDES.

The market has shown no new feature. Prices are steady and unchanged. Quotations are as follows: No. 1 hides, 9c.; No. 2 8c.; No. 3, 7c. Calfskins, 8 to 10c.; lambskins, 60c.

MONTREAL NOTES.

Straits tin is 1c. lower.

Iron pipe is reported scarce for the present.

The price of "Standard" screwdrivers has been advanced 5 per cent. by some jobbers.

ARTISTIC, SANITARY, DURABLE

What More Could be Said of an Interior Finish?

Our Metallic Ceilings and Walls give the acme of lasting satisfaction for all classes of buildings.

Such a multiplicity of decorative designs—and such a perfection of best workmanship in every detail—they sell readily everywhere.

You'll do bigger business with these goods than without them, wherever you are.

TORONTO. MONTREAL. WINNIPEG.

ONTARIO MARKETS.

Toronto, October 31, 1902.

HARDWARE.

ALL lines of hardware are moving out actively and there is still a big rush to push forward orders which have to be got to their destination before the close of navigation. The demand for Marlin and Winchester rifles and ammunition has been enormous owing to the large number of sportsmen who are hunting this fall. The prices of barb wire, from stock, Toronto, have been reduced 10c., and the base price of Nos. 6 to 9, galvanized wire, from Cleveland, has been reduced 25c. per 100 lb. The local prices of galvanized wire have been reduced 30 to 65c. per 100 lb.

BARB WIRE.—Trade in this line is still quiet. The Toronto price has been reduced 10c. per 100 lb. We quote as follows: $2.67½ from Cleveland in less than carlots; carlots, 12½c. less. From Toronto the price is $2.90.

GALVANIZED WIRE.—The base price of this wire has been reduced 25c. and the Toronto price, 30 to 65c. per 100 lb. all through the list. We quote: Nos. 6, 7 and 8, $3.20 per 100 lb., according to the quantity; No. 9, $2.55; No. 10, $3.30; No. 11, $3.40; No. 12, $2.70; No. 13, $2.80; No. 14, $3.80; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots and 12½c. less for carlots of 15 tons.

FINE STEEL WIRE.—Trade in fine steel wire is on the quiet side. The discount is 25 per cent.

SMOOTH STEEL WIRE.—There is very little demand for smooth steel wire. We now quote the base price at $2.60 per 100 lb. Oiling, 10c.; coppering, 60c. and tinning, $2 per 100 lb. extra. Shipping points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—Trade in wire nails is keeping up well. Quotations are as follows: $2.50 in carlots and $2.55 for less quantities. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Business in these is fair. We quote $2.50 per keg and 10c. less for carlots.

HORSE NAILS.—These are fairly active and the prices are unchanged. The discounts are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "M" brand, 50, 10 and 5 per cent.; "Monarch," 60 2-3 per cent.; "Countersunk" head, 60 per cent.

HORSESHOES.—There continues to be a fair trade in horseshoes. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—These are in very active demand and hardly any supplies can be obtained from the manufacturers. Discounts are: Flat head bright, 87½ and 10 per cent. discount; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent. and flat head bronze, 70 per cent.

RIVETS AND BURRS.—These are much wanted but are very hard to procure as the manufacturers are still hampered by the scarcity of raw material. The discounts are: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The scarcity of bar iron is still acutely felt by the manufacturers of bolts and nuts. They are away behind in their deliveries and are unable to catch up. The prices are firm and unchanged. Our quotations are as follows: Carriage bolts, common, ($1.00 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3.00 list), 55 and 10 per cent.; machine bolts, all sizes, 50 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

SPADES AND SHOVELS.—An active business is doing in both spades and shovels. The discount is 40 and 5 per cent.

ROPE.—A fair demand is reported for rope with a scarcity of supplies. We quote: Pure manila, 15c.; British manila, 13c.; sisal, 12½c.; lathyarn, single, 11½c.; double, 12c.; sisal bed cord, 3-cord, 48 feet, 65c.; 60 feet, 80c.; 72 feet, 95c. per dozen.

HARVEST TOOLS.—These are selling well at the following discount, viz.: 60 and 10 per cent.

EAVETROUGH, ETC.—Quite a few orders are still coming forward for eavetroughing. We quote: Eavetrough, 10-in.,

per 100 ft., $3.10 ; conductor pipe, 2-inch, per 100 feet, $3 ; 3-inch, $4 ; 4-inch, $5.25; 5-inch, $6.75 and 6-inch, $9.

BUILDING PAPER.—Very active is the market for building paper. The prices are unchanged. Our quotations are as follows : Dry sheathing, grey or straw, 35c. per roll ; tar sheathing, grey or straw, 45c. per roll ; dry fibre, 50c .per roll ; tarred fibre, 60c. per roll.

ASH SIFTERS.—These are very active and scarce. The price is $13.20 per gross.

TINWARE AND ENAMELLED WARE.—A good business is still being done in these lines.

STOVES AND RANGES.—The demand for these is much greater than the supply and the manufacturers are working to their fullest capacity. A good many stoves and heaters are being sent to the West and Northwest this year.

SCREEN DOORS, ETC.—These have been active during the week for future delivery. We quote: Screen doors, common, 2 or 3 panel, walnut stained, 3-in. style, $6.60 ; stained, yellow or green, $6.80 ; in natural colors, oil finish, $8.15 ; 4-in. style, 20c. per dozen extra.

CEMENT.—The market for cement continues strong and active. Manufacturers are hastening to complete their orders if possible before the cold weather sets in. This year has been about the best in the history of the country for the cement trade. Our quotations are now as follows : Canadian Portland cem n , $2.80 to $3.20 and hydraulic, $1.35 up. At the works the prices are $2.50 to $2.70 per barrel.

METALS.

There is a large quantity of metals now being shipped forward to their destination, owing to the nearness of the close of navigation. Values in these lines are firmly held. The demand, otherwise, is not very strong. The bar iron market has been gathering strength these last few weeks and prices now are firmly held at $2.05 per 100 lb. The outside tin market is more active and stronger, but copper continues featureless. The iron and steel markets of Pittsburg are dead outside of small sales of pig iron for early delivery at constantly advancing prices.

PIG IRON.—The market is strong and scarce. We quote prices at the Canadian furnaces as follows : $23 for No. 1 and $22.50 for No. 2. On track, Toronto, No. 2 Summerlee iron is quoted at $23.

STEEL BOILER PLATES.—The mills have sold their output of steel boiler plates up till April. These are still quoted at $1.80 per 100 lb. in carlots.

STEEL RAILS.—Prices are unchanged at $30 per ton for steam railways and $36 per ton for electric railways.

TOOL STEEL.—There is an active demand for tool steel, especially for rock drill steel, and prices have an upward trend. It is expected in some quarters that prices will be advanced about January 1. Our quotations are as follows : "B C" and "Black Diamond," 10 to 11c. ; Jessop's, Morton's and Firth's, 14c. ; Jonas & Colver's, 8 to 15c.; ditto, "Air Hardening," 30 to 50c.; Chas. Leonards', 8 to 9c. ; Park's "Silver," 12 to 14c.; Park's Special, 15 to 20c.

MILD STEELf—There is an active trade doing in mild steel, as the demand more than equals the supply. We quote $2.50 to $3 f.o.b. Toronto per 100 lb.

BOILER TUBES.—These are active and unchanged.

SPRING STEEL.—The demand for this steel is well maintained. We quote $3 to $3.50 on track, Toronto.

BAR IRON.—The market is very active and the demand is greater than the supply. The prices have been advanced to $2.05 base. Our quotations are now : $2.05 up base. Extras cut to length while rolling : 2 ft. and over, 10c. per 100 lb., 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—A fair amount of trade keeps doing in black sheets. We quote : Common, $3.15 for 28 gauge and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—These are in active demand and the prices are firm. We quote : All dull,, $2.90 to $3 ; half polished, $2.85 to $3.10 ; all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—There is nothing new to report in this line and business continues good. Our quotations are as follows : Queen's Head, $4.50 for 28 gauge ; American, $4.40 for 29 gauge ; Bell brand, $4.30 for 28 gauge ; Gordon Crown, $4.50 for 28 gauge.

TIN.—There is á fair amount of business being done in tin. We quote $31 to $32 per 100 lb.

TINPLATES.—These have been in better demand. We quote : Charcoal, $4.75 to $5 and cokes, $4.25 per box.

COPPER.—There is a moderate demand for ingot copper. We quote : Ingot copper, $13 per 100 lb. and sheet copper, $22 to $23.

BRASS.—Trade is about the same as it was last week. The discount is 15 per cent.

LEAD.—This metal is moving out freely. We quote : Pig lead, $3.50 and bar lead, $3.75 per 100 lb.

IRON PIPE.—There is a big demand for iron pipe with a scarcity of supplies. The manufacturers in Montreal keep behind in their deliveries. Quotations are : Per 100 feet : $\frac{1}{4}$-inch, $2.40 ; $\frac{3}{8}$-inch, $2.65 ; $\frac{1}{2}$-inch, $2.85 ; $\frac{3}{4}$-inch, $3.65 ; 1-inch, $5.20 ; $1\frac{1}{4}$-in., $7.35 ; $1\frac{1}{2}$-in., $8.95 ; 2-in., $12.55 ; galvanized, 1-inch, $7.20. Trade discount is 4 per cent. for carlots.

ZINC SPELTER.—This commodity is in fair demand. We quote 5 to 6c. per lb.

ZINC SHEETS.—These are unchanged. We quote : Cask lots, $6 to $6.25 and part casks, $6.25 to $6.50.

SOLDER.—There is a steady demand for solder.

ANTIMONY.—This metal is still active. The prices are unchanged at $9 per 100 pounds.

OLD MATERIAL.

There is no change to note in the prices of old material. Quotations are as follows : Heavy copper and wire, 10c. per lb. ; light copper, 8 to $8\frac{1}{2}$c. ; heavy red brass, $9\frac{1}{2}$c.; heavy yellow brass, 8 to $8\frac{1}{2}$c.; light brass, 5 to $5\frac{1}{2}$c.; lead, 2 to $2\frac{1}{4}$c.; scrap zinc, 3c.; iron, No. 1 wrought, $13.00 per net ton ; No. 2 wrought, $1.50 ; machinery cast scrap, $11 to $15 ; stove plate, $10 ; malleable and steel, $6 to $6.50 ; old rubbers, $6\frac{1}{2}$c. per lb. and country mixed rags, 50c. per 100 lb.

HIDES SKINS AND WOOL.

HIDES.—There is a steady demand for these and the prices are unchanged. We quote : No. 1 green, 8c.; No. 2 green, 7c.; No. 1 green, steers, $8\frac{1}{2}$c.; No. 2 green, steers, $7\frac{1}{2}$c.; cured, $8\frac{1}{2}$ to 9c.

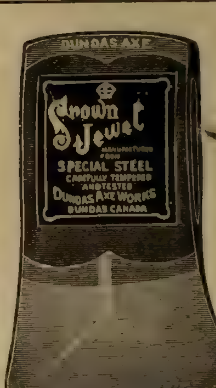
STANDARD.
The cost of Axes per million feet of lumber taken out should be the best Standard. Under this Standard the CROWN JEWEL is the cheapest Axe in the market.



Dundas Axe Works, Dundas, Ont.
W.L. Haldimand, Jr., Eastern Agent, Montreal.

SKINS.—Calfskins sell readily and sheepskins have advanced 5 to 10c. We quote: Veal skins, 6 to 14 lb. inclusive, No. 1, 10c.; No. 2, 8c.; do, 15 to 20 lb. inclusive, No. 1, 9c.; No. 2, 7c.; deacons (dairies), 60 to 70c. each; shearlings and lambskins, 50 to 55c.

WOOL.—There is little or nothing doing in Canadian fleece wools. Foreign and pulled wools are in fair demand. Quotations are as follows: Fleece, 13½c. and unwashed, 7½c. per lb.

TALLOW.—Prices of tallow are still weak at 6¼ to 7c. per lb.

SEEDS.

The good export demand for alsike is still a feature. Prices are unchanged. We quote: Alsike, $6.25 to $7.25 for choice seed; red clover, $5.50 to $6 and timothy, $1.40 to $1.60 aboard at outside points.

PETROLEUM.

The market is steady and a good business is doing. We quote as follows: Lily White, Canadian, 15 to 15½c. in bbls.; Silver Light, Canadian, 16 to 16½c. in bbls.; Crystal Spray, water white, American 18 to 18½c. in bbls.; Pennoline, best American, imported, 19 to 19½c. in bbls. In bulk, 2c. per gallon less.

COAL.

A cargo of about 1,200 tons of hard coal arrived in the city on Thursday, but as it was all ordered last summer, it still leaves the market without any. The price at the international bridges is $7 per ton for soft coal.

MARKET NOTES

Bar iron has been advanced to a $2.05 basis.

Soft coal has decreased $1 per ton during the past week.

The Toronto price of barb wire has been reduced 10c. per 100 lb.

The Cleveland price of galvanized wire has been reduced 25c. per 100 lb. and the Toronto price 30c. upwards per 100 lb.

THE MAKING OF THE BOTTLE.

The origin of glass bottle making is a legend-shrouded mystery, but for some 1,000 years it has written its own fragile story, and has left a different shaped bottle for each chapter thereof.

On the walls of ancient Egypt was pictured glassblowing in many phases, and bottles of various shapes and for divers uses were among the objects shown. The manner of blowing bottles has not altered at all, nor have the original ingredients of the glass composing them been greatly changed, and little change has been made in the melting furnaces until in very recent years. In modern bottle making the sand and its accompanying elements are melted in a long-continued heat of extreme intensity.

As a rule, the furnaces are at the base of a lofty chimney of tremendous draught, and around them are grouped the pots of fire clay in which the melting is done. The plants of newer equipment employ furnaces heating large tanks of stone and clay, since the expense of heating is somewhat less than where the pots are used.

THE ADVERTISING ARENA.

IF somebody with lots of time on his hands would take the trouble to make out a statement, showing the number of hardware advertisements that appeared on a certain date in Canadian newspapers, a rather astonishing state of affairs would undoubtedly be disclosed. It would be found that, speaking roughly, scarcely one hardware merchant in ten uses space in the press of the country. Take up paper after paper, and not a single hardware advertisement is to be seen in them. This is the more extraordinary, because some of these papers are published in towns where there are hardware businesses, perfectly capable of paying for space.

* * *

Advertising, like fishing, requires patience. As well expect to hook a big fish at the first cast, as to draw in a big trade with the first insertion of an advertisement. The good fisherman always has an eye on conditions, and he selects his ground and his bait accordingly. Just so, the skilful advertiser keeps his hand on the pulse of the public and uses the mediums and the matter that suit the taste of the public. There is a great deal in being timely with advertising. An advertisement that is just the thing for July is very probably entirely out of place in October, and vice-versa.

* * *

If you knew how many people there were right in your town who know practically nothing about your store, your goods or your methods, it would fill you with astonishment and alarm, says H. B. Wilber, in The American Advertiser. You are close to your business and your store seems so importaot to you that you forget that a great many people are minding their own business so closely that they never paid any attention to you. In order to get the facts in relation to yourself and your business into the minds of the people you should keep telling them over and over again.

* * *

The practice in large cities, now very general, of lighting up windows after closing hours is unquestionably good; and might with advantage be adopted by dealers located in small communities, says The New York Trade Review. Large numbers of prospective purchasers have absolutely no time until after working hours to "look in windows," and the advertising value of a well dressed and lighted window is worth considerably more than the cost of illumination.

* * *

While the business of the departmental stores in Canadian cities has grown remarkably of recent years, both in the cities themselves and throughout the country, the latter side of the business has not developed so much proportionately as the former. There are several reasons for this. The merchants in the smaller cities, towns and villages have improved their businesses remarkably. The local papers, in which they advertise, have gained a stronger hold in their respective localities than the city papers, while it is only in the city itself that the improved departmental stores are beginning to realize that, if growth is to be continued, they must stretch out and draw in more country trade. They have accordingly urged on the city press the necessity for extending their circulations in the smaller cities, towns and country. The press, it seems, has responded by raising advertising rates so that this purpose may be accomplished. Besides this, special offers are being made to country subscribers, by which, in one instance, a Toronto daily can be secured for from 80 cents to $1.00 per annum. Local merchants and the local press will, therefore, have to face two problems so related to each other that they become as one to every community. The merchants will have to meet the increased competition of the departmental stores, and the press the greater artivity of the city papers.

* * *

It becomes accordingly a necessity for merchants and publishers to get together and help each other. Publishers will have to improve their papers and build up their circulations so that local advertising will become more effective, and merchants, if they are to keep business, will have to go in for more extensive advertising. This is the most straightforward way for them to fight down the competition of the cities.

It is a poor policy to take chances upon disappointing customers. Nine out of every ten intelligent persons know just what they want when asking for certain brands. But give them something else than what is asked for, and there is an entering wedge to the loss of the customer's trade. The merchant had better keep in stock the articles which are extensively advertised, for they are the ones that are sure to be called for.—Progressive Advertiser.

A medium may bring a lot of replies and still be unprofitable.

Robbin Smith, two-storey and attic detached brick dwelling, Madison avenue, $3,800; G. T. Smith, interior alterations to dwelling, Sherbourne street, $1,200 Kenneth Cross & Co., three two-storey and attic attached brick dwellings, on Euclid avenue, $6,000; J. and T. Dempster, two-storey brick shed, Argyle street, $1,200.

SYDNEY, C B.

The mayor of Sydney, C.B., draws attention to the large number of building permits issued for the year. The number of permits for October is likely to exceed any previous month, and the amount invested in buildings in this town will amount to a total of three-quarters of a million dollars within the year.

OTTAWA'S PLUMBING BY-LAW.

The Ottawa Board of Health has put through the provisions of the plumbing by-law, and they will be sent on to the council. One by-law is to license and regulate plumbers, and the other to regulate the character and class of plumbing done in the city.

C.P.R.'S NEW WORKS AT FORT WILLIAM

The Canadian Pacific Railway is erecting several extensive buildings at Fort William, Ont. The largest of these is a machine shop, occupying a rectangle near the new round house, which is also in course of erection, and will be capable of accommodating quite a number of locomotives. A car-repair shop is to be built next year and a new flour shed will be at once commenced. The machine shop will be equipped with suitable machinery to enable repairs of any kind to be made at Fort William, to the cars or locomotives of the company.

NEW SEWAGE SYSTEM FOR TORONTO

The ratepayers of Toronto will be asked in January next to vote $2,385,000 for a new sewage system. The council has two different systems in view—the trunk system, at $1,750,000, and septic tanks and filtration on a sewage farm, $2,385,000—and have decided to ask the citizens to vote on the amount needed for the more expensive one, the council then to decide on which to put in operation.

PLUMBING AND HEATING CONTRACTS.

J. E. GRAY, Queen street east, Toronto, has the contract for the hot-water heating in G. H. Howland's residence on Roxborough ave.

The plumbing for C. Boeckh, Toronto, Junction, is being done by Fiddes & Hogarth, Toronto.

Guest & Co., Church street, Toronto, have a contract for the plumbing for J. H. Mullin, Jarvis street.

The John Ritchie Co., Limited, are installing the hot-water heating for Hugh Munro, South Drive, Rosedale.

Mashinter & Co., Toronto, are putting a new plumbing and heating system in E. Sullivan's hotel, King street.

The hot-water heating in Singer's new apartment house, John street, Toronto, is being put in by The Toronto Furnace Company.

Purdy & Mansell, Toronto, have the contract for the plumbing and hot-water heating for Mr. McTaggart's residence on Dovercourt Road.

Fiddes & Hogarth, Toronto, have the contract for the plumbing and heating for a pair of houses for R. D. Malcolm, South Drive, Rosedale.

W. J. McGuire & Co., King street west, Toronto, have the contract for the heating and plumbing for Mr. Johnston's house on Langdon Crescent.

The plumbing and hot-water heating in Mrs. Millichamp's two houses on Barton avenue, Toronto, is being put in by Fred Armstrong, Queen street west.

The Bennett & Wright Co., Limited, Toronto, are putting in hot-water heating in Geo. Watson's house on St. George street. There are 35 radiators to be used in this house.

HANDSOME SHOWROOMS.

The James Morrison Brass Manufacturing Company, Limited, Toronto, plumbers and engineers' supplies, have now handsome showrooms. They have recently fitted up and enlarged their rooms and have so arranged their large assortment of electric fixtures and lamps that light may be readily turned on them, producing a brilliant effect and showing off the place to advantage.

A representative of "Hardware and Metal" had the pleasure recently of viewing these rooms and admiring the large and varied stock af porcelain, enamel and

steel-clad baths, nickel-plated shower baths, lavatories of Tennessee and Italian marble, and porcelain enamel. They have on hand a big assortment of steam specialties, including steam gauges, water gauges, lubricators, valves, gongs and inspirators.

AN OLD-ESTABLISHED FIRM.

Fiddes & Hogarth, King street east, Toronto, are one of the oldest established plumbing houses in that city, having been in business for the past 25 years. They say that the past year was one of the best they have ever had, and their only difficulty is in securing competent men to do their work. That seems to be a general complaint among the plumbing trade.

A NEW FOUNDRY IN HAMILTON.

A. Hammond, of Indiana, manufacturer of all kinds of iron pipes for the plumbing trade, was in Hamilton this week looking for a site to build a new foundry. He was bought out by the trust in the United States and is now looking around for a suitable place to start business in Canada. It looks bright for Hamilton, as an architect is preparing an estimate of the cost of a foundry building for him.

PLUMBING NOTES.

Studdard, Sons & Co., of Winnipeg, are about to build a new warehouse. The new building will have a frontage of 91 feet on McDermot street and 135 feet on King street. The estimated cost is $26,000.

The Huntsville Lumber Company, of Huntsville, Ont., are about to erect a number of houses for the accommodation of their men employed at the former Brennen mill. The company are stocking both their mills very heavily and will find the dwellings a great accommodation.

BUILDING NOTES.

The building trade is just as busy now as it was at any time during the summer.

The Bennett & Wright Co., Limited, are making a great rush on their work at the King Edward Hotel.

A. E. Ames will erect a 15-storey building at the corner of King and Jordan streets, extending through to Melinda street.

The Toronto Brass Manufacturing Company are about to erect a five-storey factory on Lombard street, which will cost $30,000.

The Consumers' Gas Company, Toronto, has purchased the western wing of the old Court House on Adelaide street, for $11,000.

THE ANGLO-FRENCH CHINAMAN.

W. H. Evans, in Montreal Star.

Entering a laundry in Westmount a few days ago I noticed the "celestial" deeply interested in a "classic." I said:

"Gum Choo, what are you reading?"

"Learnee Flenchee."

"Learning French?"

"Yep."

"Who is teaching you?" I exclaimed.

"The San Fliscan Flyer."

"The St. Franciscan Friar?"

"Yes, the Fliscan Flyer at the biggee Jossee housee on Dolchester street, no bootee, lopee beltee (rope belt)."

"Well, Gum, how are you progressing?"

"Fline, pallee likee Loctor Dlummond's Labitant (Habitant). Avee vooee checkee po' la washee, chin chin, savee?"

"You are doing well. How do you amuse yourself?"

"Playee plingee plongee with Yow Yow in backee roomee. Comme ca?"

GLAD TO MEET HIM.

A welcome visitor to the Montreal office of HARDWARE AND METAL on Wednesday was Mr. W. C. Webster, of W. C. Webster & Son, hardware and crockery dealers, Coaticook, Que. Business conditions in that part of the Province have been of the best, says Mr. Webster, for the past year. In his own line trade has been and is now exceptionally lively.

As to Coaticook, it is progressing rapidly. Last spring Webster & Son erected three dwellings, which were occupied as soon as they were ready. Next spring they may build others. Their plumbing, painting, etc., was done from their own stock, a line of plumbers' supplies being a feature of the store.

The weekly visit of HARDWARE AND METAL to the store of W. C. Webster & Son is much appreciated by the employers and staff, said Mr. Webster. They have been readers of its pages for some time, and look forward every week to its arrival with a great deal of pleasure.

PERSONAL MENTION.

Mr. J. G. Lewis, of Lewis Bros., Montreal, was in Toronto last Saturday.

Mr. C. M. Robertson, of The James Robertson Co., Limited, Toronto, and Mr. A. McMichael, general manager of the company, have left for a trip through England, Ireland and Scotland. They sail direct to Glasgow, and will be away about eight weeks.

The many friends of Mr. Charles Donald will regret to learn of his death, which occurred at his home, Sylvania, Ohio. Deceased was a brother of Mr. Alexander Donald, of The B. Greening Wire Co., Hamilton, and at one time represented The Ontario Lead and Wire Co., of Toronto.

An important change has been made in The Hudson's Bay Co. Mr. George E. Sharpe, manager of the Calgary branch, has been appointed assistant general-manager, and Mr. J. G. Edgar, for some time bookkeeper at this branch, has been appointed manager of the Calgary branch. The employes of The Hudson's Bay Co. waited upon the retiring manager at Calgary recently and presented him with an address and a beautiful fur coat. The presentation was made by Mr. T. T. Bowes, the oldest employe in the store.

1,750,000,000

Taking the number of boxes of "C" brand Horse Nails we have sold since we commenced their manufacture in 1865 or thirty-seven years ago: we calculate that the total number of Nails we have made (taking the average size No. 8) to be one billion, seven hundred and fifty millions.

Now that output constitutes a pretty fair experience in the manufacture of Horse Nails. The buyer of the "C" brand gets the benefit of our experience in purchasing from us. He has the assurance that the Nail which has maintained its hold upon the Canadian market for thirty-seven years must have merit to back it up. And it is simply because of their superior merits that they are more largely sold than any other brand of Horse Nails made or sold in Canada, or for that matter as many as any other two Makers in Canada.

All our competitors claim their Nails are "just as good" of course. But:—there's the supreme test. Why can they not sell their productions on even terms with ours? Why do they have to undersell in the open market? The truth must be told. They don't value their goods as being equal to our "C" brand and so have to sell them for what they are worth, and that is for less money than ours. We put the best material known or used in the world for making a Horse Nail into our "C" brand. Money cannot purchase in Sweden anything better. We forge our nails from the solid rod while at a white heat, and complete the finishing process by machinery used nowhere else on this continent. All our Nails are finally subjected to a careful hand sorting and we warrant our "C" brand, as the result, to be absolutely free from imperfections, and shall replace any found otherwise, without cost to the purchaser.

Remember that to effect a saving of one cent on the 32 nails required for a full set of shoes, you would have to purchase Horse Nails at seventy-five cents a box less than the price for our "C" brand. You will find them to prove the most economical in the long run and to retain your farrier trade.

We will appreciate your preference in ordering, to state that you want the "C" brand made by the

CANADA HORSE NAIL COMPANY,
MONTREAL.

HOW SCHWAB ROSE TO FAME AND FORTUNE.

CHARLES M. SCHWAB, who, at the age of 39, was chosen President of the United States Steel Corporation, the greatest commercial organization in the world, and who receives $250,000 a year, probably the largest salary in the world, was born in Williamsburg, Pa., February 18, 1862, and consequently is now nearly 41 years old.

When he was 10 years old his father, who had been in the woollen manufacturing business in Williamsburg, moved to Loretto, Pa., and established a livery business. Young Charles did considerable stage driving for his father, attended for three months each winter the Loretto country school, where he early displayed a great love for mathematics, and after two years went to St. Francis' College, where for four years he stood at the head of his class.

Just seven years after he entered the Carnegie concern he was sent as chief engineer to rebuild the great Homestead steel plant.

In 1887 he became superintendent of the Homestead works, and five years later, in consequence of the tragic death of his friend, W. R. Jones, he was made general superintendent of the Thomson works. He subsequently built the great steel rail mill and practically rebuilt the entire plant, receiving at this time a salary of $35,000 a year.

Several years before his advancement became a matter of course, Mr. Jones once answered the query as to who would succeed him as the head of the Edgar Thomson works by saying, "The young engineer Schwab is the only man thoroughly fitted for the place."

After his fatal accident there were 21 applications for Mr. Jones' position. Mr. Schwab did not apply, and was surprised to receive a letter from the officers of the Carnegie works appointing him superintendent, a great honor for a man so young.

During the Homestead strike, after the strikers had been out two months and there was no prospect of an early settlement, Mr. Schwab went to the Homestead works and, on account of the great fondness of the men for him, in three weeks, through his individual efforts, the strike was declared off. At that time he directed both the Edgar Thomson works and the Homestead works from Homestead.

When Mr. Carnegie sold out his interest in the Carnegie company to the United States Steel Corporation he stipulated that Mr. Schwab must be made president. He is now a multimillionaire and is very generous in his charitable work.

Seven hundred tons of steel rails per day are being turned out by the mills of the Algoma Steel Co., Sault Ste. Marie, Ont. The two blast furnaces of the company are nearing completion.

NO. 22.

No. 33 (double blade) is similar in construction and finish.

Something New!

THIS is an entirely new style of mincing knife of our own design. The shank is a flat tinned steel band, drawn tightly into a groove encircling the handle, the blade being riveted between the ends. This construction does away with any hole in the handle, which consequently cannot split or come loose. The handle itself is stained and shellacked, the whole making the neatest and strongest mincing knife ever put on the market.

MADE ONLY BY

The P. R. Cumming Manufacturing Co., Limited, Toronto.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

MARTIN KLEEN, harnessmaker, of Ottawa, has assigned to C. S. Borbridge, and his creditors held a meeting on October 29.

Adrien Barrette, general merchant, St. Tite, Que., is offering to compromise.

The assignee is in possession of the premises of Barker & Co., general merchants, MacLeod, N.W.T.

J. D. Lalonde & Co., general merchants, St. Benoit, Que., have assigned to Lamarche & Benoit.

Joseph Boucher, general merchant and blacksmith, St. Adrien, Que., has assigned to Chartrand & Turgeon.

V. E. Paradis has been appointed curator to the vacant estate of J. Pineau & Co., general merchants, Bic, Que.

A consent of the assignment of Henderson & Lovelace, coal dealers, Montreal, has been filed ; John P. Kavanagh is provisional guardian.

PARTNERSHIPS FORMED AND DISSOLVED.

Aumond & Caty, sash and door factory, Montreal, have dissolved.

Govier & Campbell, blacksmiths, West Lorne, Ont., have dissalved.

Fisher & Malone, general merchants, Cochrane, N.W.T., have dissolved.

McKim & Duxbury, agricultural implement agents, Elkhorn, Man., have dissolved.

Robinson & Baker, blacksmiths and implement agents, Dresden, Ont., are about dissolving.

Caswell & Murphy, hardware merchants, Straffordsville, Ont., have dissolved ; Caswell continues.

Wm. McNairnie, planing mill owner, of Wallaceburg, Ont., has admitted J. C. Shaw as a partner.

Carscallen Bros., hardware merchants, Dresden, Ont., have dissolved ; J. B. Carscallen continues.

Trapisener & Boissmeau, blacksmiths, Ruscom Station, Ont., have dissolved ; Trapisener continues.

SALES MADE AND PENDING.

John D. Renaud, blacksmith, of Perce, Ont., has sold out.

The assets of Geo. Simser, contractor, South Indian, Ont., are to be sold.

John Sharpe, hardware merchant, Elva, Man., has sold his blacksmith shop.

A. R. Lusker, blacksmith, Feversham, Ont., is advertising his business for sale.

Alexander Kyles, blacksmith and implement agent, Whitewood, N.W.T., is succeeded by Kyles Bros.

W. H. Parsons & Co., hardware merchants, Edmonton, N.W.T., have sold out to John Somerville & Son.

The offer of G. Pommerleau, general merchant, Beauce Junction, Que., to compromise at 25c on the dollar has been refused.

FIRES.

The sawmill of J. & T. Jardine, lumber merchants, Rexton, N.B., was burned.

The premises of J. M. Smyth, bicycles, etc., Montreal, were damaged by fire ; insured.

Coulter & Campbell, brass and copper works, Toronto, had a fire in their copper shop ; the loss is covered by insurance.

DEATHS.

John W. Fisher, roofer, St. John, N.B., is dead.

HARDWAREMEN DISCUSS PRICES.

THE regular monthly meeting of the Hardware Section of the Retail Merchants' Association of Canada was held in their board room, Medical Building, Bay and Richmond streets, Toronto, on Thursday evening, October 23, 1902, John Caslor presiding, in the absence of the chairman, E. R. Rogers, who was unavoidably absent through an accident which occurred to him some days previous.

Over 50 communications were read from various hardware merchants throughout the counties of York, Wentworth, Halton, Waterloo, etc., all expressing their entire sympathy with the work of the Association and all unanimous that the price on certain lines of goods will have to be changed. Thirty-five new members were added to the roll, and the general secretary has been instructed to write those who have not yet sent in their replies, asking them to do so, that the Association will be able to judge and obtain a full expression of opinion from the retail trade before having a consultation with the wholesalers and manufacturers.

G. J. St. Leger, the president of the Dominion board, was present, and paid an official visit to the section, and complimented them upon the energy that they put into their section and hoped that they would accomplish much practical work for the good of the members. He referred to the coming convention in February, which will be held in Hamilton, and hoped that the hardwaremen would be well represented there.

The stction decided to make every effort to assist the general executive board to make the coming concert in Massey Hall a success, as the proceeds will be for the general good of the Association.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**
